UNDER the powers conferred upon him by section 51, clause (1) of Act VI of 1884 (the Inland Steam-vessels Act), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the carriage of passengers in inland steam-vessels:—

The master of any inland steam-vessel may refuse to receive on board thereof any person who, by reason of drunkenness or otherwise, is in such a state, or misconducts himself in such a manner, as to cause annoyance to other passengers on board, or, if such person is on board, may put him on shore at any convenient place; and no person so refused admittance or put on shore shall be entitled to the return of any fare he may have paid.

The following offenders, that is to say—

(1) Any person who, being drunken or disorderly, has been on that account refused admission into any duly surveyed inland steam-vessel by the owner or any person in his employ, and who, after having had the amount of his fare (if he has paid the same) returned or rendered to him, nevertheless persists in attempting to enter such steamer;

(2) Any person who, being drunken or disorderly on board any such steamer, is requested by the owner or any person in his employ to leave the same at any place at which he can conveniently so do, and who, having had the amount of his fare (if he has paid the same) returned or tendered to him, refuses to comply with such request;

(3) Any person on board any such steamer who, after warning by the master or any other officer of the steamer, molests or continues to molest any passenger;

(4) Any person who, after having been refused admission into any such steamer by the owner or any person in his employ on account of such steamer being full, and who after having had the full amount of his fare (if he has paid the same) returned or tendered to him, nevertheless persists in attempting to enter the same;

(5) Any person having got on board any such steamer, who upon being requested on the like account by the owner or any person in his employ to leave such steamer before the same has quitted the place at which such person got on board, and who, upon having the full amount of his fare (if he has paid the same) returned or tendered to him, refuses to comply with such request;

(6) Any person who travels or attempts to travel in any such steamer without having previously paid his fare, and with intent to avoid payment thereof;

(7) Any person who, having paid his fare for a certain distance, knowingly and wilfully proceeds in any such steamer beyond such distance without previously paying the additional fare for the additional distance, and with intent to avoid payment thereof;

(8) Any person who knowingly and wilfully refuses or neglects, on arriving at the point to which he has paid his fare, to quit any such steamer; and

(9) Any person on board any such steamer who does not, when required by the master or other officer of such steamer, either pay his fare or exhibit such ticket or other receipt (if any) showing the payment of his fare as is usually given to persons travelling by and paying their fare for such steamer

shall, for every such offence, be liable on conviction before a Magistrate to a penalty not exceeding Rs. 20; but such liability shall not prejudice the recovery of any fare payable by him.

NOTICE.

The 6th November 1885.—The following draft of Rules, which it is proposed to issue under section 24 of Act VII of 1884, is published for general information. The Rules will be taken into consideration on the expiry of a month from the date of the first publication of the Rules in the *Calcutta Gazette*. The Lieutenant-Governor will receive and consider any objection or suggestion which may be made by any person with respect to the Rules before the period specified above.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

UNDER the powers conferred upon him by section 24 of Act VII of 1884 (the Indian Steam-Ships Act), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor has been pleased to make the following rules for the survey of steam-ships :—

Time and place of surveys.

1. Surveys shall be made at the Port of Calcutta upon due notice or application from the owner, on any day in the year, with the exception of Sundays and Government holidays, by the Surveyor to the Port Commissioners. Certificates of survey shall be given in the form hereunto annexed by the Vice-Chairman to the Port Commissioners, on payment of the fee specified in the schedule to the Act.

Surveyors' duties.

2. The Surveyors will be guided by the rules hereunto annexed in making their survey. In cases where two Surveyors are employed, the Engineer-Surveyor will survey the engines, boilers, and all the machinery required to be surveyed under the Act. The Ship-wright Surveyor will inspect the hull equipments and passenger accommodation, measure and determine the number of passengers the vessel is fit to carry, and see that the certificates of the master, mates, and engineers are such as is required by the Act, also that the lights and fog signals are in accordance with the regulations for the prevention of collisions at sea.

Notice of survey to be given.

3. Owners of steam vessels requiring survey are to give the Surveyor at least three days' notice in writing when a survey is required, and should such notice fail to be given, he (the Surveyor) is not responsible for any delay or inconvenience which may occur in consequence.

Particulars to be given in notice.

4. This notice (which is to be preserved by the Surveyor) must state explicitly the name of the steamer to be surveyed, and the time when, and place at which, she will be ready for inspection.

Surveyors to attend at appointed time.

5. In order to prevent inconvenience and delay to the owners, the Surveyors are to be careful to be in attendance at the appointed time and place. Should they be unable to attend as required, notice should be given to the owners to that effect.

Survey if deferred.

6. Should a steamer not be ready for inspection at the time arranged, the Surveyors may make such arrangements for the subsequent survey as may be convenient to the owner or his agent. All expenses arising out of this postponement will be charged against the owner when the certificate is issued.

SURVEYORS' DECLARATIONS.

Surveyors' declarations.

7. The Surveyor's declaration under section 11 of the Act shall be made in the form hereunto annexed. The particulars required to be given in the declaration for a certificate of survey are the following, which are treated of under separate heads :—

(1.) That the hull of the ship is sufficient for the service intended, and in good condition.

(2.) That the boats, life-buoys, lights, signals, compasses, and shelter for deck passengers, and the certificates of the master, and mate or mates, engineer or engineers, or engine-driver are such and in such condition as required by any law for the time being in force.

(3.) The time (if less than 12 months) for which the said hull and equipments will be sufficient.

(4.) The limits (if any) beyond which, as regards the hull and equipments, the ship is in the Surveyor's judgment not fit to ply.

(5.) The number of passengers which the ship is, in the Surveyor's judgment, fit to carry, distinguishing if necessary between the respective numbers to be carried on deck, and in the cabins and in different parts of the deck and cabins, such numbers to be subject to such conditions and variations according to the time of the year, the nature of the voyage, the cargo carried, and other circumstances as the case requires.

The declarations of the Surveyor as to the boilers and machinery is to contain a statement of the following particulars:—

(1.) That the machinery of the ship is sufficient for the service intended, and is in good condition.

(2.) The time (12 months or less) for which such machinery will be sufficient.

(3.) That the safety valves and fire hose are such, and in such condition, as are required by the Act, and the rules framed thereunder.

(4.) The limits of the weight to be placed on the safety valves.

(5.) The limits (if any) beyond which as regards the machinery, the ship is, in the Surveyor's judgment, not fit to ply.

When a Surveyor is, from any reason whatever, unable to complete his declaration, an incomplete declaration should be sent to those who applied for survey as soon as possible, stating in it the reasons for not being able to fill up all the particulars under the various heading. He must take care to obliterate all the items in this declaration that he is unable to certify to as being in accordance with the Acts and regulations.

Surveyors may go on board ships.

8. Surveyors may go on board any ship at any reasonable time for the purpose of inspecting, either the certificates of the master, mates, or engineers, or the vessel, the machinery, the boats, other equipments, or for any other purpose rendered necessary by the Acts; and the owners, masters, mates, and engineers of steam-ships are required by the Act to give to the Surveyors, on being requested so to do, all such information and assistance within their power as may be requisite for the purpose of making the returns required by the Acts. In the performance of this part of their duties, Surveyors are to be careful to avoid impeding the duty of the vessel, or wilfully giving offence to any of the officers. If they should be hindered or vexatiously obstructed by any person in the performance of their duties, they should by no means mark it by personal resentment, but should communicate the facts without delay to the proper authorities, by whom the case will be taken up, if necessary.

Inspection to be made in the presence of owner, agent, or responsible person.

9. Surveyors should, if possible, make their inspections when the agent, master, or chief mate, and engineer of the vessel are present. Repairs can then be required, and defects can be pointed out to the proper persons without incurring the uncertainty and delay attendant upon messages delivered to the subordinate officers. If the owners do not regard the survey, as being of sufficient importance to instruct a responsible representative to be present, the Surveyors will of course make the survey in his absence.

Statement of repairs required to be given by Surveyors.

10. In order to prevent mistakes as to the nature and extent of repairs required by the Surveyors, whenever they cannot give a declaration until repairs are effected or alterations made, a written statement of the nature and extent of the defects to be remedied or alterations required should in all cases be given to the owner or agent, whether applied for by him or not. A copy of the above should always be taken in the office Press Letter Book. If any difference of opinion arises between the Surveyors and the owners, manufacturers, or others, or any questions are raised, the facts should at once be reported.

Declaration not to be given without great caution.

11. Surveyors are in no case to give a declaration either for the hull, machinery, boilers, or equipments of a steamer unless they are satisfied that all the requirements of the law have been complied with.

It is the duty of the Surveyor to satisfy himself personally regarding every detail of the survey of a vessel, and not to trust to any certificate or other document given by any person not responsible to the Government. This instruction does not of course apply to certificates of compass adjustment.

Short declaration when to be granted.

12. In any case in which the Surveyor has reason to believe that the hull, machinery, boilers, or equipments are not fit for so long a time as the owner has applied for, he is to grant his declaration for such shorter period as he may deem expedient, informing the owners, if necessary, of his reasons for so doing. Unless it is the docking time only that limits his declaration, or the latest date for which an excursion certificate can be granted in accordance with the regulations, he is not to grant a declaration for sea-going steamers for less than a period of three months. In such cases, also in cases in which the Surveyor refuses a declaration altogether, he is to give a statement in writing of the repairs he considers necessary to enable him to grant a declaration for the time asked. By this paragraph the Surveyor is to understand that a sea-going steam ship that is not fit for a declaration for three months is not to be deemed by him as fit to hold a certificate at all.

Surveyor to complete survey where possible, but to sign only for details surveyed. Declarations to be in such form as the Government may direct.

13. It is most desirable that a Surveyor should complete the survey of a vessel in every detail when he has commenced it, and if possible, arrangements should always be made to secure this. In exceptional cases, however, when this cannot be arranged, one or more Surveyors should complete the parts of the survey left unfinished. The Surveyor who commenced the survey should not sign a declaration for any details which he has not surveyed, and for which consequently he is not prepared to hold himself personally responsible. He can only relieve himself from entire responsibility for every detail by distinctly noting on his declaration that he has been unable to attend to certain details specified by him, and in respect only of the details so specified will his claim to irresponsibility be accepted. The Surveyor or Surveyors who attend to the details of the survey which have been left unfinished should also give declarations for the particulars they have attended to. The supplementary declaration should be attached to the main declaration.

Refusal of declaratio be notified.

14. A report should be made to the Local Government of the name, port of registry, and official number of all vessels for which declarations are refused. This should be done as soon as possible after the vessel is withdrawn from survey, and full reasons for the refusal should be given. A declaration for twelve months should not be granted whenever the Surveyor has any doubt whatever as to the efficiency of any part of the vessel, or her machinery, or equipments for such period.

The object of rule 14 is to enable the Local Government to communicate to other Local Governments notice that declarations have been refused to such vessels.

EXAMINATION OF HULL, &c.

Hulls to be examined.

15. Surveyors are to determine whether the hulls of sea-going vessels are in good condition and fit for the service for which they are intended; and they are to examine the hulls of such vessels outside and inside once at least in every year, at such time as is most convenient to the owners.

Owner should give notice when a vessel is in dry dock.

16. Delays and inconvenience may to a great extent be prevented if notice is given by owners when a vessel, which requires a certificate, is undergoing repairs, or is in dry dock for any other purpose, as this notice might obviate the occasional necessity of re-docking a vessel at an inconvenient time. Surveyors should explain this to owners or their agents whenever an opportunity occurs.

New ships to be surveyed before being painted or cemented.

17. The Government cannot regard as a satisfactory survey of a new steam ship a survey made only after the hull is complete, and is cemented and painted. Surveyors are therefore instructed to decline to grant declarations for any new steamer, unless they inspected her before she was painted or cemented. Any survey made while the vessel is being built is not to interfere with the complete inspection afterwards, but is to be made solely with a view of enabling the Surveyors to form an opinion of the workmanship, material, and construction.

The bottoms of new vessels need not be examined in dry dock after launching, if they have been examined by the Surveyor before launching, unless he has special reasons for considering it necessary.

Water-tight collision bulkheads and water-tight compartment round stern tube of screw shaft. Other bulkheads.

18. A collision water-tight bulkhead, also an after water-tight compartment to cover the stern tube to the screw shaft, must be fitted in all sea-going steamers, both new and old. As regards other bulkheads, the Surveyors should not refuse to grant a declaration upon the ground that they are not fitted, or are defective, unless they are of opinion that the want of, or the defective state of, the bulkheads renders the ship unseaworthy.

As to screw tunnels.

19. It is necessary that the screw tunnels of all iron passenger steam vessels should be made of iron, and should be strongly constructed and water-tight, with a stuffing-box round the shaft at the forward end. If there are manholes or openings in the floor, care must be taken that all are efficiently fitted with covers or doors, so arranged that they can easily and rapidly be made water-tight. If means are provided for entering the tunnel by a separate opening abaft the engine-room bulkhead, the passage down from the upper deck must be strongly constructed of iron, perfectly secure, and water-tight. In some cases the inside of an iron mast serves for this purpose. Cocks, or valves, and pipes must be fitted to let the water off the floor of the tunnel, and must be made to open or shut from the upper or main deck. If there is an opening through the engine-room bulkhead into the tunnel, a properly constructed water-tight door should be fitted to it, arrangements being made that it can be easily opened or shut from the upper or main-deck. In vessels which have already received Surveyor's certificates, this regulation need not be enforced if there be an effective arrangement of water-tight bulkheads, decks, floors, and stuffing-boxes, which will so confine any water entering the ship from the aftermost stuffing-box as to prevent it from finding its way into the ship in such quantity as will interfere with her safety.

Examination of the bottom outside.

20. In no case should a Surveyor grant a declaration for a steamer the outside of the bottom of which has not been examined by a Surveyor during the twelve months preceding the date of survey, and in no case should a declaration be granted for a longer period than a period terminating within twelve months

from the date of the last outside examination. For instance, if a steamer be examined outside on the 1st of January, she will (if the law be complied with) be entitled to a certificate for twelve months (*i.e.*, until the 1st of January following). But supposing the survey is not completed until the 1st of February, the Surveyor is (if the vessel be fit) to grant his declaration for a period ending the 1st of January following and no longer, unless the vessel be re-docked for examination.

Examination of bottom to be made before painted. Cocks, &c., to be examined in dry dock.

21. The Surveyors, before granting a declaration for twelve months, should be careful to make a thorough examination of the outside of the bottom of the ship in a dry dock, after it has been cleaned. They should examine the pintles and braces of the rudder, as well as the bearings of the screw shaft and the different openings, valves, bolt-heads, &c., in the ship's bottom. All bolts, connecting cocks, valves, or pipes to the skin of the ship should have the heads outside, and such heads should be either countersunk or cupheaded. All discharge valves and sea-cocks should be taken out for examination while the vessel is in dry dock. Before Surveyors finally pass the hull of a vessel they are to see it fit to go into the water.

Ceiling to be removed as Surveyor thinks necessary.

22. For examining the internal parts of the ship, they should have parts of the ceiling removed, in order that they may ascertain the condition of the ship; they should also carefully examine the cement to ascertain its condition, and where they find it cracked or doubtful, they should extend their examination, and cause such a portion of the cement to be removed as may, in their judgment, be necessary to enable them to form a correct opinion as to the state of the ship covered by the cement. The roses for the deck pumps, also those for the bilge pumps, should be taken out of the bilges and cleaned, and the sluices and cocks on the bulkheads inspected and put in good working order.

Examination of vessel in engine-room, coal bunkers, &c.

23. The Surveyors should examine very particularly the plating, stringers, frames, floors, &c., in the engine-room, boiler space, and coal bunkers, the bunkers of course being empty

Entries in office book.

24. The date of the last outside inspection of the bottom is to be entered in the declaration, as it is from that date that the docking time is to count. If the hull is not passed at all, or not passed for the maximum time (twelve months), the fact should be noted in the declaration for the vessel. The repairs which have been executed from time to time should be recorded in the office book.

As to coamings skylights, scuppers, ports, gratings, &c.

25. The height of the coamings round all openings in the main deck, and the means provided for securely protecting or fastening down all skylights, bunker openings, &c., as well as the sufficiency of the water, ports and scuppers for relieving the decks of water, are important items to be noted by the Surveyors in sea-going vessels coming under their survey. All side-lights should be fitted with deadlights, and all stern and other ports fitted in such a manner that they can be quickly and efficiently secured. All openings below the weather-deck in sea-going steam and sailing vessels carrying passengers or emigrants, whether such weather-deck be a poop, awning-deck, spar-deck, or forecastle, must be fitted with gratings or hatch covers, and tarpaulins, and also with means for effectually securing the tarpaulins down, and making the openings water-tight. Such gratings or hatch covers must be kept and secured in a suitable place, at all times accessible and near to the openings for which they are intended. Many casualties happen through the engine-room skylights, coamings, companions, &c., being of light construction and insufficiently secured, instead of being of sufficient strength to form permanent parts of the

structure of the ship; casualties also arise through the fronts of poops and bridge-houses being weak and insufficiently secured. The fore and aft beams or "strong backs," in the hatchways and the hatches themselves are often too weak to bear the pressure of water which may find its way on to them in a heavy sea. The Surveyors should in granting declarations for passenger steamers look especially to these points, and should in like manner, in the case of ships other than passenger steamers, look to these amongst other points when reporting a ship for detention as unsafe.

BOATS AND LIFE-BUOYS.

Dimensions of boats.

26. It will be the duty of the Surveyor to take care that all steam ships are provided with the boats or rafts required by the law for the time being in force, both as to number and cubic contents; and to see that they are efficient, and in good order and ready for service, subject to the rules contained in these instructions. Surveyors are not to insist upon the precise lengths, breadths, and depths inserted in the table, but are to approve of any efficient boats of sufficient strength, the cubic contents of which are respectively equal to, or greater than, the cubic contents of the boats specified in the table laid down in rule.

If the smaller number of boats required by the law for the time being in force is carried, one of them must be a launch of at least the capacity named in column 2 of the said table.

If the larger number of boats is carried, the cubic contents (equal in their aggregate to the cubic contents required by law) may be spread in any way over the whole number of boats.

Rule for ascertaining the capacity of boats.

27. To ascertain the cubic capacity of a boat. Measure the length and breadth outside and the depth inside. Multiply them together and by ·6; the product is the capacity of the boat in cubic feet. Thus, a boat 28 feet long, 8 ft 6 ins. broad, and 3 ft. 6 ins. deep will be regarded as having a capacity of $28 \times 8{\cdot}5 \times 3{\cdot}5 \times {\cdot}6 = 499{\cdot}8$, or 500 cubic feet. If the oars are pulled in rowlocks the bottom of the rowlock is to be considered the gunwale of the boat for ascertaining her depth.

As to life-boats.

28. A life-boat, fitted with efficient and substantial air casings, is deemed to be capable of carrying one adult for every 10 cubic feet of her capacity. Thus a life-boat measuring $28 \times 8{\cdot}5 \times 3{\cdot}5$, whose cubic contents by the present rule are 500 cubic feet, is deemed to be sufficient for 50 adult persons. The space in the boat must be sufficient for the seating of the persons carried in it, and for the proper use of the oars.

Air cases.

29. No boat should be passed as a life-boat unless she has for every person she carries, or, what is the same thing, for every 10 cubic feet computed as above, at least one and a half cubic feet of strong and serviceable inclosed air-tight compartments, so constructed, fitted, and arranged that water cannot find its way into them. That is to say, the life-boat measuring $28 \times 8{\cdot}5 \times 3{\cdot}5$, whose whole cubic contents are 500 cubic feet, and which is deemed to be sufficient for 50 adults, is to have 75 cubic feet occupied by inclosed air cases.

Zinc is not permitted in the construction of a life-boat or her air cases, neither is copper to be used if the boat is built of iron.

If the boat is built of wood, copper of a good substance is of course a good material for the air cases, but the Surveyor should not insist upon it being employed; if used he should see that it is not too thin, as cases have occurred in which air cases have been

made of sheet copper not much thicker than tin foil, and the fraud has escaped detection at the time.

If the air cases are made of galvanised iron care should be taken that the galvanising is well done, as otherwise it is nearly as bad as zinc.

The air-tight compartments or cases must be so distributed as to give the boat good buoyancy and stability, whether a part of the air cases should be under thwarts, or whether they should be all in the ends, or along the sides, will, so long as an efficient life-boat is obtained, be left to the option of the owner. If air cases are in the bottom of the boat, the depth of the boat is to be measured from the top of the bottom air cases. It is desirable that the coverings in the boats over the air cases be secured with screws or otherwise so as to enable the cases to be removed without difficulty for examination.

Spaces filled with or containing any material are not to be deemed air spaces.

No boat fitted with a steam-engine is to be passed as a life-boat.

No life-boat other than a metal one should be passed if carried sufficiently near the funnel as to be injuriously affected by the heat therefrom.

30. Life-boats should be built whale-boat fashion, both ends alike. They should have a sheer of about three-quarters of an inch to a foot, rising equally from the midships to the stem and stern, and they should be made buoyant in accordance with the preceding instructions. A square-sterned boat is not to be passed as a life-boat, and, excepting in small boats, the oars should be double-banked. Build.

31. In sea-going vessels a boat's compass must be supplied for each of the life-boats required. Compasses.

32. As regards requisites for use. All boats should be hung in davits and kept ready for service at any moment. The Surveyors should see that in all boats the full complement of oars, including steering oar and two spare oars at least, are provided (in large boats more than two spare oars ought to be provided); that each boat has two plugs for each plughole, attached with lanyards or chains, and one set and a half of thole pins or crutches attached to the boat by sound lanyards; a bailer, a rudder and tiller, or yoke and yoke lines; a painter of sufficient length, and a boat hook, the rudder and bailer to be attached to the boat by sufficiently long lanyards, and kept ready for use. Means for speedily detaching the boats from the lower blocks of the davit tackles should be insisted upon; an ordinary fixed hook in the lower block shipping into a fixed eye in the boat should not be allowed. Surveyors should also see that the davits are strong enough, that they are so spaced that the boats can be swung out without unnecessary labour, that the boats' chocks can be expeditiously removed, and that the boats will not foul the ship's side in lowering when the ship has no list, and that the whole of the tackling, including davits, falls, blocks, eye-bolts, and rings, &c., is of sufficient strength to lower the boat, with its full complement on board, into the water. The boat's falls must be long enough to lower the boat into the water when the vessel is light. Life-lines should be fitted to the davits long enough to reach the water, when the vessel is light, and allowance made for the extreme roll of the ship. Boats to be hung in davits. Requisites for use in boats. Lowering gear

Surveyors are to refuse declarations in cases in which the foregoing instructions are not fully carried out, but it is to be left to shipowners themselves to provide such methods as they please for lowering the boats, so long as the intention of the Legislature is complied with.

All the boats should be seen lowered into the water at every survey.

Equipments of life-boats.

33. In the case of life-boats, the Surveyor should see that the hatchet or tomahawk, which is to be kept in each end of each life-boat, is in good order, and attached with a lanyard, and that a mast or masts, with at least one good sail and proper gear for each, and a life-jacket or life-belt for each oarsman and one for the coxswain is also provided; a life-line in loops should run round the outside of the boat and be securely made fast.

Life-jackets standard of.

34. No life-jacket or belt should be passed that is not capable of floating in the water for 24 hours with 28 lb of iron suspended from it; and to ensure this buoyancy a life-jacket, in which the cork must be exposed and have a canvas back and straps only, should weigh 5 lb when dry.

Life-buoys, standard of.

35. As regards life-buoys. No life-buoy stuffed with rushes or with cork shavings or other shavings, or granulated cork, or any loose material should be passed. All cork life-buoys should be built of solid cork and fitted with life-lines and loops securely seized to the life-buoy, and none should be passed that will not float for 24 hours in water with 32 lb of iron suspended from them. If life-buoys are not made of solid cork, then any other strong life-buoy of an approved pattern may be passed that is capable of floating in the water for 24 hours with 40 lb of iron suspended from it. No contrivance is to be passed as a life-buoy that requires inflation before use. Life-buoys with lines attached should be secured by a toggle and becket, or any other similar method, so that they can be quickly released; they must not be lashed nor seized to the rail or any other part of the vessel, but must be kept so as to be ready for use at a moment's notice in case of an emergency.

Life-buoys should in all cases be carefully examined by the Surveyor, who will satisfy himself of the buoyancy, and see that the materials of which they are composed have not become sodden, and that the lines attached to them are sufficient. Surveyors are to call the attention of owners and masters to the penalties imposed for not keeping the boats and efficient life-buoys in constant readiness for use.

Steam-launches.

36. As regards steam-launches or boats fitted with steam power, the contents taken up in the boat by the engine and boiler are not to be deemed part of the clear contents of the boat. The boilers of steam-launches should, as regards fittings and strength, comply with the same regulations as the main boilers. As regards the safety valves fitted to the boilers of steam-launches, and of other boats carried by sea-going steamers, the Surveyors should see that they are out of the control of the engineer when steam is up, and comply with the same rules as the safety valves on the main boilers. The lifting or easing gear for the valve should actually lift the valve and not merely the weight. The boilers should also have a steam-gauge, a glass water-gauge, and test cocks.

As to boats already passed.

37. In carrying these instructions into effect, Surveyors are to be careful not to interfere unduly with life-boats passed before April 1884, provided their buoyancy and efficiency are equal or nearly equal to that indicated above; but in the case of new boats coming under survey for the first time, as well as in all cases in which the fittings of the boats require renewal, the rules contained in these instructions are to be strictly adhered to, whilst the Surveyors are to be careful not to interfere so as to condemn apparatus that may have been already passed, and that still remains efficient.

38. Table of the dimensions of boats required to be carried by passenger steamers under the Merchant Shipping Act.

Number of tons registered.	Either					Or				
	Number of boats.	Dimensions. Length.	Breadth.	Depth.	Factor.	Cubic contents.	Number of boats.	Dimensions. Length.	Breadth.	Depth.	Factor.	Cubic contents.

	If the number of boats in this column are carried, one of them must be a launch of at least the capacity named.						If the number of boats in this column are carried, their cubic contents (equal in the aggregate to the cubic contents required) may be spread in any way over the whole number of boats. The life-boat or life-boats must be the largest boats.					

38a. Before granting a declaration or certificate of survey for a steam vessel, where the boilers and machinery are in charge of a native driver, the Surveyor should require the production of a certificate either from the Superintending Engineer or from some respectable engineering firm, to the effect that the pressure guages on the boiler or boilers have been overhauled and adjusted and are in proper order.

MISCELLANEOUS.

Sail power.

39. As a general rule, if sea going steamers are fitted with sufficient sail power to enable them to work as sailing vessels in the event of their machinery becoming disabled, no question need be raised. They should of course be provided with sufficient spare sails to be kept on board. All the sails must be examined by the Surveyors, who must at every survey be perfectly satisfied with their efficiency, as also with that of the standing and running gear.

Compasses to be adjusted to Surveyor's satisfaction.

40. The compasses of every sea-going steam ship employed to carry passengers must be properly adjusted from time to time; such adjustment, in the case of ships surveyed as herein mentioned, to be made to the satisfaction of the Surveyor, and according to such regulations as may be issued by the Government.

The Surveyor should satisfy himself as to the proficiency of the person whose signature is attached to the adjustment certificate in question.

Standard compass.

41. Every foreign-going iron or composite built ship should have a standard compass fitted with the means of taking accurate bearings, and a table of errors for this compass should be furnished by the master.

Certificate of master and mate to be taken in certain cases.

42. In other cases the Surveyor should act as follows, viz.—

The Surveyor should, before he grants his declaration, receive a certificate from the owners to the following effect, viz.—"We the undersigned hereby certify that the compasses of the steamer (*name of steamer*) are in all respects to our satisfaction. We know the errors and can apply them."

Dated at

this day of 18

_____ Master

_____ Mate.

"We hereby attest the above signatures and certify that the said (*master's name* sailed as master and that the said (*mate's name*) sailed as mate of the said vessel on her last voyage, ending 18 .

_____ Owners

This certificate, which must be attested by the owners, must be signed by the master and mate, one of whom at least must have made the previous, and is going to make the next voyage in the vessel.

Deck pump to be fitted.

43. There must be for each compartment a pump of sufficient size, which can be worked from the upper deck. A rose or perforated box of sufficient size should be fitted at the end of the suction pipe of each pump, and means provided for clearing the end of the suction pipe. A trunk-way leading from the upper deck to the suction of each pump, large enough for a man to go down to the end of the suction pipe, is the best arrangement for this purpose.

It is very desirable that the steam winches (if any) be so fitted and arranged that the deck pumps can be worked by them as well as by hand.

Deck pumps, when not worked by machinery, should have handles at least long enough for two men to work at them.

Sounding pipes, &c.

44. There must be fitted at the bottom of each bulkhead means for ascertaining the depth of water in each compartment.

Engine-room pumps.

45. Pipes connected with pumps worked by the engines are to be carried through the bulkheads into the compartments fore and aft of the engine-room, so that each compartment can be pumped out separately by the engines as well as by the deck pump. The pipes should be well secured where they pass through the bulkheads, and it is very desirable that cocks or valves be fitted between these suction pipes and the bulkheads, to be capable of being opened or shut from the upper or main deck.

Pumps not necessary in fore peak, &c.

46. In all sea-going screw vessels there must be a strong water-tight deck over the cast-iron tube aft, so as to make a tank round the tube, and a properly fitted man-hole at the top or fore end. Collision bulkheads must also be fitted in sea-going vessels: if they are not fitted, the Surveyor should decline to grant a declaration. These compartments are generally small, and the Surveyor should not insist on a separate deck pump leading direct into them.

Steering gear.

47. A spare tiller, properly fitted to the rudder head, relieving tackle, &c., should, in all sea-going and home-trade steamers, be kept near the after-steering gear ready for immediate service. Rudder pendants should also be securely fastened to the back of the rudder, with their ends led up to a place accessible in all weathers. In any case where the Surveyor is not satisfied that the rudder pendants are made fast so as to have sufficient power over the rudder, he should see that an efficient bumpkin is securely fitted, to which the rudder pendants must be made fast. The steering gear should be thoroughly overhauled at every survey, and taken to pieces and thoroughly examined at least once a year. The chains and blocks that are liable to interfere with or endanger the passengers or crew should be guarded by portable but properly secured guards.

It is very desirable that the man at the helm should be so placed that he has a clear look-out ahead, more especially in steamers that frequent crowded harbours or rivers.

Helm indicators.

48. In passing a helm indicator, the Surveyor should ascertain by actual trial that whenever the pointer moves to the word "port" on the dial or plate, wherever that word may be, it shows that the helm is ported, and whenever the pointer points to the word "starboard," wherever that word may be, it means that the helm is starboarded.

Meaning of port helm.

49. In the foregoing directions, it is assumed that "port helm" means that the helm is so moved as to turn the ship's head to the right, and "starboard helm" means that the helm is so moved as to turn the ship's head to the left.

Lead-lines.

50. A deep-sea lead-line of at least 120 fathoms, a lead of at least 28 lb weight, and a suitable reel, together with at least two hand lead-lines of at least 25 fathoms, and leads of at least 7 lb should be supplied to all foreign-going steamers In short-voyage steamers two hand lead-lines of 25 fathoms each and leads of at least 7 lb must be demanded. These are the minimum requirements. For a 1st class (*i.e.*, twelve months) declaration double the number of lines and eads must be provided. The Surveyor should see that the lead-lines are properly marked. The following marks are those usually adopted:—

At	2	fathoms	a piece of leather split in two strips.
,,	3	,,	,, ,, three strips.
,,	5	,,	white bunting.
,,	7	,,	red bunting.
,,	10	,,	leather with a hole.
,,	13	,,	blue bunting.
,,	15	,,	white bunting.
,,	17	,,	red bunting.
,,	20	,,	a strand with two knots tied in it.

It is always best to have the lines fitted with calico for white marks, bunting for red marks, and serge for blue marks, because a man can tell the difference by the feel in the dark.

Anchors chains cables, hawsers, warps, &c.

51. Surveyors must be very careful to see that each steam ship they survey is provided with chain cables and anchors duly certified under the Chain Cable Acts. (34 & 35 Victoria Chapter 101). When the stream and kedge anchors exceed 168 lb in weight they also must be tested in accordance with the same Acts. The Surveyors should upon each survey require the production of the test certificates of all the chain cables and anchors. When from any cause these cannot be produced, the Surveyors should require satisfactory proof that the provisions of the Acts have been complied with.

The Surveyors must also see that the chain cable and anchors on board are sufficient for the service and

in good condition. The chain cables must be removed from the chain lockers at least once in twelve months, cleaned, if necessary, and the pins knocked out of the shackles. The shackle pins should be secured by small pins of hard wood.

The spare anchors should not be stowed below, but kept where they will be ready in case they are required.

Proper hawsers and warps must also be supplied.

Statutory distress signals.

52. The signals specified in the first schedule of the English Merchant Shipping Act of 1873 shall be deemed to be signals of distress.

In the daytime.—The following signals numbered 1, 2, and 3, when used or displayed together or separately, shall be deemed to be signals of distress in the daytime:—(1) a gun fired at intervals of about a minute; (2) the international code signal of distress indicated by N C; (3) the distant signal, consisting of a square flag having either above or below it a ball, or anything resembling a ball.

At night.—The following signals numbered 1, 2, 3, when used or displayed together or separately, shall be deemed to be signals of distress:—(1) a gun fired at intervals of about a minute; (2) flames on the ship (as from a burning tar barrel, oil barrel, &c.); (3) rockets or shells, of any colour or description, fired one at a time at short intervals.

To be examined.

53. The means for making signals of distress are to be carefully examined by the Surveyors, to see that they are kept dry and in good order, and are protected from fire and accident; and that the cannon or mortar, which is to be of at least the size below specified, is in good condition and ready for use. The means for making flames should be lights that burn in water, or some other approved arrangement.

Description of signals to be provided, size of gun, &c.

54. The signals required are 12 blue lights, two of Holmes' storm or danger signal lights, and six of the smaller lights of the same description with means for attaching them to life-buoys; 12 rockets, each containing 16 ozs. of composition; one gun at least 3½ inches in the bore, or one mortar at least 5½ inches in the bore, with 12 charges of ammunition. The Socket Distress Signals of the Cotton Powder Company may be passed as sufficient for signals of distress, and they may be passed in lieu of guns or in lieu of rockets, but not as equivalent to both in sea-going steam ships and emigrant ships. When a gun is carried, each charge must contain 16 ozs. of pebble or bean powder in a flannel bag. An air-tight copper magazine, rammers, sponges, wads, priming wires, friction tubes, powder flask with fine powder for priming, and means for firing and withdrawing charges should be provided and carefully examined. The Holmes' Patent Storm and Danger Signal Lights must be supplied to each sea-going steam ship.

Rocket lockers.

55. The locker for keeping the rockets, blue lights, &c., should not be air-tight, but should have sufficient small safe openings to allow of the escape of any moisture generated; by this means the rockets, blue lights, &c., can be kept for a long period. Red pyrotechnic lights are dangerous.

Distress signals.

56. Surveyors should in every case in which the regulation distress signals are not on board the passenger (emigrant) ships, and sea-going passenger steamers, which they may be called on to survey, decline to grant papers or declarations, unless a written guarantee is given to them that the signals shall be on board, and an opportunity given for inspecting them before the ship sails.

Fire hose

57. Passenger steamers going to sea are to be provided with a hose adapted for the purpose of extinguishing fire in any part of the ship, and capable of being connected with the engines of the ship or with

the donkey engine if it can be worked from the main boiler. The Surveyor must take care that it answers the required purpose.

The fire-hoses should be connected, stretched to judge of their length, and thoroughly examined at every survey, and at least once a year (and at any other time that the Surveyor thinks it necessary) tested with the conductor in its place, by pumping water through them by the main or donkey engines at full speed. A proper conductor and metal bend or goose neck forms part of its equipment and must be provided. Generally leather hoses are the most durable, and should be supplied when a declaration for twelve months is required.

Deck to be caulked and have proper hatches, &c.

58. All decks and floors upon which passengers are carried, which are the main and lower decks only in sea-going steamers, must be caulked and properly secured. Sufficient light and ventilation must be provided. Scuttles and hatches are not considered as efficient means of ventilation. Proper and sufficient means of ingress and egress must be fitted. Companions or booby hatches must in all cases be fitted to the entrances to passenger spaces, and be so arranged as to open and shut easily. Surveyors should satisfy themselves that there are hatches to batten down in bad weather, or that otherwise the booby hatch is itself so strong, and so securely bolted as to be part and parcel of the ship, and so fitted that it can be securely closed.

Height, &c., of bulwarks.

59. All sea-going passenger steamers must have planked bulwarks of such a height as is, in the Surveyor's judgment, necessary for the proper shelter and protection of the passengers, or rails, stanchions and a weather cloth, to give the required protection.

BOILERS AND SUPERHEATERS.

Board of Trade test certificates to be accepted.

60. In the case of boilers built in the United Kingdom for steam ships applying for survey certificates under Act VII of 1884, the Surveyor is authorized to accept test certificates for such boilers duly signed by officers of the Board of Trade. If such a certificate cannot be produced, the addition (Y) in Rule 70 will be made to the factor of safety in computing the strength of the boiler.

The Surveyor to fix pressure on safety valves.

61. The Surveyor is required to fix the limits of weight to be placed on the safety-valves of sea-going steam ships. The Surveyor having himself fixed the limits of the weight, is then required to declare that in his judgment the boiler and machinery are sufficient for the service intended, and in good condition, and that they will be sufficient for twelve months, or such other period as he may, in his judgment, determine. For his guidance the following directions are given.

Working pressure to be fixed by calculation.

62. The Surveyor should fix the working pressure for boilers by a series of calculations of the strength of the various parts and according to the workmanship and material. The Surveyors should therefore receive and report on any plans of boilers intended for sea-going vessels that may be submitted in due course with the form of application and fees. They are not to report on any tracing or plan that is not accompanied by that form, or when they have reason to believe that the boilers, when finished, are not intended to be placed on board steamers that will require survey certificates. When the Surveyor has received plans and tracings of new boilers, or of alterations of boilers, and has approved of them, he will of course, be careful in making his examinations from time to time, to see that they are followed in construction. When he has not had the plans submitted, but is called in to survey a boiler, he will, of

course measure the parts, note the details of construction, and, if necessary, bore the plates to ascertain their thickness, &c., before he gives his declaration.

The Surveyor cannot declare a boiler to be safe unless he is fully informed as to its construction, material, and workmanship. He should therefore be very careful how he ventures to give a declaration for a boiler that he is not called in to survey until after it is completed and fixed in the ship.

Respecting stays.

63. In the case of new boilers the Surveyors may allow a stress not exceeding 7,000lb per square inch of net section on solid iron screwed stays and supporting flat surfaces, but the stress should not exceed 5,000lb when the stays have been welded or worked in the fire.

The areas of diagonal stays are found in the following way :—Find the area of a direct stay needed to support the surface; multiply this area by the length of the diagonal stay, and divide the product by the length of a line drawn at right angles to the surface supported to the end of the diagonal stay; the quotient will be the area of the diagonal stay required.

When gusset stays are used their area should be in excess of that found in the above way.

Girders for flat surfaces.

64. When the tops of combustion boxes or other parts of a boiler are supported by solid rectangular girders the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam; and in the case of combustion chambers, that the ends are fitted to the edges of the tube plate and the back plate of the combustion box:—

$$\frac{C \times d^2 \times T}{(W-P)\ D \times L} = \text{Working pressure.}$$

W = Width of combustion box in inches.
P = Pitch of supporting bolts in inches.
D = Distance between the girders from centre to centre in inches.
L = Length of girder in feet.
d = Depth of girder in inches.
T = Thickness of girder in inches.
C = 500 when the girder is fitted with one supporting bolt.
C = 750 when the girder is fitted with two or three supporting bolts.
C = 850 when the girder is fitted with four supporting bolts.

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays.

Flat surfaces of boilers.

65. The pressure on plates forming flat surfaces is found by the following formula:—

$$\frac{C \times (T+1)^2}{S-6} = \text{Working pressure.}$$

T = Thickness of the plate in sixteenths of an inch.
S = Surface supported in square inches.
C = Constant according to the following circumstances.
C = 100 when the plates are not exposed to the impact of heat of flame, and the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.*
C = 90 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts only.

* If the diameter of riveted washers be at least ⅓rds the pitch of the stays, and the thickness not less than the plates they cover, the constant may be increased to 150.

When doubling plates are fitted of the same thickness as the plates they cover, and not less in width than ⅓rds of the pitch of the stays, the constant may be increased to 160.

When doubling plates cover the whole of the flat surface the case should be submitted for the consideration of the Board.

C = 60 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plate they cover.

C = 54 when the plates are exposed to the impact of heat or flame, and steam in contact with the plate, and the stays fitted with nuts only.

C = 80 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plate and fitted with nuts.

C = 60 when the plates are exposed to the impact of heat or flame, with water in contact with the plate, and the stays screwed into the plate, having the ends riveted over to form a substantial head.

C = 36 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, with the stays screwed into the plate, and having the ends rivete dover to form a substantial head.

When the riveted ends of screwed stays are much worn, or when the nuts are burned, the constants should be reduced, but the Surveyor must act according to the circumstances that present themselves at the time of survey ; and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state it will be often necessary to reduce the constant 60 to about 36.

Compressive stress on tube plates.

66. The Surveyors should not in any case allow a greater compressive stress on the tube plates than is obtained by the following formula :—

$$\frac{(D-d) \times 15000}{W \times D} = \text{Working pressure.}$$

D = least horizontal distance between centres of tubes in inches.

d = inside diameter of ordinary tubes in inches.

T = thickness of tube plate in inches.

W = extreme width of combustion box in inches from front of tube plate to back of fire box, or distance between combustion box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Wet-bottomed boilers.

67. The Surveyors should take care that wet-bottomed boilers, the outside of the bottom of which cannot be seen, are lifted for inspection at least once in every four years, or oftener, if the Surveyor considers it necessary. It will often be found necessary long before this to reduce the pressure, unless the boilers are lifted from their seats, for the latter to judge of their efficiency. If the owners in any special case have any good reasons for not wishing to lift them when the Surveyor requires it, the Surveyor should submit the whole case in detail to the Government for consideration. The Surveyor must recollect that he is not to certify as sufficient any boiler respecting which he cannot thoroughly satisfy himself.

The Surveyor should record in the hydraulic test book the dates on which wet-bottomed boilers are inspected when lifted, and whether the boilers were out of the ship when examined, and if out of the ship where they were examined. Boilers which have been lifted should in all cases be subjected to the hydraulic test before they are re-set.

Cylindrical boilers.

68. When cylindrical boilers are made of the best material with all the rivet holes drilled in place and all the seams fitted with double butt straps each of at least ⅞ the thickness of the plates they cover, and all the seams at least double riveted with rivets having an allowance of not more than 75 per cent. over the

single shear, and provided that the boilers have been open to inspection during the whole period of construction, then five may be used as a factor of safety. The tensile strength of the iron is to be taken as equal to 47,000lb per square inch with the grain, and 40,000lb across the grain. But when the above conditions are not complied with, the additions in the following scale must be added to the factor 5, according to the circumstances of each case:—

A†	·15	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place after bending.
B†	·3	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place before bending.
C	·3	To be added when all the holes are fair and good in the longitudinal seams, but punched after bending instead of drilled.
D	·5	To be added when all the holes are fair and good in the longitudinal seams, but punched before bending.
E*	·75	To be added when all the holes are not fair and good in the longitudinal seams.
F	·1	To be added if the holes are all fair and good in the circumferential seams, but drilled out of place after bending.
G†	·15	To be added if the holes are fair and good in the circumferential seams, but drilled before bending.
H	·15	To be added if the holes are fair and good in the circumferential seams, but punched after bending.
I†	·2	To be added if the holes are fair and good in the circumferental seams, but punched before bending.
J*	·2	To be added if the holes are not fair and good in the circumferential seams.
K	·2	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and double riveted.
L	·1	To be added if double butt straps are not fitted to the longitudinal seam, and the said seams are lap and treble riveted.
M	·3	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are double riveted.
N	·15	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are treble riveted.
O	1·	To be added when any description of joint in the longitudinal seams is single riveted.
P	·1	To be added if the circumferential seams are fitted with single butt straps and are double riveted.
Q	·2	To be added if the circumferential seams are fitted with single butt straps and are single riveted.
R	·1	To be added if the circumferential seams are fitted with double butt straps and are single riveted.
S††	·1	To be added if the circumferential seams are lap joints and are double riveted.

T	·2	To be added if the circumferential seams are lap joints and are single riveted.
U	·25	To be added when the circumferential seams a re lap and the strakes of plates are not entirely under or over.
V‡	·3	To be ad ded when the boiler is of such a length as to fire from both ends, or is of unusual length, such as flue boilers; and the circumferential seams are fitted as described opposite P, R, and S, but of course when the circumferential seams are as described opposite Q and T, V ·3 will become V ·4.
W*	·4	To be added if the seams are not properly crossed.
X*	·4	To be added when the iron is in any way doubtful, and the Surveyor is not satisfied that it is of the best quality.
Y†††	1·65	To be added if the boiler is not open to inspection during the whole period of its construction.

Where marked * the allowance may be increased still further if the workmanship or material is very doubtful or very unsatisfactory.

† When the holes are to be rimered or bored out in place the case should be referred for orders as to the reduction or omission of A, B, G, and I as heretofore.

‡ When boilers are comparatively short the cases should be submitted for consideration as to the omission of V.

†† When the circumferential seams are lapped and treble-riveted the case should be submitted for orders.

††† When surveying boilers that have not been open to his inspection during construction, the Surveyor may accept test certificate granted by a Board of Trade Surveyor in the United Kingdom.

The strength of the joints is found by the following method:—

$$\frac{(\text{Pitch}-\text{Diameter of rivets}) \times 100}{\text{Pitch.}} = \left\{\begin{array}{l}\text{Percentage of strength of plate at joint as compared with the solid plate.}\end{array}\right.$$

$$\frac{(\text{Area of rivets} \times \text{No. of rows of rivets}) \times 100}{\text{Pitch} \times \text{thickness of plate.}} = \left\{\begin{array}{l}\text{Percentage of strength of rivets as compared with the solid plate.*}\end{array}\right.$$

Then take iron as equal to 47,000lb per square inch and use the smaller of the two percentages as the strength of the joint, and adopt the factor of safety as found from the preceding scale—

* If the rivets are exposed to double shear multiply the percentage as found by 1·75.

$$\frac{(47{,}000 \times \text{percentage of strength of joint}) \times \text{twice the thickness of the plate in inches.}}{\text{Inside diameter of the boiler in inches} \times \text{factor of safety}} = \left\{ \begin{array}{l} \text{Pressure to be allowed per square inch on the} \\ \text{safety valves.} \end{array} \right.$$

Butt straps.

In the case of zigzag riveting, the strength through the plate diagonally between the rivets is equal to that horizontally between the rivets, when diagonal pitch $= \frac{6}{10}$ horizontal pitch $+ \frac{4}{10}$ diameter of rivet.

Plates that are drilled in place must be taken apart and the burr taken off, and the holes slightly countersunk from the outsides.

69. Butt straps must be cut from plates and not from bars, and must be of as good a quality as the shell plates, and for the longitudinal seams must be cut across the fibre. The rivet holes may be punched or drilled when the plates are punched or drilled out of place, but when drilled in place, must be taken apart and the burr taken off and slightly countersunk from the outside.

When single butt straps are used and the rivet holes in them punched they must be one-eighth thicker than the plates they cover.

The diameter of the rivets must not be less than the thickness of the plates of which the shell is made; but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates.

Dished ends must be stayed as flat surfaces; but when they are theoretically equal to the pressure needed, when considered as portions of spheres, the stays, when solid, may have a stress of 14,000lb. per square inch of net section, but the stress should not exceed 10,000lb. when the stays have been welded or worked in the fire.

Truly hemispherical ends subjected to internal pressure may be allowed double the pressure that is suitable for cylinder of the same diameter and thickness.

All man-holes and openings must be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. The openings in the shells of cylindrical boilers should have their shorter axes placed longitudinally. It is very desirable that the compensating rings round openings in flat surfaces be made of ⊥ or T iron. Cast iron doors are not to be passed.

Circular furnaces

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions. The boilers must be tested by hydraulic pressure to twice the working pressure in the presence and to the satisfaction of the Surveyors.

70. Circular furnaces with the longitudinal joints welded or made with a butt strap:—

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches.}}{(\text{Length in feet} + 1) \times \text{diameter in inches.}} = \text{working pressure per square inch, provided it does not exceed that found by the following formula:—}$$

$$\frac{8{,}000 \times \text{thickness in inches}}{\text{diameter in inches}} = \left\{ \begin{array}{l} \text{Working pressure} \\ \text{per square inch.} \end{array} \right.$$

The second formula limits the crushing stress on the material to 4,000lb per square inch.

The length is to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap jointed in the ordinary way, then 70,000 is to be used instead of 90,000, excepting only where the lap is bevelled and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above must be reduced, that is to say, the 90,000 will become 80,000; the 80,000 will become 70,000; the 70,000 will become 60,000; and when neither the material nor the workmanship are of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Surveyor, as in the case of old boilers. One of the conditions of best workmanship is that the joints are either double riveted with single butt straps, or single riveted with double butt straps, and the holes drilled after the bending is done and when in place, and afterwards taken apart, the burr on the holes taken off, and the holes slightly countersunk from the outside.*

The working pressure for corrugated furnaces, practically circular and machine-made, provided the plane parts at the ends do not exceed six inches in length, and the plates are not less than $\frac{5}{16}$ inch thick, should not be greater than found by the following formula:—

$$\frac{9{,}000 \times \text{thickness in inches}}{\text{mean diameter in inches.}} = \left\{ \begin{array}{l} \text{Working pressure per} \\ \text{square inch.} \end{array} \right.$$

When the furnaces are riveted in two or more lengths the case should be submitted for consideration, as it may be necessary to make a deduction.

71. The strength of the joints of cylindrical superheaters and the factor of safety are found in a similar manner as for cylindrical boilers and steam receivers, but instead of using 47,000 lb as the tensile strength of iron 30,000 lb is adopted, unless where the heat or flame impinges at, or nearly at, right angles to the plate; then 22,400 lb is substituted. Cylindrical superheaters

When a superheater is constructed with a tube subject to external pressure the working pressure should be ascertained by the rules given for circular furnaces, but the constants should be reduced as 30 to 47.

In all cases the internal steam pipes should be so fitted that the steam in flowing to them will pass over all the plates exposed to the impact of heat or flame.

Superheaters should, as regards survey, be deemed to be the *most important parts* of the boilers, and must be inspected *inside and outside*; those that cannot be entered on account of their size or arrangement must have a sufficient number of doors through which a thorough inspection of the whole of the interior can be made.

Special attention should be paid to the survey of superheaters, as with high pressure the plates may become dangerously weak, and not give any sound to

---

* The following examples will serve to show the application of the constants for the different cases that may arise:—

Furnaces with butt joints and drilled rivet holes.	90,000	when the longitudinal seams are welded.
	90,000	where the longitudinal seams are double riveted and fitted with single butt straps
	80,000	where the longitudinal seams are single riveted and fitted with single butt straps.
	90,000	where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with butt joints and punched rivet holes.	85,000	where the longitudinal seams are double riveted and fitted with single butt straps.
	75,000	where the longitudinal seams are single riveted and fitted with single butt straps.
	85,000	where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with lapped joints and drilled rivet holes.	80,000	where the longitudinal seams are double riveted and bevelled.
	75,000	where the longitudinal seams are double riveted and not bevelled.
	70,000	where the longitudinal seams are single riveted and bevelled.
	65,000	where the longitudinal seams are single riveted and not bevelled.
Furnaces with lapped joints and punched rivet holes.	75,000	where the longitudinal seams are double riveted and bevelled.
	70,000	where the longitudinal seams are double riveted and not bevelled.
	65,000	where the longitudinal seams are single riveted and bevelled.
	60,000	where the longitudinal seams are single riveted and not bevelled.

In the case of upright fire boxes of donkey or similar boilers, 10 per cent. should be deducted from the constant given above, applicable to the respective classes of work.

indicate their state when tested with a hammer; the plates should therefore be occasionally drilled.

Before commencing the survey, it is prudent to question the engineer officers as to the tendency of boilers to flame; if flaming is a frequent occurrence, extra care must be taken in the survey, and in fixing the pressure to be allowed as the tensile strength of the plate, when heated, is often reduced to about four tons per square inch. Drain pipes must in all cases be fitted to superheaters in which a collection of water in the bottom is possible.

Safety valve for superheaters.

72. Superheaters that can be shut off from the main boilers must be fitted with parliamentary safety valve of sufficient size, but the least size passed should be 3 inches diameter.

The flat ends of all boilers, as far as the steam space extends, and the ends of superheaters, should be fitted with shield, or baffle-plates, where exposed to the hot gases in the uptake; as all plates subjected to the direct impact of heat or flame are liable to get injured unless covered with water.

STEEL BOILERS.

73. The following should guide the Surveyors when the general quality of the steel has been found suitable for marine boilers.

Maker's test.

74. The steel-makers or boiler-makers should test one or more strips cut from each plate for tensile strength and elongation, and stamp both results on a part of the plate, where they can be easily seen when the boiler is constructed.

Surveyor's tests.

75. The Surveyor is not obliged to witness the foregoing tests, although it is very desirable that he should, when his other duties will allow him to do so, but he should, however, select at least one in four of these plates, either at the steel works or the boiler-maker's works, and witness the testing of at least one strip cut from each selected plate.

Rivet tests.

76. A few rivets of each size should be selected, and should be turned and tested for tensile stress. The tensile stress should be from 28 tons to 32 tons per square inch, with a contraction of area of about 60 per cent.

Tensile and bending tests.

77. If for the plates from which the Surveyor selects the above proportions a greater stress is wished than is allowed for iron, tests for tensile stress and elongation should be made, and those for which no reduction of thickness is asked may be tested for resistance to bending if preferred.

Test strips.

78. The breadth of test strips for tensile stress should be about two inches, and the elongation, taken in a length of ten inches, should be about 25 per cent., and not less than 20 per cent. The test strips must be carefully prepared and measured, and they should be cut from the plate by a planing or shaping machine.

Bending tests.

79. The bending tests for plates *not* exposed to flame should be made with strips in their normal condition, but strips cut from furnaces, combustion boxes, &c., should be heated to a cherry red, then plunged into water of about 80°, and kept there until of the same temperature as the water, and then bent. The bending strips should not be less than two inches broad and 10 inches long, and they should be bent until they break, or until the sides are parallel at the distance from each other of not less than (3) three times the thickness of plate.

Tensile stress, &c.

80. The tensile stress of the plates *not* exposed to flame should be about 28 tons, and should not exceed 32 tons per square inch of section, and 28 tons should be the stress used in the calculations for cylindrical shells if the plate comply with all the conditions as stated herein; but when the minimum tensile stress of shell plates exceeds 28 tons, and allowance is wished for

the excess, the case should be specially submitted for the consideration of Government. The tensile stress of furnace flanging and combustion-box plates should range from 26 tons to 30 tons per square inch.

Annealing. 81. All plates that are punched, flanged, or locally heated must be carefully annealed after being so treated.

Perforating and annealing. 82. The rivet holes in the furnaces and longitudinal seams of cylindrical shells should be *drilled*, but if it is wished to punch them and afterwards bore or anneal the plates in a proper furnace, the proposed method of the punching and boring or annealing should be submitted for consideration before being done; but all punched holes should be made after bending.

In all cases where assent has been given to for plates to be punched after bending and then annealed, the makers should stamp the plates with the words "punched after bending and then annealed," and in all cases where assent has been given for punching and afterwards boring plates, the words "punched and then bored" should be stamped on the plates.

Stress on stays. 83. Bars for stays should be tested. Solid steel screwed stays which have not been welded or otherwise worked after heating may be allowed a working stress of 9,000 lb per square inch of net section, provided the tensile stress is from 28 to 30 tons per square inch and the elongation in 10 inches about 25 per cent. and not less than 20 per cent. Steel stays which have been welded or worked in the fire have been found to be unreliable, therefore they should not be passed.

Constants for flat surfaces. 84. If the flanging plates and those exposed to flame comply with the foregoing conditions, the constant in the Board of Trade rules for iron boilers may be increased as follows:—

The constants for flat surfaces when they are supported by stays screwed into the plate and riveted 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and nutted, or when the stays are nutted in the steam space, 25 per cent. This is also applicable to the constants for flat surfaces stiffened by revited washers or doubling strips and supported by nutted stays.

The constants for combustion-box girders 10 per cent.

Furnaces, plane and corrugated. 85. The furnace constants about 10 per cent. when plane. When new corrugated and machine-made, and practically true circles, the working pressure is found by the following formula, provided that the plane parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{1}{16}$ inch thick.

$\frac{12,500 \times T}{D}$ = working pressure.

T = thickness in inches.

D = mean diameter in inches.

(If the furnace is riveted in two or more lengths, the case should be submitted for consideration.)

Compressive stress on tube plates. 86. A greater compressive stress should not be allowed on tube plates than that found by the following formula:—

$$\frac{(D-d)\ T \times 20,000}{W \times D} = \text{working pressure.}$$

D = least horizontal distances between centres of tubes in inches.

d = inside diameter of tubes in inches.

T = thickness of tube plate in inches.

W = extreme width of combustion-box in inches from front of tube-plate to back of fire-box, or distance between combustion-box tube-plates when boiler is double-ended and the box common to the furnaces at both ends.

Plate and rivet section.

87. The rivet section, if of iron, in the longitudinal seams of cylindrical shells, where lapped and at least double riveted, should not be less than $\frac{1}{2}$ times the net plate section, but if steel rivets are used, their section should be at least $\frac{1}{1.75}$ of the net section, if the plate of the tensile stress of the rivets is not less than 28 tons and not more than 32 tons per square inch. Therefore in calculating the working pressure the percentage strength of the rivets may be found in the usual way by the foregoing rules, but in the case of iron rivets, the percentage found should be divided by $\frac{1}{2}$, and in the case of steel rivets by $\frac{1}{1.75}$, the result being the percentages required. If the percentage strength of the rivets by calculation is less than the calculated percentage strength of the plate, calculate the working pressure by both percentages. When using the percentage strength of the plate, use the nominal factor of safety suitable for the method of construction, as by the rules for iron boilers; but when using the percentage strength of rivets, use 5 as the factor of safety. The less of the two pressures so found is the working pressure to be allowed for the cylindrical portion of the shell.

Local heating to be avoided.

88. Local heating of the plates should be avoided, as many plates have failed from having been so treated.

elding, &c.

Steel plates which have been welded should not be passed if subjected to a tensile stress, and those welded and subject to a compressive stress should be efficiently annealed.

In other respect the boilers should comply with the rules for iron boilers.

If the tests are to be made at the steel works, the boiler-makers should inform the Surveyors in their district when and where they will be made, so that the Surveyor from the nearest district to the steel works may be instructed to attend to them. The Surveyor should have due notice two or three days when the plates, &c., will be ready for the test pieces to be cut from them. (Surveyors should report all cases of failures of steel plates, &c., which may come to their knowledge.)

Steel for superheaters, &c.

89. If steel is proposed to be used in superheaters, the particulars should be submitted to the Government for consideration; but in all cases it should be discouraged for this purpose.

This applies to the unshielded uptakes of all boilers, including ordinary vertical donkey boilers.

Makers of steel.

90. When the steel is not to be made by any of the following makers, the case will receive the special consideration of the Government, and this should be specially noted by the Surveyors:—

Messrs. Beardmore.
" J. Brown & Co.
" C. Cammell & Co.
Mr. D. Colville.
The Landore Steel Company.
The Leeds Forge Company.
The Steel Company of Scotland.
The Weerdale Iron and Coal Company.
The West Cumberland Iron and Steel Company.

Boiler tracings, &c.

91. Difficulty has been experienced with regard to the survey of steel boilers, owing to the fact that some makers were not aware, at the time the boilers were commenced, that a Survey certificate would be necessary, and the makers have therefore omitted to submit tracings until the boilers have been nearly completed. Tracings of boilers may therefore be received for examination upon payment of the usual fee of Rs. 50, and the Surveyors may proceed as far as witnessing the hydraulic test before

any further instalment of the survey fee is paid. Engineers and boiler makers should be advised of this arrangement.

BOILERS GENERAL.

Donkey boilers.

92. Donkey boilers that are in any way attached to, or connected with, the main boilers, or with the machinery used for propelling the vessel, must be surveyed and be fitted the same way as the main boilers, and have a water and steam gauge, and all other fittings complete, and, as regards safety valves, must comply with the same regulations as the main boilers.

Stop valves.

93. No boiler or steam chamber is to be so constructed, fitted, or arranged so that the escape of steam from it through the safety valve required by the Act of Parliament can be wholly, or partially, intercepted by the action of any other valve.

A stop valve must always be fitted between the boiler and the steam pipe, and, where two or more boilers are connected with a steam receiver or superheater, between each boiler and the superheater or steam receiver. The object of this is obvious, viz. to avoid the failure of all the boilers through the failure of one. The necks of stop valves should be as short as practicable.

Gauges, &c.

94. Each boiler must be fitted with a glass water-gauge, at least two test cocks, and steam-gauge; that is to say, each boiler must be fitted with all fittings as complete as if there were only one boiler. Boilers that fire both ends, and those of unusual width, must have water-gauges and test cocks at each end or side, as the case may be. When a steamer has more than one boiler, and these boilers are fitted with stop-valves, each boiler must be treated as a separate one, and have all the requisite fittings.

Boilers to be tested when too small to enter.

95. When the boilers are not large enough for the Surveyors to get into, they should see them tested by hydraulic pressure at every annual survey at least. The hydraulic test should also be applied at every intermediate survey if the Surveyor considers it necessary. In the case of old boilers the Surveyors must use their own judgment as to the necessary pressure to be applied. This is in no way to interfere with the instructions to test all new boilers to double their working pressure, nor with the proper internal examination of all boilers that are large enough for the Surveyors to get into.

Whenever it is only stays that prevent getting in, he may order their removal, and he must see them properly replaced before granting his declaration.

Surveyors not to go into hot boilers.

96. If the boiler is too hot for the Surveyor to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a declaration, until he can make an efficient internal examination.

Strength of boilers to be ascertained. and working pressure fixed by calculation.

97. Before testing a boiler, the Surveyor should examine it, take the necessary measurements, and calculate what the working pressure should be in accordance with the regulations, and only test to double the working pressure; if the test is not satisfactory the defects must be made good, and the boiler re-tested.

This instruction applies to superheaters and steam chests as well as to boilers.

The Surveyor who grants the declaration must examine the boilers thoroughly, and will be held responsible for the pressure allowed.

Hydraulic test.

98. Surveyors should see all new boilers, and boilers that have been taken out of the ship for a thorough repair, tested by hydraulic pressure up to at least double the working pressure that will be allowed previous to

the boilers being placed in the vessel, to test the workmanship, &c.; but the working pressure is to be determined by the strength of stays, thickness of plates, and strength of riveting, &c., and not by the hydraulic test.

The hydraulic test should in no case exceed twice the calculated working pressure of the boiler, and it is never to be applied until the boiler has been examined in accordance with paragraph and until the strength has been calculated from the necessary measurements taken from the boiler itself.

When the boilers are in the vessel the Surveyor may, at any time he thinks it necessary, before he gives a declaration, have them tested by hydraulic pressure to satisfy himself as to any doubtful part, or of places not easy of access, care being taken in the case of old boilers not to overstrain them; but the test must always exceed the working pressure.

Surveyors should pay particular attention to the examination and testing of steam pipes.

The hydraulic test should be applied to the boilers of all steamers that have not previously had a survey certificate, before a declaration is granted for them. The amount of the hydraulic pressure test and the date on which it was last applied to the boilers should be inserted in the Surveyor's declaration and recorded in the office boiler book.

Cast iron in boilers and steam-pipes.

99. In all boilers in which the Surveyors find that cast iron is employed in such a manner as to be subject to the pressure of steam or water, great care must be taken. Cast iron must not be used for stays, and Surveyors should also discourage the use of cast iron for chocks and saddles for boilers. Particular attention should be paid to the chocking of boilers, more especially when they are fired athwartships.

Pressure fixed by one Surveyor not to be increased by another.

100. A pressure once allowed on the boiler of a sea-going steam ship is not to be increased unless, in cases where a Surveyor is of opinion that an increased pressure may with safety be allowed, he has communicated with the Surveyor who last surveyed the vessel; and on learning the reasons why the existing pressure was formerly allowed, the Surveyor is of opinion that it may be increased.

SAFETY VALVES.

Provisions of the Act as regards safety-valves.

101. Every steam ship shall be provided with a safety valve upon each boiler, so constructed as to be out of the control of the engineer when the steam is up, and if such valve is in addition to the ordinary valve, it shall be so constructed as to have an area not less, and a pressure not greater, than the area of and pressure on that valve.

The Surveyors are instructed that in all *new boilers*, and whenever *alterations can be easily made*, the valve chest should be placed directly on the boiler; and the neck, or part between the chest and the flange which is bolted on to the boiler, should be as short as possible and be cast in one with the chest.

The Surveyors should note that it is not intended by this instruction that vessels with old boilers which have been previously passed with such an arrangement should be detained for the alterations to be carried out.

Of course in any case in which a Surveyor is of opinion that it is positively dangerous to have a length of pipe between the boilers and the safety valve chest, it is his duty at once to insist on the requisite alterations being made before granting a declaration.

If any person places an undue weight on the safety valve of *any* steam ship, or increases such weight beyond the limits fixed by the Engineer-Surveyor, he shall, in addition to any other liabilities he may incur by so doing, incur a penalty not exceeding one thousand rupees.

The Engineer-Surveyor shall declare, amongst other things, the limits of the weight to be placed on the safety valves; that the safety valves are such, and in such condition as required by these rules, and that the machinery is sufficient for the service for the time he fixes, and is in good condition for that time.

Area of safety-valves.

102. The area of Government safety valves, or (when there is more than one) the combined area of the Government safety valves should be not less per square foot of fire-grate surface than that given in the following table opposite the boiler pressure intended, provided the valves are not less than three inches in diameter. This applies to new vessels or vessels which have not received survey certificate.

When, however, the valves are of the common description, and are made in accordance with the tables, it will be necessary to fit them with springs having great elasticity, or to provide other means to keep the accumulation within moderate limits.

If there is only one safety valve on a main boiler, the Surveyor should not grant a declaration without first referring the case for special instructions.

In the case of small boilers, such as launch boilers, if it is wished to fit valves smaller than three inches diameter, the case should be submitted for orders.

Safety valve areas.

Boiler pressure.	Area of valve per square foot of fire-grate.	Boiler pressure.	Area of valve per square foot of fire-grate.	Boiler pressure.	Area of valve per square foot of fire-grate.

Examination of safety-valves.

103. The Surveyor, in his examination of the machinery and boilers, is particularly to direct his attention to the safety-valves, and whenever he considers it necessary, he is to satisfy himself as to the pressure on the boiler by actual trial.

The Surveyor is to fix the limits of the weights to be placed on the safety-valves, and the responsibility of not issuing a declaration before he is fully satisfied on the point is very grave. The law places on the Surveyors the responsibility of "declaring" that the boilers are in his judgment sufficient with the weights he states.

The Surveyor is to examine the whole of the valves, weights, and springs at every survey.

Surveyor to see valves weighted.

104. When the Surveyor has determined the amount of pressure, he is to see the valves weighted accordingly, and the weights or springs fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure. The limits of the weight on the valves is to be inserted in the declaration, and should it at any time come to a Surveyor's knowledge that the weights or the loading of the valve have been shifted, or otherwise altered, or that the valve has been in any way interfered with, so as to increase the pressure, he is at once to report the facts to Government.

Spring safety valves.

105. If the following conditions are complied with, the Surveyor need raise no question as to the substitution of spring loaded valves for dead weighted valves:—

(1) That at least two separate valves are fitted to each boiler, except in the case of donkey or other small boilers, in which the grate surface does not exceed 14 square feet, in which case a single safety-valve may be passed, provided it is not less than three inches in diameter.

(2) That the valves are of the proper size.

(3) That the spring and valve be so cased in that it cannot be tampered with.

(4) That provision be made to prevent the valve flying off in case of the spring breaking

(5) That the requisite safety-valve area is cased in the usual manner of Government valves.

(6) That screw lifting gear be provided to ease all the valves.

(7) That the size of the steel of which the spring is made is to be found by the following formula:—

$$\sqrt[3]{\frac{s \times D}{c}} = d:$$

s = the load on the spring in lb.

D = the diameter of the spring (from centre to centre of wire) in inches.

d = the diameter, or side of square, of the wire in inches.

c = 8,000 for round steel.

c = 11,000 for square steel.

(8) That the springs be protected from the steam and impurities issuing from the valves.

(9) That when valves are loaded by direct springs, that the compressing screw abuts against a metal stop or washer, when the load sanctioned by the Surveyor is on the valve.

In no case is the Surveyor to give a declaration for a spring-loaded valve, unless he has examined it and is acquainted with the details of its construction, and unless he has tried it under full steam, and full firing, for at least 20 minutes with the feed-water and stop valve shut off. If the accumulation of pressure exceeds 10 per cent. of the loaded pressure, he should not give his declaration.

106. It is clearly the duty of the masters and engineers of vessels to see, in the intervals between the surveys, that the Government safety-valve or valves, as well as the other safety-valves and the rest of the machinery, are in proper working order. There is no provision in the Indian Steam-Ships' Act, exempting the owner of any vessel, on the ground that she has been surveyed, from any liability, civil or criminal, to which he would otherwise be subject. The Government safety-valve is to be out of the control of the engineer when the steam is up; this enactment, far from implying that he is not to have access to it, and to see to its working at proper intervals when the vessel is in port, rather implies the contrary; and the master should take care that the engineer has access to it for that purpose. A substantial lock, that cannot be easily tampered with, and as far as possible weather-proof, should be used for locking up the safety-valve boxes.

Owners, masters, and engineers to see that valves are kept in proper order.

107. In witnessing the hydraulic tests of boilers, &c., and in witnessing all safety-valve tests for accumulation of pressure, the Surveyors are to use the pressure gauges supplied to them for the purpose.

All tests for pressure and accumulation are to be made with proper gauges.

MACHINERY, &c.

108. The machinery to be surveyed comprises the engines and boilers used for propelling the vessel, and all the machinery connected therewith. The boilers of donkey engines are to be surveyed with the boilers and machinery of the vessel, when they are in any way connected with them.

What machinery is to be surveyed.

109. Surveyors should, before granting declarations for any period exceeding six months, be careful when examining the machinery; (1) to have the upper brasses of all bearings taken off; (2) the shaft turned round and carefully examined; (3) the cylinder covers and junk rings lifted for examination of the pistons and cylinders; (4) the slide covers or bonnets removed for examination of the slides, and if necessary, the slides taken out; (5) the air and circulating pump covers lifted for examination of the pump buckets and valves; (6) the covers of all feed and bilge pump valves removed for the examination of the valves; (7) all discharge valves and sea-cocks taken out for examination; (8) the propeller shaft to be drawn when necessary, and it and the screw to be examined, and in all cases in which the shaft is drawn, it is to be seen again after the screw is secured in its place; (9) the bridges and fire-bars to be removed to permit of a thorough examination of the boilers and furnaces; (10) all cocks and valves on the boilers to be taken out and examined.

When to be taken to piece for examination.

When a Surveyor has seen the machinery of a new steamer in the shop before it was put together, and is satisfied with it, it will not be necessary to have it again opened up on board the ship on the first survey for examination, unless in the Surveyor's judgment it is necessary after the vessel has been tried under steam.

It will rest with owners to determine whether or not they will have a certificate for any period exceeding six months; but if they do so determine, then the above instructions are to be complied with before a declaration is granted.

The above instructions are also to apply at least once a year to the survey of all sea-going steamers, with the exception named in the next paragraph, whatever may be the period for which the declarations are given, and to carry out the whole of the above, it must be done when the vessel is in dry dock.

After the examination of the parts has been made as above, the machinery must be tried under steam at full pressure

Examination to be carefully made.

110. In the examination of the machinery and boilers the Surveyor should in no case give a declaration without thoroughly satisfying himself that both the boilers and the machinery are sufficient for the service intended, and in good condition.

Separate feed arrangements to be fitted.

111. The boilers of all new sea-going vessels, passenger tugs, and other small passenger vessels, should be fitted with separate feeding arrangements in addition to, but unconnected with, the main feed pipes and valves. In very small vessels an efficient hand pump, instead of the donkey pump, may be passed if the Surveyor has satisfied himself as to its efficiency when steam is up, and provided there are separate feed pipes and valves as directed above. This instruction is to apply also in the case of old vessels of the above description, when being fitted with new boilers.

The Surveyors should discourage the practice of using the same pump for the bilges and for feeding boilers.

Cocks, valves and pipes communicating with ship's side.

112. All inlets or outlets in the bottom or side of a vessel near to, at, or below the deep-load water-line other than the outlets of waterloset, soil, scupper, lavatory, and urinal pipes, must have cocks or valves fitted between the pipes and the ship's side or bottom; such cocks or valves must be attached to the skin of the ship, and be so arranged that they can be easily and expeditiously opened or closed at any time; and the cocks, valves, and the whole length of the pipes should be accessible at all times.

Guards on blow-off cocks.

113. With a view to the prevention of accidents to boilers through the blow-off cocks being left open after the boiler is run up, and to prevent water getting accidentally or intentionally into the ship by cocks being left open, and also to prevent the donkey engine becoming useless when used for feeding the boilers, all blow-off cocks and sea connexions are to be fitted with a guard over the plug, with a featherway in the same, and a key on the spanner, so that the spanner cannot be taken out unless the plug or cock is closed. One cock is to be fitted to the boiler, and another cock on the skin of the ship or on the side of the Kingston valve.

Non-return valves to pipes.

114. In all cases where pipes are so led or placed that water can run from the boiler or the sea into the bilge, either by accidentally or intentionally leaving a cock or valve open, they should be fitted with a non-return valve and a screw not attached, but which will set the valve down in its seat when necessary; the only exception to this is the firemen's ash cock, which should have a cock or valve on the ship's side, and be above the stoke-hole plates.

Exhaust pipe of donkey engine not led through ship's side

115. The exhaust pipe for the donkey engine must not be led through the ship's side, but must be led on deck or into the main waste-steam pipe; and in all cases it should have a drain-cock on it. This will prevent water getting into the pipe when the ship is deeply laden or rolling.

Cocks or valves standing exceptional distances from the ship's plating, that is where the necks are longer than is necessary for making the joint, are to be discouraged, and if passed, they should be made of brass or gun-metal, and well bracketed.

Non-return valves on feed cocks.

116. Where the feed-cock or valve is so placed and arranged that more than one boiler can be fed at the same time through this cock or valve, a non-return valve must be fitted between each boiler and this cock or valve; but it is very desirable that all feed-cocks or valves should have a non-return valve fitted between the boiler and the cock or valve.

Cast-iron stand-pipes or cocks through which hot brine has to pass must never be passed.

117. In the case of the outlets of watercloset, soil, scupper, lavatory and urinal pipes which are below the weather deck, there should be an elbow of good substantial metal other than cast-iron or lead, and the pipe connected with this elbow should, if of lead, have a sufficient bend to provide for expansion in the pipe or any movement from the working of the ship. Pipes, no matter of what material they may be constructed, are never to be fitted in a direct line between the aparture in the ship's side and its connexion with the deck, or closet, or other fitting. Unless the watercloset and scupper pipes and their outlets are fitted in the way hereby required, or in a manner that will in the opinion of the Surveyor be more or equally efficient and safe, the Surveyor should refuse to grant a declaration. This paragraph applies only to sea-going vessels coming under survey for the first time. Outlets of watercloset and scupper pipes.

118. No question as to gear need be raised if the following spare gear and stores are supplied. The heavier portions of this gear must have been fitted and tried in its place, and must be kept on board where access can at all times be had to it:— Spare gear and stores to be carried.

1 pair of connecting-rod brasses.
1 air-pump bucket, and rod, with guide.
1 circulating pump bucket and rod
1 air-pump head valve, seat, and guard.
1 set of india-rubber valves for air pumps.
1 circulating pump head valve, seat and guard.
1 set of india-rubber valves for circulating pumps.
2 main bearing bolts and nuts.
2 connecting-rod bolts and nuts.
2 piston-rod bolts and nuts.
8 screw shaft coupling bolts and nuts.
1 set of piston springs.
3 sets, if of india-rubber, or 1 set if of metal, of feed-pump valves and seats.
3 sets, if of india-rubber, or 1 set if of metal, of bilge pump valves and seats.
1 hydrometer.
Boiler tubes, 3 for each boiler.
100 iron assorted bolts, nuts, and washers, screwed, but need not be turned.
12 brass bolts and nuts, assorted, turned and fitted.
50 iron " " " "
50 condenser tubes.
100 sets of packing for condenser tube ends, or an equivalent.
At least one spare spring of each size for escape valves.
1 set of water gauge glasses.
$\frac{1}{10}$th of the total number of fire-bars necessary.
3 plates of iron, assorted.
6 bars of iron, assorted.
1 complete set of stocks, dies, and taps, suitable for the engines.
1 smith's anvil.
1 fitter's vice.
Ratchet-braces, and suitable drills.
1 copper or metal hammer
Suitable blocks and tackling for lifting weights.
1 dozen files, assorted, and handles for the same.
1 set of drifts, or expanders for boiler tubes.
1 set of safety valve springs (if so fitted) for every four valves; if there are not four valves, then at least one set of springs must be carried.
1 screw jack.
And a set of engineer's tools suitable for the service, including hammers and chisels for vice and forge; solder and soldering iron; sheets of tin and copper; spelter; muriatic acid, or other equivalent, &c., &c.

119. Main, and tunnel, and propeller shafts must not be passed without reference to Government if found Size of shafting.

to be less in diameter than that found by the following rules :—

For compound engine, with two cylinders :—

$$\text{Diameter of shaft in inches} = \sqrt[3]{\frac{(d^2 \times P) + (D^2 \times 15)}{f}} C,$$

where d=diameter of high pressure cylinder in inches.
D=diameter of low pressure cylinder in inches.
P=boiler pressure.
C=length of crank in inches.
f=constant from following table.

For ordinary condensing engines, with two cylinders, when the pressure is not low :—

$$\text{Diameter of shaft in inches} = \sqrt[3]{\frac{D^2 \times P \times 2}{f}} C,$$

where D=diameter of cylinder.
P=boiler pressure.
C=length of crank in inches.
f=constant from following table.

TABLE.

Constant.	Angle between Cranks.	For Crank and Propeller Shafts.	For Tunnel Shaft.

,,	180°	1746	2037

Surveyors should not grant a declaration for twelve months whenever they have any doubt whatever as to the efficiency of any portion of the vessel, or her machinery, for such period.

Distilling apparatus for making fresh water.

120. The distilling apparatus of emigrant ships must be taken to pieces every voyage, except in the cases of steamers holding passenger certificates, which must be taken to pieces at least once every six months, or oftener, if the Surveyor thinks it necessary, and the tubes or coils tested to at least twice the highest working pressure of the boiler from which the apparatus can be worked, and the machinery and boilers thoroughly examined. After the distilling apparatus is put together again, it must be tested as to the quantity and quality of the water made.

How to be examined, and what is to be capable of doing.

The water must be perfectly cool, pure, and fit to drink immediately it is drawn off from the filter. No distilling apparatus is to be passed, unless fitted with a suitable sized filter, charged with animal charcoal, the charcoal must be taken out, cleansed, or renewed every voyage, except in cases of steamers holding passenger certificates, in which case it need not be taken out, unless the Surveyor think it necessary, oftener than every six months. In such cases (where sea-going steamers are coming frequently in for survey under the Emigration Acts, and such complete examination is not made previous to each voyage,) the Surveyor will be held wholly responsible for the efficiency of the apparatus; but the quantity and quality of the water

must be tried previous to every voyage. It therefore rests with him whether he orders the distilling apparatus to be taken to pieces every voyage or not. The boilers must be at least equal in strength to the boilers of passenger steamers, and must have the same fittings as is necessary for them, in accordance with the Regulations. The Surveyor must satisfy himself as to the capability of the man who is to have charge of the apparatus.

The steam for working the apparatus is not to be taken from the main boilers. No exhaust steam must be permitted to go into the condenser if appliances for the introduction of lubricants be fitted to the steam pipes, or steam cylinder of the pumping engine. The boiler of the apparatus must not be filled or fed with water from the surface condensers of the main engines, and must not be fitted with cocks, &c., for the introduction of tallow or oil.

When the water is pumped into the condenser, there should be an escape valve fitted to it, which cannot be readily tampered with ; and if the condensing portion of the apparatus or the cooler and filter be unfit to bear the pressure on the boiler, an efficient safety-valve, that cannot be readily overloaded, should be fitted between the steam-pipe and the apparatus.

Pump for distilling apparatus to be fitted as fire-engine.

121. It is advisable that the donkey-engine for pumping water through the condenser be so fitted that it can be available in case of emergency for extinguishing fire in any part of the ship; a leather hose, with suitable bends and conductors, are to be supplied for this purpose.

Stores to be carried with distilling apparatus.

122. The following list of tools and materials must be provided for distilling apparatus:—

1 set of stoking tools.
1 scaling tool.
1 spanner for boiler doors.
1 set of fire-bars, suitable for boiler.
1 14-inch flat bastard file.
1 14-inch half-round file.
1 10-inch round file.
3 file handles.
2 hand cold-chisels.
1 chipping hammer.
1 pair patent gas-tongs.
1 soldering iron.
10 lbs. of solder.
2 „ of rosin.
6 gauge-glasses.
24 india-rubber gauge-glass washers.
30 bolts and nuts, assorted.
1 slide-rod for donkey-pump.
5 lbs. spun-yarn.
10 „ cotton-waste.
1 deal box, with lock complete.
2 gallons machinery oil.
Animal charcoal sufficient to charge the filter at least twice.
1 can for machinery oil.
1 oil-feeder.
1 small bench vice.
1 ratchet-brace.
4 drills, assorted.
1 set dies and taps, suitable for the bolts.
2 glass salinometers.
1 hydrometer and pot.
1 shifting spanner.
1 lamp for engineer.

And other articles that the particular distiller and boiler supplied may, in the Surveyor's judgment, require.

List of distilling apparatus that have been approved by the :—

1. Normandy's patent.
2. Winchester and Graveley's patent.
3. Chaptin & Co.'s patent.
4. Brown & Co.'s patent.
5. Fraser's patent.
6. Hocking & Co.'s patent.
7. Kirkaldy's patent.
8. Siddeley & Co.'s patent.
9. Rayner's patent.
10. Union S. S. Co.'s patent.
11. Willoughby & Co.'s patent.

ACCIDENTS AND DAMAGES.

Damage to be inspected.

123. In all cases in which a steam-ship has sustained damage from any accident, or other cause, affecting her seaworthiness or efficiency in any part of her hull, equipments, or machinery, the surveyors of the port where the vessel may be, are to go on board and ascertain the extent of the damage. In doing so they will take care not to make any change in the position or condition of things on board, which would be at all likely to affect any legal evidence, should an enquiry into the case afterwards be considered necessary.

It is extremely important that the vessel should be surveyed and a report forwarded as early as possible.

Report to be sent to Government.

124. They are forthwith to send a report, together with a rough figured sketch, showing the position of all the bulkheads, and distinguishing the compartments that may have been injured, to the Government, in order that the certificate may be cancelled, if necessary. In this report they are to state whether the vessel is rendered inefficient or unseaworthy either in hull or machinery; and whether, in their opinion, the certificate should be cancelled or only temporarily withdrawn.

Lights to be examined.

125. The Surveyor should at the same time examine the lights and screens of the vessel, and if the vessel with which she has been in collision is in port, he should examine the lights of that vessel also, and should forward to the Government, in a separate report, a statement respecting the size, condition, and place of her lamps and screens, and whether, in his opinion, they comply with the requirements of the regulations, and if not, in what respects they are deficient.

The Surveyors shall be very careful in wording their reports as to lights and screens, as they may be used in evidence in cases taken into court.

Surveyor may order vessel to be docked.

126. If, in consequence of any accident to a steam-ship, or for any other reason, the Surveyor considers it necessary to require the vessel to be taken into dock for the purpose of surveying the hull thereof, he may do so, but he is to be cautious never to exercise this power unless the circumstances of the case actually require it.

Certificate to be held during repairs.

127. Unless directions to the contrary are given, the Surveyor is to hold the certificate of the vessel during the time she is under repair, and for this purpose he is to require it of the master, unless the damage is such that in the Surveyor's judgment the certificate should be cancelled, in which case he should forward it to the officer authorized to grant certificates of survey under the Act, who will obtain the orders of Government on the subject. In all cases of serious damage the certificates should be cancelled.

Certificate may be endorsed if it has not been cancelled.

128. When the vessel is in every respect rendered sea-worthy and efficient, both in hull and machinery, to the entire satisfaction of the Surveyor, he is to put an endorsement on the back of the certificate and duplicate, if they have not previously been cancelled

to the effect that the damage has been made good so as to last for the period for which the certificate was granted, and return the certificate to the master or owner, or his agent, and allow the vessel to proceed.

CERTIFICATES OF MASTERS, MATES, AND ENGINEERS.

Surveyors inspect certificates.

129. It will be the duty of the Surveyor to report in his declaration that the certificates of the Master, Mates, Engineers, and Engine-drivers of the vessel under survey are such as are required by the Act.

The Surveyors are to state on their declarations, in the appropriate place, the number and description of these certificates.

The details of the officers' certificates should be taken from the certificates themselves at every survey, the Surveyors carefully noting that by their certificates the officers are qualified for the positions they occupy.

PASSENGER ACCOMMODATION.*

Passenger in sea-going steam-ships.

130. The upper weather deck and the upper surface of the poop, forecastle, and spar deck being exposed to the weather are not to be included in the measurements for passengers in sea-going steamers, during the foul season as defined by Government notification No. 1366, dated Simla, 26th May 1882, nor on voyages extending to 120 hours and upwards; nor are the poop, round-house, or deck-house to be measured for passengers, unless they form part of the permanent structure of the vessel. They should in all cases be railed round at the top to prevent passengers from falling overboard.

Care should be taken that the means provided for ventilation are sufficient to allow of a good supply of air in the event of the hatches being closed in bad weather. Places ventilated by hatches only, or in which provision is not made for a sufficient supply of air and light under *ALL* circumstances, should not be measured for passengers.

Divisors for space check.

131. Sea-going steam-ships carrying more than 12 passengers, and not coming within the operation of the Passengers Act, 1876, are to be measured as follows:—

Saloon or 1st class.—The number of properly constructed fixed berths or sofas that are fitted determine the number of passengers to be allowed, if sufficient light and ventilation is provided and a reasonable amount of floor space—2nd class.—The number is found in the same way as the 1st class. The number of 3rd-class passengers may be determined in like manner, if berths are fitted; if not, the number of passengers for each deck shall be determined according to the following scale:—

	Fair season, square feet.	Foul season, square feet.	Long voyage.
Hurricane deck, bridge or poop ...	... 6	0	0
Main or upper deck	... 6	9	0
Upper 'tween decks	... 9	9	9
Lower „ „	... 12	15	15

When 'tween deck passengers are carried, for each person so carried a space of 4 square feet is to be allowed on the upper deck or hurricane deck, bridge or poop.

The height of between decks to be in no case less than 6 feet from deck to deck when 'tween deck passengers are carried.

The breadth of the deck is taken inside the waterway, or at the greatest tumble home, if the sides do tumble home.

* Detailed instructions as to the proper mode of ascertaining the maximum number of passengers to be carried under the different classes of passenger certificates will be found in the appendix. (See Appendix A.)

Deduction when stores are carried in passenger space.

132. When cargo or stores are carried in the space measured for passengers, the area in superficial feet of deck space so occupied is to be deducted.

In the following rules the words "deck passengers" are intended to include all passengers, whether carried on deck or in the cabins, except passengers entered as 2nd class or saloon passengers in the way bill.

Water-closets in sea-going ships.

133. In addition to, and exclusive of, closets for cabin and saloon passengers, closets are to be provided for the *exclusive use of deck passengers* in the ratio of three for every two hundred deck passengers allowed by the survey certificate, and a fair proportion are to be allotted to the sole use of women and children, and so marked outside. Clear passages to these closets must always be maintained. In no case is a less number than two to be provided. These closets should be clean, well lighted, and well drained, and must be of sufficient height and size, and effectually protected from weather and sea.

Arrangement necessary when cattle are carried

134. If cattle are carried under cover on the same level deck as passengers, they are to be separated from the passenger space by a moveable close bulkhead running athwartships across the deck, and extending from the deck to the covering above, or must be otherwise efficiently separated.

When the cattle are not under cover, the space occupied by the cattle shall be effectually shut off from the passenger space by bulk-heads, wooden partitions, or otherwise. The partitions need not be close; but efficient wash-boards must be fitted to prevent the dung or urine of the cattle from getting on to the passenger space.

If cattle are carried either in the 'tween decks or holds, then the passenger space must be effectually shut off from the cattle space, and separately ventilated, so that no effluvia from the cattle space can escape into the passenger space.

135. The Surveyors should measure the ship in sections or parts, as set forth in the applications for survey, taking care that some definite limits, or some mark, or conspicuous object, indicates the boundary of each space which is measured separately.

The deck space set apart for deck or third class passengers is always to be measured from abaft the windlass (as at present), to a mark which, in paddle steamers, shall be placed over the shafts, and in other vessels shall be an arbitrary line marked vertically on the house or bulwarks amidships, or as near thereto as convenient. From this mark aft the deck space is to be measured as far as the deck or third class passengers accommodation extends, whether to a break or raised quarter-deck; to a poop or the entire after length of the deck, to the wheel, as the case may be. The breadth of measurement shall be to a point which affords good and convenient foot-room.

Spaces on deck for first class passengers, and for all passengers other than those included in the category of deck or third class passengers, are to be measured in a similar manner.

The breadths are taken from inside the gutter waterway, or the inside edge of the raised covering board, or inside edge of the rail, if the bulwarks tumble home further than the inside edge of water-way or covering board. Clear area means the space after all incumbrances, such as hatchways, skylights, companions, steam-chest casings, funnel casings, wheel, windlass, binnacles, masts, dunnage for luggage, boats carried inboard, and fittings for cattle, &c., are deducted, and in no case is the crew space to be included.

Where cargo, cattle, &c., are carried in the space measured for passengers in sea-going passenger

NOTICE.

The 6th November 1885.—The following draft of Rules, which it is proposed to issue under section 29 of Act VI of 1884 and section 36 of Act VII of 1884, is published for general information. The Rules will be taken into consideration on the expiry of a month from the date of the first publication of the Rules in the *Calcutta Gazette*. The Lieutenant-Governor will receive and consider any objection or suggestion which may be made by any person with respect to the rules before the period specified above.

J. WARR EDGAR,
Offg. Secy. to the Govt. of Bengal.

Rules for the examination of, and grant of Certificates to, Masters of Inland Steam Vessels under section 29, Act VI of 1884.

1. Candidates for certificates as first class Masters of Inland Steam vessels must be not less than twenty-one years of age and must have served either three years at sea and three years as Mate of a river steamer or Master of a flat, or six years as Mate of a river steamer or Master of a river flat.

2. Every such Candidate shall apply for permission to appear for examination in a printed form* to be filled up by him and forwarded to the Port Officer, Calcutta, together with such documentary evidence as shall satisfy the Port Officer that the Candidate has complied with the conditions of Rule 66 above, and that he is of sober habits and of good character. Each Candidate shall forward with his application a fee of Rs. 16, which will not be returned in case of failure.

* Copies will be supplied to intending Candidates by the Port Officer, Calcutta, on application.

3. The Port Officer shall notify to accepted Candidates the date and hour of examination, in fixing which he shall have due regard to the convenience of their employers. The fees of any Candidate who is not accepted shall be returned to him.

4. The examination of Candidates shall ordinarily be conducted by the Committee which sits quarterly for the examination of Pilots, assisted by two persons selected in each case by the Port Officer, holding certificates as first class Masters of Inland Steam Vessels, duly in force under these rules. But the Port Officer may at any time convene a Special Committee for the examination of Candidates under these rules.

5. Before proceeding to examine any Candidate in the manner provided in the rule next following, the Committee shall carefully test his ability to distinguish the following colours which enter largely into the combinations of signals by day and night, viz. black, white, red, green, yellow, and blue. In the event of any Candidate failing to satisfy completely the usual tests for colour-blindness in respect of all of these colours, the Committee will decline to proceed with his examination, and will report the case through the Port Officer for the information of the local Government.

6. The Committee will examine each Candidate apart, and *viva voce*, in each and all of the following subjects: –

(1).—The names and courses of the river reaches from Calcutta to Mud Point, and the extent of the sands in such reaches.

(2).—The sets of the tides within the said limits.

(3).—The names of all points in the river within the said limits.

(4).—The candidate's general knowledge of soundings in the channels and over the sands within the said limits.

(5).—The tracks over the Moyapore and Royapore flats, the Fultah tracks, and the Eastern and Western Guts.

(6).—The marks for fair channels or hauling in to reaches where such exist.

(7).—The marks for the limits of sands where such exist.

(8).—The rules of the road.

(9).—The management of river steamers under all contingencies of meeting, overtaking, and passing vessels in all possible positions within the limits described in No. 1.

(10).—The Tide Table.

(11).—The rules of the Port of Calcutta including the prescribed Storm Signals.

(12).—The provisions of Act VI of 1884, and the rules framed under it.

7. If the Candidate satisfy the Committee as to his knowledge of the subjects set forth in the foregoing rule, and generally as to his competency to command an inland river steamer, they shall certify the same to the Port Officer, who will then grant a certificate of such competency in the form appended to these rules.

8. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate and the other shall be kept and recorded by the Port Office.

9. No Candidate who fails to satisfy the Committee shall be at liberty to submit a fresh application for examination until six months have passed from the date of such failure.

10. A candidate for a certificate as second class Master of an Inland Steam vessel must produce satisfactory certificates of sobriety and intelligence, and that he has served four years as mate of a small steam vessel or helmsman of a large steam vessel, and shall be examined by the examining body defined in rule 69 *viva voce* as to his knowledge in the following subjects :—Colours, rule of the road and lights, management of small river steamers, rules of the Port of Calcutta and storm signals.

11. A fee of Rs. 6 will be charged, which will not be returned in case of failure.

By the Honourable the Lieutenant-Governor of Bengal.

Government of Bengal.

Certificate of Competency

AS

FIRST CLASS MASTER OF AN INLAND STEAM VESSEL UNDER ACT VI OF 1884.

To

Mr. _____

Whereas it has been reported to me that you have been found, after examination, duly qualified to fulfil the duties of First-class Master of an Inland Steam Vessel under Act VI of 1884, I do hereby grant you this CERTIFICATE OF COMPETENCY as such First-class Master.

Given *under my* Hand and Seal,

By order of the Government of Bengal,

Port Officer, Calcutta.

This _____ *day of* _____ 18____.

Registered at the Office of the Port Officer.

No. of Certificate

*Address of Owner*_____

*Date and Place of Birth*_____

*Signature*_____

N.B.—Any person other than the owner thereof becoming possessed of this Certificate is required to transmit it forthwith to the Port Officer, Calcutta.

*Issued at the Port of Calcutta on the*_____ *day of*_____ 18____.

By the Honorable the Lieutenant-Governor of Bengal.

Government of Bengal.

Certificate of Competency

AS

SECOND CLASS MASTER OF AN INLAND STEAM VESSEL UNDER ACT VI OF 1884.

To

Mr._____

Whereas *it has been reported to me that you have been found, after examination, duly qualified to fulfil the duties of Second-class Master of an Inland Steam Vessel under Act VI of* 1884, *I do hereby grant you this CERTIFICATE OF COMPETENCY as such Second-class Master.*

By order of the Government of Bengal,

Given *under my* Hand and Seal,

Port Officer, Calcutta.

This_____ *day of*_____ 18____.

Registered at the Office of the Port Officer.

No. of Certificate

*Address of Owner*_____

*Date and Place of Birth*_____

*Signature*_____

N.B.—Any person other than the owner thereof becoming possessed of this Certificate is required to transmit it forthwith to the Port Officer, Calcutta.

*Issued at the Port of Calcutta on the*_____ *day of*_____ 18____.

REGULATIONS

RELATING TO THE

EXAMINATIONS OF ENGINEERS AND ENGINE-DRIVERS.

UNDER SECTION 29, ACT VI OF 1884, AND SECTION 36, ACT VII OF 1884.

EXAMINATION OF ENGINEERS FOR CERTIFICATES OF COMPETENCY.

Preliminary.

The penalties incurred by persons proceeding to sea in the capacity of Engineers or Engine-drivers without possessing the necessary certificate are laid down in the Indian Steam Ships Act, VII of 1884, and the Inland Steam Vessels Act, VI of 1884.

Certificates of competency granted to persons who pass requisite examinations.

1. CERTIFICATES of competency will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions.

2. Examinations will be held once every two months by the Chief Engineer of the Dockyard, and two Engineers who will be appointed by the local Government under section 22 of Act VI of 1884, and section 26 of Act VII of 1884. The Chief Engineer will be the permanent President of the Examining Committee, and the other members will usually be selected from the Superintending Engineers of the different Steam Companies in the port. Each examiner will receive a fee of Rs. 32 for the examination.

3. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate and the other shall be kept and recorded by the Port Officer.

Examinations continued till all the candidates are examined.

4. The examinations will commence early in the forenoon and will be continued from day to day until all the candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Application how to be made.

5. The application for examination is to be made on Form Exn. 3, which may be obtained at the Port Office. The Exn. 3 properly filled in, together with the Candidate's testimonials, must be lodged with the Port Officer not later than the day before the day of examination.

Testimonials required.

6. Applicants will be required to produce, in addition to the usual Forms of Discharge, satisfactory testimonials as to sobriety, experience, ability, and general good conduct for at least the 12 months immediately preceding the date of application to be examined, and without producing them no person will be examined. If the service has been on shore the testimonial must be signed by an Employer, if at sea by the Master Managing Owner, and Chief or Superintending Engineer.

7. As such testimonials and discharges have to be verified before the candidates can be examined, it is desirable that they should be handed in, together with the Form Exn. 3, as early as possible.

Testimonials of Foreigners

8. The testimonials of servitude of Foreigners and of British Seamen serving in foreign vessels which cannot be verified by the Port Officer must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Local Government.

Certificate as to age.

9. Should any doubt exist as to the age of a Candidate he will be required to produce a Certificate of Birth or Baptism.

Foreigners to know English.

10. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel.

Verification of services, &c., by Articles.

11. Services which cannot be verified by proper entries in the Articles of the Ships in which the Candidates have served cannot be counted.

12. Service performed on rivers, or within smooth or partially smooth water limits, cannot be accepted, except for inland steamers.

Assistant Engineer.

13 Service entered upon a Ship's Articles as having been performed in the capacity of Assistant Engineer must be supported by proof of the Candidate having acted as 2nd, 3rd, 4th, &c., Engineer, as the case may be.

Service in Home or Coasting Trade.

14. The service required by the Regulations to qualify a candidate for examination is to be regarded as referring to service in the Foreign Trade only. Service in the Home or Coasting Trade must amount to at least half as much again as that required by the Regulations to make up for the time spent in Port, *e.g.*, for every twelve months' service under the Regulations, eighteen months' service in Home Trade or Coasting Vessels will be required.

Service as Engineer only accepted as qualifying service.

15. Service in the engine-room (afterwards referred to) for qualifying a candidate to be examined for a Second-class Engineer's Certificate must be only in those capacities which afford opportunities of obtaining practical experience as an engineer; and service in the capacity of fireman stoker, donkeyman, greaser, winchman, labourer, engineer's steward, or any other capacity than that of engineer taking watch will not be accepted

Service as Third Engineer.

16. Service as a Third Engineer in Steamers, where more than three Engineers are carried, their names being entered on the Articles in their respective ratings on board, may be accepted as equivalent to service as Second Engineer for qualifying a candidate for examination for a First-class Engineer's Certificate, provided the candidate has been in possession of a Second-class Engineer's Certificate (Imperial or under an Order in Council) during the performance of such service, and his name has been entered on the Articles as Third Engineer.

Service as Second Engineer where Certificate not required.

17. If a candidate has served in the Engine-Room with a Second-class Certificate in the capacity of a Second Engineer in Foreign-going Steam Ships under 100 horse-power or in Home Trade Passenger Steam Ships, which are not required by law to carry a certificated Second Engineer, his service may be accepted without reference to the vessel's horse-power, provided he has been on the ship's articles as Second Engineer, and produces certificates of discharge as Second Engineer, for the required period.

First-class Certificates without Second.

18. The Port Officer may see fit to allow an applicant who, in consequence of service abroad, has been unable to obtain a Second class Certificate, to be examined for a First-class Certificate, without first obtaining a Certificate of the lower grade, provided he is able to satisfy him as to the satisfactory character of his services.

Unsuccessful candidates may in certain cases receive Certificates for inferior grade.

19. In such cases (para. 17) or in cases where the candidate is already in possession of a Certificate of Service, should he fail to pass the examination for the higher grade, but passes the examination for the lower grade, he may receive a Certificate accordingly, but no part of the fee will be returned.

Consequence of failure in such cases.

20. A candidate who under the above regulation (para. 17) has been permitted to be examined for a First-class Certificate without first obtaining a Second-class Certificate of Competency, and who fails in his *viva voce* examination, may not be re-examined for a Certificate of the higher grade until he has served 12 months as Second Engineer with a Second-class Engineer's Certificate of Competency as required by the Regulations.

21. If the candidate fails altogether, *i.e.*, both in the examination for the lower as well as for the higher grade of Certificate (para. 17) he may be re-examined for a *Second-class Certificate only*, subject to the usual regulations relating to failure.

Inaccurate statements of service.

22. Every person who makes, or procures to be made, or assists in making, any false representation for the purpose of obtaining for himself or for any other person a Certificate of Competency, shall for each offence be liable to punishment under chapters V and XI of the Indian Penal Code.

23. These provisions will be *strictly enforced* by the Local Government, and any candidate for a Certificate of Competency as First or Second Engineer who shall, for the purpose of obtaining any such Certificate, present to the Examiner any "application to be examined for a Certificate of Competency" (Exn. 3.), or statutory declaration containing any false or inaccurate statement of service, and any other person who shall make or prepare, or assist in making or preparing, any such false or inaccurate statement will be *prosecuted*.

If after passing examination services are found to have been insufficient.

24. If after a candidate has passed his examination it is discovered on further investigation, *e.g.*, by verification on the part of the Port Officer that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, it will not be granted to him; but if the Local Government are satisfied that the error in the calculation of his services did not occur through any fault or wilful misrepresentation on his part, the Certificate may be issued to him, or he may be allowed to go up for re-examination without payment of further fee, when he has performed the amount of service in which he was deficient as the Local Government may direct.

Certificate of lower grade may be granted on certain conditions.

25. If, in such a case, the applicant's services are sufficient to entitle him to receive a Certificate of a lower grade, provided as aforesaid he has not wilfully misrepresented the amount of his services, an Inferior Certificate may be granted to him, and the difference between the fee paid by him for the Superior Certificate and the fee payable for the Inferior Certificate may be placed to his credit.

Must be re-examined for certificate of higher grade.

26. In such a case when the applicant has by further service made up the time in which he was found to be short, he may be required, before he can receive the higher Certificate, to be re-examined in all the subjects.

Qualifications for Certificates of Competency

27. AS ENGINE-DRIVERS.

a. Such certificates of competency will be granted only to those persons who possess the qualifications hereinafter detailed and otherwise comply with the requisite conditions.

b. Applications for such certificates of competency are to be made to the Port Officer, on whose recommendation examiners will be appointed to test the qualifications of candidates under the following rules.

c. A candidate for a certificate of competency under these rules must have attained the age of twenty-two years.

d. He must have the testimonial shown in one of the appendices to this code of rules filled up by the engineer with whom he has last served, or his other testimonials must contain all the particulars therein required.

e. The fee for examination under these rules will be ten rupees, and the amount must be remitted with the application to the Port Officer. If a candidate fails, no part of the fee he has paid will be returned to him.

f. Such certificates will be granted by the Port Officer in the form prescribed in one of the appendices to this code.

g. In case of failure, candidates may be re-examined *de novo* after a lapse of six months, if the past examination showed that they might reasonably be expected to qualify.

FOR INLAND STEAMERS UNDER ACT VI OF 1884.

a. He must have been three years principal serang or tindal in the engine-room of a steamer, or have been three years in charges of the engine of a factory or mill under a European manager or engineer, as well as one year principal serang or tindal or assistant engineer in the engine-room of a steamer under a certificated engineer, or he must prove that he has been employed for not less than five years in the making and repairing of engines, and has been employed as assistant in the engine-room of a steamer or in charge of a steam launch for a period of not less than twelve months.

b. He must pass a *viva voce* examination before the Board of Examiners as to the working of an engine and the use of its different parts.

c. He must be able to show his practical qualifications by one week's trial in a Government steamer after fulfilling the other tests to which he will be subjected.

FOR SEA-GOING STEAMERS UNDER ACT VII OF 1884.

A candidate will be required to have served three years as principal serang or as tindal in the engine-room of a sea-going steamer under a certificated Engineer, and to show, in addition to the qualifications required of a candidate for a certificate of competency as engine-driver of an inland steamer under Act VI of 1884, a knowledge of the use of brine cocks and blowing off of the salinometer, and of the care of the boiler in salt-water.

FOR INLAND STEAMERS UNDER ACT VI OF 1884.

Qualification of candidate for Inland Engineer's Certificate.

28. A candidate for a certificate as Engineer for Inland Steamers must have served an apprenticeship to an Engineer, of three years in England or five years in India, and must prove that during the period of his apprenticeship he has been employed on the making and repairing of engines. Or, if he has not served an apprenticeship, he must prove that for not less than three years in England or five years in India he has been employed as a journeyman or master-hand in some factory or workshop on the making or repairing of engines. In either case he must also have served two years thereafter as an engine-driver or Engineer afloat. Any one who has passed as a Second class Engineer under Act VII of 1884 will be considered to be qualified as an Engineer for inland steamers.

FOR SEA-GOING STEAMERS.

Qualification of candidate for Second class Engineer's Certificate.

29. SECOND-CLASS ENGINEER.—A candidate for a Second-class Engineer's Certificate must be 21 years of age;

He must have served an apprenticeship to an Engineer for three years in England or five in India at least, and prove that during the period of his apprenticeship he has been employed on the making and repairing of engines. Or if he has not served an apprenticeship, he must prove that for not less than three years in England or five in India he has been employed as a journeyman mechanic in some factory or workshop on the making or repairing of engines.* In either case he must also have served one year at sea in the engine-room as an Engineer on the Watch in the Foreign, or eighteen months in the Home or Coasting Trade; or

He must have served at least four years at sea in the engine-room as an Engineer on the Watch in the Foreign, or six years in the Home, or Coasting Trade.

* These may be either land or marine engines.

FOR BOTH CLASSES OF CANDIDATES.

(*a*) He must be able to give a description of boilers and the methods of staying them, together with the use and management of the different valves, cocks, pipes, and connections.

(*b*) He must understand how to correct defects from accident, decay, &c., and the means of repairing such defects.

(*c*) He must understand the use of the barometer, thermometer, and salinometer, and the principles on which they are constructed.

(*d*) He must state the causes, effects, and usual remedies for incrustation and corrosion.

(*e*) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total break down.

(*f*) He must write a legible hand, and understand the first five rules of arithmetic, and decimals, and their application to questions about consumption of stores, and full capacities of tanks and bunkers, the duty of pumps, and the direct strains in engines and boilers.

(*g*) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines in general use; as to the details of the different working parts, external and internal, and the use of each part.

FOR SEA-GOING STEAMERS.

Qualification of candidate for First-class Engineer's Certificate.

30. FIRST-CLASS ENGINEER.—A candidate for a First-class Engineer's Certificate must be 22 years of age.

31. In addition to the qualification required for a Second-class Engineer;

(*a*) He must have served for one year at sea as Second Engineer with a Second-class Engineer's Certificate of Competency *(See also para. 15 as regards service as Third Engineer).*

(*b*) The Examiner should therefore be satisfied that an applicant for a First-class Engineer's Certificate has not only been *in possession* of a Second class Certificate for the periods above stated, but that he has actually *served* for such periods in the engine-room, at sea with a Second-class Certificate, in the capacities referred to, and that his name has been entered in the articles of agreement accordingly. *(See also para. 17)*

32. (*a*) He will be required to make an intelligible hand sketch, or a working drawing of some one or more of the principal parts of a steam-engine; and to mark in, without a copy, all the necessary dimensions in figures, so that the sketch or drawing could be worked from.*

(*b*) He must also be able to take off and calculate indicator diagrams.

(*c*) He must be able to calculate safety-valve pressures and the strength of the boiler, shell, stay, and rivetting.

(*d*) He must be able to state the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct strain, the twisting strain, and the bending strain in rectangular bars, and in round bars with given loads.

(*e*) He must be able to explain the method of testing and altering the setting of the slide valves, and to sketch about what difference any alteration in the slide valve will make in the indicator diagram, and of testing the fairness of the paddle and screw shafts and of adjusting them.

(*f*) He must be conversant with surface condensation, superheating, and the working of steam expansively.

(*g.*) His knowledge of arithmetic must include the mensuration of superficies and solids and the extraction of the square root, and the application of these rules to questions relating to the power, duty and economy of engines and boilers, and to the strains in rods, shafts, and levers of the engine.

Service in the Royal Navy or Indian Marine.

33. Retired Engineers of the Royal Navy or Indian Marine are qualified to be examined for First-class Engineer's Certificates in the Mercantile Marine, provided that their character and ability have been satisfactory. Engineers.

34 Retired First-class Assistant or Assistant Engineers of the Royal Navy or Indian Marine may be examined for Second-class Engineer's Certificates in the Mercantile Marine under similar conditions. Assistants Engineers.

35. Temporary service in the Royal Navy or Indian Marine does not count.

36. Service performed on shore in the capacity of Engineer Artificer may count as workshop service to qualify a candidate for examination for a Second-class Engineer's Certificate of Competency in the Mercantile Marine. Temporary service. Engineer Artificer.

37. Application for permission to be examined must be made to the Port Officer.

Fees.

38. Candidates for examination, in making their application on Form Exn. 3, will be required to pay the examination fees before any step is taken, whether by inquiring into their services or testing their qualifications, &c.

39. The fee for examination must be paid to the Port Officer.

40. If a candidate fails in his examination, *no part of the fee he has paid will be returned to him.* Fees to be paid by applicants for examination. (S. 133, Exn. 17.)

41. The fees are as follow:—

Engine-driver's Certificate - -	Rs.	10
Inland Engineer's Certificate - -	„	12
Second-class Engineer's Certificate -	„	12
First-class Engineer's Certificate -	„	24
First-class Engineer's Certificate if candidate is already in possession of a Second-class Certificate of competency granted by the Board of Trade or by the Government of a British Possession under Section 8 of the Merchant Shipping (Colonial) Act, 1869 - - - -	„	12
Renewal of any certificate - -	„	5

General Rules as to Examinations.

42. All books necessary for the use of candidates under examination will be provided by the Local Government, and applicants will not be permitted to take into the examination room any book, paper, document, or memoranda of any description whatever, and subject to the provisions referred to hereafter. They will also not be allowed to work out their problems on a slate or on waste paper. Candidates not to take books, &c., into examination room.

43. Candidates will be allowed in the time allotted to cancel any part of their work, and when required additional papers will be supplied by the examiners. These additional sheets must be attached to and form part of the examination papers.

44. Candidates for First-class Certificates have to pass an examination in Rough Working Drawing, which may be either hand sketches clearly dimensioned and complete in the necessary *views* and *sections*, or drawings to a scale Drawing boards and T squares will be provided by the Local Government, but the applicants will have to bring with them any drawing instruments they may require.*

Punishment for breaking rules.

45. In the event of any candidate being discovered copying from another, or affording any assistance or giving any information to another, or communicating in any way with another during the time of examination, he will be regarded as having failed in his examination, and will be turned back for three months, in the same manner as if he had failed in the practical part of the examination; and no part of the fees he may have paid for examination will be returned to him.

Leaving examination room

46. If a candidate leaves the room before answering any question which has been given to him, he cannot afterwards be permitted to answer it, but the Examiners may substitute other data or another question.

Questions from Form Exn. 15*a*.

47. All applicants presenting themselves for examination will be required to give written answers to eight out of a list of ten questions selected from Form Exn. 15*a*.,† "Elementary "Questions for the first examinations of Engineers for certificates of competency." These questions are intended to furnish a record to some extent of the candidate's knowledge at the time of his examination, and also to induce the candidates to pay more attention to their handwriting and spelling.

48. The Form Exn. 15*b*.,† on which these answers will be written, contains also some questions as to the experience of the applicant, to be answered by him in writing.

49. Examiners may add to their *viva voce* questions on the practical management of steam engines and boilers any of those contained in Exn. 15*a*.

50. If at the expiration of the time allowed the Candidate has worked out correctly the whole of the questions set to him, and given satisfactory answers in the *viva voce* examination, he will be declared to have passed.

51. If at the expiration of the time allowed he has not worked out the whole of the questions set to him, but if the result of the *viva voce* examination taken in connection with the answers to such of the questions as he has worked out is sufficient to satisfy the Examiner that the applicant is competent to take charge of engines, he will be declared to have passed.

52. In other cases he will be declared to have failed.

(Exn 15)

53. A report of the examination, and the examination papers, will be forwarded to the Port Officer on the Form Exn. 15).

Notification of having passed will be given to successful candidates. (Exn. 16.)

54. If the candidate passes he will receive the Form Exn. 16, which authorises the Port Officer to issue the Certificate to the candidate, whose testimonials, &c., will be returned at the same time. It is therefore important that the port of destination of the certificate should be the same on both the Form Exn. 16 and the Form Exn. 2. If circumstances should make any alteration necessary, the examiners should see that it is made in both forms, otherwise delay in the issue of the certificate may be caused.

Failure.

55. If the applicant fails in the *viva voce* or practical part of the examination he may not present himself for re-examination until he can produce proofs of THREE MONTHS' further service at sea as Engineer from the date of failure. If he fails in arithmetic or drawing only, he may come up again at any time. Engine-drivers may be examined *de novo* after six months, if the past examination shewed that they might reasonably be expected to qualify.

By the Honourable the Lieutenant-Governor of Bengal.

The 10th November 1885.

No. 446.—The following Resolution of the Government of India, Public Works Department, is republished for general information :—

No. 1638G., dated 30th October 1885.

Read again—

Public Works Department Resolution No. 195G., dated 4th February 1885.

Read also—

Memorandum from the Accountant-General, Public Works Department, No. 972, dated 26th September 1885.

RESOLUTION.—It having been brought to the notice of the Government of India that the rules for the conduct of the Civil Engineers' Provident Fund, promulgated in the

Resolution, now read again, are silent in regard to subscriptions during leave, His Excellency the Governor-General in Council is pleased to rule—

I.—That an officer on leave of any kind may, at his option, subscribe any sum he pleases, subject to a minimum of 5 per cent. on his leave allowances, and a maximum of 10 per cent. on the salary he would draw if on duty.

II.—That when an officer's leave allowances are drawn *in India*, the subscription shall be dealt with as usual on audit of salary. When, however, they are payable *out of India*, or when an officer is on leave without allowances, he can contribute such amount as he pleases between the minimum and maximum as in Rule I, but must make his own arrangements for so doing.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, British Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agent to the Governor-General for Central India, Rajputana, and Beluchistan.
The Accountant-General, Public Works Department.
The Inspector-General of Military Works.
The Director-General of Railways.

Orders and Notifications by the Government of India, &c.

[*Reprinted from the Gazette of India.*]

The following notifications, issued by the Government of India, Home Department, are republished for general information.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

NOTIFICATIONS.—EXAMINATIONS.

Simla, the 29th October 1885.

No. 96.—The following Regulations respecting the Examination of Candidates for the Civil Service of India, to be held in June 1885, are published for general information :—

EXAMINATIONS FOR THE CIVIL SERVICE OF INDIA.

REGULATIONS FOR THE OPEN COMPETITION OF JUNE 1886.

N.B.—The regulations are liable to be altered in future years.

1. On the 1st June 1886, and following days, an examination open to all qualified persons, will be held in London (*a*). Not fewer than persons will be selected, if so many shall be found duly qualified;—viz., for the Lower Provinces of Bengal (including Assam); for the Upper Provinces of Bengal (including the Punjab and Oudh); for Burma; for Madras; and for Bombay (*b*).

2. No person will be deemed qualified who shall not satisfy the Civil Service Commissioners—

(i) That he is a natural-born subject of Her Majesty.

(ii) That his age will be above seventeen years and under nineteen years on the 1st January 1886. [*N.B.—In the case of Natives of India, this must be certified by the Government of India, or of the Presidency or Province in which the candidate may have resided.*]

(iii) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India.

(iv) That he is of good moral character.

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the candidate, on payment of the prescribed fee (*c*), will be admitted to the examination. The Commissioners may, however, in their discretion, at any time prior to the grant of the certificate of qualification hereinafter referred to, institute such further inquiries as they may deem necessary; and if the result of such inquiries, in the case of any candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India; and, if already selected, will be removed from the position of a Probationer.

(*a*) An order for admission to the Examination will be sent to each candidate on the 18th of May.
(*b*) The numbers will be announced hereafter.
(*c*) The fee (£5) will be payable by means of a special stamp according to instructions which will be communicated to candidates.

4. The examination will take place only in the following branches of knowledge :—

		Marks.
	English composition	300
(*d*)	History of England—including a period selected by the candidate	300
(*d*)	English Literature—including books selected by the candidate	300
	Greek	600
	Latin	800
	French	500
	German	500
	Italian	4 0
(*e*)	Mathematics (pure and mixed)	1,000
	Natural Science; that is, the elements of any two of the following Sciences. *viz.* :— Chemistry, 500; Electricity and Magnetism, 300; Experimental Laws of Heat and Light 300; Mechanical Philosophy, with outlines of Astronomy, 300.	
	Logic	300
	Elements of Political Economy	300
(*f*)	Sanskrit	500
(*f*)	Arabic	500

Candidates are at liberty to name any or all of these branches of knowledge. No subjects are obligatory.

5. The merit of the persons examined will be estimated by marks; and the number set opposite to each branch in the preceding regulation denotes the greatest number of marks that can be obtained in respect of it.

6. The marks assigned to Candidates in each branch will be subject to such deduction as the Civil Service Commissioners may deem necessary (*g*), in order to secure that "a Candidate be allowed no credit at all for taking up a subject in which he is a mere smatterer."

7. The examination will be conducted on paper and *viva voce*, as may be deemed neccesary.

8. The marks obtained by each Candidate in respect of each of the subjects in which he shall have been examined, will be added up, and the names of the several Candidates who shall have obtained after the deduction abovementioned, a greater aggregate number of marks than any of the remaining Candidates, will be set forth in order of merit, and such Candidates shall be deemed to be Selected Candidates for the Civil Service of India, provided they appear to be in other respects duly qualified. Should any of the Selected Candidates become disqualified, the Secretary of State for India will determine whether the vacancy thus created shall be filled up or not. In the former case, the candidate next in order of merit, and in other respects duly qualified, shall be deemed to be a Selected Candidate. A Selected Candidate declining to accept the appointment which may be offered to him will be disqualified for any subsequent competition.

9. Selected Candidates, before proceeding to India, will be on probation for two years, during which time they will be examined periodically, with a view of testing their progress in the following subjects (*h*) :—

		Marks.
1.	Law	1,250
2.	Classical Languages of India—	
	Sanskrit	500
	Arabic	400
	Persian	400
3.	Vernacular Languages of India (each)	400
4.	The History and Geography of India	350
5.	Political Economy	350

In these examinations, as in the open competition, the merit of the candidates examined will be estimated by marks, and the number set opposite to each subject denotes the greatest number of marks that can be obtained in respect of it at any one examination. The examination will be conducted on paper and *viva voce*, as may be deemed necessary. The last of these examinations will be held at the close of the second year of probation, and will be called the "Final Examination," at which it will be decided whether a selected candidate is qualified for the Civil Service of India. At this Examination Candidates

(*d*) A considerable portion of the marks for English History and Literature will be allotted to the work selected by the candidate. (See Notice on p. 4). In awarding marks for this, regard will be had partly to the extent and importance of the periods or books selected, but chiefly to the thoroughness with which they have been studied.

(*e*) The Examination will range from Arithmetic, Algebra and Elementary Geometry, up to the elements of the differential and integral calculus, including the lower portions of applied Mathematics.

(*f*) The standard of marking in Sanskrit and Arabic will be determined with reference to a high degree of proficiency, such as may be expected to be reached by a Native of good education.

(*g*) Marks assigned in English Composition and Mathematics will be subject to no deduction. Each science will, for the purpose of deduction, be treated as a separate subject.

(*h*) Full instructions as to the course of study to be pursued will be issued to the successful candidates as soon as possible after the result of the open competition is declared.

will be permitted to take up any one of the following branches of Natural Science, viz.—Agricultural Chemistry, Botany, Geology, or Zoology, for which 350 marks will be allowed.

10. Candidates will be tested during their probation as to their ability to perform journeys on horseback; and no candidate will be deemed qualified for the Civil Service of India who fails to satisfy the Civil Service Commissioners of his competence in this respect.

11. Any candidate who, at any of the periodical examinations, shall appear to have wilfully neglected his studies, or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of selected candidates.

12. The Selected Candidates who, at the final examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character, and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that service.

13. Persons desirous to be admitted as candidates must apply on forms,* which may be obtained from "The Secretary, Civil Service Commission, London, S. W.," at any time after the 1st December 1885. The forms must be returned so as to be received at the office of the Civil Service Commissioners on or before 31st March 1886 (*i*).

The Civil Service Commissioners are authorised by the Secretary of State for India in Council to make the following announcements:—

(1) *Selected Candidates will be permitted to choose, according to the order in which they stand in the list resulting from the open competition, so long as a choice remains, the Presidency (and in Bengal the Division of the Presidency) to which they shall be appointed; but this choice will be subject to a different arrangement, should the Secretary of State, or the Government of India, deem it necessary* (*k*).

(2) *The probationers, having passed the necessary examinations, will be required to report their arrival in India within such period after the grant of their certificate of qualification as the Secretary of State may in each case direct.*

(3) *The seniority in the Civil Service of India of the Selected Candidates shall be determined according to the order in which they stand on the list resulting from the Final Examination.*

(4) *An allowance amounting to £300 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State, viz., the Universities of Oxford Cambridge, Dublin, Glasgow, Edinburgh, St. Andrew's, and Aberdeen; University College, London; and King's College, London; provided such Candidates shall have passed the required Examinations to the satisfaction of the Civil Service Commissioners, and shall have complied with such rules as may be laid down for the guidance of Selected Candidates.*

Candidates are not permitted to migrate from the University originally chosen by them to another University without first applying to the India Office for the permission, and receiving the sanction, of the Secretary of State, who will not entertain such applications unless good and sufficient reasons are assigned.

(5) *Selected Candidates desiring to remain in this country an additional year after the completion of their two years' probation for the purpose of taking a degree at one of the Universities abovementioned, should apply to the Secretary of State for India for permission to do so. Besides the allowances abovementioned, a bonus of £150 will, as a temporary and experimental measure, be paid to any Candidate who, having obtained permission to remain an additional year, passes an examination qualifying for a degree in Honours at Oxford or Cambridge, or, being a student of University College, London, passes with credit an Honour Examination of the University of London. This privilege will be hereafter extended to any other of the Universities above referred to, at which an academical distinction is obtainable which, in the opinion of the Secretary of State, corresponds to a degree in Honours at Oxford or Cambridge, and to obtain which the additional year's residence in this country is necessary.*

(6) *All Selected Candidates will be required, after having passed the first periodical Examination, and before receiving the first instalment of their allowance, to attend at the India Office for the purpose of entering into an agreement binding themselves, amongst other things, to refund in certain cases the amount of their allowance in the event of their failing to proceed to India. A surety will be required.*

(*i*) These forms should be accompanied by evidence on the points mentioned in Regulation 2, and by a list of the subjects in which the candidate desires to be examined. Evidence of health and character must bear date not earlier than 1st March 1886. Applications for leave to alter or add to the list of subjects named will not be entertained unless received on or before the 4th of May.

(*k*) This choice must be exercised immediately after the result of the open competition is announced, on such day as may be fixed by the Civil Service Commissioners.

* Copies of these Regulations and of the form of application may be obtained on application to the Secretary to the Government of India in the Home Department.

(7) *After passing the Final Examination, each Candidate will be required to attend again at the India Office, with the view of entering into covenants, by which, amongst other things, they will bind themselves to agree to such Regulations for the provision of pensions for their families as may be approved by the Secretary of State for India in Council. The stamps payable on these covenants amounts to* £1.

(8) *Candidates rejected at the Final Examination of* 1888 *will in no cases be allowed to present themselves for re-examination.*

1886.

NOTICE RESPECTING THE EXAMINATION IN THE HISTORY OF ENGLAND AND ENGLISH LITERATURE.

HISTORY OF ENGLAND.

For the guidance of Candidates who may have a difficulty in making their selections for special study under this head, the following list is given as indicating the character and amount of reading that would be regarded as satisfactory.

Any one of the following periods, to be studied generally in "Bright's History," or (for the two first periods) Green's "History of the English People"; and more particularly in portions selected by the candidate of the text-books named :—

1. A D. 1066-1307.—Stubbs' Select Charters; Stubbs' Constitutional History of England; Freeman's Norman Conquest. Vol. V.
2. A D. 1461-1588.—Hallam's Constitutional History of England; Froude's History of England; Brewer's Henry VIII.
3. A.D. 1603-1715.—Hallam's Constitutional History of England; Macaulay's History of England; Gardiner's History of England; Wyon's Reign of Queen Anne.
4. A.D. 1715-1805.—Lord Stanhope's History; Sir T. E. May's Constitutional History; Seeley's Expansion of England; Massey's Reign of George III.

ENGLISH LITERATURE.

Under this head there will be (besides the general paper) a special paper on the following books :—

1. CHAUCER.—Prologue and Knighte's Tale.
2. SHAKESPEARE.—King Lear, Merchant of Venice.
3. BACON.—Essays, I XXX, inclusive,
4. BYRON.—Childe Harold
5. BURKE.—Thoughts on present Discontents; Speeches on American Taxation, and Conciliation with America.

The oral examination in English Literature will have reference chiefly to such works, *not included in the foregoing list,* as the Candidate may offer for the purpose.

CIVIL SERVICE COMMISSION,
September 1st, 1885.

EVIDENCE OF AGE TO BE REQUIRED FROM CANDIDATES FOR THE CIVIL SERVICE OF INDIA.

I. Every Candidate born in the United Kingdom should produce a certificate from the Registrar-General of Births, Marriages, and Deaths, or from one of his Provincial Officers. This certificate may be obtained from the Registrar-General in London, Dublin, or Edinburgh, or from the Superintendent Registrar of the District in which the birth took place.

II. A Candidate born of European parents in India may produce a Certificate of Baptism from the District in which he was baptised. When such Certificates are not in the possession of the Candidates, an extract from the registers kept at the India Office will probably be obtainable.

III. A Candidate, who is a native of India, must have his age certified by the Government of India, or of the Presidency or Province in which he may have resided.

Except as noted in paragraphs II and III, every Candidate is expected to produce a Certificate of *Birth.* The Civil Service Commissioners will not in ordinary cases accept a Certificate of Baptism, or other testimony, unless they are first satisfied that a Certificate of Birth cannot be procured.

Official Certificates of *Birth* may generally be obtained as follows :—

(*a*) *For persons born in England or Wales since 30th June* 1837.—From the Registrar-General, Somerset House, London, or from the Superintendent Registrar of the District in which the birth took place.

(*b*) *For persons born in Scotland since 31st December* 1854.—From the General Register Office, Edinburgh; or from the Registrar of the Parish or District in which the birth took place.

(c) *For persons born in Ireland since 31st December* 1863.—From the General Register Office, Dublin; or from the Superintendent Registrar of the District in which the birth took place.

(d) *For persons of English, Scottish or Irish parentage born on board British ships since the dates mentioned in* (a), (b), *and* (c) *respectively.*—From the General Register Office, London, Edinburgh, or Dublin, according to parentage.

(e) *For persons born in India of European parents.*—From the India Office, London.

Any Candidate who cannot produce a Certificate of Birth from one of the authorities named should, if possible, procure a Certificate of Baptism, and should then apply to the Secretary, Civil Service Commission, for further instructions.

CIVIL SERVICE OF INDIA.

FORM OF APPLICATION; TO BE FILLED UP BY CANDIDATES.

*** *This Form must be sent so as to be received at the Office of the Civil Service Commission on or before the* 31*st March* 1886.

Date _____

SIR,

BEING desirous to offer myself as a Candidate at the Examination for the Civil Service of India, which is appointed to commence on the 1st of June 1886, I transmit herewith, as required by the Regulations—

(1) If a General Register Office Certificate cannot be obtained, the instructions printed on the other side will show what evidence should be supplied. If evidence is already in the hands of the Commissioners, strike out "A Certificate of my birth," and insert "Evidence is already in the possession of the Commissioners."

(1) A Certificate of my birth, showing that I was born on the day of 18 , and that therefore my age was above 17 years and under 19 years on the 1st of January 1886.

(2) The terms indicated by the marks of quotation must appear in the Certificate, which must be given after personal examination, and bear date not earlier than 1st March 1886.

(2) A certificate signed by of my having "no disease, constitutional affection, or bodily infirmity unfitting me, or likely to unfit me, for the Civil Service of India."

(3) Two testimonials must be sent bearing date not earlier than 1st March 1886. One of them should be given by an intimate acquaintance (not a relative) of not less than three or four years' standing; the other, if the Candidate has recently left School, should be given by his late Schoolmaster, or if he has had employment of any kind, by his late employer. If the Candidate has been at any University, he should send a Certificate of good conduct from his College tutor.

(3) Proof of my moral character, viz.:—

(1) A testimonial from

(2) A testimonial from

(4) This should be given on the form herewith. If the History of England or English Literature be named, the schedule should also be filled up.

(4) A statement of the branches of knowledge in which I desire to be examined.

I have also to state, with reference to section 2, clause (i) of the Regulations, that I am a natural-born subject of Her Majesty.

I am, SIR,

Your obedient Servant,

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 29th October 1885.—It is hereby notified that the Lieutenant-Governor is pleased to appoint, under section 27 of Act III (B.C.) of 1884, Mr. G. J. B. T. Dalton to be Chairman of the Julpigoree Municipality, *vice* Mr. A. E. Staley, C.S.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 29th October 1885.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Moulvi Fazla Rahi to be a Commissioner of the Lalbagh Municipality, in the district of Moorshedabad, *vice* Mr. J. Reuther, resigned.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 31st October 1885.—Whereas a notification, dated the 12th June 1885, announcing the intention of the Lieutenant-Governor to declare the town of Jehanabad, in the district of Hooghly, to be a municipality, was published in the *Calcutta Gazette* of the 24th idem, and whereas no valid objections have been raised to the proposal within six weeks from the date of the publication of the said notification within the said town, it is hereby notified for general information that, in the exercise of the powers conferred on the Local Government by section 8, Act III (B.C.) of 1884, and on the recommendation of the local officers, the Lieutenant-Governor extends the provisions of the said Act to the said town of Jehanabad with effect from the 1st January 1886.

The boundaries of the said town of Jehanabad are as follows:—

On the North.—Survey mouzahs Dhadalsaha, Moygram and Kirtichundrapore, Dongabathan, Golta and Korni.

On the South.—Survey mouzahs Shambatti, Mothura and Mobarukpore Mât.

On the West.—Survey mouzahs Balibella, Patulsara and Belly.

On the East.—Gurbari and survey mouzahs Kulbyra, Moheshpore, Roghunathpore and Kutdohi.

The new municipality shall be included in both the first and second schedules of the said Act.

The number of Commissioners to be appointed to the Municipal Committee shall be ten.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 29th October 1885.—Under rule 8 of the rules framed under sections 6 and 7 of the Local Authorities Loan Act of 1879 it is hereby notified for general information that the Lieutenant-Governor intends to submit to the Government of India for sanction the following application from the Commissioners of the Burdwan Municipality for permission to raise a loan of Rs. 25 000, bearing interest at 5 per cent. per annum, unless good reasons to the contrary are shown within one month from the date of the publication of this notification within the said Municipality.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

The 9th November 1885.—It is hereby notified that the Lieutenant-Governor is pleased to appoint Surgeon-Major K. McLeod, M.D., to be a Commissioner of the municipality of the town of Calcutta, *vice* Dr E. A. Birch.

J. WARE EDGAR,
Offg. Secy. to the Govt of Bengal.

DECLARATION.

The 4th November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dacca Municipality for a public purpose, viz. for a road in continuation of Dhalkarnagore lane, in the village of Gundaria, in the town of Dacca, district Dacca, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 beegahs 5 cottahs 11 dhoors of standard measurement is required. The land is bounded on the north and south by the rice fields of Baharullahmiah and others; on the east by the side cutting of Dacca-Mymensingh State Railway, and on the west by the land of Sharva Mohun Pal and Dhalkarnagore lane.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

Notice.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of sál beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet length, at Rs. 2-10 per cubic foot.
22 " " 2-12 "
23 " " 2-14 "
24 " " 3 "

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c ft.
Under 12 and over 7, at " 2-4 "
Under 7 feet at " 2 "

The above prices are for ordinary building purposes.

For *Planking, Sleepers*, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

Second and Third Class Timber will be sold and price fixed by agreement.

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KANHYA LAL,
Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1883.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking twenty pounds at a time, from the Superintendent, Botanic Garden, Calcutta, for cash only, at the rate of Rs. 24 per pound. The general public can be supplied by the Superintendent, Botanic Garden, for cash only, and also by the principal European and Native druggists at Rs. 32 per pound. Postage twelve annas extra.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin, *Rs.* 4 *ans.* 8; per eight ounce tin, *Rs* 8 *ans.* 8; per pound tin, *Rs.* 16 *ans.* 8. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates:—per four ounce tin, *Rs.* 5 *ans.* 8; per eight ounce tin, *Rs.* 10 *ans.* 8; per pound tin, *Rs.* 20. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

Notice.

THE Public are hereby informed that the well-known Kartick Baruni Mela, which is held every year on the banks of the Dhaleshwari, near Munshigunge, in the district of Dacca, will commence on the 21st November 1885 A.D., corresponding to the 7th Augrahyan 1292 B.S., and continue up to the 3rd January 1886. Tradesmen, dealers, and others may buy and sell there during these six weeks.

F. WYER, Collector.

Notice.

GYA MICA MINES.

IT is proposed to give leases to prospect for and extract mica in the Government estates of Dubour and Chatkari in the district of Gya. Offers from persons likely to work the mines in a scientific manner will be received by the Collector of Gya.

D. NORTON, Offg. Collector

The 1st October 1885.

Notification.

WANTED a Canoongo temporarily for six months on Rs. 50 a month for supervising the collection of water-rates in the district of Shahabad.

Applications will be received up to the 15th November next.

S. P. CHATTERJEE, Special Dy. Collector.

Arrah, the 28th October 1885.

Wanted

A SURVEYOR and Draftsman for the Singbhoom Road Cess works for six months on a salary of Rs. 60 and fixed travelling allowance of Rs. 15 per mensem. Candidates must have the qualifications of a Public Works Department Overseer. Applications should be made to the Chairman before the 15th November with copies of testimonials.

UPENDRANATH BANERJEA, B.C.E.,
District Engineer, Singbhoom.

Chybassa, the 19th October 1885. (680—3)

Wanted

SUB-OVERSEER, salary Rs. 40, for the Purneah Road Cess Department.

None need apply but natives who have Public Works Department Sub-overseers' qualifications and have had a practical experience of road-making and measurements and are of sound constitution and active habits.

Copies of certificates, which will not be returned, should be submitted without delay to the District Engineer up to 20th November 1885.

A. WEEKES,
Chairman, District Road Cess Committee, Purneah.
(688—1)

Wanted

A SURVEYOR and Leveller to prepare a map and take levels of the municipal town of Kandi, consisting of an area of nearly six square miles. A lump sum will be paid for the whole work. Apply stating terms to the undersigned before the end of November current.

BEPIN BEHARI MOOKERJEE,
Chairman, Kandi Municipality.

Dated Kandi, the 2nd November 1885. (685—2)

WANTED a Tax Collector for the Hazaribagh town on Rs. 30 a month. None need apply who does not possess a competent knowledge of English and Hindi and in keeping accounts. Successful candidates will have to lodge a security deposit of Rs. 500 in cash or Government promissory note. Applications will be received by the undersigned up to the 15th November 1885.

C. H. GARRETT,
(686—1) Chairman, Hazaribagh Municipality.

DESTROYED.—The Government Promissory Note No. 142763 of the 4 % of 1842-43 for Rs. 1,000, originally standing in the name of the Bank of Bengal, and last endorsed to Bholanath Banerjee, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of the proprietor.

(682—3) BHOLANATH BANERJEE, Boinchee.

R Scott, Thomson & Co., "Ld."

THE Forty-fifth Half-yearly Ordinary General Meeting of Shareholders will be held at the registered office of the Company, 15, Government Place, on Friday, the 27th instant, at noon, for the purpose of declaring an *ad interim* dividend for the half-year which ended on the 30th September last.

By order of the Directors,

ROBT. J. CARBERY, Secretary and Accountant.

Calcutta, 3rd November 1885. (684—3)

Commissariat Notice No. 13.

TWO flour mills, each workable by a pair of bullocks, are available for sale, one at Golaghat, and the other at Dinapore; and likewise water-mill apparatus (forming four mills) at the latter place. This has never been brought into use, and comprises the following—

6 Boards, wooden.
2 Top boards, wooden.
4 Boards in pieces.
1 Bottom board.
15 Cross beams.
1 Centre beam.
8 Mill-stones.
4 Wooden funnels.
7 Brass brushes.
32 Screws, small.
8 Do., large.
5 Flying wheels.

Gross weight of the water-mills is about 35 maunds, and that of the bullock mills about 70 maunds each.

Offers are invited for the purchase—

1*st.*—Deliverable at the places where the intending purchasers may wish.

2*nd.*—Deliverable at the place of sale. The bullock mills, though brought into use, are as good as new.

E. DEC. RENNICK, Captain,
Assistant Commissary-General.

Shillong, Executive Commissariat Office, the 18th September 1885.

Notice.

P. B. ROBERTS, C.E., *Executive Engineer, Nuddea Rivers Division.*

Berhampore, the 9th November 1885.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage.	With postage
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
,, each of the Madras, Bombay, and Allahabad Series ...	,, 6 0	,, 7 0
,, a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	,, 2 0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ...	.....	,, 1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
,, Thacker & Co., Bombay.
,, Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
,, Curator of Government Books, North-Western Provinces and Oudh.
,, Superintendent of Government Printing Bengal.

Orders and subscriptions for 1885 *should be at once remitted.*

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor-General of India in Council received the assent of His Excellency the Governor-General on the 16th October, 1885, and is hereby promulgated for general information:—

ACT No. XVIII OF 1885.

THE LAND ACQUISITION (MINES) ACT, 1885.

CONTENTS.

SECTIONS.

1. Short title, commencement and local extent.
2. Saving for mineral rights of the Government.
3. Declaration that mines are not needed.
4. Notice to be given before working mines lying under land.
5. Power to prevent or restrict working.
6. Mode of determining persons interested and amount of compensation.
7. If Local Government does not offer to pay compensation, mines may be worked in a proper manner.
8. Mining communications.
9. Local Government to pay compensation for injury done to mines.
10. And also for injury arising from any airway or other work.
11. Power to officer of Local Government to enter and inspect the working of mines.
12. Penalty for refusal to allow inspection.
13. If mines worked contrary to provisions of this Act, Local Government may require means to be adopted for safety of land acquired.
14. Construction of Act when land acquired has been transferred to a local authority or Company.
15. Pending cases.
16. Definition of local authority and Company.
17. This Act to be read with Land Acquisition Act, 1870.

An Act to provide for cases in which Mines or Minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870.

WHEREAS it is expedient to provide for cases in which mines or minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870; It is hereby enacted as follows:— X of 1870.

1. *(1)* This Act may be called the Land Acquisition (Mines) Act, 1885; and

Short title, commencement and local extent.

(2) It shall come into force at once.

(3) It extends in the first instance to the territories administered by the Governor of Madras in Council and the Lieutenant-Governor of Bengal, but any other Local Government may, from time to time, by notification in the official Gazette, extend this Act to the whole or any specified part of the territories under its administration.

2. Except as expressly provided by this Act, nothing in this Act shall affect the right of the Government to any mines or minerals.

Saving for mineral rights of the Government.

3. *(1)* When the Local Government makes a declaration under section 6 of the Land Acquisition Act, 1870, that land is needed for a public purpose or for a Company, it may, if it thinks fit, insert in the declaration a statement that the mines of coal, iron-stone, slate or other minerals lying under the land or any particular portion of the land, except only such parts of the mines or minerals as it may be necessary to dig or carry away or use in the construction of the work for the purpose of which the land is being acquired, are not needed. X of 1870.

Declaration that mines are not needed.

(2) When a statement as aforesaid has not been inserted in the declaration made in respect of any land under section 6 of the Land Acquisition Act, 1870, and the Collector is of opinion that the provisions of this Act ought to be applied to the land, he may abstain from tendering compensation under section 11 of the said Land Acquisition Act in respect of the mines, and may— X of 1870.

(a) when he makes an award under section 11 of that Act, insert such a statement in his award;

(b) when he makes a reference to the Court under section 15 of that Act, insert such a statement in his reference; or

The Land Acquisition (Mines) Act, 1885.—(Sections 4-10.)

(c) when he takes possession of the land under section 17 of that Act, publish such a statement in such manner as the Governor-General in Council may, from time to time, prescribe.

(3) If any such statement is inserted in the declaration, award or reference, or published as aforesaid, the mines of coal, iron-stone, slate or other minerals under the land or portion of the land specified in the statement, except as aforesaid, shall not vest in the Government when the land so vests under the said Act.

Notice to be given before working mines lying under land.

4. If the person for the time being immediately entitled to work or get any mines or minerals lying under any land so acquired is desirous of working or getting the same, he shall give the Local Government notice in writing of his intention so to do sixty days before the commencement of working.

Power to prevent or restrict working.

5. *(1)* At any time or times after the receipt of a notice under the last foregoing section, and whether before or after the expiration of the said period of sixty days, the Local Government may cause the mines or minerals to be inspected by a person appointed by it for the purpose; and

(2) If it appears to the Local Government that the working or getting of the mines or minerals, or any part thereof, is likely to cause damage to the surface of the land or any works thereon, the Local Government may publish, in such manner as the Governor General in Council may, from time to time, direct, a declaration of its willingness either—

(a) to pay compensation for the mines or minerals still unworked or ungotten, or that part thereof, to all persons having an interest in the same; or

(b) to pay compensation to all such persons in consideration of those mines or minerals, or that part thereof, being worked or gotten in such manner and subject to such restrictions as the Local Government may in its declaration specify.

(3) If the declaration mentioned in case *(a)* is made, then those mines or minerals, or that part thereof, shall not thereafter be worked or gotten by any person.

(4) If the declaration mentioned in case *(b)* is made, then those mines or minerals, or that part thereof, shall not thereafter be worked or gotten by any person save in the manner and subject to the restrictions specified by the Local Government.

Mode of determining persons interested and amount of compensation.

6. When the working or getting of any mines or minerals has been prevented or restricted under section 5, the persons interested in those mines or minerals and the amounts of compensation payable to them respectively shall, subject to all necessary modifications, be ascertained in the manner provided by the Land Acquisition Act, 1870, for ascertaining the persons interested in the land to be acquired under that Act, and the amounts of compensation payable to them, respectively.

X of 1870.

If Local Government does not offer to pay compensation, mines may be worked in a proper manner.

7. *(1)* If before the expiration of the said sixty days the Local Government does not publish a declaration as provided in section 5, the owner, lessee or occupier of the mines may, unless and until such a declaration is subsequently made, work the mines or any part thereof in a manner proper and necessary for the beneficial working thereof, and according to the usual manner of working such mines in the local area where the same are situate.

(2) If any damage or obstruction is caused to the surface of the land or any works thereon by improper working of the mines, the owner, lessee or occupier of the mines shall at once, at his own expense, repair the damage or remove the obstruction, as the case may require.

(3) If the repair or removal is not at once effected, or, if the Local Government so thinks fit, without waiting for the same to be effected by the owner, lessee or occupier, the Local Government may execute the same and recover from the owner, lessee or occupier the expense occasioned thereby.

Mining communications.

8. If the working of any mines is prevented or restricted under section 5, the respective owners, lessees and occupiers of the mines, if their mines extend so as to lie on both sides of the mines the working of which is prevented or restricted, may cut and make such and so many airways, headways, gateways or water-levels through the mines, measures or strata, the working whereof is prevented or restricted, as may be requisite to enable them to ventilate, drain and work their said mines; but no such airway, headway, gateway or water-level shall be of greater dimensions or section than may be prescribed by the Governor General in Council in this behalf, and, where no dimensions are so prescribed, not greater than eight feet wide and eight feet high, nor shall the same be cut or made upon any part of the surface or works, or so as to injure the same, or to interfere with the use thereof.

Local Government to pay compensation for injury done to mines.

9. The Local Government shall, from time to time, pay to the owner, lessee or occupier of any such mines extending so as to lie on both sides of the mines, the working of which is prevented or restricted, all such additional expenses and losses as may be incurred by him by reason of the severance of the lands lying over those mines or of the continuous working of those mines being interrupted as aforesaid, or by reason of the same being worked in such manner and under such restrictions as not to prejudice or injure the surface or works, and for any minerals not acquired by the Local Government which cannot be obtained by reason of the action taken under the foregoing sections; and if any dispute or question arises between the Local Government and the owner, lessee or occupier as aforesaid, touching the amount of those losses or expenses, the same shall be settled as nearly as may be in the manner provided for the settlement of questions touching the amount of compensation payable under the Land Acquisition Act, 1870.

X of 1870.

And also for injury arising from any airway or other work.

10. If any loss or damage is sustained by the owner or occupier of the lands lying over any such mines, the working whereof has been so prevented or restricted as aforesaid (and not being the owner, lessee or occupier of those mines), by reason of the making of any such airway or other works as aforesaid, which or any like work it would not have been necessary to make but for the working of the mines having been so prevented or restricted as aforesaid, the Local Government shall pay full compensation to that owner or occupier of the surface lands for the loss or damage so sustained by him.

The Land Acquisition (Mines) Act, 1885.—(Sections 11-17.)

Power to officer of Local Government to enter and inspect the working of mines.

11. For better ascertaining whether any mines lying under land acquired in accordance with the provisions of this Act are being worked, or have been worked, or are likely to be worked so as to damage the land or the works thereon, an officer appointed for this purpose by the Local Government may, after giving twenty-four hours' notice in writing, enter into and return from any such mines or the works connected therewith; and for that purpose the officer so appointed may make use of any apparatus or machinery belonging to the owner, lessee or occupier of the mines, and use all necessary means for discovering the distance from any part of the land acquired to the parts of the mines which have been, are being, or are about to be worked.

Penalty for refusal to allow inspection.

12. If any owner, lessee or occupier of any such mines or works refuses to allow any officer appointed by the Local Government for that purpose to enter into and inspect any such mines or works in manner aforesaid, he shall be punished with fine which may extend to two hundred rupees.

If mines worked contrary to provisions of this Act, Local Government may require means to be adopted for safety of land acquired.

13. If it appears that any such mines have been worked contrary to the provisions of this Act, the Local Government may, if it thinks fit, give notice to the owner, lessee or occupier thereof to construct such works and to adopt such means as may be necessary or proper for making safe the land acquired, and the works thereon, and preventing injury thereto; and, if after such notice, any such owner, lessee or occupier does not forthwith proceed to construct the works necessary for making safe the land acquired and the works thereon, the Local Government may itself construct the works and recover the expense thereof from the owner, lessee or occupier.

Construction of Act when land acquired has been transferred to a local authority or Company.

14. When a statement under section 3 has been made regarding any land, and the land has been acquired by the Government, and has been transferred to or has vested by operation of law in a local authority or Company, then sections 4 to 13, both inclusive, shall be read as if for the words "the Local Government" wherever they occur in those sections the words "the local authority or Company, as the case may be, which has acquired the land" were substituted.

Pending cases.

15. *(1)* This Act shall apply to any land for the acquisition whereof proceedings under the Land Acquisition Act, 1870, are pending at the time when this Act comes into force, unless before that time the Collector has made, in respect of the land, an award under section 14 or a reference to the Court under section 15 of that Act, or has taken possession of the land under section 17 of the same. X of 1870.

(2) When the Collector has before the said time made an award or reference in respect of any such land or taken possession thereof as aforesaid, and all the persons interested in the land, or entitled under the Land Acquisition Act, 1870, X of 1870. to act for persons so interested, who have attended or may attend in the course of the proceedings under sections 11 to 15, both inclusive, of the Land Acquisition Act, 1870, consent in writing X of 1870. to the application of this Act to the land, the Collector may by an order in writing direct that it shall apply, and thereupon it shall be deemed to have applied from the commencement of the proceedings; and the Collector shall be deemed, as the case may be, to have inserted in his award or reference, or to have published in the prescribed manner, when he took possession, the statement mentioned in section 3 of this Act.

Definition of local authority and Company.

16. In this Act—

(*a*) "local authority" means any municipal committee, district board, body of port commissioners or other authority legally entitled to, or entrusted by the Government with, the control or management of any municipal or local fund; and

(*b*) "Company" means a Company registered under any of the enactments relating to Companies from time to time in force in British India, or formed in pursuance of an Act of Parliament or by Royal Charter or Letters Patent.

This Act to be read with Land Acquisition Act, 1870.

17. This Act shall, for the purposes of all enactments for the time being in force, be read with and taken as part of the Land Acquisition Act, 1870. X of 1870.

D. FITZPATRICK,
Secy. to the Govt. of India.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to provide for cases in which Mines or Minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870, was presented to the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 23rd September, 1885:—

WE, the undersigned, Members of the Select Committee to which the Bill to provide for cases in which Mines or Minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Messrs. Macneill & Co., Managing Agents, Equitable Coal Company, Limited, dated 21th April, 1885, and enclosure [Papers No. 1].
From Officiating Secretary to Chief Commissioner, Assam, No. 649, dated 24th April, 1885 [Paper No. 2].
From Secretary to Chief Commissioner, Coorg, No. 206—25, dated 4th May, 1885 [Paper No. 3].
From Chief Commissioner, Ajmer-Merwára, No. 479, dated 7th May, 1885, and enclosure [Papers No. 4].
From Officiating Secretary to Chief Commissioner, British Burma, No. 708-94R., dated 20th April, 1885 [Paper No. 5].
From Secretary for Berar to Resident, Hyderabad, No. 161 G., dated 9th May, 1885 [Paper No. 6].
From Registrar, High Court, Calcutta, No. 1524, dated 15th May, 1885 [Paper No. 7].
From Chief Secretary to Government, Madras, No. 1251, dated 9th May, 1885, and enclosures [Papers No. 8].
From Under Secretary to Government, Bombay, No. 4381, dated 30th May, 1885, and enclosures [Papers No. 9].
From Secretary to Government, Bengal, No. 481 T.—R., dated 28th May, 1885, and enclosures [Papers No. 10].
From Officiating Junior Secretary to Government, Punjab, No. 544, dated 4th June, 1885, and enclosures [Papers No. 11].
From Bábú Gurdhar Das, Honorary Magistrate, Etáwah, dated 8th May, 1885 [Paper No. 12].
From Chief Secretary to Government, North-Western Provinces and Oudh, No. 1150—I.-776, dated 30th June, 1885, and enclosures [Papers No. 13].
From Assistant Secretary to Chief Commissioner, Central Provinces, No. 2655—77, dated 11th July, 1885 [Paper No. 14].

2. Some of the Local Governments have objected to the Bill being applied to the provinces under their administration on the ground that, having regard to the manner in which the right to minerals is regulated in those provinces, it is unnecessary there, and that, if unnecessary, it would only prove an encumbrance and complication in the acquisition of lands. To meet these objections we have made the measure applicable by its own vigour only to the territories under the administration of the Governor of Madras in Council and the Lieutenant-Governor of Bengal, but have empowered the remaining Local Governments to extend it to the whole or any part of the territories administered by them if they think fit.

3. An apprehension has been expressed in some of the opinions received that the Bill might by implication affect the rights which the Crown has to all minerals throughout a very large portion of this country. Such an apprehension is, we believe, unfounded, but by way of greater precaution and to prevent misapprehension we have inserted a section (2) saving the rights of the Crown.

4. Section 2 of the Bill as introduced required the Government to determine, before it issued its declaration under section 6 of the Land Acquisition Act, whether the land should be acquired simply under that Act, that is to say, including the minerals, or whether the special provisions of this Bill should be put in force with a view to excluding the minerals from the acquisition.

It has been represented that it is not for the interest of any of those concerned that an irrevocable determination should necessarily be come to on so important a point at a stage of the proceedings when the circumstances of the case would in all probability be imperfectly known. The Government, it will be observed on reference to the Land Acquisition Act, has a discretion to withdraw from a proposed acquisition of land up to a considerably later stage, and it seems but reasonable that it should have a discretion to exclude the minerals from the acquisition at any time up to the same stage if it turns out that their acquisition is not essential to the undertaking, and that either the owners are unwilling to part with them or the Government or the local authority or Company concerned is unwilling to pay their full value. We have accordingly (in section 3) empowered the Collector, who in such a matter would, of course, act under the control of the Government, to exclude the minerals from the acquisition at any time up to the stage of the proceedings at which the land vests, and it is no longer in the discretion of the Government to recede from the transaction.

5. It has been urged that the notice of thirty days to be given to the Government, under section 3 of the Bill as introduced, by a mine-owner desiring to work his mines is too short having regard to the delays in communication in this country. We think the objection is reasonable, and we have accordingly (in section 4 of the amended Bill) extended the period to sixty days.

6. It has been held by the House of Lords in an important case (*Dixon* v. *The Caledonian Railway Co.*, 5 App. Ca. 820) that when a mine-owner gives notice under section 78 of the Railways Clauses Act, 1845, of his intention to work minerals, the Railway Company is not, for the purpose of giving its counter-notice to stop or control the working, limited to the thirty days for which the mine-owner's notice runs, that the period of thirty days is merely prescribed as a period until the expiration of which the mine-owner is debarred from

working, and that the Company can at any time give its counter-notice, though of course if given at any time after the thirty days had expired and the workings had been commenced it would have no effect except as regards the further progress of the workings. The opposite view, as was pointed out by their Lordships, would involve somewhat serious consequences, and it is obviously necessary that there should be no mistake as to the effect of the Bill in this respect. It would doubtless have been sufficient, so far as regards the ultimate result, if we followed the exact wording of the English Act, on the main lines of which we are proceeding throughout. The highest Courts in this country would, as a matter of course, follow the decision of the House of Lords, but it is to be apprehended that inferior authorities might in many cases be ignorant of that decision, and might mistake the effect of the wording of the English Act, which it must be admitted is by no means clear. We have therefore thought it safer to amend the sections concerned in such a manner that they will in a clear and unmistakeable way express the effect of the English Act as construed by the House of Lords.

7. Another important English decision which points to an amendment of the Bill is that in *Smith* v. *Great Western Railway Co.* (2 Ch. D. 235), and in appeal before the House of Lords, 3 App. Ca. 165). We may have, under a Bill of this sort, a state of things to deal with, of which that case affords an illustration, where one person holding under a terminable lease has an immediate right to work the minerals, and another person is entitled to the reversion on the expiration of the lease and perhaps to a rent or royalty during its continuance. The lease may or may not be of such a length as to admit of all the minerals being worked out during its continuance, and it may or may not be liable to be put an end to by forfeiture or otherwise before the expiration of its term. The provisions of the English Act, which deal specially with the subject now before us, and which have been incorporated in this Bill, were found inadequate to provide for the exigencies of such a state of things as that referred to. They probably contemplate a settlement only with the person immediately entitled to work the mines, and, in order to provide for the case of a reversioner or other person interested, it was found necessary to call in the aid of a general provision of the law which would be out of place in a Bill like this.

It appears to us that the simplest mode of dealing with the various interests that may co-exist in the mines is to require, in accordance with the scheme of the Land Acquisition Act, that they should all, whether present or future, be considered and compensated for simultaneously, whenever the owner of the surface has occasion to exercise his power of stopping or controlling the working.

We have accordingly provided in effect that where the person immediately entitled to work the mines intimates to the owner of the surface his intention to work them, and the latter after that determines to stop or control the working, the settlement of compensation must extend to all persons interested in the mines, and the stoppage or control will be binding in perpetuity on all alike.

8. We have introduced three new sections (8, 9 and 10), corresponding to sections 80, 81 and 82 of the Railways Clauses Act, 1845. We question whether the object of these sections would not have been otherwise attained through the medium of the Land Acquisition Act, the provisions of which were made applicable by section 6 of the Bill as introduced; but as importance appeared to be attached to them in the memorial of the Coal Companies, we have thought it better to remove all doubt by including them. They will doubtless overlap section 6 of the Bill, but no practical harm will result from this.

9. An objection has been taken in some quarters to section 11 of the Bill as introduced (now section 14), which in effect gives to certain Companies the powers conferred on the Local Government by some of the foregoing provisions of the Bill. It appears to be overlooked that the section in question can apply only to Companies established for such purposes and occupying such a position from a public point of view as would warrant the Government in acquiring land on their behalf. In particular it is provided, by sections 48 and 49 of the Land Acquisition Act, that land shall not be acquired for a Company under that Act unless it is needed for a work likely to prove useful to the public, and the Company enters into an agreement with the Government settling, among other matters, the time within which and the conditions on which the work shall be executed and maintained and the terms on which the public shall be entitled to use it.

10. We may further observe that there appears from some of the papers considered by us to be a certain amount of misapprehension as to the nature of the powers referred to.

If the Local Government or the Company exercising the powers of the Local Government neglects to come to terms with the mine-owner on his giving notice of his intention to work, it does so at the risk of its property. If, considering that the mine-owner is working improperly, it takes steps under section 7 (new numbering) to remedy the mischief with a view to charging the mine-owner with the cost, it does so at the risk of losing its money and of incurring serious legal consequences if the Court before which the case may ultimately come takes a different view of the matter. Similarly, if it considers that the mines are being worked contrary to the provisions of the Act and proceeds to take steps under section 13 (new numbering), it still acts at its own risk, for it is by no means certain that it will appear to the Court that the mines were being so worked.

Thus the powers in question are very far from being so formidable as has been supposed, and we may add that they are framed as closely as possible on the lines of those conferred by

Parliament on Railway Companies in England, the substance of which seems generally to have met with approval.

11. We have placed "local authorities" on a footing similar to that of Companies, as in many recent Acts the provisions of the Land Acquisition Act have been made applicable for the purpose of acquiring land for such authorities.

12. We are informed that there are certain land acquisition cases pending at this moment in Bengal, which have already proceeded beyond the stage at which the provisions of this measure would in its ordinary course be applicable to them, but in which it may nevertheless be thought desirable to have the benefit of it. To meet this, we have inserted a clause (15 (2)) which will admit of the Bill being applied in such cases if those concerned unanimously desire that it should.

13. The publication ordered by the Council has been made as follows :—

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor-General on the 16th October, 1885, and is hereby promulgated for general information :—

ACT No. XIX OF 1885.

An Act to amend the law relating to Government Securities.

WHEREAS it is expedient to amend the law relating to Government securities in manner hereinafter appearing; It is hereby enacted as follows :—

Short title and commencement.

1. *(1)* This Act may be called the Indian Securities Act, 1885; and

(2) It shall come into force at once.

Definitions.

2. In this Act—

The expression "Government security" includes promissory notes, debentures, stock certificates, and all other securities issued by the Government of India or by any Local Government in respect of any loan issued under notification in the official Gazette, whether before or after the passing of this Act, but does not include a stock note or a currency note: and

"prescribed" means prescribed by rules made from time to time by the Governor General in Council in this behalf.

[1872. Right of survivors of joint payees of Government securities.

3. *(1)* Notwithstanding anything contained in the Indian Contract Act, section 45, when a Government security issued before the first day of April, 1886, is payable to two or more persons jointly and any of them dies, the security shall be payable to the survivor or survivors of those persons.

(2) Nothing herein contained shall affect any claim which the representative of the deceased person may have against the survivor or survivors in respect of the security jointly payable to them and the deceased.

(3) This section shall apply whether the death of the person to whom the security was jointly payable occurred or occurs before or after this Act comes into force.

Issue of renewed securities.

4. A person claiming to be entitled to a Government security as payable to him under an endorsement may, on satisfying the prescribed officer of the justice of his claim and paying the prescribed fee and delivering the security duly receipted to the prescribed officer, obtain from the officer a renewed security issued payable to himself.

Issue of duplicate securities.

5. *(1)* When a Government security is alleged to have been wholly or partly lost or destroyed, and a person claims to be the person to whom but for such loss or destruction it would be payable, he may, on application to the prescribed officer, and on producing proof to his satisfaction of the loss or destruction and of the justice of the claim, obtain from him an order for—

(a) the payment of interest in respect of the security said to be lost or destroyed pending the issue of a duplicate security; and

(b) the issue of a duplicate security payable to the applicant.

(2) An order shall not be passed under sub-section *(1)* until after the issue of the prescribed notification of the loss or destruction and after the expiration of the prescribed period, nor until the applicant has given the prescribed indemnity against the claims of all persons deriving title under the security lost or destroyed.

(3) A list of the securities in respect of which an order is passed under sub-section *(1)* shall be published in the *Gazette of India* at such times as the Governor General in Council may, from time to time, direct.

Period after which Government is released from liability in respect of original security.

6. When a renewed security has been issued under section 4, or a duplicate security has been issued under section 5, the Government shall be discharged of all liability in respect of the original security of which such renewed or duplicate security has been issued—

(a) in the case of a renewed security, after the lapse of six years from the date of the issue of the renewed security;

(b) in the case of a duplicate security, after the lapse of six years from the date of the publication under section 5, sub-section *(3)*, of the list in which the security is first mentioned, or from the date of the last payment of interest on the original security, whichever date is latest.

Power of Governor-General in Council to make rules.

7. The Governor General in Council may, from time to time, make rules to prescribe—

(a) the fees to be paid for applications under sections 4 and 5;

(b) the form in which securities delivered for renewal are to be receipted;

(c) the officer who is to exercise all or any of the powers and perform all or any of the duties prescribed by sections 4 and 5;

(d) the proof which is to be produced by persons applying for duplicate securities;

(e) the form and mode of publication of the notification mentioned in section 5, and the period after which interest may be paid or a duplicate security may be issued under that section;

(f) the nature and amount of the indemnity to be given by a person applying under section 5 for the payment of interest or the issue of a duplicate security; and

(g) generally all matters connected with the grant of renewed and duplicate securities.

Publication of drafts and rules.

8. *(1)* The Governor General in Council shall, before making rules under the last foregoing section, publish a draft of the proposed rules in such manner as may, in his opinion, be sufficient for the information of the public.

(2) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(3) The Governor General in Council shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(4) Every rule made under the last foregoing section shall be published in the *Gazette of India*, and the publication in the *Gazette of India* of a rule purporting to be made under that section shall be conclusive evidence that it has been duly made

D. FITZPATRICK,
Secy. to the Govt. of India.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the law relating to Government Securities was presented to the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 8th October, 1885:—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the law relating to Government Securities was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From Officiating Secretary to Chief Commissioner, British Burma, No. 92—17L., dated 7th May, 1885, and enclosure [Papers No. 1].
From Officiating Secretary to Chief Commissioner, Assam, No. 746, dated 11th May, 1885, and enclosure [Papers No. 2].
From Secretary for Berar to Resident, Hyderabad, No. 1780., dated 18th May, 1885 [Paper No. 3].
From Bábú Gurdhar Dás, Honorary Magistrate, Etáwah, dated 18th May, 1885 [Paper No. 4].
From Chief Commissioner, Ajmer-Merwára, No. 615, dated 17th June, 1885 [Paper No. 5].
From Chief Secretary to Government, Madras, No. 1455, dated 3rd June, 1885, and enclosures [Papers No 6].
From Secretary to Government, North-Western Provinces and Oudh, No. 2793—X-395, dated 26th June, 1885 [Paper No. 7].
From Registrar, High Court, Calcutta, No. 1898, dated 24th June, 1885 [Paper No. 8].
From Secretary to Chief Commissioner, Coorg, No. 522—58, dated 23rd June, 1885 [Paper No. 9].
From Officiating Secretary to Government, Bengal, No. 1304T.F., dated 26th June, 1885, and enclosures [Papers No. 10].
From Officiating Secretary to Government, Punjab, No. 5208., dated 1st July, 1885, and enclosures [Papers No. 11].
Telegram from Chief Commissioner, Central Provinces, dated 1st July, 1885 [Paper No. 12].
From Under Secretary to Government, Bombay, No. 1869, dated 27th June, 1885, and enclosure [Papers No. 13].
From Secretary to Government of India, Legislative Department, to Solicitor to Government of India, No. 1370, dated 28th August, 1885; from Solicitor to Government of India, No. 1103, dated 17th September, 1885, and enclosure [Papers No. 14].

2. The only substantive alteration we have made in the Bill is in section 8, which, in cases in which one of a number of joint-holders of a Government security dies, applies what we may term the rule of survivorship as opposed to the rule of representation laid down by section 45 of the Indian Contract Act. The reasons which led to the insertion of this provision are fully set forth in the Statement of Objects and Reasons: but we find that a considerable difference of opinion exists regarding it.

3. On the one hand, it is urged, among others, by so high an authority as the Advocate General of Bengal, that this provision should be generalized and extended to other classes of obligations besides those arising on Government securities.

On the other hand, it is argued in several of the papers that the rule of survivorship as applied to instruments of the description in question is one that does not fit in with the habits and ideas of certain classes of the Native population, and might, if extended to those classes as an absolutely binding rule, open a door to the perpetration of frauds.

The question thus raised is of considerable importance and difficulty. We do not think that we should be justified in entering fully upon it here in the absence of those members of the Council most competent to advise on legal and commercial matters, and we accordingly propose, with a view to avoiding it as far as possible, to confine the section to Government securities already issued, or which may be issued before the 1st of April next.

4. As regards securities already issued, the law must be settled without any further delay, the delay which has taken place in obtaining opinions on the Bill having already led to

considerable public inconvenience. Moreover, as it is impracticable to make any distinctions among those securities, one and the same rule must be laid down for all, and it is clear that that rule must be the rule of survivorship. The rule of survivorship has hitherto been applied to them, as well after the passing of the Contract Act as before, subject at most to rare exceptions or qualifications. It is the rule that is most suitable to the great majority of those who hold those securities, and if in exceptional cases it should be found to be less suitable it must be remembered that those securities have been issued under a system which contemplated its application.

5. On the other hand, there is no necessity to settle the question at this moment as regards securities to be issued for all time to come, especially as a simple mode of providing, without the aid of the legislature, for securities to be hereafter issued has been proposed.

It has been suggested that it could be so arranged in the Loan Department of the Government that it should be in the option of persons, in whose favour securities are first issued or to whom they are subsequently transferred by endorsement, either to take them simply in their several names, that is to say, in favour, *e.g.*, of "A, B & C," without qualification, in which case the rule of the Contract Act would apply, or to take them under words giving a right of survivorship, as, *e.g.*, in favour of "A, B & C, and the survivor or survivors of them," in which case we are advised the rule of the Contract Act would be excluded and the rule of survivorship would apply. This, it has been argued, would be likely to afford a more satisfactory solution of the difficulty as regards securities to be hereafter issued than any enactment establishing either the rule of survivorship or that of representation in a hard-and-fast manner, as it would leave it open to all concerned to adopt for themselves the rule best adapted to their requirements.

It is urged, on the other hand, that the requirements of the new system would be likely for some time to be overlooked, and that considerable hardship and inconvenience would thus result, but this danger might perhaps be averted by some device such as that of a warning enfaced on the security in such a way as to attract attention.

We do not, however, recommend that any determination should be arrived at on this matter until it has undergone the fullest discussion. It will doubtless be settled during the course of the Calcutta Session, and we think that we are acting most in accord with the balance of convenience, and so as to occasion the least amount of disturbance in existing relations, by recommending that as regards securities issued meantime, *i.e.*, say up to the 1st of April next, the law should be placed on the same footing as for securities already issued, that is to say, that the rule of survivorship should apply.

6. The remaining changes which we have made in the Bill, being confined to matters of form or drafting, do not call for special notice. We may, however, mention that we have introduced words in the definition of "Government security" to make it clear that the Bill does not apply to stock notes or currency notes—classes of securities to which, as they are otherwise provided for, it was never intended to apply.

7. The publication ordered by the Council has been made as follows:—

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Act of the Governor-General of India in Council received the assent of His Excellency the Governor-General on the 16th October, 1885, and is hereby promulgated for general information :—

ACT No. XX OF 1885.

An Act to postpone for a limited time the operation of certain provisions of the Bengal Tenancy Act, 1885.

WHEREAS it is provided by the Bengal Tenancy
VIII of 1885. Act, 1885, that that Act shall come into force on such date as the Local Government, with the previous sanction of the Governor-General in Council, may, by notification in the local official Gazette, appoint in this behalf;

And whereas, in exercise of the power thus conferred, the Local Government, with the previous sanction of the Governor-General in Council, has, by a notification in the local official Gazette, appointed the first day of November, 1885, as the date on which the said Act is to come into force;

And whereas it is convenient that certain portions of the said Act relating to deposits of rent and distraint should not come into force until a later date;

It is hereby enacted as follows :—

Postponement of operation of deposit and distraint provisions.

1. Notwithstanding anything contained in the said notification—

(a) the provisions of sections 61 to 64, both inclusive, and of Chapter XII, of the said Act, except such of those provisions as confer powers to make rules, shall come into force on such date, not later than the first day of February, 1886, as the Local Government, after the passing of this Act, may, by notification in the local official Gazette, appoint in this behalf, or, if no date is so appointed, on the first day of February, 1886, and not before;

(b) until those provisions come into force, the enactments specified in Schedule I annexed to the said Act shall, in so far as they relate to deposits of rent and distraint, continue in force, and all references to those provisions in other portions of the said Act shall, so far as may be, be read as if they were made to the corresponding provisions of the said enactments.

D. FITZPATRICK,
Secy. to the Govt. of India.

STATEMENT OF OBJECTS AND REASONS.

THE Lieutenant-Governor of Bengal has, for reasons which have been approved of by the Government of India and in exercise of the power conferred by the Bengal Tenancy Act, directed that that Act shall come into force on the 1st of November next. A reference to section 190 of the Act will show that an interval of at least a month must elapse between the date on which the Act comes into force and the date on which rules made under it can be brought into force. There is no reason to believe that any practical inconvenience will result from this, except possibly as regards the matters of deposits of rent by tenants and distraint; but it is apprehended that inconvenience might be felt in regard to these matters if the provisions of the Act relating to them were for any time in force without the rules by which it is intended that they should be supplemented, and the Lieutenant-Governor has suggested, as the simplest mode of obviating this, that the date on which the provisions of the Act relating to deposits and distraint are to come into force should be postponed for a month or two, and that the existing law relating to these subjects should meantime be retained in force.

The Governor-General in Council, being anxious to minimize the inconvenience incidental to the transition from the old law to the new, has approved of this proposal, and the present Bill has been prepared to give effect to it.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 15th October, 1885:—

No. 17 OF 1885.

A Bill rendering it permissive to the members of the Maimon Community to declare themselves subject to Muhammadan Law.

WHEREAS there is in the Presidency of Bombay and elsewhere a class of persons known as Maimons, and questions have from time to time arisen in the case of some of those persons as to the law by which in certain particulars they are governed, and whereas some of those persons consider that they are governed or desire to be governed in those particulars by the Muhammadan law as established in the Hanafi School;

And whereas it is expedient that a procedure should be provided whereby the applicability of that law to them in those particulars could be placed beyond dispute;

It is hereby enacted as follows:—

Short title.

1. This Act may be called the Maimons Act, 1885.

Declaration to be made by Maimons.

2. *(1)* When any Maimon who has attained his majority has declared in manner next hereinafter provided that he desires to be governed by the Muhammadan law as established in the Hanafi School, that law shall thereafter, notwithstanding any custom to the contrary, apply to him in each part of British India in the same particulars and to the same extent as it applies to other persons in that part of British India who are governed by it.

(2) A declaration to take effect under sub-section *(1)* must be made by a written instrument under the hand of the person making the same, in the form given in the schedule to this Act or in a form to the like effect, and must—

(a) if made in a part of British India in which the Indian Registration Act, 1877, is for the time being in force, be registered during his lifetime under that Act; and [Act III of 1877, s. 33.] III of 1877.

(b) if made elsewhere, be executed before, and authenticated by, a notary public or a Court, Judge, Magistrate, British Consul or Vice-Consul or representative of Her Majesty or of the Government of India.

(3) Nothing in this Act shall prevent any person being or becoming subject to any form of Muhammadan law in any other manner than that provided by this Act.

THE SCHEDULE.

FORM OF DECLARATION.

I hereby declare that I wish to be governed to the extent provided by the Maimons Act, 1885, by the Muhammadan law as established in the Hanafi School.

STATEMENT OF OBJECTS AND REASONS.

1. THE Maimons, like the Khojás, were originally Hindus, and have been converted to Muhammadanism, but though they are said, as a rule, to be Muhammadans in a fuller sense than the great body of the Khojás, it has been held by the Courts that certain sections of them are in some particulars still governed by Hindu customs instead of by Muhammadan law.

2. From a petition lately received by the Government, it appears that, to a large number of the Maimons in question this position is not satisfactory. They hold that they should be governed, or they wish to be governed, by the Muhammadan law of the Hanafi School, and they ask that it may be declared by the legislature that they are so governed.

3. It is not to be expected that any such declaration would be made by the legislature unless it were shown that it was desired by the entire community to which it would apply, and it must be admitted that there is a want of unanimity among them on this subject.

It seems but reasonable, however, that some simple procedure should be provided by which the petitioners and other members of the Maimon class, who may be of their way of thinking, would be enabled to secure the application to themselves of those portions of the Muhammadan law which are applied by our Courts to ordinary Muhammadans, and to avoid all risk of being held to be governed by customs which are distasteful to them, and which it is to be apprehended are far from being well settled.

4. Such a procedure is to be found in the clause which it has been proposed to insert in the Khojá Succession Bill now under consideration, and which provides that a Khojá of full age may by a registered declaration withdraw himself from the peculiar law of succession by which Khojás are to be governed and place himself under the Muhammadan law of succession.

The present Bill has been prepared with a view to providing a similar procedure for Maimons. It is, however, not restricted to the matter of succession, as the difficulty which it is intended to meet is not confined to that branch of the law; and as, from all that has appeared up to this, the Hanafi form of the Muhammadan law is the only one to which Maimons would desire to be subject, it provides for the application to them only of that form of the law.

5. As it is obviously undesirable that any doubt should be thrown on the legal position of Maimons who may be already fully subject to the Muhammadan law, or that it should be suggested that a Maimon could not after the passing of the Bill become fully subject to that law in any way in which he, in common with Hindus and others, might become subject to it at present, a clause has been inserted in the Bill, providing that nothing therein contained shall prevent any person from being or becoming subject to any form of Muhammadan law in any other manner than that provided by the Bill.

AMÍR ALÍ.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 22nd October, 1885:—

No. 18 OF 1885.

THE INDIAN TRAMWAYS BILL, 1885.

CONTENTS.

Preliminary.

SECTIONS.

1. Short title and commencement.
2. Local extent.
3. Definitions.

Orders authorising the Construction of Tramways.

4. Application for and consent necessary to making of order.
5. Consent of local or road authority not necessary in certain cases.
6. Procedure for making order.
7. Contents of order.
8. Further orders.
9. Power to authorise joint work by local authorities.
10. Cesser of powers given by an order.

Construction and Maintenance of Tramways.

11. Mode of formation of tramway.
12. Inspection of tramway before opening.
13. Agreement between road-authority and promoter as to repair of roadway.

Traffic on Tramways.

14. Rights of promoters and the public over tramways.
15. Tolls leviable by promoter or lessee.
16. Carriage of dangerous or offensive goods.

Licenses to use Tramways.

17. Grant to third parties of licenses to use tramway in certain events.
18. Licensee to give to promoter or lessee an account of traffic.

SECTIONS.

Discontinuance of Tramways.

19. Cesser of powers of promoter and lessee on discontinuance of tramway.
20. Powers of road-authority on cesser of powers of promoter.

Insolvency of Promoter.

21. Proceedings in case of insolvency of promoter.

Purchase of Tramways.

22. Future purchase of undertaking by local authority.

Working of Tramways owned by Local Authorities.

23. Lease of, or working of, tramway by local authority.

Rules.

24. Power to make rules.
25. Power to impose penalty by rule.
26. Procedure for making, and publication of, rules.

Offences.

27. Penalty for failure of promoter, lessee or licensee to comply with Act or order.
28. Penalty for obstructing promoter in exercise of his powers.
29. Penalty for interfering with tramway.
30. Penalty for using tramway with carriage having flange-wheels.
31. Penalty for evading payment of proper toll.
32. Penalty for taking or sending dangerous or offensive goods without giving notice.
33. Penalty for licensee not giving to promoter or lessee an account of traffic or giving false account.
34. Saving of prosecutions under other laws.

Settlement of Differences.

35. Differences between promoters or lessees and authorities.

Recovery of Tolls.

36. Recovery of moneys due from promoters and in certain cases, from lessees.
37. Recovery of tolls from licensees.
38. Recovery of tolls from passengers.

Savings.

39. Promoter to have right of user only.
40. Saving of power over roads traversed by tramways.
41. Saving of power of local authority and police to regulate traffic on roads.

The Indian Tramways Bill, 1885.—Sections 1-4.

Supplemental Provisions.

SECTIONS.

42. Promoters, lessees and licensees to be responsible for all injuries.
43. Want of funds not a sufficient reason for default.
44. Power to exempt from municipal taxation.
45. Application by local authorities of local funds to tramways.
46. Extension of Act to existing tramways.
47. Meaning of "tramway" in Railway Act.
48. Powers of Local Government exerciseable from time to time.

A Bill to facilitate the construction and to regulate the working of Tramways.

WHEREAS it is expedient to facilitate the construction and to regulate the working of tramways; It is hereby enacted as follows:—

Preliminary.

Short title and commencement.

1. *(1)* This Act may be called the Indian Tramways Act, 1886; and

(2) It shall come into force at once.

Local extent.

2. *(1)* It extends in the first instance to the whole of British India, except the territories administered by the Governor of Fort Saint George in Council, the Governor of Bombay in Council, and the Lieutenant-Governor of Bengal.

(2) But the Governor of Fort Saint George in Council, the Governor of Bombay in Council or the Lieutenant-Governor of Bengal may, by notification in the official Gazette, extend this Act to the whole or any part of the territories under his administration.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

[Act XIII, 1885, s. 3, clause (7).] *(1)* "local authority" means a municipal committee, district board, body of port commissioners or other authority legally entitled to, or entrusted by the Government with, the control or management of a municipal or local fund:

[Act XXII, 1883, s. 2.] *(2)* "road" means the way of a road, street, thoroughfare, passage or place along or across which a tramway authorised under this Act is, or is intended to be, laid, and includes the surface soil and sub-soil of a road, and the footway and drains of a road, and any bridge, culvert or causeway forming part of a road:

[33 & 34 Vic., c. 78, s. 3.] *(3)* "road-authority", in relation to a road, means—

(a) if a local authority maintains and repairs the road, then that authority:

(b) if a local authority does not maintain and repair the road, and the road is neither vested in Her Majesty nor maintained and repaired by the Government, then the person in whom the road is vested; and

(c) if a local authority does not maintain and repair the road, and the road is vested in Her Majesty or maintained and repaired by the Government, then the Local Government:

[33 & 34 Vic., c. 78, s. 3.] *(4)* "circle", in relation to a local authority or road-authority, means the area within the control of that authority:

[Act XXII, 1883, s. 2.] *(5)* "tramway" means a tramway, or any part of a tramway, or any siding, turnout, connection, line or track belonging to a tramway:

(6) "order" means an order authorising the construction of a tramway under this Act, and includes a further order substituted for, or amending, extending or varying, that order:

[33 & 34 Vic., c. 78, ss. 4, 43 & 44; Act XXII, 1 8, Schedule, Articles 1 & 26.] *(7)* "promoter" means a local authority or person in whose favour an order has been made, and includes a local authority or person on whom the rights and liabilities conferred and imposed on the promoter by this Act and the order and any rules made under the Act, as to the construction, maintenance and use of the tramway, have devolved:

(8) "undertaking" includes all moveable and immoveable property of the promoter suitable to and used by him for the purposes of the tramway:

(9) "carriage", in the case of a tramway on which steam-power or any other mechanical power is used, includes an engine worked on the tramway for the purpose of producing that power

(10) "toll" includes any charge leviable in respect of the use of a tramway:

(11) "lessee" means a person to whom a lease has been granted of the right of user of a tramway and of demanding and taking the authorised tolls:

(12) "District Magistrate" includes an officer empowered by the Local Government by name or by virtue of his office to discharge within any local area all or any of the functions of a District Magistrate under this Act:

(13) "Collector" means the chief officer in charge of the revenue-administration of a district, and includes an officer empowered by the Local Government by name or by virtue of his office to discharge within any local area the functions of a Collector under this Act; and

(14) "prescribed" means prescribed by rules made by the Local Government under this Act.

Orders authorising the Construction of Tramways.

Application for and consent necessary to making of order.

[33 & 34 Vic., c. 78, s. 4.]

4. *(1)* The Local Government may make an order authorising the construction of a tramway in a circle on the application of—

(a) the local authority of the circle, with, where that authority is not the road-authority of a road or part of a road to be traversed by the tramway, the consent of the road-authority in respect of that road or part; or

(b) any person with the consent of the local authority and, where that authority is not the road-authority of a road or part of a road to be traversed by the tramway, of the road-authority in respect of that road or part:

Provided that, if any part of the proposed tramway is to traverse land which is not included within the limits of a municipality or of a cantonment, the Local Government shall not make the order without the previous sanction of the Governor-General in Council.

The Indian Tramways Bill, 1885.—Sections 5-7.

(2) A local authority shall not make an application for an order, or be deemed to consent to an application being made by any person for an order, unless the making of the application or the giving of the consent has been approved by the local authority in manner prescribed.

[33 & 34 Vic., c. 78, s. 5.]

Consent of local or road authority not necessary in certain cases.

5. When it is proposed to lay a tramway in two or more circles, and a local authority or road-authority having control in either or any of the circles does not consent thereto, the Local Government may, nevertheless, make an order authorising the construction of the tramway in the circle, if, after considering the objections of the dissenting authority, and the benefit which the public is likely to derive from the tramway being laid in the circle of that authority, it is satisfied that the construction of the tramway therein is expedient.

[33 & 34 Vic., c. 78, ss. 7 & 9; & Act XV, 1873, s. 68.]

Procedure for making order.

6. *(1)* The Local Government on receiving an application shall consider it, and, if satisfied as to the propriety of proceeding thereon, publish in the official Gazette, and in such other manner as it deems sufficient for giving information to persons interested, a draft of a proposed order authorising the construction of the tramway.

(2) A notice shall be published with the draft stating that any objection or suggestion which any person may desire to make with respect to the proposed order will, if submitted to the Local Government on or before a date to be specified in the notice, be received and considered.

(3) If, after considering any objections or suggestions which may have been made with respect to the draft on or before the date so specified, the Local Government is of opinion that the application should be granted, with or without addition or modification, or subject or not to any restriction or condition, it may settle and make an order accordingly.

(4) Every order authorising the construction of a tramway shall be published in the official Gazette in English, and in the other prescribed language or languages, if any, and that publication shall be conclusive proof that the order has been made as required by this section.

[33 & 34 Vic., c. 78, s.]

Contents of order.

7. *(1)* An order made under section 6 shall empower the promoter therein specified to construct and maintain the tramway therein described in the manner therein provided, and shall specify the time within which the tramway shall be commenced and the time within which it shall be completed and opened for public traffic.

[See 33 & 34 Vic., c. 78, s. 9, and s. 10 of this Bill.]

(2) The order may also provide, in manner consistent with this Act, for all or any of the following, among other matters, that is to say:—

[Provisional Order Clause 1.]

(a) a period before the expiration of which the tramway shall not be commenced, and the conditions subject to which the local authority, when it is not itself the promoter, may, within that period, elect to be substituted in the place of the promoter in respect of the undertaking or of so much thereof as is within its circle; and the limits of time within which, and the terms upon which, the local authority may, after the tramway has been constructed, require the promoter to sell to it the undertaking or so much thereof as is within its circle;

[33 & 34 Vic., c. 78, s. 43.]

(b) the acquisition by the promoter of land for the purposes of the tramway, and the disposal by him of land which has been acquired but is no longer required for those purposes;

[33 & 34 Vic., c. 78, ss. 8 & 15; Provisional Order Clauses 2 and 5; and Report of House of Lords Committee, 1879, paragraph 11.]

(c) the conditions subject to which roads may be opened and broken up for the purposes of the construction or maintenance of the tramway or any part thereof, and the method of, and materials to be used in, the re-instating of the roads, and the approval of the method and materials by the Local Government or the road-authority before the commencement of the work;

[33 & 34 Vic., c. 78, ss. 26 & 27, and Provisional Order Clause 9.]

(d) the conditions on which the tramway may be constructed over a bridge or across a railway or tramway when the carriageway over the bridge is to form part of the tramway or when the tramway is to cross a railway or another tramway on the level;

[33 & 34 Vic. c. 78, s. 26.]

(e) the space which shall ordinarily intervene between the outside of the carriageway on either side of a road whereon the tramway is to be constructed and the nearest rail of the tramway, and the conditions on which a smaller space may be permitted;

[33 & 34 Vic., c. 78, s 9, and Provisional Order Clause 13.]

(f) the gauge of the tramway; the rails to be used, and the mode in which, and the level at which, they shall be laid and maintained; and the adoption and application by the promoter of such improvements in the rails, and in their situation, and in the sub-structure upon which they rest, as the Local Government may require;

[33 & 34 Vic., c. 78, s. 25, and Provisional Order Clauses 8 and 10.]

(g) the portion of the road or roads traversed by the tramway to be kept in repair by the promoter, the maintenance by the promoter to the satisfaction of the Local Government or the road-authority, or both, of that portion of the road or roads, and the liability of the promoter, on the requisition of the Local Government, from time to time to adopt and apply such improvements in the tramway as the Local Government may consider necessary or desirable for the safety and convenience of the public, and to alter the position or level of the tramway to suit future alterations in the road or roads;

[33 & 34 Vic., c. 78, s. 28, and Provisional Order Clauses 8, 11 & 12.]

(h) the application of material excavated by the promoter in the construction or maintenance of the tramway;

[32 & 34 Vic., c. 78, s. 27, and Provisional Order Clause 17.]

(i) the provision of such crossings, passing-places, sidings, junctions and other works, in addition to those specified in or authorised by the order, as may from time to time be necessary or convenient to the efficient working of the tramway;

[Provisional Order Clause 15.]

(j) the powers which may from time to time be exercised by the Local Government, the local authority, the road-authority or any person in respect of sewers, drains, telegraph-lines, gas-pipes or water-pipes in or

[33 & 34 Vic., c. 78, s. 32, and Provisional Order Clause 18.]

on land occupied by the tramway; the notice (if any) to be given of the intended exercise of those powers; the manner in which the powers shall be exercised; and the extent to which the tramway and the traffic thereon may be interfered with in the exercise thereof;

[33 & 34 Vic., c. 78, ss. 30 & 31.]

(k) the conditions subject to which the promoter may from time to time interfere with, or alter or require the alteration of the position of, drains (not being sewers or main drains), telegraph-lines, gas-pipes or water-pipes;

[Provisional Order Clause 16.]

(l) the provision of a temporary tramway in place of a part of a tramway which has been removed, or of which the use has been discontinued, by reason of the execution of any work affecting a road along which the part of the tramway was laid;

[33 & 34 Vic., c. 78, s. 34; and Provisional Order Clauses 26, 26 & 27.]

(m) the motive power to be used on the tramway, and the conditions on which steam-power or any other mechanical power may be used;

[33 & 34 Vic., c. 78, s. 34; Schedule A to form of Provisional Order; and Regulations and Bye-laws of the Board of Trade with respect to the use of steam-power on tramways.]

(n) the nature, dimensions, fittings, appliances and apparatus of the carriages to be used on the tramway, and the inspection and examination thereof by officers of the Local Government or the local authority, and the liability of the promoter or lessee, on the requisition of the Local Government, from time to time, to adopt and apply such improvements in the carriages, and in the fittings, appliances and apparatus, as the Local Government may consider necessary or desirable for the safety and convenience of the public;

[33 & 34 Vic., c. 78, s. 10, and Provisional Order Clauses 33 to 36 and 38 to 43.]

(o) the traffic which may be carried on the tramway, the traffic which the promoter or lessee shall be bound to carry, and the traffic which he may refuse to carry; the tolls to be leviable by the promoter or lessee, and the periodical revision thereof by the Local Government; and the regulation of the traffic and of the levy of the tolls;

[Provisional Order Clause 37.]

(p) the use of the tramway free of toll by the local authority, with its own carriages, for specified purposes, during specified hours, with power to the local authority to make such sidings and other works as may be necessary for communication between its premises and the tramway;

[33 & 34 Vic., c. 78, s. 44, and Provisional Order Clause 48.]

(q) the conditions subject to which the promoter may transfer the undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise; and the conditions subject to which the local authority may be the transferee;

[33 & 34 Vic., c 78, s. 28, proviso.]

(r) the performance by the Local Government or by the local authority or road-authority of any work required by the Act or the order to be done by the promoter; and

[Provisional Order Clauses 10, 11, 26, 27 and 40.]

(s) the penalty to be incurred by the promoter or lessee for failure to observe any condition or direction contained in the order, and the application of the penalty when recovered.

[Report of House of Lords Committee, 1879, para. 11.]

(3) The Local Government may, in providing in the order for the acquisition of land for the purposes of a tramway of which the promoter is not a company, direct that land may be acquired for the promoter under the provisions of the Land Acquisition Act, 1870, in the same manner and on the same conditions as it might be acquired for the purposes of the tramway if a company were the promoter. X of 1870.

(4) The order shall imply the condition—

(a) in the case of a tramway of which a local authority is the promoter, that a lease thereof shall be granted only in manner by this Act provided, and

(b) in the case of a tramway of which a local authority is not the promoter, that a lease thereof shall be only of the right of user and of demanding and taking the authorised tolls, and shall not confer or impose on the lessee any of the powers or duties of the promoter in respect of the construction or maintenance of the tramway.

[33 & 34 Vic., c. 78, s. 16.]

8. *(1)* The Local Government may, on the application of the promoter, revoke, amend, extend or vary the order by a further order.

Further orders.

(2) An application for a further order shall be made in the same manner and subject to the same conditions as an application for an order.

(3) The Local Government may, in its discretion, either grant or reject the application.

(4) If it grants the application, it shall make the further order in the same manner as an order, except that no addition to, or modification of, the rights, powers and authorities asked for in the application, or restriction or condition with respect thereto, shall be made or imposed by the further order without the consent in writing of the promoter.

[33 & 34 Vic., c. 78, s. 17.]

9. *(1)* Subject to, and in accordance with, the provisions of this Act, the Local Government may, on a joint application, or on two or more separate applications, settle and make an order empowering two or more local authorities, respectively, jointly to construct the whole, or separately to construct parts, of a tramway, and jointly or separately to own the whole or parts thereof.

Power to authorise joint work by local authorities.

(2) All the provisions of this Act which relate to the construction of tramways shall extend and apply to the construction of the whole and the separate parts of the tramway, and the form of the order may be adapted to the circumstances of the case.

[33 & 34 Vic., c. 78, s. 18.]

10. *(1)* If a promoter authorised by an order to construct a tramway—

Cesser of powers given by an order.

(a) does not within the time specified in the order substantially commence the construction of the tramway, or

(b) having commenced the construction, suspends it without a reason sufficient in the opinion of the Local Government to warrant the suspension, or

(c) does not within the time specified in the order complete the tramway and open it for public traffic,—

the following consequences shall ensue:—

(i) the powers given by the order to the promoter for constructing the tramway and otherwise in relation thereto shall, unless

the Local Government, by special direction in writing, prolongs the time or condones the suspension, cease to be exercised except as to so much of the tramway as is then completed;

(ii) as to so much of the tramway as is then completed, the Local Government may either permit, or refuse to permit, the powers given by the order to continue;

(iii) if the Local Government refuses to permit the powers to continue, then so much of the tramway as is then completed may be dealt with, under the provisions of this Act relating to the discontinuance of tramways, as a tramway of which the discontinuance has been proved to the satisfaction of the Local Government.

[tions 19 & f this .]

(2) A notification published by the Local Government in the official Gazette to the effect that on a date specified in the notification the construction of a tramway had not been substantially commenced or a tramway had not been completed and opened for public traffic, or that the construction of a tramway had been suspended without sufficient reason, shall, for the purposes of this section, be conclusive proof of the matter stated therein.

Construction and Maintenance of Tramways.

& 34 c. 78, .]

Mode of formation of tramway.

11. A tramway shall be constructed and maintained in the manner provided by the order.

& 31 c. 78, s. Act IV, s. 5.]

Inspection of tramway before opening.

12. A tramway, or portion or extension of, or addition to, a tramway, shall not be opened for public traffic until an engineer appointed in this behalf by the Local Government has inspected it and certified it to be fit for such traffic.

& 34 s. 78, s.

Agreement between road-authority and promoter as to repair of roadway.

13. The road-authority and the promoter may from time to time enter into agreements with respect to the keeping in repair of the whole or a part of a road traversed by a tramway, and with respect to the proportion to be paid by either of them of the expense of keeping the road or part in repair.

Traffic on Tramways.

& 31 c. 78, ss. 68, and XXII, s. 8.]

Rights of promoters and the public over tramways.

14. *(1)* The promoter of a tramway shall, subject to the provisions of sub-section *(2)* and to the other provisions of this Act and of the order, have the exclusive use of the tramway for carriages with flange-wheels or other wheels suitable to run on the rail described in the order as the rail to be used on the tramway:

Provided that nothing in this Act or the order or in any rule made under the Act shall affect the right of any person authorised to use a tramway or railway to pass across a tramway constructed under this Act with carriages having wheels suitable to run on the rail thereof.

(2) The public shall have a right to pass along or across any part of a road along or across which a tramway is constructed, whether on or off the tramway, with carriages not having flange-wheels or other wheels suitable to run on the rail of the tramway: provided—

(a) that this sub-section shall not apply where the tramway is constructed on land the right to the exclusive possession of which has been acquired by the promoter, and

(b) that the Local Government may by an order authorise the construction of a tramway on any part of a road with rails raised above the surface of the road, if it is satisfied that the convenience of the public will not be injuriously affected thereby.

[31 & 34 Vic. c. 78, s. 45.]

Tolls leviable by promoter or lessee.

15. *(1)* The promoter or lessee may demand and take, in respect of the tramway, tolls not exceeding the limits specified in or determinable under the order, or if the order contains no provision in this behalf, then such sums as may from time to time be fixed by the promoter or lessee with the previous sanction of the Local Government.

[33 & 34 Vic., c. 78, s. 53; and Act X XII 1883, s. 13.]

(2) A list of all the tolls authorised to be levied shall be exhibited, in such languages as the District Magistrate may direct, in a conspicuous place inside and outside each of the carriages used upon the tramway.

Carriage of dangerous or offensive goods.

16. *(1)* A person shall not be entitled to carry, or to require to be carried, on a tramway constructed under this Act, any goods of a dangerous or offensive nature.

(2) A person taking such goods with him on the tramway shall, before entering the carriage, give notice of their nature to the servant of the promoter or lessee in charge of the carriage.

(3) A person sending such goods by the tramway shall distinctly mark their nature on the outside of the package containing them, or otherwise give notice thereof in writing to the servant of the promoter or lessee with whom he leaves them for the purpose of their being sent by the tramway.

(4) Any servant of the promoter or lessee may refuse to carry upon the tramway a parcel which he suspects to contain goods of a dangerous or offensive nature, and, if any such parcel has been received for the purpose of being carried upon the tramway, may stop the transit thereof until he is satisfied as to the nature of its contents.

Licenses to use Tramways.

[33 & 34 Vic., c. 78, s. 35.]

Grant to third parties of licenses to use tramway in certain events.

17. If, at any time after a tramway or part of a tramway has been for three years opened for public traffic in a circle, the local authority of the circle represents in writing to the Local Government that the public is deprived of the full benefit of the tramway or of the part thereof, the Local Government may, if after such enquiry as it deems necessary it is satisfied as to the truth of the representation, grant a license to any person to use the tramway conformably to this Act and the order and to the rules made under the Act, subject to the following provisions, namely:—

(a) the license shall be for a period not less than one year or more than three years from the date of the license, but the Local Government may in its discretion renew it;

(b) the license shall be to use the whole of the tramway for the time being opened for public traffic, or such part or parts of the tramway as the Local Government, having regard to the cause for granting the license, thinks fit;

The Indian Tramways Bill, 1885.—Sections 18-22.)

(c) the license shall specify the number of carriages which the licensee shall run upon the tramway, the mode in which, and times at which, the carriages shall be run, the tolls to be paid to the promoter or lessee by the licensee for the use of the tramway, and the tolls, being those for the time being leviable by the promoter or lessee, which the licensee may demand and take for the use of his carriages;

(d) the licensee and his officers and servants shall permit one person, duly authorised for that purpose by the promoter or lessee, to travel free of toll in or upon each carriage of the licensee run upon the tramway for the whole or any part of a journey; and

(e) the Local Government may revoke, alter or modify the license for any cause sufficient in its opinion to warrant the revocation, alteration or modification thereof.

[33 & 34 Vic., c. 78, s. 37.]

Licensee to give to promoter or lessee an account of traffic.

18. A licensee shall, on demand, give to an officer or servant authorised in that behalf by the promoter or lessee an exact account in writing, signed by the licensee, of the number of passengers, or number or quantity of goods, conveyed by any and every carriage used by him on the tramway.

Discontinuance of Tramways.

[33 & 34 Vic., c. 78, s. 41.]

Cesser of powers of promoter and lessee on discontinuance of tramway.

19. If it is proved to the satisfaction of the Local Government, at any time after the opening of a tramway for public traffic, that the working of the tramway, or any part thereof, has been discontinued, for the space of three months, without a reason sufficient, in the opinion of the Local Government, to warrant the discontinuance, the Local Government, if it thinks fit, may, by notification in the official Gazette, declare that the powers of the promoter and of the lessee, if any, in respect of the tramway or the part thereof so discontinued, shall, from the date of the notification, be at an end, and thereupon the said powers shall cease and determine, except in so far as they may be purchased by a local authority in manner by this Act provided.

[Section 22 of this Bill.]

[33 & 34 Vic., c. 78, s. 41.]

Powers of road-authority on cesser of powers of promoter.

20. *(1)* Where a notification has been published under section 19, the road-authority may, at any time after the expiration of two months from the date of the notification, remove the tramway or part of the tramway so discontinued, and use the materials thereof in re-instating the road.

(2) The promoter shall pay to the road-authority the cost incurred by that authority in removing the tramway or the part thereof and in re-instating the road.

(3) The cost shall be certified by an officer of the road-authority, and his certificate, countersigned by the District Magistrate, shall be conclusive proof as to the cost incurred.

(4) If the promoter does not pay the amount so certified within one month after the delivery to him of the certificate or of a copy thereof, the road-authority may, without any previous notice to the promoter and without prejudice to any other remedy which it may have for the recovery of the amount, sell and dispose of such materials of the tramway or part thereof removed as it has not used in re-instating the road, either by public auction or by private sale, and for such sum or sums, and to such person or persons, as it thinks fit, and may, out of the proceeds of the sale, pay and reimburse itself the amount of the cost aforesaid and of the expenses of the sale, and shall pay over the residue (if any) of the proceeds of the sale to the promoter.

[Section 36 of this Bill.]

Insolvency of Promoter.

[33 & 34 Vic., c. 78.]

Proceedings in case of insolvency of promoter.

21. *(1)* If, at any time after the opening of a tramway in a circle for public traffic, it appears to the road-authority or local authority of the circle that the promoter of the tramway is insolvent, so that he is unable to maintain the tramway, or work it with advantage to the public, and either of those authorities makes a representation to that effect to the Local Government, the Local Government may, if after such enquiry as it deems necessary it is satisfied as to the truth of the representation, declare, by notification in the official Gazette, that the powers of the promoter shall, at the expiration of six months from the publication of the notification, be at an end; and the powers of the promoter shall cease and determine at the expiration of that period, except in so far as they may be purchased by a local authority in manner by this Act provided.

[Section 21 of this Bill.]

(2) Where a notification has been published under sub-section *(1)*, the road-authority may, at any time after the expiration of six months from the date thereof, remove the tramway in the same manner, and subject to the same provisions as to the payment of the cost of the removal, and to the same remedy for recovery of the cost, in every respect as in cases of removal under section 20.

Purchase of Tramways.

[33 & 34 Vic., c. 78.]

Future purchase of undertaking by local authority.

22. *(1)* Where the promoter of a tramway in a circle is not the local authority, the local authority, with the previous sanction of the Local Government, may—

(a) within such limits of time as may be specified in this behalf in the order, or

(b) if a time was not specified in the order, then within six months after the expiration of a period of twenty-one years from the date of the order, and within six months after the expiration of every subsequent period of seven years, or

(c) within two months after the publication of a notification under section 19 or within six months after the publication of a notification under section 21,—

by notice in writing, require the promoter to sell to the local authority his undertaking or the part thereof which is within the circle of the local authority; and thereupon the promoter shall sell the same upon the terms specified in the order, or, if the terms were not specified in the order, then upon the terms of paying the then value of the undertaking or of the part thereof, exclusive of any allowance for past or future profits of the undertaking or any compensation for compulsory sale or other consideration whatsoever.

(2) A requisition shall not be made under sub-section *(1)* unless the making thereof has been

approved by the local authority in manner prescribed.

(3) When a sale has been made under this section, all the rights, powers and authorities of the promoter in respect of the undertaking or part thereof sold, or, where a notification has been published under section 19 or section 21, all the rights, powers and authorities of the promoter previous to the publication of the notification in respect of the undertaking or part thereof sold, shall be transferred to the authority to whom the undertaking or part has been sold, and shall vest in, and may be exercised by, that authority in the same manner as if the tramway had been constructed by it under an order made under this Act.

(4) Subject to, and in accordance with, the preceding provisions of this section, two or more local authorities may jointly purchase an undertaking or so much thereof as is within their circles.

Working of Tramways owned by Local Authorities.

1 Vic., 19.] Lease of, or working of, tramway by local authority.

23. *(1)* When a local authority has under the authority of an order completed a tramway, or has under the provisions of this Act or of an order acquired possession of a tramway, it may, by a lease to be approved by the Local Government, let to any person the right of user of the tramway and of demanding and taking the authorised tolls.

(2) On the determination of a lease, the local authority may from time to time let the right for such further term and on such conditions as the Local Government may approve.

(3) Every lease made under this section shall imply a condition of re-entry if at any time after the making thereof it is proved to the satisfaction of the Local Government that the lessee has discontinued the working of the tramway leased, or of any part thereof, for the space of three months, without a reason sufficient, in the opinion of the Local Government, to warrant the discontinuance.

(4) Notice of the intention of the local authority to make a lease shall be given in manner prescribed.

(5) If the local authority cannot by means of a lease obtain what it deems to be a fair rent for the tramway, it may itself, with the previous sanction of the Local Government and for such term as the Local Government directs, place and run carriages upon the tramway, and demand and take the authorised tolls in respect of the use of the carriages.

Rules.

Vic., 46 & Act 83, s. Power to make rules.

24. *(1)* In addition to any other power to make rules expressly or by implication conferred by this Act, the Local Government may make rules consistent with this Act—

(a) as to the form in which an application for an order shall be made;

(b) as to the costs to be paid by an applicant in respect of an order, and the time when, and the place where, those costs shall be paid;

(c) as to the payment of money or lodgment of securities, by way of deposit, by the applicant for an order before the order is published under section 6, sub-section *(4)*, or a further order is made under section 8; the investment of money so paid; the disposal of interest or dividends from time to time accruing due on money or securities so paid, lodged or invested; the application of the money or securities or the produce thereof to the discharge of any liability incurred by the promoter, and the forfeiture, repayment or return of the money or securities;

(d) as to the plans and sections of any works to be deposited by applicants for orders or by promoters;

(e) for regulating the use of steam-power or any other mechanical power on a tramway;

(f) as to any matter specified in section 7, sub-section *(2)*, clauses *(c)*, *(d)*, *(e)*, *(j)* and *(k)*, as a matter which may be provided for in an order, when that matter has not been so provided for, or has not, in the opinion of the Local Government, been effectually so provided for;

(g) as to any matter respecting which rules may be made under this section by a local authority or a promoter or lessee; and,

(h) generally, as to any other matter or thing in respect of which it may seem to the Local Government to be expedient to make rules for the purpose of carrying this Act into execution.

(2) A local authority may, from time to time, with the previous sanction of the Local Government, make rules, consistent with this Act and the order and any rules made by the Local Government under the Act, for regulating— [33 & 34 Vic., c. 78, s. 46; and Act XXII, 1883, s. 20.]

(a) the rate of speed to be observed in travelling upon a tramway within the circle of the local authority;

(b) the use of animal power on the tramway;

(c) the distances at which carriages using the tramway shall be allowed to follow one after the other;

(d) the stopping of carriages using the tramway;

(e) the traffic on roads along or across which the tramway is laid;

(f) the number of passengers which may be carried in any carriage;

(g) the licensing and control of drivers, conductors and other persons having charge of the carriages of the promoter or lessee or a licensee; and, [33 & 34 Vic., c. 78, s. 48.]

(h) generally, the mode of use of the tramway. [Act XXII, 1883, s. 20.]

(3) The promoter or lessee of a tramway may, from time to time, with the previous sanction of the Local Government, make rules consistent with this Act and the order and any rules made under the Act— [33 & 34 Vic., c. 78, s. 46; and Act XXII, 1883, s. 20.]

(a) for preventing the commission of any nuisance in or upon any carriage, or in or against any premises belonging to him; and

(b) for regulating the travelling in any carriage belonging to him.

Power to impose penalty by rule.

25. The authority making any rule under section 24 may direct that a breach of it shall be punishable with fine which may extend— [33 & 34 Vic., c. 78, s. 47.]

(a) if the authority making the rule is the Local Government, to two hundred rupees, and [Act XXII, 1883, s. 14.]

The Indian Tramways Bill, 1885.—Sections 26-31.

[Act XXII, 1883, s. 20, sub-section (3).]

(b) if that authority is a local authority or a promoter or lessee, to twenty rupees;

and, when the breach is a continuing breach, with a further fine which may extend—

[Act XXII, 1883, s. 14.]

(c) if the authority making the rule is the Local Government, to fifty rupees, and

[33 & 34 Vic., c. 78, s. 47.]

(d) if that authority is a local authority or a promoter or lessee, to five rupees,

for every day after the first during which the breach continues.

Procedure for making, and publication of, rules.

26. *(1)* Every authority having power to make rules under any section of this Act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(2) The publication shall be made, in the case of rules made by the Local Government, in such manner as may in its opinion be sufficient for giving information to persons interested, and, in the case of rules made by a local authority or by a promoter or lessee, in manner prescribed.

(3) There shall be published with the draft a notice specifying a date, not earlier than the expiration of one month after the date of publication, at or after which the draft will be taken into consideration.

(4) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(5) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive proof that it has been duly made.

(6) The Local Government may cancel any rule made by a local authority or by a promoter or lessee under section 24.

Offences.

Penalty for failure of promoter, lessee or licensee to comply with Act or order.

27. If a promoter—

(a) constructs or maintains a tramway otherwise than in accordance with the order;

[Act XXII, 1883, s. 14.]

(b) opens the tramway for traffic, or permits it to be so opened, before it has been inspected and certified in manner required by section 12; or

(c) fails to observe any requirement or condition of the order for neglect or breach whereof no penalty has been expressly provided in the order;

or if a promoter, lessee or licensee runs a carriage on a tramway otherwise than in accordance with the order;—

he shall (without prejudice to the enforcement of specific performance of the requirements of this Act or of the order, or to any other remedy which may be obtained against him in a Court of Civil Judicature), on the complaint of the Local Government or of the local authority or road-authority or of any person injuriously affected thereby, be punished with fine which may extend to two hundred rupees, and in the case of a continuing offence to a further fine which may extend to fifty rupees for every day after the first during which the offence continues to be committed.

Penalty for obstructing promoter in exercise of his powers.

28. If any person without lawful excuse, the burden of proving which shall lie upon him, wilfully obstructs any person acting under the authority of the promoter in the lawful exercise of his powers in constructing or maintaining a tramway, or injures or destroys any mark made for the purpose of setting out the line of the tramway, he shall be punished with fine which may extend to fifty rupees.

[33 & 34 c. 78, s. and Act 1883, s.

Penalty for interfering with tramway.

29. If any person without lawful excuse, the burden of proving which shall lie upon him, wilfully does any of the following things, namely:—

[33 & c. 78, and Act 1883, s.

(a) interferes with, removes or alters any part of a tramway constructed under this Act, or of the works connected therewith;

(b) places or throws upon or across any such tramway any wood, stone, refuse or other thing;

(c) does anything in such a manner as to obstruct any carriage using any such tramway; or

(d) abets within the meaning of the Indian Penal Code the doing of, or attempts to do, anything mentioned in clause *(a)*, clause *(b)* or clause *(c)*,

XLV of

he shall (without prejudice to any other remedy which may be obtained against him in a Court of Civil Judicature) be punished with fine which may extend to one hundred rupees.

Penalty for using tramway with carriage having flange-wheels.

30. If any person, except under a lease from, or by agreement with, the promoter, or under license from the Local Government granted under this Act, uses on a tramway, otherwise than as permitted by section 14, a carriage having flange-wheels or other wheels suitable to run on the rail of the tramway, he shall be punished with fine which may extend to two hundred rupees.

[33 & c. 78,

Penalty for evading payment of proper toll.

31. *(1)* If any person travelling or having travelled in a carriage of the promoter or lessee or a licensee evades or attempts to evade payment of toll, or if any person having paid toll for a certain distance wilfully proceeds in any such carriage beyond that distance and does not pay the additional toll for the additional distance or attempts to evade payment thereof, or if any person wilfully refuses or neglects on arriving at the point to which he has paid toll to quit the carriage, he shall be punished with fine which may extend to ten rupees.

[33 & c. 78, and 1883,

(2) When a person commits an offence under this section and refuses, on demand of a servant of the promoter, lessee or licensee, to give his name and residence, or gives a name or residence which the servant has reason to believe to be false, he may be arrested and taken to the nearest police-station by the servant or any person whom the servant may call in for his assistance.

[33 & c. 78, Act X 1883, and A 1883,

(3) When the person is taken to the police-station, he shall with the least possible delay be forwarded to the nearest Magistrate unless his true name and residence are ascertained, in which case he shall be released on his executing a bond for his appearance before a Magistrate if so required.

The Indian Tramways Bill, 1885.—Sections 32-39.

[33 & 34 Vic., c. 78, s. 53, and Act XXII, 1883, s. 17.]

Penalty for taking or sending dangerous or offensive goods without giving notice.

32. If any person takes or sends by a tramway any goods of a dangerous or offensive nature without giving the notice required by section 16, he shall be punished with fine which may extend to fifty rupees.

[33 & 34 Vic., c. 78, s. 38.]

Penalty for licensee not giving to promoter or lessee an account of traffic or giving false account.

33. *(1)* If a licensee fails on demand to give the account mentioned in section 18, or, with intent to evade the payment of tolls, gives a false account when he is called upon to give an account under that section, he shall be punished with fine which may extend to fifty rupees.

(2) The fine shall be in addition to any tolls payable by the licensee to the promoter or lessee in respect of the passengers or goods conveyed by the carriage or carriages used by the licensee on the tramway.

Act XIII, 1884, s. 158.]

Saving of prosecutions under other laws.

34. Nothing in this Act shall prevent a person from being prosecuted under any other law for an act or omission which constitutes an offence against this Act or the rules made under it, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Act or the rules made under it: Provided that a person shall not be punished twice for the same offence.

Settlement of Differences.

[33 & 34 Vic., c. 78, s. 33.]

Differences between promoters or lessees and authorities.

35. *(1)* If any difference arises between the promoter or lessee on the one hand and the Local Government, or the local authority, or the road-authority, or a person having the charge of any sewers, drains, telegraph lines, gas-pipes or water-pipes, on the other hand, with respect to any interference or control exercised or claimed to be exercised by, or on behalf of, either party by virtue of this or any other Act, or of the order, or of rules made under this Act, or with respect to the propriety of, or the mode of, the execution of any work, or with respect to any compensation to be made by or to the promoter or lessee, or on the question whether any work is such as ought reasonably to satisfy the Local Government or the road-authority or both, or with respect to any other subject or thing regulated by, or comprised in, this Act or the order or rules made under the Act, and not otherwise expressly provided for therein, the matter in difference shall, on the application of either party, be settled by a referee.

(2) Where the difference is between the promoter or lessee on the one hand and the Local Government, either as such or as the road-authority, on the other, the referee shall be the District Court within the jurisdiction of which the tramway is situate, or, where the tramway is within the jurisdiction of more than one District Court, the District Court within the jurisdiction of which the greater part of the tramway is situate.

(3) In other cases, the referee shall be appointed by the Local Government.

(4) The powers and procedure of the referee may be prescribed.

(5) The decision of the referee shall be binding and conclusive on both parties.

Recovery of Tolls.

[33 & 34 Vic., c. 78, s. 56; & Act XIII, 1884, s. 61.]

Recovery of moneys due from promoters and, in certain cases, from lessees.

36. Any of the following moneys, namely, any rent due to a local authority from a lessee, any penalty recoverable from a promoter or lessee under an order, any sum payable by a promoter or lessee under an award of a referee, the cost of the performance under this Act by the Local Government or by a local authority or road-authority of any work required by this Act or an order to be done by a promoter, and the cost incurred by a road-authority in removing a tramway and reinstating a road under this Act, may, without prejudice to any other remedy the authority to which the money is due may have by suit or otherwise, be recovered by that authority, on application made in this behalf to the Collector, as if the sum due were an arrear of land-revenue due by the promoter or lessee or his surety (if any):

Provided that nothing in this section shall authorise the arrest of the promoter or lessee or his surety in execution of any process issued by the Collector.

[Act XIII, 1884, s. 172.]

Recovery of tolls from licensees.

37. *(1)* If a licensee fails to pay on demand the tolls due for the use of a tramway, the promoter or lessee to whom the tolls are due may, without prejudice to the remedy which he may have by suit, apply to a Magistrate to recover the amount of the tolls, and the Magistrate may, after giving notice to the licensee if possible and allowing him an opportunity of being heard, proceed to recover the amount by distress and sale of any carriages or other moveable property of the licensee which may be found on the tramway or on premises connected therewith.

(2) When a licensee has failed to pay on demand the tolls due from him, the promoter or lessee to whom the tolls are due may seize any carriage or other moveable property of the licensee on the tramway or on premises connected therewith, and detain the same for forty-eight hours unless the tolls are sooner paid.

(3) When application is made to a Magistrate under sub-section *(1)*, he may make an interim order of distraint pending his final decision.

[Act XIII, 1884, s. 173.]

Recovery of tolls from passengers.

38. Any toll due to a promoter, lessee or licensee from a passenger may be recovered either by suit or, on application to a Magistrate having jurisdiction within any local area in which any part of the tramway is laid, by distress and sale of any moveable property belonging to the passenger within the local limits of the jurisdiction of the Magistrate.

Savings.

[33 & 34 Vic. c. 78, s. 57; and Act XXII, 1883, s. 9.]

Promoter to have right of user only.

39. *(1)* Notwithstanding anything contained in this Act or in an order, a promoter shall not acquire any right other than that of user only over a road along or across which he lays a tramway, nor shall anything contained in this Act or in an order exempt the promoter of a tramway, or any other person using the tramway, from the payment of such charges as may lawfully be levied in respect of the use of a road or bridge along or across which the tramway is laid.

[Act VIII, 1851.]

[Act XVII, 1878, s. 18.]

(2) The Local Government may, if it thinks fit, fix rates at which a promoter, lessee or licensee

may compound for the charges payable in respect of the use of a road or bridge.

[33 & 34 Vic., c. 78, ss. 32 & 60.]

Saving of power over roads traversed by tramways

40. *(1)* Nothing in this Act or in an order shall take away or abridge any power which a road-authority, local authority or other person has by law to break up, widen, alter, divert or improve a road, railroad or tramway along or across which a tramway is laid.

(2) The road-authority, local authority or other person executing any work referred to in sub-section *(1)* shall not be liable to pay to a promoter, lessee or licensee any compensation for injury done to a tramway by the execution of the work or for loss of traffic occasioned by the reasonable use of any power lawfully exercised for the execution thereof.

[33 & 34 Vic., c. 78, s. 61; and Act XXII, 1883, s. 10.]

Saving of power of local authority and police to regulate traffic on roads.

41. Nothing in this Act or in an order shall affect the powers of a local authority or of a magistrate or police-officer to regulate the passage of traffic along or across a road along or across which a tramway is laid; and the authority, magistrate or officer aforesaid may exercise its or his powers as well on as off the tramway and with respect as well to the traffic of a promoter, lessee or licensee as to the traffic of other persons.

Supplemental Provisions.

[33 & 34 Vic., c. 78, ss. 40 & 55.]

Promoters, lessees and licensees to be responsible for all injuries.

42. A promoter, lessee or licensee shall be answerable for all injuries happening through his act or default, or through the act or default of any person in his employment, by reason or in consequence of any of his carriages or works, and shall save harmless all authorities and persons collectively and individually, and their officers and servants, from all damages and costs in respect of injuries so happening.

[Act XXII, 1883, s. 21.]

Want of funds not a sufficient reason for default.

43. For the purposes of this Act, want of funds shall not be deemed to be a sufficient reason for the suspension of the construction, or the discontinuance of the working, of a tramway by a promoter or lessee.

[Act XXII, 1883, s. 22.]

Power to exempt from municipal taxation.

44. When a tramway is constructed under this Act within the limits of a municipality, the Local Government may exempt the animals, plant, rolling-stock, yards, workshops, engine-sheds and depôts of the promoter or lessee, for such period as it thinks fit, from all or any municipal taxes leviable within those limits.

[33 & 34 Vic., c. 78, s. 20.]

Application by local authorities of local funds to tramways.

45. The fund to or with the control or management of which the local authority of a municipality, cantonment or district is entitled or entrusted shall, notwithstanding anything in any Act respecting the purposes to which that fund may be applied, be applicable, subject to the control of the Local Government, to the payment of expenses incidental to the exercise of the powers and functions which may be vested in or exercised by a local authority under this Act.

Extension of Act to existing tramways.

46. The Local Government may, with the consent of the local authority and road-authority and of the promoter, extend any part of this Act or of any rules made thereunder, either with or without modification, to the whole or any part of a tramway constructed, or authorised to be constructed, before the passing of this Act, and to any extension of, or addition to, any such tramway, and may withdraw any part of the Act so extended.

IV of 1879.

Meaning of "tramway" in Railway Act.

47. In section 54 of the Indian Railway Act, 1879, the word "tramway" shall have the meaning assigned to it by section 3 of this Act.

[Act XIII, 1884, s. 173.]

Powers of Local Government exercisable from time to time.

48. All powers conferred by this Act on a Local Government may be exercised from time to time as occasion requires.

STATEMENT OF OBJECTS AND REASONS.

THE introduction of this Bill has been rendered necessary by the projected construction of tramways in parts of India beyond the reach of a local legislature. In 1883 a special Act was passed by the Governor General in Council to authorise the making, and regulate the working, of tramways in Rangoon. Since that year application has been made for special Acts for tramways in Lahore and Amritsar, and legislation would probably be found to be necessary to regulate the use of tramways in other large towns in which their construction has been approved by, or is under the consideration of, the local authorities.

2. The Bill has been drawn on the lines of the Tramways Act, 1870 (33 & 34 Vic., c. 78), and of the provisional orders and rules made by the Board of Trade under that statute. These orders and rules, and the fullest discussion on almost all points connected with the subject of tramways, will be found in Mr. Sutton's "Tramway Acts of the United Kingdom."

3. The Bill extends in the first instance to the whole of British India except the territories comprised within the sphere of a local legislature, and is extendible to those territories by the Local Government.

4. "Orders" take the place of the "provisional orders" of the English statute, but differ from those orders in not being "provisional" and not being confirmed by a subsequent Act of the Legislature. They also differ from provisional orders in that they must be consistent with the Act and cannot vary or except any part of it.

5. Sections 4 to 6 of the Bill prescribe the conditions on which, and the manner in which, an order may be made; and section 7 specifies the matters for which provision may be made in an order. A reference to the authorities cited against the several clauses of that section will show how those matters are now provided for in the United Kingdom. If an order is found on experience to be defective, it can be supplemented by a further order on the

application of the person in whose favour the original order was made (section 8), or, in certain particulars, by rules (section 24).

6. When the order has been made, the tramway must be constructed, maintained and worked in the manner provided by the order (sections 11 and 27). If the tramway is constructed by a local authority, it will ordinarily be worked by a lessee (section 23). If it is constructed by a private speculator, it may be worked by him or by a lessee to whom he has let the right of user and of demanding and taking the authorised tolls (section 7, sub-section *(4)*). If the owner of the tramway or his lessee so works the tramway that the public is deprived of the full benefit of it, the Local Government may grant a license to any person to use the tramway on the payment of tolls to the owner or the lessee (section 17). If the owner discontinues the working of the tramway (section 19) or through want of funds is unable to maintain the tramway or work it with advantage to the public (section 21), the Local Government may revoke his powers. When the powers of the owner are so revoked, the tramway may either be removed by the authority which has charge of the road on which the tramway is laid (section 20 and section 21, sub-section *(2)*), or it may be purchased by the local authority (section 22).

7. Section 22 provides for tramways which have been constructed by companies and private persons being purchased by local authorities on the expiration of the periods, and upon the terms, specified in the order, or, if the periods and terms were not specified in the order, then on the expiration of the periods, and upon the terms, prescribed in the English statute.

8. When a tramway is purchased by a local authority, it will ordinarily be worked by a lessee. There may, however, be cases in which the authority would be unable to let a tramway for an adequate consideration. It has been provided, therefore (section 23), that in those cases the Local Government may authorise the local authority itself to engage in the business of running carriages.

9. Differences between owners or lessees of tramways and the Local Government or local authorities are to be settled by a referee (section 35), who, if the Local Government is directly interested, is to be the District Judge. The decision of the referee will be final.

10. Sections 36 to 38 provide for the recovery by suit or summary process of moneys due to and from owners, lessees and licensees of tramways.

11. Sections 39 to 41 contain the savings usually found in enactments and agreements relating to the construction of tramways, and section 44 enables the Local Government to exempt from local taxation the animals, plant, rolling-stock and premises of owners and lessees of tramways constructed within the limits of municipalities.

12. Section 46 enables the Local Government, with the consent of the owner and the local authorities, to extend any part of the Act, with or without modification, to a tramway or any part of a tramway constructed, or authorised to be constructed, before the passing of the Act.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE REGISTRATION DEPARTMENT IN BENGAL FOR THE YEAR 1884-85.

REGISTRATION.

Darjeeling, the 30th October 1885.

RESOLUTION.

READ—

The Report on the Administration of the Registration Department for the year 1884-85.

Read also—

The Reports for the years 1882-83 and 1883-84, and the orders of Government recorded thereon.

Read also—

The Report on the operations under the Mahomedan Marriage Registration Act during the year 1884-85.

During the past year there was again an increase in the number of registrations, amounting to 87,378, or 14·53 per cent. as compared with an increase of 45,861, or 8·26 per cent. in the previous year. The increase in the number of compulsory registrations affecting immoveable property exceeded considerably the increase in the number of optional registrations affecting property of the same kind; the procentage of the latter was, however, much higher than that of the former, the increase in compulsory registrations amounting to 43,024, or 12·97 per cent., while the increase in optional registrations amounted to 29,847, or 18·20 per cent. The receipts rose from

Rs. 9,74,711 to Rs. 1,074,501, an increase of 10·23 per cent., while the expenditure increased from Rs. 5,04,755 to Rs. 5,54,110, or 9·77 per cent.; the net surplus being Rs. 5,20,391, or 10·73 per cent. higher than the net surplus for 1883-84.

2. The following table shows the number of operations and the receipts and expenditure during each of the years since 1869-70. It also shows the number of registration offices open during each year. In former reports the figures given for the years preceding 1874-75 included the figures for Assam, as the Chief Commissionership formed, during those years, a part of Bengal. In his present Report, however, the Inspector-General has excluded the figures for Assam, so that the table now relates purely to Lower Bengal:—

Years.	Number of Registrations—				Total receipts.	Total expenditure.	Surplus.	Number of registration offices.
	Affecting immoveable property		Other registrations.	Total.				
	Compulsory.	Optional.						
					Rs.	Rs.	Rs.	
1869-70	158,226	50,358	37,997	246,581	4,02,392	3,07,545	94,847	150
1870-71	157,075	48,480	30,831	236,386	3,78,024	3,04,393	73,631	155
1871-72	154,000	53,803	30,791	239,494	3,62,990	2,73,410	89,580	157
1872-73	170,609	65,052	36,068	271,729	4,22,745	2,95,460	1,27,284	159
1873-74	198,741	77,104	44,028	319,873	4,68,511	3,18,437	1,50,074	201
1874-75	230,340	98,070	74,563	423,873	5,52,325	3,86,953	1,65,372	246

3. In the statement given below are shown the number of compulsory and optional registrations referring to immoveable property, and also the number of registrations other than those affecting such property—

REGISTRATIONS AFFECTING IMMOVEABLE PROPERTY.

	1883-84.	1884-85.
(A).—*Compulsory.*		
Instruments of sale, &c., of immoveable property of value of Rs. 100 and upwards	42,951	47,027
Instruments of mortgage of immoveable property of value of Rs. 100 and upwards	48,295	55,253
Perpetual leases	75,552	85,519
Term leases under section 17	154,571	175,045
Other compulsory registrations	10,337	11,886
Total compulsory registrations affecting immoveable property ...	331,706	374,730
(B).—*Optional.*		
Instruments of sale, &c., of immoveable property of value less than Rs. 100	100,618	115,540
Instruments of mortgage of immoveable property of value less than Rs. 100	52,207	66,416
Leases for one year and less	4,952	5,363
Miscellaneous documents	6,187	6,492
Total optional registrations affecting immoveable property ...	1,63,964	193,811
Total registrations affecting immoveable property ...	495,670	568,541

REGISTRATIONS OTHER THAN THOSE AFFECTING IMMOVEABLE PROPERTY.

(C).		
Obligations for payment of money	72,985	85,459
All other registrations	30,558	32,556
Total of above ...	103,543	118,015
(D).		
Number of wills registered	1,744	1,783
Ditto of written authorities	45	41
Total registrations	601,002	688,380

4. Under every head in the statement there has been an increase in the number of operations, with the exception of the number of written authorities registered, and under this head, which is a very small one, there was a slight decrease. The largest number of operations under any of the heads was under the head of term leases, of which 175,045 were registered as against 154,571 registered during 1883-84. The number of perpetual leases registered rose from 75,552 in 1883-84 to 85,519 during the past year. The number of instruments of sale, &c., of immoveable property of Rs. 100 and upwards in value was 47,027, showing an increase of 9·49 per cent. on the number registered during the preceding year, while the number of similar instruments relating to property below Rs. 100 in value registered was 55,253 as compared with 48,295 registered in 1883-84, showing an increase of 6,958 registrations, or 14·40 per cent. Under the optional registrations affecting immoveable property, the number of instruments of sale, &c., relating to property worth Rs. 100 and upwards rose from 100,618 in 1883-84 to 115,540 during the past year, while the same class of documents relating to immoveable property of less than Rs. 100 in value increased from 52,207 to 66,416, an increase of 27·21 per cent. The number of obligations for the payment of money, or money-bonds registered, shows an increase of 17·09 per cent. as compared with the number registered during the preceding year, the number having risen from 72,985 to 85,459. Including Calcutta and Howrah as registration districts, an increase of the number of registrations as compared with the figures for 1883-84 took place in 40 districts, while there was a decrease in five only. The largest decrease was in the Sonthal Pergunnahs, where the number of registrations fell from 6,884 in 1883-84 to 4,283 during the past year. In Bhagulpore also the number fell from 13,508 to 11,967. The number of districts in which over 20,000 registrations took place was 11, as compared with 9 in 1883-84 and 8 in the year which preceded it. Jessore, as usual, headed the list with 69,345 registrations as against 61,442 in the preceding year. The other districts were Backergunge (47,948), 24-Pergunnahs (46,439), Chittagong (40,253), Noakholly (31,787), Midnapore (31,333), Tipperah (29,198), Furreedpore (26,959), Khulna (24,602), Burdwan (21,542) and Dacca (21,124). In 6 districts over 30,000 documents were registered, as compared with 4 districts in 1883-84 and 3 districts in 1882-83. In 20 districts less than 10,000 documents were registered. Darjeeling and Singbhoom, in each of which there was a falling off as compared with 1883-84, are again much below any other district, the number of registrations in them being only 445 and 239 respectively.

5. The total number of leases, perpetual, term, and for periods of one year and under, which were registered during the last four years, were—

	1881-82.	1882-83.	1883-84.	1884-85.
Perpetual leases	74,639	70,764	75,552	85,519
Term leases	140,287	141,156	154,571	175,045
Leases for one year and under...	3,890	4,534	4,952	5,363
Total ...	218,816	216,454	235,075	265,927

Out of 85,519 perpetual leases registered, 82,787 were registered in Bengal Proper, only 1,402 being registered in Behar, 1,245 in Chota Nagpore and 85 in Orissa, and of the large number registered in Bengal Proper, 69,543 were registered in seven districts—Chittagong, Backergunge, Jessore, Noakholly, Furreedpore, 24-Pergunnahs and Khulna; the numbers registered in Chittagong, Backergunge and Jessore being 22,010, 12,069 and 11,315 respectively. The increase of perpetual leases in Eastern Bengal is attributed to the "growing prosperity of the ryot, especially those who lease lands which require much labour or expenditure of money to reclaim," as the latter are unwilling to incur expense in improvements until they have secured "some certainty of tenure." On the other hand, these leases are frequently given by zemindars who are in pecuniary difficulties, because they are enabled by giving them to raise a considerable sum of ready money. These leases are also a convenience to landholders whose property is scattered, and who, by giving a perpetual lease, can relieve themselves of the trouble and expense of looking after outlying portions of their property.

6. The number of term leases registered in Bengal Proper also far exceeds the number registered in the other three divisions, 127,607 out of

175,045 being registered in Bengal. Behar is not, however, so far behind in respect of term leases, as it is in the case of perpetual leases, 40,360 leases of the former kind having been registered in it during the past year. In four districts more than 10,000 term leases were registered, viz Jessore (16,126), Furreedpore (11,968), Backergunge (10,641) and Tipperah (10,020.) The 24-Pergunnahs and Mymensingh come next with 9,767 and 9,106 term leases respectively. In Chittagong, in which district 22,010 perpetual leases were registered, the number of term leases registered only amounted to 1,212. Various reasons are given for the increase in Eastern Bengal, where it is most noticeable: in Furreedpore the increase is said to be due to the settlement of three large estates, and in Khulna to a large reclamation of marsh land; while the increase in Mymensingh marks, it is said, "the amicable close of a long-standing quarrel between the landlords and their tenants." The total number of leases for one year and less, registered during the past year, was 5,363 as compared with 4,952 in 1883-84. Of these, 4,529 were registered in Bengal Proper, 571 in Behar, 186 in Chota Nagpore and 77 in Orissa. The total value of leases of all kinds registered during the year was Rs. 1,00,86,412, the value of those registered in Bengal being Rs. 48,04,023, or an average of Rs 43 per lease; while in Behar the value was Rs 48,39,082, or an average of Rs. 134 per lease. Even in Orissa and Chota Nagpore the average per lease is much higher than in Bengal, being Rs. 87 and Rs. 53 respectively.

7. The returns show a decrease in the proportion of leases to counterparts registered, as compared with the preceding year, the percentage of leases being only 26·83 as compared with 28·16 in 1883-84. The best results were again obtained in Chota Nagpore (59·31 per cent.) and Behar (48·08 per cent.) and the worst in Orissa (23·02 per cent.) and Bengal Proper (19·12 per cent.) In the case of leases, the registration of which is compulsory, the proportion amounted to 27 32 per cent., while in the case of those, the registration of which is optional, it only amounted to 11·2 per cent. The highest percentage was in Chumparun, where the leases registered amounted to 91·16 per cent.; while in Lohardugga and Mozufferpore the percentages were 83·05 and 82·81 respectively. In Purneah and Mymensingh the percentages were only 8·23 and 4·7.

8. There was a marked increase in the number of instruments of sale of immoveable property of the value of Rs. 100 and upwards, 47,027 being registered as compared with 42,951 registered during 1883-84, an increase of 9·49 per cent. In nine districts there was a decrease in the number, but it was slight; in one district the numbers in the two years were the same; in all the remaining districts there was an increase. Instruments of mortgage of immoveable property of the value of Rs. 100 and upwards showed an increase of 14·40 per cent., the number having risen from 48,295 in 1883-84 to 55,253 in 1884-85. The increase was general throughout the country, with the exception of two districts, the Sonthal Pergunnahs and Balasore, in which the decrease was 203 and 20 respectively. The number of instruments of gift of property of the same value was 4,272, which represented property of the value of Rs. 21,40,502. These deeds, as in 1883-84, were most numerous in Mymensingh, where 448 were registered; in Dacca and Beerbhoom the numbers were 323 and 239, while the 24-Pergunnahs and Midnapore had 238 each. The largest amount of property transferred was in Sarun, where land to the value of Rs. 2,95,619 was transferred by only 78 deeds.

9. The number of instruments of sale of immoveable property of less than Rs. 100 in value, which was registered, rose from 89,269 in 1882-83 and 100,618 in 1883 84 to 115,540 during the past year. The Inspector-General remarks: "The increased execution of deeds of this class is not a matter for unqualified congratulation, since it shows that a large number of petty holdings and small parcels of land are changing hands, presumably owing to the necessities of their proprietors; but, granted the necessity for carrying out these sales, their presentation at a registration office is undoubtedly to be desired." Looking to the fact that the number of such registrations rose in every district of Bengal, with the exception of Darjeeling, the Sonthal Pergunnahs, Balasore and Singbhoom, the Lieutenant-Governor is disposed to consider that the increase should not be attributed so much to necessity on the part of persons occupying petty holdings as to the more general appreciation

of the benefits of registration which is now evinced by persons throughout the country. The mere fact that optional registrations of instruments affecting immoveable property increased from 132,475 in 1881-82 and 146,021 in 1882-83 to 163,964 in 1883-84 and 193,811 in 1884-85, shows that the feeling that there is a certain amount of security to be obtained by registration is spreading among the mass of the population of these Provinces. Instruments of mortgage of immoveable property of less value than Rs. 100 increased from 52,207 registered during 1883-84 to 66,416 registered during 1884-85. This increase, not in itself large, was pretty generally distributed throughout Bengal, though Chittagong and Durbhunga each show an advance of nearly 100 per cent. on the figures of the previous year, and the Sonthal Pergunnahs an almost equal decrease. In Durbhunga one of the causes of the increase is said to have been the loans which a number of the poorer *pundits* of Tirhoot raised by mortgaging their properties in order to procure the money necessary to enable them to attend *sobha* held by the Maharajah of Durbhunga at Benares, the *punnits* being desirous of being present both from the wish to obtain the rewards and dresses of honour which were promised, and from the fear that their absence would prejudicially affect their reputation

10. The following statement shows the number of estates and tenures transferred by registered deeds during the past two years, the amount for which they were disposed of and the classes of persons by whom they were purchased :—

	Entire revenue-paying estates.		Share in entire revenue-paying estates.		Revenue-free properties.		Intermediate tenures.		Others.	
	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.
Number of transactions ...	1,670	1,344	11,129	11,701	25,065	27,589	26,951	29,415	7,891	9,903
Purchasers—										
1. Mahajans, traders, or money-lenders .	261	238	1,461	1,317	4,907	4,976	2,698	2,593	1,328	1,370
2. Zemindars	428	367	6,640	7,307	2,868	2,127	2,164	1,959	927	993
3. Intermediate tenure-holders	221	2	2,136	2,675	2,134	3,296	14,158	15,809	1,196	1,673
4. Ryots	104	1	1,100	1,178	8,431	10,180	6,830	9,227	1,916	2,492
5. Others	785	586	1,350	1,121	7,664	8,355	5,649	5,108	3,252	3,098
Purchase-money	34,38,186	19,10,314	93,20,039	1,01,44,18	41,61,888	84,28,819	48,26,933	53,77,446	74,09,947	96,57,135

From this statement it appears that zemindars were again the principal purchasers in the case of entire revenue-paying estates and shares in such estates; ryots and "others" in the case of revenue free properties; and principally tenure-holders, but also to a large extent ryots, in the case of intermediate tenures. The results are satisfactory from the point of view that the agricultural classes cling to the soil, and that the intervention of money lenders in such purchases is not so general as is commonly supposed With regard to purchasers coming under the heading "others," the Inspector-General remarks in the case of entire revenue paying estates: "The question naturally arises who are these 'others'? They are clearly not zemindars or tenure holders, mahajans or cultivators, since these are specified in the statement They are most probably members of the rising class of native advocates, pleaders judges, magistrates, doctors, &c., who, it is believed, have a great predilection for this class of property as a medium of safe investment for their savings" It would seem that the members of the same classes also look upon revenue-free tenures as a safe means of investment; for in the case of the sale of such tenures, "others" is next to "ryots" in number as a class, and far exceeds the number under any other class. When the question was raised by Mr Paul, who was then Officiating as Inspector General, regarding the necessity for a detailed classification of purchasers, to which he objected on account of the difficulty of making an accurate one, the Lieutenant-Governor decided that no alteration should then be made in the form of the statements, and the Inspector-General was so informed. Mr. Bourdillon remarks that no further communication has been received by him on the subject. The question involves some difficulties, and, pending the disposal of the rules to be framed under the Tenancy Act, has not been finally settled. The determination arrived at will be communicated in due course to the Inspector-General. There can be no doubt that, as a matter of revenue administration, the fullest information on the subject would be of value.

11. In the following statement are shown the details regarding the purchasers of ryoti holdings at fixed rates, and ryoti holdings with right of occupancy during the last two years:—

	Ryoti holdings at fixed rates.		Ryoti holdings with right of occupancy.	
	1883-84.	1884-85.	1883-84.	1884-85.
Number of transactions	20,518	24,327	47,060	54,186
Purchasers—				
1. Mahajans, traders, or money-lenders	3,585	4,156	6,745	6,846
2. Zemindars of the holding transferred	771	781	1,174	1,060
3. Ditto of holding other than that transferred	1,930	2,134	2,208	2,695
4. Ryots	10,990	13,012	31,911	39,436
5. Others	5,071	5,951	6,504	7,515
Total purchasers ...	22,277	26,014	48,602	57,542

The ryots have again been by far the most numerous purchasers, no less than 13,012 out of a total of 26,014 buyers of holdings of the former denomination, and 39,436 out of a total of 57,542 buyers of holdings of the latter kind belonging to that class. The return also indicates the rapid growth of such transfers, regarding which considerable discussion passed in the debates upon the Bengal Tenancy Bill. The total purchase-money in the case of ryoti holdings at a fixed rate was Rs. 22,83,331, as compared with Rs. 18,78,375 in 1883-84; while the average area per holding rose from 2·2 to 2·9 acres. The annual rental of the holdings was Rs. 2,02,481, as compared with Rs. 1,97,944, the annual rental of similar holdings transferred in 1883-84. In the case of ryoti holdings with right of occupancy, the annual rental of the holdings transferred during the past year was Rs. 3,53,727, as compared with a rental of Rs. 3,26,195 of those transferred in the preceding year: the total purchase-money rose from Rs. 32,00,555 to Rs. 35,30,008. The average area per holding remained the same as in the previous year, viz. 2·2 acres, which was less than the average area in 1882-83, when it amounted to 2·6 acres. The number of years purchase fetched by holdings of the former class ranged between 47·6 in the Sonthal Pergunnahs and 4·2 in Jessore. The number of years purchase of holdings of the latter class varied from 93·8, the highest in Lohardugga, to 3·6, the lowest in Nuddea.

12. During the past year the total number of registrations, other than those affecting immoveable property, and excluding wills and written authorities, was 118,015 as compared with 103,543 in 1883-84. Of these, 85,459, as compared with 72,985 in the preceding year, were bonds for the payment of money. With the exception of eight districts, of which six are in Behar, there has been an increase in the number of bonds registered in every district. As remarked in the Resolution on the Report for 1883-84, there was in that year, for the first time since 1879-80, a rise instead of a fall in the number of bonds registered. The increase during the past year was much more marked, for while the increase in 1883-84, as compared with 1882-83, was only 3,640, the returns for the past year show an increase of 12,474 as compared with 1883-84. Of this very large increase, 5,111 were due to Jessore, the number of bonds registered in that district being 30,658. In 1883-84 and 1882-83 the numbers registered in this district were only 25,547 and 25,927 respectively, but the returns for the past year are not so great as those for 1881-82, when the number of bonds registered was 34,829, or for 1880-81, when 39,245 bonds were registered in that district; but even this number was exceeded in 1879-80, when 49,878 deeds of this description passed through the registration offices in the Jessore district. Various reasons for the recent increased registration of bonds in Jessore are given. The Registrar of Jessore, whose remarks on the subject the Inspector-General quotes, says—

The increase is attributed by the Sub-Registrars of Gadkhali, Jhenida, Magura, and Narail to the high price of food-grains. The Sub-Registrar of Gadkhali further reports that the completion of the railway works, which used to provide employment for the poor class of people, has compelled many of this class to borrow money. Registrations in book IV have increased twofold in the offices of the Sub-Registrars of Jhenida and Gadkhali. The cause of increase in the former is partly attributable to the introduction of

the rural sub-registry system, and the consequent appointment of an officer who could give all his time to the work. At Gadkhali the increase is said to be due to the facility which this station offers for registration, being as it is at a railway station.

As was the case in 1883-84, by far the largest number of the bonds were for small amounts, there being only 2,097 for sums exceeding Rs. 500, and only 17,747 for sums exceeding Rs. 100 It is quite possible that, taking the above facts into consideration, the high price of food-grains may to a great extent be looked upon as the cause of the increase in the number of bonds registered; still it is very remarkable that the extraordinarily large number should be confined to a single district. In Behar, Chota Nagpore, and Orissa, the largest number of bonds registered were those of the fourth class, viz. bonds for amounts varying from Rs. 101 to Rs. 500. In Bengal Proper, in which 74,149 bonds out of the total 85,458 were registered, 19,294 were for sums not exceeding Rs. 25; 25,077 for sums between Rs. 26 and Rs. 50, and 17,774 for sums between Rs. 51 and Rs. 100. The Inspector-General considers that the explanation of this difference is "the same as that offered in the case of leases, viz. that, except in Bengal Proper, bonds of small value are not usually registered, while the advantages of registration are nevertheless so well appreciated that those of large value are very largely brought to the registrars' offices." There was an increase of 39 in the number of wills registered, 1,783 being registered in 1884-85 as compared with 1,744 in the preceding year; while written authorities decreased from 45 to 41. The number of powers-of-attorney registered was 6,722 as compared with 6,602 registered in 1883-84.

13. The Inspector-General draws attention to the fact that, though leases and counterparts can, when presented at the same time, be registered for a single fee, advantage is seldom taken of the concession. In Jessore, out of 27,586 leases and counterparts registered, in only 776 cases were the leases and counterparts presented at the same time. In Tipperah the proportion was higher, both documents being presented at the same time in 1,999 instances out of 12,664 leases registered. In Gya, he remarks, there was not a single instance in which the two were presented at the same time, notwithstanding the fact that in Gya the proportion of leases registered to counterparts amounted to 66 98 per cent. The returns seem to indicate an absence of knowledge of the provisions of the law in some districts, and an imperfect understanding of them in others. The attention of registering officers should, as proposed, be drawn to the subject.

14. As there was apparently a want of uniformity in interpreting the sections of the Act relating to the time from the date of execution within which documents must be presented, and the further time within which execution must be admitted, a circular was issued on the subject in January last by Mr. Bolton, who was at that time officiating as Inspector-General of Registration. Mr. Bourdillon remarks that the circular "gives expression to what may be called the more severe view of the law, and will, no doubt, result in an increase of fines" levied on documents submitted after the expiration of the ordinary time allowed. The circular was issued after the approval of the Advocate-General had been accorded to Mr. Bolton's proposals, and it seems to remove all possibility of any misinterpretation of the law. The next annual report will show whether Mr. Bourdillon's anticipation regarding the increase in the number of fines will prove to be correct.

15. The number of commissions issued and visits paid during 1884-85 was 6,163 as compared with 5,948 in 1883-84. In 3,391 cases, as against 3,086 in 1884-85, registration was refused, but was subsequently ordered in 158 cases out of 317 appeals made against the order of refusal. The number of prosecutions under sections 81 and 82 of the Registration Act was 54 as compared with 57 in the preceding year. Of these, six took place in Midnapore and nine in Mozufferpore. Of the latter, convictions followed in seven cases, and two cases were still pending at the close of the year. In Mymensingh, in which district in 1883-84, there were 13 prosecutions, there was not a single prosecution during the past year. Of 84 persons concerned in the 54 cases in which prosecutions were instituted, and in four cases pending from the preceding year, 54 were convicted, 26 acquitted, and four were awaiting trial at the close of the year. Of the 54 cases, 32 were for false personation,

13 for making a false statement, 8 for forgery, and one for disobedience of summons.

16. The total number of applications for searches or copies was 56,076, as compared with 52,218 in 1883-84. The searches are of three kinds—(1) those in Books III and IV and their indexes, made by the registering officer himself; (2) searches made under the rules of the High Court; and (3) searches made by applicants for their own information. The Inspector-General still expresses disapprobation of the results obtained in connection with the searches made under the rules of the High Court, and proposes to address Government separately on the subject. The Lieutenant-Governor's views on the matter have been expressed in the Resolutions on the Reports for 1882-83 and 1883-84, and none of the facts at present before him seem to the Lieutenant-Governor to warrant a departure from the conclusion which has, in the Resolutions referred to, been already communicated to the Inspector-General. Under these circumstances, the Lieutenant-Governor does not deem it advisable to advert further to this matter at present, but he will await the receipt of the letter embodying in full Mr. Bourdillon's views on the subject, and his reasons for still adhering to them. The number of such searches made during 1884-85 was 35,350, and the fees realized Rs. 66,320; while the number of ordinary searches was 21,596 and the fees received on account of them Rs. 24,706. The fees realized for the registration at the sudder office of documents which might have been registered at sub-registry offices amounted to Rs. 26,191 as compared with Rs. 24,900 in 1883-84. The reasons assigned for the preference shown for registration at the sudder office are, the Inspector-General remarks, those which have been given before, viz. that better legal advice can be obtained at the head-quarters of a district: that better lodgings can also be obtained there: and, lastly, that the parties have frequent occasion to go to the sudder station on other business. These reasons seem to be sufficient

17. During 1884-85, 2,225 documents were impounded for deficiency of stamp duty as compared with 2,098 during the preceding year. In 1,696 cases the Collector upheld the action of the registering officers, in 345 the documents were held to be correctly stamped, and 184 documents were pending adjudication at the close of the year. It is satisfactory to observe that the decision of the registering officer was reversed in only 17 per cent of the cases. In 102 cases prosecutions for fraudulent evasion of the stamp duty were instituted.

18. The civil courts during the past year discredited 70 deeds as against 33 during the preceding year. The Inspector-General is inclined, looking to the fact that the number of districts in which deeds have been discredited is so much larger than it formerly was, to attribute the increase to "the greater vigilance and care in bringing these cases to the notice of the officers concerned, rather than to any absolute increase." In 11 only of the deeds discredited was the cause an error of law or procedure in registration.

19. In 1883-84, as compared with 1882-83, there was an increase in the number of operations under the Act in 34 districts, and a decrease in 11. During the past year, as has been above remarked, there was an increase in 40 districts and a decrease in 5 districts only. Of the latter, the decrease was considerable only in the Sonthal Pergunnahs, where it amounted to 37·78 per cent., and in Bhagulpore, where it amounted to 11·4 per cent. In Singbhoom the decrease was 11·8 per cent., but the total number of registrations in this district are so small that a difference of even a few registrations produced a large percentage. With regard to the Sonthal Pergunnahs, the Inspector-General explains that this falling off "is said to be due to a general uncertainty prevailing among that timorous and suspicious people as to the power of cultivators to transfer their holdings by sale or mortgage." It is further added that "the cause of this mistrust is that it is yet undecided whether money-lenders can foreclose mortgages of the 'Sud Bandaki' class executed by Sonthals; and until this question is settled, the mahajans decline to lend money to the Sonthals" Mr. Bourdillon adds: "No explanation of it (the decrease) is given by the Registrar of Bhagulpore, but if the suggestion made for the Sonthal Pergunnahs is correct, it no doubt has an effect on the registration of the neighbouring district of Bhagulpore, which has a considerable Sonthal population." In 18 districts the increase in the number of operations exceeded 2,000, while in 26 districts it exceeded 1,000.

20. The total receipts for the past year were Rs. 10,74,501 as compared with Rs. 9,74,711 in 1883-84; while the total expenditure was Rs. 5,54,110 as compared with Rs. 5,04,755 in the preceding year, the surplus being Rs. 4,69,956 and Rs. 5,20,391 in 1883-84 and 1884-85 respectively. In addition to the expenditure above stated, there were certain items, payment for which is made by transfer, and which have not been shown in the total expenditure, which, in accordance with the usual practice, only shows actual cash expenditure. These items are—

	Rs.
Cost of stationery	5,026
Do of printing and registers	56,751
Do. of new buildings by the Public Works Department ...	4,334
Do. of cast-iron record-racks	5,180
Total ...	71,291

Deducting this amount from the amount of surplus shown, the net balance of Rs. 4,49,100 is obtained on the operations for the year.

21. The number of registration offices open at the close of the year was 290 as compared with 284. The increase was caused by six new rural offices being opened, one in the district of Bankoora, one in Hooghly, one in Chittagong, one in Mymensingh, and two in Noakhally. During 1883-84, eighteen sub-divisional *ex-officio* offices were converted into rural offices, and with satisfactory results, both as regards the number of presentations and the fees realized. During the past year eight other sub-divisional offices were converted into rural offices, and the Inspector-General anticipates other similar changes, as well as the opening of more rural offices during the current year. The Lieutenant-Governor will await the submission of any proposals the Inspector-General may from time to time wish to make regarding either the conversion of sub-divisional offices, or the opening of new rural ones. The extension of the facilities of registration is under the Lieutenant-Governor's consideration with a view to the requirements of the new Rent Law.

22. The following table shows the operations under the Mahomedan Marriage Registration Act since it came into force:—

Year.	Number of districts in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered.	Number of divorces other than khulas registered.	Number of khulas registered.	Total number of ceremonies registered.
1876-77	14	77	2,585	402	161	3,118
1877-78	14	101	7,301	1,401	585	9,391
1878-79	14	103	8,161	1,748	771	10,687
1879-80	14	107	7,107	2,067	623	9,857
1880-81	14	108	5,777	1,974	779	8,630
1881-82	14	107	4,951	2,239	907	7,897
1882-83	14	112	5,048	2,247	760	8,081
1883-84	14	112	4,823	2,315	805	7,483
1884-85	14	112	3,913	2,540	957	7,410

There has been no change in the number of districts in which the Act is in force, and the number of offices open was the same as in the two years preceding 1884-85. There was an increase of 225 in the number of divorces, other than khulas, registered, and of khulas there was an increase of 62. The number of marriages registered was, however, less by 360 than the number registered during 1883-84, the total number of operations being only 7,410 as compared with 7,483 in the preceding year. The decrease is not large, but the total result is unsatisfactory as being below that of any year except 1876-77. The number of marriages registered increased in 8 out of the 14 districts, but the decrease of the number of marriages registered in Rungpore from 789 in 1883-84 to 358 in 1884-85 has of course had its effect on the returns for the past year. The decrease is owing, the Registrar of the district explains, as stated by Mr. Bourdillon, to "a thorough understanding by the parties that the registration does not carry any weight in courts of law, and that non-registration does not make the defaulters liable to any penalty or forfeiture. It is added that the zemindars also levy the marriage impost as before, and when the parties once pay the landlord, they refuse to pay the Marriage Registrar unless compelled by law to do so. Lastly, the registration of deeds-of-dower and divorce in the ordinary registration offices is considered

as more conclusive evidence of marriage than a resort to the office of the Mahomedan Marriage Registrar." There may be, and is no doubt, considerable weight in these reasons; but as all these causes for non-registration existed in 1883-84 as well as in 1884-85, the Lieutenant-Governor cannot accept them as at all fully explaining the decrease of 54 62 in the number of registration in one year, more especially when looking to the fact that in the adjoining districts of Dinagepore and Bogra there was an actual increase in the number of marriages registered as compared with the preceding year. The greatest number of ceremonies was registered in Chittagong, viz. 2,550, Dacca comes next with 858 and Rajshahye with 844. No other district registered as many as 600 ceremonies. Of offices, 598 ceremonies were registered in the office of Satkania in Chittagong, which has considerably more than double the number of registrations in any other office, except that of Patiya in the same district, in which they amounted to 371. The Inspector-General remarks that "the Act is falling more and more into desuetude in the districts to which it has been extended. Notwithstanding the recent revision of the rules and procedure under Act I (B.C.) of 1876, the total number of ceremonies registered has fallen off compared with the previous year; but it should be remarked that there has hardly yet been sufficient time to judge whether the changes carried out will cause an increase in the number of ceremonies registered or not." The next report will be awaited when Government will be in a better position to ascertain the effect of the alterations in the rules and procedure under the Act, to which reference was made in the Resolution on the Report of the working of the Act for the year 1883-84. Most of the Mahomedan registration offices were inspected during the year. It is reported that those inspected were found in good order, and that the conduct of the Registrars was satisfactory.

23. During 1884-85 only 838 inspections of registration offices were made as compared with 884 during the preceding year. As in 1883-84, the decrease has again been due to the falling off in the number of inspections made by District Registrars, which decreased from 200 to 192, in the number made by Sudder Sub-Registrars, which fell from 92 to 64, and in the number of those made by Sub-Divisional Officers which fell from 110 to 107. On the other hand, there has been an increase of 20 in the inspections by Special Sub-Registrars, and Mr. Bourdillon considers that the more searching nature of their enquiries more than compensates for a falling off in the number of inspections by District Registrars, who have not leisure as a rule for long and elaborate inspections. Mr. Bourdillon draws special attention, however, to the falling off in the inspections made by Sudder Sub-Registrars. This point calls for serious notice, and the Inspector-General should at once direct the attention of District Registrars to the omission. The number of stamp inspections made during the year was 428 as compared with 465 made during the preceding year.

24. Mr. Handley was in charge of the office of Inspector-General of Registration from the commencement of the year till the 7th May 1884, when Mr. Paul succeeded him and remained in charge till he went on leave on the 1st November, between which time and Mr. Bourdillon's return on the 16th February, Mr. Bolton was in charge of the office. The Lieutenant-Governor notes the favourable remarks made concerning the manner in which Mr. J. F. Harrison and Baboo Hari Chaitanya Ghose performed their duties as First and Second Inspectors. Credit is also given to Mr. Handley for diligence in the discharge of his duties during the short time that he reverted to his substantive appointment as First Inspector, but as that period is not stated, and Mr. Handley is shown to have made only 18 inspections in that capacity, the Lieutenant-Governor can only take it for granted that the Inspector-General's commendation was deserved. The names of the officers referred to, with an extract from the Report, will be forwarded to the Appointment Department for information. Mr. Bourdillon remarks that, where so many registering officers have done well, it is impossible to select any for special mention without doing injustice to others equally efficient. The Lieutenant-Governor would have thought that in so large a department some officers must have singled themselves out of the crowd by exceptionally good work. On the other hand, the failure of those who have not given satisfaction in the discharge of their

duties should always be noticed. There is no department of the public service in which especial care in supervising the work of individual officers is more urgent than in the Registration Department.

25. From a review of the year's operations, the Lieutenant-Governor is satisfied with the general efficiency of the Registration Department. The proposal for opening a large number of rural offices in anticipation of the expansion of the department by the coming into operation of the Bengal Tenancy Act will be dealt with separately.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Registration for information and guidance.

Ordered also that extract paragraph 24 of this Resolution, and extract paragraph 131 of the Report, be forwarded to the Appointment Department of this Office for information and guidance.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE LICENCE-TAX FOR 1884-85.

FINANCIAL DEPARTMENT.—LICENCE-TAX.

Darjeeling, the 4th November 1885.

RESOLUTION.

READ—

The Report on the Administration of the License-tax for 1884-85.

Read also—

The Report for 1883-84 and the Resolution recorded on it.

As in previous years, the license-tax in Bengal was levied under Act II (B.C.) of 1880. The number of special assessors employed was the same as in the preceding year, namely 46; three assessors being employed for Calcutta, one for the Suburban Municipality, and one for each district, except Darjeeling and Singbhoom, where the number of assessees was not sufficiently large to warrant the expense of appointing an assessor. Of the 46 assessors, two were of the rank of Sub-Deputy Collector, the remainder being of lower status. The collection of the tax was as usual commenced in the majority of districts soon after the period allowed by sections 16 and 17 of the Act, the assessment lists of the preceding year, as they stood after the disposal of objections and appeals, being adopted as the basis of operations; while in a few districts, where the assessment had been hurriedly made, the issue of notices was postponed until the assessors had finished their enquiries and submitted revised lists.

2. The total number of villages visited by the assessing officers was 25,619, including 617 streets in Calcutta, against 27,067 in the previous year. It is observed that, in the majority of cases, proper attention was paid by district officers to the direction of the assessors' movements, though in a few districts, which the Board enumerate, greater activity might have been displayed with advantage. A considerable number of villages also were visited for purposes of assessment by officers other than assessors. The district most conspicuous for activity in this respect was Durbhunga, where as many as 456 villages were visited by officers on the regular staff. A very creditable outturn of work is also noticeable in the districts of Tipperah, Midnapore, Bhagulpore, Dacca, Furreedpore, Backergunge, Monghyr, Hooghly, and Mymensingh.

3. The gross number of assessments, after eliminating double centres and allowing for the revision of the lists by Collectors, amounted to 76,259. Of these 5,681 were exempted on objection and 310 on appeal, leaving 70,259 persons on the list of assessees on the 30th June, as compared with 71,293 in 1883-84. The outstanding balance on the 30th June 1884 was Rs. 10,022, and of this the greater part had to be remitted, the number of persons finally assessed in 1883-84 being reduced to 70,552. The following table compares the number of assessees in each class in the final lists of 1883-84 with those of the year under review:—

		Number of assessees	
	Rs.	On the final lists in 1883-84.	On the lists of 30th June 1885.
Class I	500	387	389
„ II	200	725	696
„ III	100	1,443	1,413
„ IV	50	3,613	3,587
„ V	20	14,836	14,714
„ VI	10	49,548	49,460
Total		70,552	70,259

The figures show that there was a falling off of 293 assessees, and there will be a still further decrease when the enquiries in regard to the outstanding balance on the 30th June 1885, amounting to Rs. 10,223, have been completed. As the figures now stand, there was a falling off, as compared with 1883-84, of 29 assessees in Class II, of 30 in Class III, of 26 in Class IV, of 122 in Class V, and 88 in Class VI, while there was an increase of only 2 assessees in Class I.

4. The following table shows the incidence of the license-tax in each of the divisions of the province :—

Bhagulpore	50	persons to Re. 1.
Rajshahye	51	ditto.
Dacca	58	ditto.
Presidency (omitting Calcutta)	61	ditto.
Chittagong	65	ditto.
Burdwan	69	ditto.
Patna	75	ditto.
Chota Nagpore	82	ditto.
Orissa	100	ditto.

Taking the population of Bengal at 66½ millions, one person in every 916 paid the tax, the average incidence being Re. 1 to every 46 persons; but if Calcutta be excluded, the general incidence was Re. 1 to every 64 inhabitants. The incidence was highest in Calcutta, Darjeeling, Howrah, 24-Pergunnahs, Maldah, Bhagulpore, Bogra, Monghyr, Dinagepore, and Dacca; and lowest in Singbhoom, Khoolna, Sonthal Pergunnahs, Bankoora, Cuttack, Shahabad, Pooree, Chumparun, Nuddea and Burdwan.

5. The number of objections filed during the year was 19,412 or 25·4 of the total number of persons originally assessed, the corresponding percentage in 1883-84 being 26·2. In 11,852 cases the assessments were upheld, in 1,877 they were modified by the transfer of the objector to a lower class, and in 5,681 cases the assessments were cancelled. The successful objections thus amounted to 7,558 or 38 per cent. of the total number of petitions filed, against 39 per cent. in the previous year. The proportion of all objections to assessments was highest in—

Pooree	58·03
Durbhunga	41·2
Moorshedabad	39·2
Cuttack	39·06
Gya	37·5
Balasore and Hazareebagh	36·4
Monghyr	35·4

And the proportion of successful objections to assessments was highest in the following districts:—

Pooree	31·5
Hazareebagh	18·8
Moorshedabad...	18·2
24-Pergunnahs	17·2
Durbhunga	17·
Nuddea	16·5
Pubna ... ... }	15·8
Gya ... ... }	
Balasore	15·

These results are most unsatisfactory; and the Lieutenant Governor regrets to find that after the considerable experience of many years assessments are still very loosely and carelessly made in many districts. The work appears to have been particularly badly done in Pooree, and a special explanation will be called for from the officers concerned.

The number of appeals against the orders passed on objections was 1,545, against 1,747 in 1883-84. Of this number, the assessment was upheld in 969 cases and reduced in 197 cases, while in 310 cases the assessees were exempted altogether. The districts in which the right of appeal was most largely exercised are Calcutta, Cuttack, Durbhunga, Chittagong, Sarun and Monghyr. In the entire province, out of 76,250 assessments, 5,991 or 7·8 per cent. were cancelled on objection or appeal, and 2,074 or 2·7 were modified. This result, though showing some improvement on that of the previous year, when out of 77,613 persons assessed, 6,320 or 8·1 per cent. were entirely exempted, and 2,333 or 3 per cent. were assessed on objection in lower grades, is still unsatisfactory. The number of appeals pending on the 30th June was 69, against 31 in the previous year. The number of applications to Commissioners under section 21 of the Act was 70, exclusive of those in Calcutta. Of these, 48 were rejected, 6 were granted in part, and in 10 cases the assessments were cancelled. Six cases were pending at the close of the year. The majority of the references were made in the divisions of Patna, Orissa and Bhagulpore.

6. The following table shows the demand, remissions, collections, and balances up to the end of June for each of the last two years:—

Class.	Rate of tax.	Gross demand.		Remissions before realisation.		Remaining demand.		Collections.		Refunds.		Net collections.		Balances	
		1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.	1883-84.	1884-85.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
I	500	2,49,000	2,36,710	46,000	36,500	2,03,000	2,00,210	2,03,000	2,00,256	9,500	6,280	1,93,500	1,94,000	... ..	... .
II	200	1,73,000	1,72,300	25,200	20,200	1,47,800	1,52,100	1,47,800	1,52,300	3,400	4,400	1,44,400	1,47,900	... ...	... ...
III	100	1,75,550	1,76,400	27,100	30,900	1,48,450	1,45,500	1,48,250	1,45,000	4,100	4,200	1,44,150	1,40,800	200	500
IV	50	2,19,225	2,16,500	33,700	32,500	1,85,525	1,84,000	1,85,075	1,83,532	4,550	4,650	1,80,525	1,78,882	450	468
V	20	3,40,670	3,35,300	41,630	37,170	2,98,140	2,98,130	3,00,331	2,95,832	4,040	4,220	2,96,291	2,91,612	1,700	2,368
VI	10	5,60,3 0	5,61,780	62,215	62,825	5,07,145	4,98,955	4,99,478	4,92,050	5,705	4,585	4,94,173	4,87,495	7,667	6,096
Total ...	...	17,33,405	16,99,.90	2,38,845	2,20,095	14,94,560	14,79,495	14,84,537	14,60,271	30,895	28,275	14,53,642	14,31,996	10,023	10,223

The figures show a reduction of Rs. 33,815 in the gross demand as compared with 1883-84. Remissions and refunds together amounted to Rs. 2,57.370. Of this sum, however, Rs. 1,03,910 were re-assessed by the transfer of the assessees to some other class, the actual remissions and refunds amounting to Rs. 1,53.460. Of this amount Rs. 1,27,640 were remitted before realization, and Rs. 25,820 refunded after realization. The amount remitted or refunded under the operation of the rule by which a person is liable to be taxed in only one place in British India was Rs 18,260 The net remissions and refunds, therefore, amounted to Rs. 1.35,200 or 8·4 of the gross demand of Rs 15,96.690 There was a falling off in the total receipts from the tax, up to the 30th June 1885, of Rs. 21,646 or 1·4 per cent. The decrease is attributed partly to the general depression in trade, and partly to the further revision of the assessments of the previous year.

7. There was a falling off in the net receipts in 31 districts, and an increase in 14. The percentage of decrease was highest in the divisions of Orissa (7·9), Burdwan (3·9), and Chota Nagpore (3 3). In the following 16 districts there was a falling off of over 3 per cent:—

Districts.	Collections in 1883-84.	Collections in 1884-85.	Decrease.	Percentage of decrease.
	Rs.	Rs.	Rs.	
Pooree ...	10,380	8,830	1,550	14 9
Pubna ...	24,370	21,172	3,198	13·1
Hazareebagh ...	21,857	18,699	2,858	13·07
Hooghly ...	21,380	18,983	2,397	11·2
Gya ...	29,464	27,040	2,424	8·2
Cuttack ...	18,570	17,044	1,526	8·2
Bankoora ...	9,318	8,640	678	7·2
Shahabad ...	20,040	18,970	1,070	5·3
Maldah ...	21,192	20,048	1,144	5·3
Moorshedabad ...	19,674	18,738	936	4·7
Singbhoom ...	2,920	2,783	137	4·6
Bhagulpore ...	51,908	49,912	1,996	3 8
Chumparun ...	17,850	17,235	615	3·4
Howrah ...	25,590	24,720	870	3·3
Jessore ...	29,280	28,360	920	3·1
Rungpore ...	39,900	38,665	1,235	3·09

The falling off in Pooree and Cuttack is attributed to the rectification of the over-assessment of previous years; but from the proportion of successful objections to assessments in these districts (31·6 in Pooree, and 14 9 in Cuttack), it appears that they were again over-assessed in the year under report. The Board remark: "It is almost every year the case that the assessment lists first submitted by the special officers appointed for revising the tax show a considerable increase over the demand finally determined at the close of the preceding year, but when further scrutinized on objection and appeal, they come to show a figure even less than that demand. This might to a great extent be avoided, if the instructions issued to the assessors were sufficiently clear to indicate the mode of revision expected from them" The Board have very properly drawn the attention of the Collectors to the importance of giving such instructions to the assessors before they begin their work of revision. The Lieutenant-Governor has no doubt that much of the unpopularity of the tax is due to the injudicious proceedings of assessors,

who imagine that the only means open to them of earning credit in their temporary appointments is to show a large increase in assessments, and he trusts that district officers will do their best, by clear instructions to the assessors, and careful supervision of their work, to counteract this tendency wherever it appears. The decrease in Pubna is attributed partly to the large number of exemptions caused by fluctuation in the circumstances of the trading class and the general failure of crops, and partly to the careful revision of the assessments of previous years. The explanation offered in respect of the decrease in Hazareebagh and Gya is somewhat similar to that given for Pubna. In Hooghly the Collector attributes the decrease to dulness of trade, though the Commissioner is of opinion that the result would have been less unsatisfactory if the assessor had not, in spite of express instructions, attempted to revise the assessments in the whole district within the short period of four months for which his services were entertained. Naturally the work was performed in a perfunctory way. The falling off in Bankoora is due to remissions granted to several persons dealing in money, grain, and lac, whose business has suffered considerably in consequence of continued droughts and dulness in the lac trade. The exemption of petty traders whose income had fallen owing to slackness in the grain and sugar trades, and the transfer of some assessees to other districts which were declared by them as the principal place of their business, are assigned as causes of the decrease in Shahabad, while the decrease in Maldah is attributed in a general way "to the reduced circumstances of the assessees and the altered condition of trade." The causes given for the decrease in Moorshedabad are the dulness of trade in silk and the partial failure of crops. In Singbhoom the decrease is attributed to revision of assessments. This was also the case in Bhagulpore, where the depression of trade, owing to bad harvests, was an additional factor. In Chumparun the decrease is ascribed to the falling off of profits of several assessees, and in Howrah to the transfer of several assessments to Calcutta and other districts, and to the slackness of trade. The chief cause of the decrease in Jessore and Rungpore was the depression of trade caused in the former district by the heavy fall in the price of sugar, and in the latter by the fall in the prices of the principal articles of local merchandize.

In the Resolution on the Report for 1883-84, it was remarked that the incidence of the tax was suspiciously low in Rajshahye as compared with the incidence for the whole division, and the Lieutenant Governor desired that the assessment work of the district should be carefully watched by the Collector. The matter is fully dealt with in the present report, and the Lieutenant-Governor is disposed to agree with the Board that the district is poorer than has been hitherto supposed.

In Calcutta the collections up to 30th June 1885 amounted to Rs. 4,04,570, against Rs 4,1[illegible],670 in the previous year. There was a decrease of 45 in the total number of assessees with a corresponding decrease of Rs 9,100 in receipts The decrease occurred in all the classes except Class VI, and is ascribed to the licenses having been taken out in other districts or provinces, and to the general depression in trade.

8. An increase occurred in the receipts in 14 districts, ranging from ·6 per cent. in Mozufferpore to 14·6 in Noakholly. The districts which show an increase of over 3 per cent. are—

Districts.	Collections in 1883-84.	Collections in 1884-85.	Increase in 1884-85.	Percentage of increase.
	Rs.	Rs	Rs.	
Noakholly ...	10,000	11,460	1,460	14·6
Chittagong ...	16 610	18,860	2,250	13 5
Dinagepore ...	31,945	34,290	2 345	7·3
Lohardugga ...	16,234	17,234	1 000	6·1
Sarun ...	36 212	38,135	1,923	5·3
Mymensingh ...	46 111	48 244	2,133	4·6
Purneah ...	32 110	33 430	1,320	4·1

The reason advanced for the increase in Noakholly is that the past year was one of great prosperity for the bulk of the population, and this had the effect of increasing the number of assessees and the amount of collections The Collector of Chittagong attributes the increase in his district to the "due attention paid by the assessing staff to their duty." The increase in

Dinagepore was chiefly derived from new assessments and enhancements made in the second and the last three classes, and in Sarun from a number of new assessments made under the two lowest classes. In Lohardugga the increase was due to careful enquiry and consequent revision of assessments in parts of the district, while the enhancement in Purneah was the result of a thorough revision of assessments in the Kishengunge sub-division. The administration of the tax in Mymensingh was the subject of unfavourable comment in the Resolution on the last report, and an explanation was called for of the circumstances under which it was necessary to grant a large number of remissions and reductions in the Attia sub-division. The explanation given is that "the assessment was originally much too high, and there were in consequence large reductions in 1882-83. The remedial measures then adopted, however, do not seem to have gone far enough, for during 1883-84 there were further petitions of objection which the then sub-divisional officers, Baboos Atul Chandra Chatterjee and Kasi Kinkar Sen, after due enquiry allowed. Whether the objections were really well founded or not it is impossible now to discover. The Collector is of opinion that every possible allowance was made, though why, if the original assessment was too high, the petitioners did not come forward sooner to object, does not appear. The sub-divisional officer at any rate showed carelessness in not making enquiries with a view to discovering fresh assessees. Many persons appear to have been reduced owing to separation of business: this may have been a legitimate cause of reduction, but it also afforded good ground for enquiry whether the person who had set up separately was not liable. A large number of remissions in the two preceding years was also due to the low prices of salt and jute—two of the principal articles of trade—and to causes such as accidental loss, closure of business and transfer of assessments to other districts" Since then the assessments have undergone a revision which has led to an increase in receipts of Rs. 2,133 or 4·6 per cent.

9. The percentage borne by remissions and refunds was below that of the previous year, the highest percentage being 26·6 in Pooree. It exceeded 15 per cent. in seven districts, in thirteen it ranged from 10 to 15, in twenty from 5 to 10, while in the remaining five districts it ranged from ·6 to 4·6. The balance on 30th June 1885, appertaining only to some seven districts, amounted to Rs. 10,223, the bulk of which is irrecoverable, and will have to be written off. There was again a decrease in the year of Rs. 5,962 in the amount of penalties and costs realized, which shows that assessees have been more punctual in the payment of the tax. The cost of collection was also considerably reduced, the percentage of charges to receipts having fallen from 6·1 in 1883-84 to 5·9 in the year under review. The total amount expended on the license-tax operations of the year, up to the 30th June 1885, was Rs. 87,159, against Rs. 91,249 in 1883-84.

10. There is little to add to the remarks recorded in previous years with regard to the popular feeling on the subject of the tax. It affects only a small section of the population, and while it can never be more popular than any other form of direct taxation, it is now quietly accepted as inevitable by the majority of those who are called upon to pay it. The absence of any complaint of harassment or extortion shows that the Act, on the whole, worked smoothly during the year under review.

11. The names of the officers who are reported to have given special attention to this branch of their duties will be noted in the Appointment Department. The Lieutenant-Governor again desires to thank the Board for their careful administration of this branch of the revenue during the year.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the Board's Report, be submitted to the Government of India, Finance and Commerce Department, for information, and that a copy of the Resolution be forwarded to the Board of Revenue.

Ordered further that extract paragraph 11 of the Resolution, together with extract paragraph 39 of the Report, be forwarded to the Appointment Department for information.

By order of the Lieutenant-Governor of Bengal,

J. WARE ELGAR,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE CHARITABLE DISPENSARIES IN BENGAL FOR 1884.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 4th November 1885.

RESOLUTION.

READ—

Report on the Charitable Dispensaries in Bengal for the year 1884

Read also—

The Report for 1883, and the Resolution recorded upon it.

In the Resolution of the Government of India, Home Department, No. 3—163-74, dated the 7th May 1883, instructions were given that in preparing Statement I, appended to the Annual Dispensary Report, dispensaries should be divided into three classes with reference to their financial constitution and relations; class I comprising all hospitals and dispensaries chiefly supported by the State, class II all institutions supported by local funds, and class III all private institutions. Class III was further sub-divided into—

(A)—Institutions entirely maintained at the cost of private individuals or associations, and

(B)—Institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

Local Governments were left free to adopt any other form of classification which might be considered most convenient for administrative purposes. In view of the advantages of a uniform and complete system of classification, the Lieutenant-Governor has adopted and prescribed for general use the form suggested by the Government of India.

On the 31st December 1883 there were 230 dispensaries. During 1884 four dispensaries were established and four were abolished. Under the new classification five of the institutions were in class I, 86 in class II, 81 in class III (A), and 58 in class III (B).

2. The system under which Government had undertaken to provide employment to all candidates passing the Licentiate's examination came to an end in 1883, and during that year no Assistant Surgeons were admitted to the service. In 1884, it is reported 21 Assistant Surgeons were received by transfer from the Imperial list. Twenty-nine civil hospital assistants were appointed, of whom 20 came from the Campbell Medical School, five from Dacca, two from Patna, and two from Cuttack. The report for 1883 contained some unfavourable comments on the qualifications of the civil hospital assistants recruited from the Patna Medical School. The Inspector-General has devoted special attention to the question during the year, and now reports that, as far as professional ability is concerned, the Patna men are up to the standard. He adds, however, that "their general want of knowledge of English, and inability to converse in Bengali, are drawbacks to their employment in the southern and eastern districts of the Province;" and he quotes certain extracts from the report of the Civil Surgeon, the late Dr. Shaw, which prove that the standard of general education among the Patna students is very low. Dr. Shaw contemplated raising the standard of entrance examination, and encouraging the study of English by the offer of scholarships, and if the matter is to be taken up, it will be necessary to refer it to Government through the Educational Department.

There was not much change in the disposition of officers in 1884; but in several cases local bodies declined to pay the higher salaries earned by their medical officers on passing the departmental examination, and applied for the services of men of lower grades. The question of the precise limits of the liability of local bodies in such cases is now under the consideration of Government. During the year the Secretary of State granted an important concession to supernumerary Assistant Surgeons by ruling that supernumerary service would count towards leave and pension.

3. Returns have been received from 229 out of the 230 dispensaries of the Province, and the following table compares the amount of work done in them during 1884 and 1883 :—

	In-door.										Out-door.									
	Under 25.	25 to 50.	50 to 75.	75 to 100.	100 to 250.	250 to 500.	500 to 750.	750 to 1,000.	Upwards of 1,000.	Total.	Under 250.	250 to 500.	500 to 750.	750 to 1,000.	1,000 to 2,500.	2,500 to 5,000.	5,000 to 7,500.	7,500 to 10 000.	Upwards of 10,000.	Total.
1884 ...	16	14	11	16	43	23	6	3	1	132	2	...	3	11	68	79	31	11	10	229
Percentage .	12·12	10·61	8·33	12·12	32·58	17·42	5·79	2·27	·76		·87	...	1·31	4 80	29·69	34·5	13·72	4·85	8 30	
1883	18	14	11	11	50	14	6	1	1	130	..	1	3	11	75	75	32	10	16	223
Percentage ..	13·85	10·77	8·46	8·46	38·46	18 85	4·61	·77	·77	...	...	·45	1·35	4 93	33·63	33·63	14 35	4·48	7·17	

The total number of dispensaries which received in-door patients was 132 against 130 in the previous year.

4. Of the 229 dispensaries, 50 were visited by the Civil Surgeons daily or frequently, four more than four times during the year, eleven four times, thirty-two three times, seventy-two twice, forty-one once only, seventeen were not inspected at all, and no information was furnished of the remaining two dispensaries Of the seventeen not inspected at all, the Lieutenant-Governor regrets to notice that eleven were in the district of the 24-Pergunnahs, and the omission requires the attention of the Head of the Department. The Inspector-General observes :—"The inspection reports have been carefully drawn up, and are closely searching in their interrogations. They show, on the whole, a fairly satisfactory state of things. I observe a considerable interest evoked in sanitary matters, which is a healthy sign, and one which it is to be hoped Civil Surgeons will continue to encourage."

5. The following table shows the number of patients treated in 1884 and the previous seven years, and the ratio of mortality among in patients :—

	In-patients treated.	Out-patients treated.	Total.	Mortality among in-patients per cent.
1877	23,054	875,631	898,685	17·34
1878	2[illegible],473	927,783	956,256	20·01
1879	24,847	865,995	890,842	17 78
1880	23,507	888,006	911,513	15 17
1881	23 414	947,5 4	970 978	13·8
1882	24,488	934,145	957,623	15 75
1883	22,498	915,751	938, 21	17 13
1884	25,077	945,556	970,633	14·76

The total number of sick attending the dispensaries, as recorded during the year, was larger than that of any previous year in the list. There was an increase of 52,411 patients, as compared with the number treated in 1883. The Inspector-General attributes this mainly to greater care in recording entries, in consequence of more attentive inspections, and does not think it probable that the attendance of patients was actually larger, owing to the increasing competition of private practitioners The Lieutenant-Governor is glad to learn that duly qualified medical men are establishing themselves in private practice throughout the country, and that "the majority may be said to be gaining a fair and honourable livelihood by the exercise of their profession." This is no doubt, as the Inspector-General calls it, "a healthful outcome of our medical educational system." The object of that system was not merely to secure a constant supply of subordinate medical officers for the Government service, but also to raise the standard of medical knowledge and encourage the practice of medicine and surgery on established scientific principles. That private practitioners, possessing the necessary qualifications, should be able to compete successfully with public medical charities, is a satisfactory result; and the Lieutenant-Governor will gladly welcome any diminution in the number of patients treated at these charities, which can be unmistakeably proved to be caused by such competition.

6. The total income and expenditure of the dispensaries during the year are shown in the following table :—

Income.

	Rs.	A.	P.
Cash balance on 1st January 1884	71,421	12	4
From Government—			
As salaries	13,855	14	11
„ registers and forms	1,468	14	0
„ European medicines	278	15	6
For diet of police cases	1,887	14	11
Special allowances	1,159	15	10
Total ...	18,651	11	2
From local or other funds	35,905	15	4
„ municipal funds	1,16,766	7	1
Interest on investments	27,914	4	10
Sale of securities or withdrawal of deposits ...	15,769	5	4
European subscriptions	16,483	8	10
Native subscriptions	1,11,086	10	10
Total ...	4,13,999	11	9

Expenditure.

Establishment	2,04,270	2	5
Bazar medicines	9,581	11	11
European medicines, from Government store or purchased otherwise	41,389	6	6
Diet	38,893	10	5
Miscellaneous charges	28,272	9	0
Buildings or repairs	27,305	0	11
Invested during the year	12,650	3	3
Total ...	3,62,362	12	5
Cash balance on 31st December 1884	51,636	15	4

The opening balance on 1st January 1884, as shown above, is less by Rs. 2,514 than the closing balance of the previous year, as given in that year's report. The difference is explained to be due to the closure of four dispensaries, to deficits found in the funds of three dispensaries, and to the readjustment of the accounts of one dispensary.

7. The total receipts from Government amounted to Rs. 18,651 in 1884, against Rs 39,511 in 1883, Rs 41,269 in 1882, and Rs. 1,06,381 in 1881. Out of the Rs. 18,651, the sum of Rs. 5,761 was contributed to municipal dispensaries After deduction, however, of the cost of registers and forms, and of diet in police cases, the contribution towards municipal dispensaries amounted to Rs. 3,106 against Rs. 22,834 in 1883. Of this, Rs. 3,032 represents salaries of medical officers, and Rs. 74 two small grants for repairs. The Government contribution towards dispensaries that are not municipal institutions amounted to Rs. 12,890, against Rs. 14,494 in 1883, thus showing a decrease of Rs 1,604.

8. The receipts from local sources other than municipalities amounted to Rs. 35,906 against Rs. 44,672 in the previous year. Of this, municipal dispensaries received Rs. 9,340. The amount of subscriptions collected from Europeans was Rs 16,483 and from natives Rs. 1,11,086 Of these subscriptions, Rs. 47,436 were paid in aid of municipal dispensaries, and Rs. 80,133 in aid of other institutions The corresponding figures for 1883 were Rs. 55,742 and Rs. 80,480 As compared with the preceding year, there was thus a falling off in the amount of subscriptions given to municipal dispensaries

to the extent of Rs. 8,306. This decrease is probably attributable partly to subscriptions being withdrawn by individuals under the impression that the dispensaries should be supported by municipal funds, and partly to the crediting of subscriptions to the general municipal revenues instead of keeping them separate in the accounts. The amount received by the sale of securities and withdrawal of deposits was Rs. 15,769, against Rs. 15,623 in 1883. Government securities belonging to dispensaries, vested in municipalities, were sold to the extent of Rs. 4,800. The question whether such sales can be effected by municipalities without the sanction of Government was under consideration during the year; and it was decided that the sanction of Government is necessary in each case. The interest on investments amounted to Rs. 27,914 against Rs. 27,911 in 1883. The amount contributed by municipalities was Rs 1,16,766 against Rs. 1,23,057 in 1883, showing a decrease of Rs. 6,291 attributable to a better adjustment of accounts.

The gross expenditure on dispensaries, exclusive of the amounts invested, was Rs. 3,49,712 against Rs. 3,60,347 in 1883, thus showing a decrease of Rs. 10,635. Medical stores were obtained from the Government Store Department and from private druggists. Of the 227 dispensaries whose accounts were received, 170 obtained their supplies from private sources. The cost of diet was Rs. 38,893 against Rs. 33,608 in the previous year, and this increase is attributable to the increase in the daily average number of in-patients. The average cost of each diet varied from two annas nine pies to seven pies.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE EXCISE DEPARTMENT FOR THE YEAR 1884-85.

FINANCIAL DEPARTMENT—EXCISE.

Darjeeling, the 9th November 1885.

RESOLUTION.

READ—

The Board's Report on the Administration of the Excise Department for 1884-85.

THE Report of the Commission appointed to enquire into the system of excise on country spirits, to which reference was made in the Resolution recorded last year, engaged the attention of Government during the year under review. It has been pointed out by the Commission that a great deal of the increase which has taken place in the consumption of spirit is due to the operation of social, moral, and religious changes among the people, and to the increase in the purchasing power of the consuming classes, but that drinking has also been much encouraged by the cheapening of liquor and the facilities which have been afforded for procuring it. The report shows that the preventible causes of increase have resulted, not from any inherent defect in the outstill system as applicable to the province at large, but from errors in administration which can be corrected; that the central distillery system is unsuited to rural tracts; that during the prevalence of this system there was illicit distillation outside, and fraud and peculation inside, the sudder distilleries; and that, while there was demoralization among those concerned in the liquor traffic and those employed to supervise them, innocent persons suffered grievous hardship and annoyance at the hands of the preventive establishment. For the province at large the Commission recommend the maintenance of the outstill system with certain modifications, and the re-establishment of central distilleries where there is a large drinking population in a comparatively small and well-defined area, and where there is a reasonable probability of an effective supervision by a supervising agency which can itself be supervised. They find that these conditions are only satisfied in the cites of Patna, Gya, Arrah, Chupra, Bettiah, Mozufferpore, Durbhunga, Monghyr with Jamalpore, Bhagulpore, Moorshedabad with Berhampore, Burdwan and Dacca; and the sudder distillery system has therefore, with the sanction of the Lieutenant-Governor, been already introduced into these towns, with the exception of Patna, Arrah and Mozufferpore, where, owing to the want of suitable buildings, the introduction of the system has been deferred till 1886-87. As regards other towns, the Commission are in favour of the maintenance of the outstill system, being of opinion that in these places the evils of monopoly can be guarded against, while it would not be possible to secure the agency required to guard against the dangers and evils inherent in the central distillery system. They propose, however, that manufacture should not be permitted within the limits of the towns, but that a site should in each case be acquired and enclosed for the manufacture of spirit outside the inhabited part of the town, and that no still should be allowed to work except in this enclosure. With regard to shops, they suggest that the Collector should be required to notify to the Municipal Commissioners the sites selected by him; that should the Commissioners object to any, the Collector should carefully consider their objections; and if he should not agree with them, should refer the matter to the Commissioner of the Division for decision, pending which he should not allow the proposed shops to be opened on the sites objected to. The report also embraces *inter alia* proposals for the limitation of the aggregate capacity of the outstills in each district, and of the aggregate capacity of the fermenting vessels used in each outstill, the fixing of rates of duty for each district, the regulation of the number of stills, the selection of sites, and the establishment of a system of standard metal stills, registered and stamped, when the capacity exceeds ten seers.

These proposals have been generally approved by the Lieutenant-Governor, and the Board have been asked to submit a detailed report on the

several recommendations of the Commission, after consulting selected local officers and inviting the opinion of public bodies and Associations throughout Bengal. This report has not yet been received, but some of the recommendations of the Commission have already been carried out, and the Lieutenant-Governor has sanctioned the establishments which the Board considered necessary for the work of initiating the proposed change.

As the Lieutenant-Governor intends to deal with the whole question on the receipt of the Board's views, he will confine himself in the present Resolution to an examination of the Board's annual report.

2. The following statement shows the total excise revenue and charges for the province during 1884-85 :—

Period.	Revenue.	Charges.	Net revenue.	Percentage of charges.
	Rs.	Rs.	Rs.	
Average of 1879 to 1883-84	90,31,000	2,64,142	87,66,858	3·01
1883-84	1,04,23,171	2,55,571	1,01,67,600	2·4
1884-85	1,00,48,968	2,91,349	97,57,619	2·8
Difference of the past two years ...	—3,74,203	+35,778	— 4,09,981	+·4

The revenue of the year shows an increase of Rs. 10,17,968 over the average of the preceding five years. The fluctuations under each head of revenue are exhibited in the following table :—

Articles.	Revenue.			In 1884-85 compared with 1883-84.		In 1884-85 compared with 1879 to 1884.	
	Average of 1879-80 to 1883-84.	In 1883-84.	In 1884-85.	Increase.	Decrease.	Increase.	Decrease.

Ganja	16,51,022	19,73,713	19,87,600	13,887	.....	3,36,578	.....
Opium	17,23,695	19,05,491	18,83,932	.....	21,549	1,60,247	.....
Miscellaneous	6,569	4,071	8,793	.....	278	.....	2,776
Total ...	90,31,000	1,04,23,171	1,00,48,968	56,536	4,30,741	10,49,750	31,782

Judging from the results shown in the two foregoing tables it would appear that there was a falling off of Rs. 3,74,203 in the receipts during the year under review as compared with the previous year. This decrease is not, however, real, as appears from the following passage in the report :—

"On financial grounds, and for purposes of accounts, it has been the practice to show, as the excise revenue for the year, all sums actually realized and credited to Government between the 1st April and 31st March. The figures so obtained do not and cannot correctly represent the actual results of the excise administration. Leaving arrears out of the question, the figures frequently include advance payments which do not strictly belong to the year to which the report refers, the inclusion of which may entirely alter, from an administrative point of view, the aspect of the excise operations for the year. It seldom happens that the advance fees of one year counterbalance those of another. Even if this were the case, it is possible by late settlements one year that the advances both of the current year and of the subsequent year may be credited to the current year's receipts, thus swelling the receipts of that year by one-third of the revenue derivable, say, from country spirits. Between this extreme and that of the year which, by a similar mishap, is deprived of advance credits altogether, the results may oscillate. What is wanted for administrative purposes is a comparison between the revenue derived from the operations of one year and that of another year. To arrive at these results under the present system of accounts it is necessary to add to the actual realizations the advance, when that advance has already been paid and credited prior to 31st March, taking care to deduct as much of the following year's advance as may similarly have been credited to the year under examination."

The Commissioners of Divisions were accordingly requested by the Board to furnish "revised figures for the general table showing the total excise revenue, as well as the revenue obtained from country spirits," on the principle above described. The Board explain that, "owing to want of time, it was not possible in dealing with the reports for 1884-85 to apply similar corrections to the remaining tables." Corrected figures have been furnished by the Commissioners, and the results are embodied in the following table supplied by the Board :—

Divisions.	1883-84.	1884-85.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Burdwan	10,50,044	10,53,602	3,558	.....
Presidency	25,92,717	27,92,558	1,99,841	.....
Rajshahye	6,47,130	6,31,994	.....	15,136
Dacca	7,01,038	7,36,109	35,071	.....
Chittagong	3,00,687	2,98,313	.....	2,374
Patna	27,64,548	25,67,027	.....	1,97,521
Bhagulpore	11,81,432	11,58,151	.....	23,281
Orissa	4,97,224	5,10,593	13,369	.....
Chota Nagpore	6,28,979	5,90,851	.....	38,128
Total ...	1,03,63,799	1,03,39,198	.....	24,601

These figures show that there has been a net decrease of only Rs. 24,601 instead of the very large decrease of Rs. 3,74,203, as shown in the two preceding tables. The districts which show considerable decrease are Gya (Rs. 1,55,120), 24-Pergunnahs (Rs. 23,705), Hazareebagh (Rs. 22,084), Sarun (Rs. 17,486), Lohardugga (Rs. 13,313), Chumparun (Rs. 11,176), Burdwan (Rs. 10,487), and Moorshedabad (Rs. 9,906); while the most marked improvement occurred in Calcutta (Rs. 2,23,862), Durbhunga (Rs. 18,192), Dacca (Rs. 14,477), Midnapore (Rs. 13,531), Pooree (Rs. 13,003), Backergunge (Rs. 11,531), Nuddea (Rs. 9,797), and Mymensingh (Rs. 9,206). The incidence of revenue per 100 of population was highest in the Presidency (Rs. 33), Patna (Rs. 17), Burdwan (Rs. 14), Bhagulpore (Rs. 14), Orissa (Rs. 13), and Chota Nagpore (Rs. 13) Divisions; and lowest in the Rajshahye, Dacca, and Chittagong Divisions, where it amounted to Rs. 8.

3. The total number of shops licensed for the sale of *Country Spirits* was 4,424 against 4,614 in 1883-84: 479 were licensed under the sudder distillery system, and 3,945 were licensed under the outstill system, against 481 and 4,133 respectively in the previous year. The revenue according to actual realizations, as exhibited in the second table in the preceding paragraph, shows a decrease of Rs. 3,67,520, but, as already explained, these figures do not correctly represent the results of the excise administration. If the advance payments are adjusted, the proper amount of decrease is only Rs. 1,12,991 compared with the actuals of the previous year. The heaviest falling off occurred in Gya (Rs. 1,52,058), Patna (Rs. 31,645), Sarun (Rs. 30,635), Hazaribagh (Rs. 21,299), and 24-Pergunnahs (Rs. 23,237); and the largest increases in Calcutta (Rs. 1,28,114), Durbhunga (Rs. 19,920), Mozufferpore (Rs. 12,281), and Nuddea (Rs. 9,672). The Board attribute the large decrease in Gya, Patna, and Sarun to "inconsiderate measures taken for reducing the number of shops." In Hazaribagh the decrease is ascribed to poor crops and high prices of food-grains, and in the 24-Pergunnahs to the abolition of all country spirit shops within the cantonment limits of Barrackpore and Dum-Dum The large increase in Calcutta is not real. Fresh settlements for the three years 1884-85 to 1886-87 were made in March 1884, and the two months advance fees have been credited to the year 1884-85; whereas the advance fees paid in March 1881 at the last triennial settlements were credited to the year 1880-81. The increase in Nuddea is attributed to the improved condition of the lower classes of the people, who are the principal consumers of spirits, while the increase in Mozufferpore and Durbhunga is unexplained.

4. The receipts under the head of *Rum* fell from Rs. 1,14,576 in 1883-84 to Rs. 98,707 in the year under review, the number of wholesale licenses being

23 against 24, and of retail licenses being 93 against 103 in the previous year. The total quantity of rum of local manufacture passed for consumption was 10,314 against 13,882 gallons. The falling off in receipts is due to the displacement of this liquor, not only by the Shahjehanpore rum, but by rum from coast ports— Hong-Kong, Penang, and Singapore—as well as to importations of cheap brandies from foreign countries.

5. The revenue from imported *Spirits* and *Wines*, which is represented by license fees, rose from Rs. 2,00,795 to Rs. 2,28,218, notwithstanding the fact that there was a decrease of 35 in the number of licenses granted during the year. The more extensive use of imported liquor by the higher classes of natives is said to be the cause of the increase in the receipts.

6. There was a decrease of 320 and 227 in the number of licenses for the sale of fermented and unfermented *Tari* respectively. The revenue, however, shows a net increase of Rs. 10,672, which occurred chiefly in Hooghly and the 24-Pergunnahs. The increase in Hooghly is said to be due to the settlement of shops in groups, and in the 24-Pergunnahs to high prices which led the lower classes to have resort to *tari* instead of country spirits.

7. *Puchwai* was sold in 28 districts against 26 in the previous year. The number of licenses fell from 2,259 to 2,168, the revenue realized being Rs. 1,58,820 against Rs. 1,83,054. By far the largest decrease occurred in Burdwan (Rs. 10,722), and is ascribed to failure of crops, which raised the price of rice, the raw material of puchwai.

8. The extent of *Ganja* cultivation depends chiefly on the profit which the crop yields from year to year. Thus the crop of 1883-84 yielded a good outturn, which caused a fall in the prices, and this led to a decrease in the area under cultivation during the year under review. The crop was, moreover, injuriously affected by deficient rainfall in November and December, the outturn being 7,076 maunds against 8,982 maunds in the previous year. The wholesale price of flat ganja ranged between Rs. 6 and Rs. 35 against Rs. 10 and Rs. 25, and that of round ganja between Rs. 8 and Rs. 40 against Rs. 12 and Rs. 35. There was a decrease in the number of shops from 3,298 to 3,196, in the quantity consumed from 5,881 maunds to 5,798 maunds, and in the revenue from duty from Rs. 11,28,937 to Rs. 11,25,183; while the receipts from license fees rose from Rs. 8,44,773 to Rs. 8,62,417.

9. The number of licenses issued for the sale of excise *Opium* shows a decrease of 83 as compared with the figures of the previous year. There was likewise a decrease of 42 maunds in consumption, and a decrease of Rs. 21,549 in the revenue realized. The receipts from license fees increased by Rs. 10,606; while the receipts from the sale proceeds of opium decreased by Rs. 32,155. By far the largest decrease in revenue occurred in Calcutta (Rs. 14,566), Rungpore (Rs. 7,324), and Hooghly (Rs. 4,581). The stoppage of the surreptitious export of *Chundu*, which is a preparation of opium, contributed to the decrease in revenue under the head of duty in Calcutta; while the decrease in Rungpore is ascribed to the reduced number of shops, and the non-settlement of some shops proposed for the current year. In Hooghly the decrease in revenue followed an apparent diminution in consumption; but a large quantity of contraband opium is believed to have been consumed in the district, where smuggling is carried on to a considerable extent. There is also reason to believe that the activity shown last year for the suppression of the use of contraband opium in the Patna Division was not maintained in the year under review. The Lieutenant-Governor must beg the special attention of the Board to this subject.

10. An important seizure was made by the police in Serampore, in which over 12 seers of contraband opium were confiscated. The smuggler was an old offender, who had been punished in 1882. He has again been convicted and punished with imprisonment and fine. Another seizure was also made by the police in Calcutta, in which about two maunds of opium have been confiscated. The smugglers have been arrested and punished.

11. The number of arrests made under the penal provisions of the Excise laws during the year was 4,228 against 4,092 in 1883-84. Of the persons arrested, 3,721 were other than licensed vendors, and 507 were vendors who had committed breaches of licenses. The number of convictions was 3,576 or 84 per cent., against 3,386 or 82 per cent. in the previous year,

and of these the police are credited with 2,597 against 2,187, and excise officers with 979 against 821. On the whole, the returns show increased activity on the part of both police and excise officers in the detection of breaches of the law. The failure of the police in detecting excise cases in Tipperah is prominently brought to notice by the Board, and the attention of the District Superintendent has been drawn to this matter. The fines imposed during the year amounted to Rs. 44,288, of which only Rs. 35,406 were realized. Of this amount Rs. 30,736 were distributed as ordinary, and Rs. 1,862 as special, rewards. The rewards do not appear everywhere to have been promptly distributed, and this was notably the case in Gya, Mozufferpore, Chumparun, Pooree, Hazareebagh, Lohardugga, and Manbhoom. No reason has been assigned for the non-payment of the rewards in these districts, and the Lieutenant-Governor must request the Board to call for an explanation from the local officers on the subject. A reward in such cases loses its efficacy if it is long delayed.

12. The names of the officers selected by the Board for special mention will be noted in the Appointment Department. The thanks of the Lieutenant-Governor are again due to the Board for their successful administration of the Excise Department during the year.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 7th November 1885.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
BURDWAN DIVN. 1	Burdwan, Nov. 7 '85	0·08	Weather—warm and cloudy. Prospects of *amun* rice good. Price of rice 11½ to 16½ seers per rupee.
BURDWAN DIVN. 2	Bankoora, „ 7 „	0·05	Weather—cloudy and rather warm for the time of year. Sowings of winter crops continue, and those sown early germinating well. Slight rain fell during the week and this morning (7th). Prospects on the whole very good. Health good
BURDWAN DIVN. 3	Beerbhoom, „ 7 „	Nil	Weather—fine. *Aus* crop being cut. Both *aus* and *amun* crop will give a good outturn. Prices falling a little. Public health satisfactory.
BURDWAN DIVN. 4	Midnapore, „ 7 „	Nil	Weather—seasonable. Prospects of rice crop very good except in flooded tracts. *Boro* paddy cultivation proceeding in flooded tract in Ghatal sub-division. Prospects of *rubbee* crop good where grown. Public health normal.
BURDWAN DIVN. 5	Hooghly, „ 7 „	Nil	Weather—cloudy and cold. Rice crop excellent in all parts of the district not damaged by floods. Cultivation of *rubbee* and *boro* paddy has commenced. Prices stationary. Public health *fair*, but fever prevails in some parts.
	Howrah, „ 9 „	0·07	Weather—sultry, but cooler at night. Prospects of crops favourable where not destroyed by floods.
	Central Districts.		
PRESIDENCY DIVN. 6	24-Perghs. Nov. 9 '85	Nil	Weather—hot for the season, and cloudy in the morning and evening. Prospects of *amun* crops good. Cold-weather crops doing well. Public health good.
PRESIDENCY DIVN. 7	Nuddea, „ 7 „	Nil	Weather—variable and cloudy. Temperature continues high. The *amun* saved from the floods very good. Sowings of *rubbee* continue on an extensive scale. Health good.
PRESIDENCY DIVN. 8	Khoolna, „ 7 „	Nil	Weather—bright, but cloudy at close of week. Prospects of rice crop continue very favourable. Ploughing for cold-weather crops going on. Fever in some places, public health otherwise good.
PRESIDENCY DIVN. 9	Jessore, „ 7 „	0·05	Weather—seasonable Prospects of *amun* crop good. Sowings of winter crops going on. Price of rice stationary. Cases of fever here and there
PRESIDENCY DIVN. 10	Moorshedabad, „ 7 „	Nil	Weather—clear and cool early in the week; cloudy and close again now. A little rain would be of great benefit to the *amun* in the *Rarh*; nevertheless a good crop is expected. *Kalai* is doing well *Rubbee* crops generally still being sown. Mulberry doing fairly well. Public health good. Common rice sells at 15 and 16 seers per rupee
RAJSHAHYE DIVN. 11	Dinagepore	.....	Report not received.
RAJSHAHYE DIVN. 12	Rajshahye, Nov. 7 „	Nil	Weather—hotter than usual for time of year and cloudy Looks like rain. Prospects of standing crops fair Preparation of lands for mustard and other cold-weather crops continues. *Ganja* is so far doing well. Fever general.
RAJSHAHYE DIVN. 13	Rungpore „ 7 „	Nil	Weather—seasonable. Prospects of *amun* and other standing crops good. Mustard and other winter crops are being sown. General health of the people good.
RAJSHAHYE DIVN. 14	Bogra, „ 7 „	Nil	Weather—dry and hot again. Prospects of *amun* continue excellent. Public health fair.
RAJSHAHYE DIVN. 15	Pubna, „ 7 „	Nil	Weather—seasonable. Prospects of crops continue good. Public health fair.
RAJSHAHYE DIVN. 16	Darjeeling, „ 7 „	0·05	Weather—cloudy and raw. Prospects of crops good. Public health good.
RAJSHAHYE DIVN. 17	Julpigoree, „ 7 „	Nil	Cold weather setting in, but sun still hot. Condition of all crops continues to be good. Fever prevalent as usual at this time of year; otherwise public health good.
	Eastern Districts.		
DACCA DIVISION. 18	Dacca, Nov. 7 '85	Nil	Weather—seasonable. Sowing of mustard and *kalai* commenced. Prospects of crops continue favourable. Public health good.
DACCA DIVISION. 19	Furreedpore, „ 7 „	Nil	Weather—warmer than last week, with some clouds. *Dhigha* paddy being reaped. Sowing of winter crops commenced A good deal of fever at head quarters.
DACCA DIVISION. 20	Backergunge, ...	.....	Report not received.
DACCA DIVISION. 21	Mymensingh, „ 6 „	Nil	Weather—cloudy and close. Prospects of all crops good.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—*concld.*			
	***Eastern District*—contd.**		
CHITTAGONG DIVN. 22	Chittagong Nov. 10 '85	Nil	Weather—seasonable Prospects of crops generally fair. Prices steady. Public health good. Cattle-disease reported
CHITTAGONG DIVN. 23	Noakholly, „ 6 „	Nil	Weather—cool and clear till 3rd, since when cloudy sky and warm. Prospects continue *fair*. Damage by grubs in the Feuny sub-division is said to be about 2 annas. Some damage also reported on the churs in the Sudder sub-division from same cause. Health good.
CHITTAGONG DIVN. 24	Tipperah, „ 5 „	Nil	Weather—cloudy and unseasonably warm. Paddy continues to promise well, but rain is now wanted to ensure good results. Public health good, but sporadic cholera reported in the north of the district.
CHITTAGONG DIVN. 25	Chittagong Hill Tracts. „ 3 „	Nil	Weather—hot with foggy mornings Harvesting of *joom* paddy nearly over. Lands being prepared for chillies, mustard, and other cold-weather crops. Cotton is in pods in some *jooms*. Sugarcane doing well.
CHITTAGONG DIVN.	Hill Tipperah, „ 4 „	Nil	Weather—unsettled; cloudy. Prospects of *aman* paddy continue to be good. Cotton and *til* being gathered. Chillies and tobacco being transplanted. Public health good
BEHAR.			
PATNA DIVN. 26	Patna, Nov. 7 '85	Nil	Weather—cloudy and warm during early part of the week, but now clear, and mornings and evenings cool. Paddy on high lands suffering from want of rain. Rain also needed for *rubbee* sowings. Sporadic cholera reported from Dinapore. Fever prevalent in some parts of the district.
PATNA DIVN. 27	Gya, „ 7 „	Nil	Weather—fairly cool. No rain reported from any part of the district. *Rubbee* sowings delayed for want of rain. Rice crops already damaged by the drought of the past five weeks would not be benefited by rain. Sugarcane being cut; outturn good.
PATNA DIVN. 28	Shahabad, „ 7 „	Nil	Weather—seasonable. Prospects of rice crop continue favourable, but more rain is wanted. *Rubbee* sowings for the most part completed. Weather favourable for poppy; sowings in full progress. Cholera and fever still prevalent. Prices stationary.
PATNA DIVN. 29	Durbhunga, „ 8 „	Nil	Cold weather has now set in. Prospects of paddy generally favourable. A couple of inches of rain or so would have been greatly beneficial in bringing crops to perfection. *Alsa* and *soothni* are being harvested. *Rubbee* sowings in progress. Prices stationary. A few sporadic cases of cholera still reported from Madhubani.
PATNA DIVN. 30	Mozufferpore, „ 7 „	Nil	Weather—seasonable. Paddy crop coming up favourably and promises well. *Rubbee* germinating well; sowings still going on Public health fair in Sudder sub-division, but from Sitamarhi and Hajipur sub-divisions cholera reported.
PATNA DIVN. 31	Sarun, „ 7 „	Nil	Weather—fair; days hot, nights cool. Prospects of *aghani* paddy good. *Rubbee* and poppy sowings in progress; early sowings coming on well. Cases of fever reported, otherwise public health good.
PATNA DIVN. 32	Chumparun „ 7 „	Nil	Weather—seasonable. Standing crops looking well *Rubbee* sowings in progress. Prices of food-grains have fallen slightly. Some cases of fever still reported from the interior.
BHAGULPUR DIVN. 33	Monghyr, Nov. 7 '85	Nil	Weather—fine. Prospects of crops continue good. A fall of rain would be beneficial. Prices steady. Public health good.
BHAGULPUR DIVN. 34	Bhagulpore, „ 7 „	Nil	Weather—cloudy and warm. Prospects of rice still good, but the failure of the later rain will injure it a good deal. *Rubbee* sowings going on on a large scale. Rain wanted for this also Prices stationary. Cholera still prevalent in the north.
BHAGULPUR DIVN. 35	Purneah „ 7 „	Nil	Weather—seasonable. Prospects of crops good. Early rice sells at 20 seers per rupee. *Khesari*, *masuri*, wheat, &c., are being sown. Public health generally good except in some parts of Arrareah, where cholera and fever still continue.
BHAGULPUR DIVN. 36	Maldah „ 7 „	Nil	Weather—fine and cool. Prospects of all crops good Common rice selling at 18 seers per rupee in most parts of district. Public health good.
BHAGULPUR DIVN. 37	Sonthal Perghs. „ 7 „	Nil	Weather—seasonable. Prospects of rice crop excellent everywhere. Public health fair.
ORISSA.			
ORISSA DIVN. 38	Cuttack Nov. 6 '85	1·42	Weather—cloudy. Early *sarad* rice flowering; late *sarad* rice in ear. Rainfall of 3rd instant greatly benefited the crops. Common rice selling at 12 seers per rupee in town. Public health generally good. A few cases of cholera reported from Jajpur and some parts of Kendrapara sub-division
ORISSA DIVN. 39	Pooree, „ 5 „	2·00	Weather—cloudy with heavy showers of rain for the last two days of the week.
	Khoorda ...	1·52	Late *sarad* rice is in ear *Laghu sarad* is being harvested. Rain of the week has caused damage to some extent to the mustard and other *rubbee* crops. Relief works are going on in the Chilka tracts which have suffered loss of crops from drought. Common rice sells at an average of 18 seers 6 chittacks per rupee in the Sudder sub-division, and 15 seers 6 chittacks in the Khoorda sub-division. Public health good.
ORISSA DIVN. 40	Balasore, „ 6 „	0·19	Weather—cloudy and cool Early *sarad* rice ripening; late *sarad* in ear. *Rubbee* crops progressing well A few cases of cholera reported from the Dhanmagar Chakla. Public health generally good.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
CHOTA NAGPORE.			
South-West Frontier Agency.			
41	Hazaribagh, Nov. 6 '85	Nil	Weather—somewhat unsettled; unseasonably warm latterly. Prospects of rice and other crops continue favourable. Rice being harvested in places. General health good. A few cases of cholera reported.
42	Lohardugga, „ 7 „	Nil	Weather—cool and cloudy. Prospects of winter rice continue favourable. *Rabbee* sowings still going on. Prices steady. Fever reported from Daltongange; otherwise public health good.
43	Singbhoom, „ 6 „	0·29	Weather—cloudy with light rain; clear to-day (6th). Prospects of crops continue good. Harvesting of paddy going on with an outturn of 12 to 16 annas. Cold-weather crops doing well General health good.
44	Manbhoom, „ 7 „	0·11	Weather—warm and cloudy. Cutting of *aman* has commenced; the crop is a bumper one. Rice selling in different parts of the district at from 20 to 28 seers per rupee. Cold-weather crops doing well. Public health good.

Published for general information.

CALCUTTA, REVENUE DEPT.,
The 10th November 1885.

A. P. MACDONNELL,
Secy. to the Govt of Bengal.

STATEMENT SHOWING THE STOCKS OF RICE IN AND AROUND CALCUTTA.

Names of Marts.	Stock in hand as compiled on—												
	1st week of Nov. 1884.	1st week of Dec. 1884.	1st week of Jan. 1885.	1st week of Feb. 1885.	1st week of Mar. 1885.	1st week of April 1885.	1st week of May 1885.	1st week of June 1885.	1st week of July 1885.	1st week of August 1885.	1st week of Sept. 1885.	1st week of Oct. 1885.	1st week of Nov. 1885.

ALEXANDER PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.

METEOROLOGICAL AND RAINFALL SUMMARY OF THE PROVINCE OF BENGAL FOR THE MONTH OF OCTOBER 1885.

OCTOBER is the month in which the south-west monsoon, which has been blowing since the commencement of June, practically ceases, and its place is taken by the north-east monsoon, which slowly and very gradually establishes itself over the province. The greater part of the month thus shows distinct transition conditions, and in normal years, while at the commencement of the month a feeble south-west monsoon may be blowing over the province, during the middle of the month, these winds gradually retreat, and by the end of the month usually a feeble north-east monsoon establishes itself over the province.

The change of the one monsoon to the other is sometimes represented as a kind of struggle between the two opposing wind currents, and with the final triumph of the stronger of the two. This, however, appears to be an incorrect way of viewing the action, and it is clear that on the one hand by the gradual and steady effacement of the conditions which brought about the south-west monsoon, or in fact it might almost be said with the tendency to the reversal of these conditions which manifests itself in October, the south-west monsoon current necessarily becomes more and more feeble, or is subject to a kind of decay.

On the other hand, temperature usually commences to fall rather rapidly in Northern India, and the main effect of the decreasing temperature appears to be to produce a considerable amount of descending air motion and a rising barometer, which is followed by the setting in of northerly winds. As therefore the south-west monsoon winds gradually retreat southwards, they are followed up by the northerly wind current, but over the area of interaction between the two currents light variable winds and calms will prevail. The point of interaction retreats southwards in front of the southerly winds, and as Bengal is the area over which this interaction takes place during a great part of October, for a very considerable part of the month light airs and calms prevail.

The time and character of the retreat of the south-west monsoon current will almost certainly depend on the strength with which it has been blowing, and with a weak current it will probably retreat early and quickly, while with a comparatively strong current the monsoon will influence Bengal for a longer time, and rain will continue later than usual, and the retreat of the current will be slow over the Bay, and thus the north-east monsoon conditions will be rather later than usual in establishing themselves over the province. The rainfall due to the continuance of the south-west monsoon conditions over Bengal probably, in normal years, ceases about the end of the first week or ten days of October, though, even after this time, local rainfall may occur, particularly near the sea coast, probably due to local sea winds or irregular local action. After this period any rainfall which may occur is almost always due to the action of cyclonic storms, which may be either small or of great magnitude. Such storms are apparently formed during the gradual retreat of the south-west monsoon, all the conditions in October being usually very favourable to the production of such storms, as pressure becomes nearly uniform round the Bay, winds are feeble, and rainfall is to a great extent absent from the land area. These storms when formed sometimes move in a northerly direction and pass over certain parts of Bengal; while on the other hand such storms frequently move in a westerly direction and cross the Coromandel or Madras coast. The storms formed in October are generally considerably larger, more violent and generally more influential than the storms of the rainy season proper, and the conditions are more favourable to the formation of large rather than small storms, inasmuch as the storms have a longer time to generate and to intensify. It is of course in October that conditions are occasionally favourable to the formation of the extremely large and intense cyclones which only occur at intervals of several years. In the event of one of these cyclonic storms passing over a part of Bengal, then the districts in its path will receive excessive rainfall, and those which are simply affected by it only will receive correspondingly smaller amounts of rain. When also these cyclonic storms cross the west coast, they generally cause slightly disturbed weather conditions over a considerable part of Bengal, and these are frequently followed by light rain.

The rainfall of October is then due to two distinct causes, and as the second cause is from its nature an extremely variable and uncertain one, it will be seen that the average distribution of the rainfall in October must be more irregular than in the previous monsoon months, and also that in particular years the actual distribution of the rainfall may be of extremely capricious character. In the case too of the rainfall which is brought up by the continuance of the south-west monsoon conditions, as the period at which these conditions cease varies very considerably from year to year, so also not only will the distribution of the rainfall be irregular, but also the total amount received will be very variable. The normal distribution of the rainfall is so irregular that it can only be briefly described with very approximate accuracy. It was thus described in the report for October 1884:—"The average rainfall in Behar (with the exception of the Purneah and North Bhagulpore districts) and Chutia Nagpur (excluding the districts bordering on South-West Bengal) varies from two and a half to four inches. The amount is least in the Gya district. It varies between four and six inches in the case of the previously excepted districts, the western districts of Orissa and the whole of Bengal, excluding the Julpigoree district and a narrow strip extending along the coast, and bounded on the north by a curved line running through Cuttack, Jajpore,

Diamond Harbour, Port Canning, Chandpore and Chittagong. Over this long narrow area, the width of which varies from 20 to 60 miles, the average rainfall exceeds 6 inches. It is absolutely greatest at False Point, for which it is 11·4 inches."

Meteorological summary of the month.—The meterological conditions which obtained over the province at the close of September were very nearly normal for the period. As is usually the case at the close of September and beginning of October, the south-west monsoon current blowing over Bengal commenced to slacken rapidly, rainfall began largely to diminish in quantity, while the area over which the rain was falling considerably decreased. On the 1st of October, however, pressure had fallen for two days in succession, and there were indications of the formation of a very feeble area of low pressure over parts of South Bengal, and these indications were rather more pronounced on the following day. Winds also showed a tendency to circulate cyclonically round the area of low pressure, and as the result of these slightly disturbed conditions, rain became decidedly general in all districts except Chutia Nagpur and parts of South Behar, the rain being heaviest in South-West Bengal. This slightly disturbed condition shortly disappeared, and for the next period of about eight or ten days the meteorological conditions were again those of the transition period above referred to. Winds were light and rather variable in direction, pressure was high, temperature began to fall, and the night temperatures in particular decreased rapidly. Humidity and cloud proportion became much smaller, and rain was practically absent in all the districts in the plains, except on the 9th instant, when owing to slightly disturbed conditions a few general showers again fell.

These transition conditions continued over Bengal up till about the 13th, when the weather in the southern districts became decidedly affected by the formation of a small cyclonic storm in the Bay, and its subsequent advance in a northerly direction. The small storm can be traced back probably as far as the 10th, when pressure was falling somewhat rapidly off Madras, and the wind directions along this coast showed a tendency to cyclonic circulation. The small depression was probably forming on this day, and its existence was shown by a fairly strong indraught at the entrance of the Bay, but at this time, and throughout the whole of its existence, the storm remained comparatively feeble. The disturbed conditions continued almost unaltered off Madras on the 11th, and then the storm apparently moved in a northerly direction almost parallel to the coast line, and on the 12th the centre was off Vizagapatam. The depression on this day had distinctly deepened, but the winds at the coast stations continued comparatively feeble. On the 13th, the small storm was nearly opposite to Gopalpore, and on this day it slightly intensified, and by the following morning (the 14th) it was to the east of False Point, and was still advancing in a north-easterly direction. As the storm was thus advancing near the Sandheads, at daylight on the 14th orders were issued to the stations in the Hooghly to hoist storm signal No. 7, indicating the probable passage of a small cyclonic storm in a northerly direction to the east of Saugor Island and to the west of Chittagong, and from reports subsequently received, it would appear that very bad weather prevailed at the Sandheads on this day, but the wind velocities at the coast stations continued comparatively small. The small storm continued its north-easterly advance, but pressure commenced to rise rapidly, and in its approach towards the land the depression began to fill up, and by the 15th it had become a shallow depression only, attended with light winds, and it was passing over the land area between Saugor Island and Chittagong. On this day, therefore, at about midday, the storm signals were lowered.

Winds, however, still continued to circulate cyclonically round the head of the Bay, even after the barometric depression over the land had disappeared. A peculiar feature of this storm was the extreme slowness of its movement, and the comparative lightness of the winds at the coast stations. Over the sea area, however, probably winds were strong, and, judging from the movements of the upper strata of the atmosphere, the indraught towards the centre of the storm was rather intense. Another point in connection with the storm was the comparative absence of heavy rain, and it would appear from theory that this is precisely what might be expected in a storm like that above described. On the 16th instant, these disturbed conditions had almost entirely passed away, and weather was fine all over Bengal, and also apparently over the whole Bay.

During the continuance of the above conditions and the advance of the storm, weather in Orissa, South-West and East Bengal also became disturbed, and light rain showers became comparatively frequent in these districts; but in Chutia Nagpur, North and South Behar and North Bengal, which were practically not under the influence of these disturbed conditions, weather was fine and rainfall was practically absent.

On the 17th instant, however, pressure began to fall rapidly near the Pegu coast, and strong winds commenced to blow at the stations in the south of the Bay. At the same time winds at the stations round the Bengal coast showed distinct indraught towards the Bay. On the following day pressure commenced to rise at the eastern stations of the Bay and to fall at the western stations, and strong winds continued to blow at Diamond Island and in the south of the Bay. On the 19th, pressure again rose at the stations in the north and east of the Bay, and it was falling at the central stations on the west coast; strong winds were still blowing in the east and south, and there was a distinct cyclonic circulation over a large part of the Bay, so that on this day the indications clearly pointed either to the

formation of a small cyclonic storm in the centre of the Bay, or to the first advance of the monsoon towards the west coast. During the whole of this period, weather in Bengal was almost uniformly fine, and with the exception of light showers in Orissa and in the hills of North Bengal, the province was rainless. Winds were light and variable, and temperature was high in all districts.

On the 20th instant the conditions as above described, which existed in the centre of the Bay, became further developed, and it was clear that it was not a cyclonic storm, but simply a diffused depression, and that a burst of rainfall was advancing towards the coast of the Circars, and on the 20th and following two days rather heavy rain was reported on this and on the Ganjam coast, while lighter rain fell in connection with this disturbance over the whole of Orissa, Chutia Nagpur and South-West Bengal. At the same time the disturbed conditions advanced apparently in a northerly direction, and in addition to giving general rain in the last-named districts, they became more diffused and gave light rain over East Bengal and North Bengal and over parts of South Behar.

With the gradual advance of this diffused depression over Bengal skies of course clouded over, humidity increased very rapidly, temperature, and particulary the night or minimum temperature, increased quickly, and the south-west monsoon conditions in a feeble form again established themselves temporarily over a large part of the province. The burst of rainfall along the west coast can scarcely be considered a true commencement of the Madras rains, but rather as a feeble, diffused and preliminary action, which might under other circumstances have generated a rather severe storm. As it was, there were decidedly disturbed conditions which existed along the whole west coast and extended far into Bengal, the centre of greatest barometric depression, (which was, however, particularly shallow,) being about Vizagapatam, while the centre of heaviest rainfall was at Coconada, which received nearly eleven inches of rain in two days, while Gopalpore also received nearly five inches, and on the 21st alone Vizagapatam registered 2·50 inches. During the formation of the depression, and owing to the indraught towards it, up to the 20th, rainfall was practically absent over Bengal, but from that date up till the 24th or 25th rainfall was fairly general in all districts except Behar, though a few showers penetrated even as far as this district. The rainfall due to this depression of course was most general and heaviest and lasted over the largest period in Orissa, though East Bengal also received some heavy showers

From the 25th up to the close of the month conditions became almost wholly those of the north-east monsoon, skies became almost cloudless, winds were northerly and north-westerly, humidity rapidly decreased and became very low, temperature reduced very rapidly, and so rapid was the reduction of the night temperatures that at some station a difference of nearly 10° was recorded between two consecutive nights, and lastly rainfall was almost entirely absent, the only rain reported during the last four days of the month being a slight shower at Darjeeling. At the close of the month, too, the cold weather conditions in Bengal were being strengthened and intensified by the setting in of the Madras rains, the indraught towards which of course caused a steady northerly current to flow over Bengal.

The variations of pressure from the normal during the month have not been of any great importance, and except where the conditions were influenced by the formation of the two depressions above alluded to, the variations were only of slight oscillatory character. The variation of the mean pressure of the month from the normal is comparatively small, being an excess of only 0·024". Except at Gya, where pressure has been in very slight defect, and at Saugor Island, where the excess pressure is less than one-hundredth of an inch the distribution of the excess pressure is fairly regular, though the district which shows the largest excess is East Bengal, where it amounts to 0·04".

Temperature variations usually in October are very considerable, and generally there is a steady decrease throughout the month. This year, however, the temperature instead of steadily falling during the whole month has presented two periods in which it fell with extreme rapidity, and two other periods in which temperature, instead of falling in most cases, increased perceptibly. The beginning of the month, as described under the meteorological summary, was a period of rapid reduction of temperature. This was followed by the formation of the cyclonic storm off the Madras coast, and its advance in a northerly direction up to the head of the Bay. Owing to the cloudy, rainy weather, and the setting in of moist winds which followed, the reduction of the temperature entirely ceased. After the disappearance of this storm, which was followed by a few days fine weather, night temperatures again began to fall, but with the setting in of moist sea winds which accompanied the westward advance of the second diffused depression, again the fall of temperature ceased. During the last five or six days of the month, as described under the meteorological summary, the fall of temperature was again very rapid. For the whole month temperature has been in all districts above the normal, the average excess temperature over the whole province has been about 1·2°, but the excess has been mainly confined to Behar, Chutia Nagpur and Orissa, where the excess approached 2°, while in East and South-West Bengal the mean temperature has been nearly normal.

The south-west monsoon current, as above stated, became extremely feeble from the very commencement of October, and thus the rainfall from this cause was smaller than usual. The two depressions which have been formed in the Bay also have not travelled into Bengal, but

have only generally influenced the weather in the province, and have therefore only brought up comparatively small amounts of rain. The rainfall for the month has consequently been in defect in all districts, and as neither of the above unsettled conditions reached as far as Behar, the rainfall in this district in particular has been excessively scanty. The district which has received the largest amount of rain has been East Bengal, where the average fall has been 5·14 inches, while the normal for the month is 5 71 inches. The actual fall is therefore about 90 per cent. of the normal. South-West Bengal reports an average fall of 3 80 inches against a normal fall of 4·56 inches, and has thus received 72 per cent. of the normal. In Chutia Nagpur an average fall of 1·95 inches is reported against the normal 2·82 inches, which represents 69 per cent. of the normal, and in Orissa the actual fall has averaged 4·02 inches, while the normal is 6·52 inches, and the percentage received becomes 62. In the case of the other three districts very deficient falls have been recorded : thus North Bengal reports an average fall of 2·18 inches, while the normal fall is 5·30 inches, and thus the actual is only 41 per cent. of the normal. In South Behar 0·66 inch of rain is reported, the normal being 3·27 inches, and thus the actual is only 20 per cent. of the normal; and finally North Behar, during the whole month, has averaged only 0·45 inch of rain, while the normal fall is 3·63 inches, and therefore this district has received the extremely small proportion of 12 per cent. of the normal, or less than one-eighth of the normal quantity.

The distribution of rainfall in October is, however, as previously stated, decidedly irregular, and this year has been no exception to the rule. In the Orissa Division it is the Balasore district which is most largely in defect, and such stations as Bhuddruck and Jellasore have received less than one inch of rain during the month, while the normal at these stations is nearly five inches. In South-West Bengal which, as before stated, has on the whole received a decidedly defective fall, the district of Nuddea has received a fall in excess of the normal, and the districts of Midnapur, Howrah, and Khoolna have only received about half the usual quantity. In the Bankoora district to, Anda, Gangajalghati and Sonamukhi have received almost no rain. In East Bengal, Noakholly has received a fall largely in excess of the normal, and Furreedpore and Mymensingh falls slightly in excess. In North Bengal the district of Julpigoree has received a fall in slight excess of the normal, but on the other hand Maldah and Dinagepore districts report falls less than a tenth of the normal, while in the former district Chanchal, Gajol and Sibgunge report absolutely no rain for the month. In North Behar all the districts are so largely in defect that it is scarcely possible to single out any one in preference to others; but in the Purneah district Gandwara reported no rain, in the Durbhunga district Bahera received no rain, again Mozufferpore recorded no rain, while Gopalgunge in the Sarun district also received no rain. In South Behar the defective rainfall was least marked in the Sonthal Pergunnahs district while in the Shahabad and Gya districts most of the stations were rainless, and in South Behar generally the following stations reported no rain :—Barrh, Jamui, Bhagulpore, Kolgong and Simra In Chutia Nagpur, while the Lohardugga and Singbhoom districts have generally received good rain, and in some cases falls above the normal, in Manbhoom the fall is defective, but in this division the distribution is fairly regular, as every station has reported more or less rain.

The following table gives full data for the comparison of the actual and the normal rainfall of the month of October in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third column in a slightly different form. It states as a percentage how much the district rainfall of the month varied in excess or defect from the normal rainfall, and is hence the difference between the numbers in the third column and 100.

	Inches.		
The total rainfall of the month	5·29		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	3·57		
The average fall of October from 48 years' registers ...	5·61		
The greatest fall in 24 hours	1·64	11th	
	Days.		
The number of rainy days in the month	8		
The average number of rainy days in October from 24 years' registers	10		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	147·6		
The mean difference of sun and air temperatures ...	58·6		
The greatest sun temperature	155·1	11th	
The greatest excess of sun over air temperature	66·9	11th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	69·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	10·3	30th	
	Miles.		
The mean movement of the wind per day	75·4		
The greatest movement of the wind in one day	117·0	14th	
The greatest movement of the wind in one hour	15·0	1st	5 to 6 P.M.

The number of hours with winds from each of the 8 points—

N. 126, NE. 42, E. 76, SE. 85, S. 72, SW. 107, W. 102, NW. 86, Calm 38.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of former years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0°8 lower; and, finally, the thermometer, which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards, is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

ALEXANDER PEDLER,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 9th November 1885.

N.B.—In the monthly abstract for September 1885 in the last line but 3 read 'equal' for "about ·6 higher."

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 9th November* 1885.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 6TH OF NOVEMBER 1885.

At the close of the previous week the conditions in Bengal were typical of the north-east monsoon. Skies were practically cloudless, temperature was falling rapidly, humidity was low, and a steady northerly current was blowing over the greater part of the province. This northerly wind current had been rather intensified by the apparent setting in of the rains along the west coast of the Bay, all stations from Masulipatam down to Galle having received fairly heavy rain. The heavy rainfall along the Madras coast suddenly ceased at the commencement of the week under review. At the same time very strong winds continued to blow at Galle, showing that weather was unsettled in the south of the Bay, and on Monday, the 2nd of November, it became evident that a cyclonic storm was approaching the west coast, and that it would cross the Coromandel coast between Masulipatam and Madras Pressure fell rapidly with the approach of the storm, the fall at Madras being about 0·2″ in the 24 hours from the 1st. to the 2nd of November. The small cyclonic storm apparently crossed the coast about midway between the above-named stations during the evening of the 2nd of November, and from the telegraphic reports received from Simla, it would appear that the storm marched across the entire peninsula without breaking up.

The storm was a large though not an intense one, and it affected the whole of the stations on the west coast, giving heavy rain to the central stations, and lighter rain to the others. Strong winds amounting to a fresh gale were also reported on the evening of the 2nd from the central stations.

Rain, therefore, was received at almost all stations in Orissa on the 3rd and 4th instant, the southern stations receiving heavy rain and the northern stations light rain. With the advance of this very large disturbance across the west coast, weather in Bengal also became unsettled ; skies clouded over rapidly, and in the southern districts they became almost practically overcast for some days. Considerable amounts of moisture also drifted over the province, and humidity and temperature rapidly rose. The northerly winds rapidly fell off in force, and winds became very light and variable. These conditions continued over the southern districts of the province, and particularly in Orissa and South-West Bengal up to the close of the week, but skies had cleared and humidity and temperature were falling in Behar, and at the northern and eastern stations in Bengal. During the continuance of these disturbed conditions a few very light showers were reported in Chutia Nagpur, and also at two or three stations in South-West Bengal and at the stations in the Darjeeling Hills, but they were of no practical importance.

The pressure changes over the province have been generally small and unimportant during the week, and usually they have been more or less of an oscillatory character. The mean pressure for the week has been distinctly above the normal, the average variation over the whole province being an excess of about 0·05″. The excess above the normal appears to have been smallest in Chutia Nagpur and South Behar, where it has been between 0·02″ and 0·03″. In Orissa the excess has been 0·04″, in East and South-West Bengal it has been 0·05″, and in North Behar about 0·07″.

Temperature was, as stated previously, comparatively low at the commencement of the week, but with the advance of the disturbed conditions over the province, night or minimum temperatures rose rapidly The day or maximum temperatures have been decidedly low during this period owing to the clouded skies which prevailed over a large part of the province, and this has very sensibly reduced the mean temperatures recorded during the week. Compared with normal temperature, all divisions, except Chutia Nagpur, have showed temperatures in defect, and in South-West Bengal and Orissa the mean defect was more than 2°.

Rainfall, as has before been stated, has been practically absent from all districts except Orissa. Behar, North and East Bengal have been absolutely rainless for the week ; South-West Bengal has received an average fall of one-hundredth of an inch only, and Chutia Nagpur one of five-hundredths of an inch. Orissa, on the other hand, has received an average fall of 1·24 inches, but here the rainfall has been unevenly distributed, and thus while the Pooree district received 2·83 inches, the Cuttack district has received 1·04 inches and the Balasore district 0·31 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 6th of November 1885 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of October.		Since 15th May 1885.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, Δ dew.

ALEXANDER PEDLER,
For Meteorological Reporter to the Government of India.

METEOROLOGICAL OFFICE, INDIA;

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 9th November 1885.

ALEXANDER PEDLER,
For Meteorological Reporter to the Govt. of India.

MEMORANDA.

DURING the week ending 24th October 1885, births and deaths were registered in the principal Municipalities in Bengal, at the rates, respectively, of 24·5 and 34·0 per 1,000 of population, against 23·4 and 33·8 per 1,000, respectively, during the preceding week ending 17th October, showing an improvement in the registration of births.

2. The highest birth and death-rates were returned by the following Municipalities:—

Births.

	Ratio per *mille*.
Darjiling	39·1
Bhagulpore	37·1
Gya	36·9
Naraingunge	33·2
Burdwan	32·0
Arrah	31·2
Comillah	30·8
Patna	30·4

Deaths.

	Ratio per *mille*.
Gya	51·9
Utterpara	47·2
Patna	46·4
Bhagulpore	46·2
Arrah	43·1
Suburbs of Calcutta	41·2
Hughli	38·9
Purneah	38·1
Comillah	34·6
Puri	33·6
Serampore	33·4
Monghyr	33·4
Chupra	30·3

3. The casualty rates from the principal diseases mentioned in the table appended to this memoranda exhibit no noticeable differences in comparison with the results of the preceding week, thus:

	Ratio per *mille* during the weeks ending—	
	24th October 1885.	17th October 1885.
Cholera	1·6	1·3
Small-pox	·1	·03
Fever	16·2	17·0
Bowel-complaints	6·8	6·0
Injury	·4	·5
Other causes	8·9	8·8

4. Excluding small-pox and injury, the casualties from which were high nowhere, and cholera, which proved noticeably fatal only in the Arrah town, *viz.* at 16·8 per 1,000 of its population, the rest of the diseases caused the highest mortality in the following Municipalities:—

Fever.

	Ratio per *mille*.
Purneah ...	38·1
Arrah ...	25·1
Bhagulpore ...	24·4
Gya	22·5
Burdwan	21·4
Patna	21·1

Bowel-Complaints

	Ratio per *mille*.
Monghyr	12·6
Patna	11·0
Hughli	10·7

Other Causes.

	Ratio per *mille*.
Comillah	19·2
Gya	17·1
Puri	16·8
Serampore	13·7
Patna	13·0
Suburbs of Calcutta ...	11·8
Bhagulpore ...	11·8
Hughli	10·7

5. The mortality referable to *Sex*, *Class* and *Age*, stands as noted below:—

According to Sex.

	Ratio per *mille*.
Males	35·0
Females	32·9
Ratio of male deaths to every 100 female deaths	120

According to Class.

	Ratio per *mille*.
Christians	21·7
Hindus	34·5
Mahomedans ...	33·4
Other classes ...	36·4

According to Age.

	Ratio per *mille*.
Under 1 year ...	289·8
1 and under 5 years ...	52·6
5 „ „ 10 „ ...	18·6
10 „ „ 15 „ ...	15·4
15 „ „ 20 „ ...	21·4
20 „ „ 30 „ ...	19·4
30 „ „ 40 „ ...	19·6
40 „ „ 50 „ ...	27·6
50 „ „ 60 „ ...	36·6
60 years and upwards ...	80·1

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

The 9th November 1885.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 3386A.

GENERAL.—*The 12th November* 1885.—In modification of the order of the 2nd instant, Baboo Poorno Chunder Bysack, Officiating Deputy Magistrate and Deputy Collector, is posted to Serajgunge in the district of Pubna.

This cancels the order of the 2nd instant, transferring Moulvie Abdool Khalique, Deputy Magistrate and Deputy Collector, to Serajgunge.

Baboo Shib Chunder Nag, Deputy Magistrate and Deputy Collector, Backergunge, is transferred to the sudder station of the district of Maldah.

The 14th November 1885.—Mr. H. Holmwood, Officiating Joint-Magistrate and Deputy Collector, Patna, is appointed to have charge of the Barh sub-division of that district.

Mr. G. E. Manisty, Joint-Magistrate and Deputy Collector, on furlough, is posted to the sudder station of the district of Patna.

Mr. Manisty is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, with effect from the date on which he joined his appointment.

Moulvie Faisuddeen Hossein, Deputy Magistrate and Deputy Collector, Silligoree, Darjeeling, is allowed leave for two months and fifteen days, under section 72, chapter V of the Civil Leave Code, with effect from such date as he may be relieved by Baboo Prosunno Coomar Dutt.

Mr C. J. S. Faulder, Officiating Joint-Magistrate and Deputy Collector, Bhagulpore, is allowed leave for one month, under section 72, chapter V of the Civil Leave Code, with effect from the 1st December 1885.

Mr. W. H. Thomson, Temporary Deputy Magistrate and Deputy Collector, Raneegunge, Burdwan, is transferred to Bhagulpore, and is posted to the sudder station of that district.

Mr. W. Tennon, Officiating Joint-Magistrate and Deputy Collector, Rungpore, is appointed to have charge of the Raneegunge sub-division of the Burdwan district.

Mr. R. F. Rampini, Officiating District and Sessions Judge, 24-Pergunnahs, is appointed to act temporarily as Additional District and Sessions Judge, 24-Pergunnahs and Hooghly, till relieved by Mr. H. Beveridge.

Lieutenant-Colonel W. L. Samuells, Officiating Deputy Commissioner, Lohardugga, on leave, is appointed to act as Deputy Commissioner of Singbhoom, during the absence, on deputation, of Lieutenant-Colonel C. H. Garbett, or until further orders.

Mr. R. H. Renny, Assistant Commissioner, is appointed to act, until further orders, in the first grade of Assistant Commissioners, and is posted to the district of Singbhoom on being relieved of his present appointment as Officiating Deputy Commissioner of that district.

Mr. D. R. Lyall, Officiating Commissioner, Chittagong Division, is allowed leave for fourteen days, under section 72, chapter V of the Civil Leave Code, with effect from the 8th instant.

Mr. A. Manson, Magistrate and Collector, Chittagong, is appointed to act as Commissioner, Chittagong Division, during the absence, on leave, of Mr. D. R. Lyall, or until further orders.

Mr. S. J. Douglas, Officiating Joint-Magistrate and Deputy Collector, Chittagong, and Officiating Deputy Commissioner, Chittagong Hill Tracts, is appointed to act as Magistrate and Collector of Chittagong, during the absence, on deputation, of Mr. A. Manson, or until further orders, in addition to his duties as Officiating Deputy Commissioner of the Chittagong Hill Tracts.

Baboo Horo Chandra Ghose is appointed temporarily to be a Sub-Deputy Collector of the fourth grade, and is posted to the sudder station of the district of Burdwan, *vice* Moulvie Mohomed Abdurrauf, on deputation.

This cancels the order of the 16th October 1885, placing the services of Baboo Horo Chandra Ghose at the disposal of the Financial Department of this Government.

POLICE.—*The 14th November* 1885.—Mr. H. W. J. Bamber, District Superintendent of Police, Rajshahye, reported his departure from India, on furlough, on the afternoon of the 16th October 1885.

ECCLESIASTICAL.—*The 12th November* 1885.—The Revd. Suliman Soke, Pastor of the Evangelical Lutheran Church at Burju in the Lohardugga district, is licensed, under clause 5, section 5, Act XV of 1872, to grant certificates of marriage between persons who are Native Christians.

REGISTRATION.—*The 11th November* 1885.—Baboo Kali Pada Banerjee, Rural Sub-Registrar of Baluchar, in the district of Moorshedabad, is appointed to be Rural Sub-Registrar of Rampore Hat, in the district of Beerbhoom, *vice* Baboo Mahabharat Saha, deceased.

Munshi Aulad Hossein, Rural Sub-Registrar of Srinagar, in the district of Dacca, is appointed to be Rural Sub-Registrar of Jhenida, in the district of Jessore.

EDUCATION.—*The 14th November* 1885.—Mr. R. Parry, Professor, Patna College, was absent from his duties, on leave, under section 50, chapter V of the Civil Leave Code, from the 7th September to the 11th October 1885.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

REVENUE (FOREST) DEPARTMENT.

The 14th November 1885.—Mr. C. A. G. Lillingston, Assistant Conservator of Forests, first grade, is appointed to officiate in the fourth grade of Deputy Conservators, with effect from the 4th April 1885.

A. P. MACDONNELL,
Secy. to the Govt. of Bengal.

NOTIFICATION.

The 17th November 1885.—Mr. H. F. J. T. Maguire, Officiating Joint-Magistrate, is appointed, under the Indian Factories' Act of 1881, to be Inspector of Factories in the district of the 24-Pergunnahs.

A. P. MCDONNELL,
Secy. to the Govt. of Bengal.

NOTIFICATION.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

Telegram dated the 13th November 1885.

From—Bombay.	To—Calcutta.
From—General Secretary.	To—Bengal.

FOLLOWING from British Consul, Alexandria, dated 12th November 1885 :—Arrivals from Ceylon and all the coast from Bassein to Bombay now admitted to free pratique.

NOTIFICATION.

The 14th November 1885 —The following papers regarding the removal of quarantine at Aden and Perim against arrivals from Calcutta, and the imposition of it at those places against arrivals from Tonquin, are republished for general information.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

Quarantine : Removal of—— at Aden and Perim against arrivals from Calcutta and imposition of——at Aden and Perim against arrivals from Tonquin.

No. 4247.

GENERAL DEPARTMENT.

Bombay Castle, 9th November 1885.

Telegram from the Government of India, Home Department, Simla, dated 6th November 1885 :—

"Your telegram 5th. Withdrawal so much Bombay notification, 9th May 1885, as imposed quarantine at Aden and Perim on arrivals from Calcutta sanctioned. Imposition quarantine at Aden and Perim against arrivals from Tonquin also sanctioned."

RESOLUTION.—It should be notified in a *Bombay Government Gazette Extraordinary* that, under instructions from the Government of India, so much of the notification of the Government of Bombay, No. 1719, dated 9th May 1885, as imposed quarantine at Aden and Perim on arrivals from Calcutta has been withdrawn. A notificati n should also be published bringing the B Quarantine Rules into operation at Aden and Perim against arrivals from Tonquin.

2. Copies of the notifications should be forwarded to the Political Resident, Aden, and the other officers and departments concerned for information, with reference to Government Resolution No. 4205, dated 5th instant. Copies should also be forwarded to the Governments of India, Bengal, Madras, and Ceylon, and the Chief Commissioner, British Burmah.

J. MONTEATH,
Under-Secy. to Government.

NOTIFICATION.

GENERAL DEPARTMENT.

Bombay Castle, 9th November 1885.

No. 4247.—Under instructions from the Government of India so much of the notification of the Government of Bombay, No. 1719, dated 9th May 1885, as imposed quarantine at Aden and Perim on arrivals from Calcutta, has been withdrawn

By order of His Excellency the Right Hon'ble the Governor in Council,

J. NUGENT,
Secretary to Government.

GENERAL DEPARTMENT.

Bombay Castle, 9th November 1885.

No. 4248.—In exercise of the power conferred by Act I of 1870, the following Rules for quarantine against cholera have been made by the Government of Bombay, with the previous sanction of the Governor-General in Council : they will take effect from the 4th instant in the Port of Aden and at Perim as a temporary measure :—

I.—The Commander of every vessel, including buggalows or other native craft, arriving from Tonquin shall, before entering the harbour, indicate by signal the port from which such vessel has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the harbour.

III.—Immediately on arrival the Commander shall cause the letter R of the Commercial Signal Code to be hoisted, and shall keep the said flag flying during his stay in port or until authorized by the Health Officer to haul it down. If communication with the shore is not desired, the vessel shall anchor at such place as may be pointed out by the Port authorities, having regard to the season of the year. If communication with the shore is desired, the Health Officer shall go alongside the vessel, and, after all necessary enquiries, shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival, or for the shorter period prescribed in Rule IV, and undergo disinfection, which should apply as well to crew, passengers, effects, and suspectible goods.

IV.—If the Health Officer of the Port has sufficient evidence that no cases of a suspicious nature have taken place on board during the voyage, and if the vessel is besides in good hygienic condition, the duration of the quarantine will be diminished according to the following scale:—

After eight days of voyage		...	...	Six days of quarantine.	
Do. nine	do.	...	...	Five	do.
Do. ten	do.	...	...	Four	do.
Do. eleven	do.	...	...	Three	do.
Do. twelve	do.	...	...	Two	do.
Do. thirteen	do.	and upwards	...	Twenty-four hours of quarantine.	

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of cholera should occur on board, the said vessel shall remain in quarantine for a period of seven days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule III.

VI.—When any vessel has been placed in quarantine as aforesaid the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days. If a case of cholera occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Aden and Perim which may have communicated with vessels coming from Tonquin shall be subjected to the same quarantine as vessels arriving at Aden and Perim from that port.

X.—All vessels which have undergone quarantine in the manner above prescribed should have the fact clearly stated on their bills of health.

By order of His Excellency the Right Hon'ble the Governor in Council,

J. NUGENT,
Secretary to Government.

NOTIFICATION.

The 14th November 1885.—In modification of the notification, dated the 24th June 1884, published at page 707 of Part I of the *Calcutta Gazette* of the 25th idem, regarding the supply, within the territories under the Lieutenant-Governor of Bengal, of lime or lemon juice or other antiscorbutics for the use of ships in accordance with the provisions of section 6 of the Merchant Shipping Act of 1867, the Lieutenant-Governor is pleased to direct that the words "or by Shama Churn Datta & Co." be inserted in paragraph 2 of the notification after the words "No. 5, Beadon Street, Calcutta."

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

[Second Publication.]

NOTICE.

The 6th November 1885.—The following draft of Rules, which it is proposed to issue under sections 21, 50 (clause 1) and 51 (clause 1) of Act VI of 1884, is published for general information. These rules will be taken into consideration on the expiry of a month from the date of their first publication in the *Calcutta Gazette*; and the Lieutenant-Governor will receive and give due attention to any objections or suggestions which may be made by any person within that period.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal

UNDER the powers conferred upon him by section 21 of Act VI of 1884 (the Inland Steam-vessels Act), and, with the sanction of the Governor-General in Council, the Lieutenant-Governor has been pleased to make the following rules for the survey of Inland Steam-vessels:—

Time and place of survey.

1. Surveys shall be made at the Ports of Calcutta, Chittagong, Patna, Cuttack, Goalundo, Kooshtea, Dehree, Khoolna, and at such other places, as may, from time to time, be declared by the Local Government to be places of survey upon due notice or application from the owner, on any day in the year, with the exception of Sundays and Government holidays, by the Surveyor or Surveyors appointed under the Act. The declarations of surveyors will be made and certificates of survey will be granted in the annexed forms on the payment of fees specified in the second Schedule annexed to the Act.

Surveyors' duties.

2. The Surveyors will be guided by the rules hereunto annexed in making their survey. In cases where two Surveyors are employed, the Engineer-Surveyor will survey the engines, boilers, and all the machinery required to be surveyed under the Act. The Ship-wright Surveyor will inspect the hull, equipments, and passenger accommodation; measure and determine the number of passengers the vessel is fit to carry, and see that the certificates of the master, mates, and engineers are such as is required by the Act; also that the lights and fog signals are in accordance with the regulations for the prevention of collisions at sea.

Notice of survey to be given.

3. Owners of steam-vessels requiring survey are requested to give the Surveyor at least three days' notice in writing when a survey is required, and are warned that, should such notice fail to be given, the Surveyor is not responsible for any delay or inconvenience which may occur in consequence.

Particulars to be given in notice.

4. This notice (which is to be preserved by the Surveyor) must state explicitly the name of the steamer to be surveyed, and the time when, and place at which, she will be ready for inspection.

Surveyors to attend at appointed time.

5. In order to prevent inconvenience and delay to the owners, the Surveyors are to be careful to be in attendance at the appointed time and place. Should they be unable to attend as required, notice should be given to the owners to that effect.

Survey if deferred.

6. Should a steamer not be ready for inspection at the time arranged, the Surveyors may make such arrangements for the subsequent survey as may be convenient to the owner or his agent. All expenses arising out of this postponement will be charged against the owner when the certificate is issued.

SURVEYORS' DECLARATIONS.

Surveyors' declarations.

7. The Surveyor's declaration under section 9 of the Act shall be made in the form hereunto annexed. The particulars required to be given in the declaration for a certificate of survey are the following, which are treated of under separate heads:—

(1) That the hull of the vessel is sufficient for the service intended, and in good condition.

(2) That the boats, life-buoys, lights, signals, compasses, and shelter for deck passengers, and the certificates of the master, engineer or engineers, engine-driver or engine-drivers, are such and in such condition as required by these rules.

(3) The time (if less than 12 months) for which the said hull and equipments will be sufficient.

(4) The limits (if any) beyond which, as regards the hull and equipments, the vessel is, in the Surveyor's judgment, not fit to ply.

(5) The number of passengers (if any) which the ship is, in the Surveyor's judgment, fit to carry, distinguishing if necessary between the respective numbers to be carried on deck and in the cabins and in different parts of the deck and cabins: such numbers to be subject to such conditions and variations according to the time of the year, the nature of the voyage, the cargo carried, and other circumstances as the case requires.

The declaration of the Surveyor as to the boilers and machinery is to contain a statement of the following particulars:—

(1) That the machinery of the vessel is sufficient for the service intended, and is in good condition.

(2) The time (12 months or less) for which such machinery will be sufficient.

(3) That the safety valves and fire hose are such and in such condition as are required by these rules.

(4) The limits of the weight to be placed on the safety valves.

(5) The limits (if any) beyond which, as regards the machinery, the vessel is, in the Surveyor's judgment, not fit to ply.

When a Surveyor is, from any reason whatever, unable to complete his declaration, an incomplete declaration should be sent to those who applied for survey as soon as possible, stating in it the reasons for not being able to fill up all the particulars under the various headings. He must take care to obliterate all the items in this declaration that he is unable to certify to as being in accordance with the Acts and regulations.

Surveyors may go on board inland steam vessels.

8. Surveyors may go on board any vessel at any reasonable time for the purpose of inspecting either the certificates of the master, or engineer, or the vessel, the machinery, the boats, other equipments, or for any other purpose rendered necessary by the Act; and the owners, masters, and engineers of inland steam vessels are required by the Act to give to the Surveyors, on being requested so to do, all such information and assistance within their power as may be requisite for the purpose of making the returns required by the Act. In the performance of

this part of their duties, Surveyors are to be careful to avoid impeding the duty of the vessel, or wilfully giving offence to any of the officers. If they should be hindered or obstructed. by any person in the performance of their duties, they should communicate the facts without delay to the officer authorized to grant a certificate of survey for the vessel concerned.

Inspection to be made in the presence of owner, agent, or responsible person.

9. Surveyors should, if possible, make their inspections when the agent, master or chief mate, and engineer of the vessel are present. Repairs can then be required, and defects can be pointed out to the proper persons without incurring the uncertainty and delay attendant upon messages delivered to the subordinate officers. If the owners do not instruct a responsible representative to be present, the Surveyors will of course make the survey in his absence.

Statement of repairs required to be given by Surveyors.

10. In order to prevent mistakes as to the nature and extent of repairs required by the Surveyors, whenever they cannot give a declaration until repairs are effected or alterations made, a written statement of the nature and extent of the defects to be remedied or alterations required should in all cases be given to the owner or agent, whether applied for by him or not. A copy of the above should always be taken in the office Press Letter Book.

If any difference of opinion arises between the Surveyors and the owners, manufacturers, or others, or any questions are raised, the facts should at once be reported to the officer authorized to grant a certificate of survey.

Declaration not to be given without great caution.

11. Surveyors are in no case to give a declaration either for the hull, machinery, boilers, or equipments of a steamer unless they are satisfied that all the requirements of the Act have been complied with.

It is the duty of the Surveyor to satisfy himself personally regarding every detail of the survey of a vessel, and not to trust to any certificate or other document given by any person not responsible to the Government.

Short declaration when to be granted.

12. In any case in which the Surveyor has reason to believe that the hull, machinery, boilers, or equipments are not fit for so long a time as the owner has applied for, he is to grant his declaration for such shorter period as he may deem expedient, informing the owners, if necessary, of his reasons for so doing. Unless it is the docking time only that limits his declaration, in accordance with the regulations, he is not to grant a declaration for an inland steamer for a shorter period than one month. In such cases, and also in cases in which the Surveyor refuses a declaration altogether, he is to give a statement in writing of the repairs he considers necessary to enable him to grant a declaration for the time asked. By this paragraph the Surveyor is to understand that an inland steamer that is not fit for a declaration for one month is not to be deemed by him as fit to hold a certificate at all.

Surveyor to complete survey where possible, but to sign only for details surveyed.

13. It is most desirable that a Surveyor should complete the survey of a vessel in every detail when he has commenced it, and if possible, arrangements should always be made to secure this. In exceptional cases, however, when this cannot be arranged, one or more Surveyors should complete the parts of the survey left unfinished. The Surveyor who commenced the survey

should not sign a declaration for any details which he has not surveyed, and for which consequently he is not prepared to hold himself personally responsible. He can only relieve himself from entire responsibility for every detail by distinctly noting on his declaration that he has been unable to attend to certain details specified by him, and in respect only of the details so specified will his claim to irresponsibility be accepted.

The Surveyor or Surveyors who attend to the details of the survey which have been left unfinished should also give declarations for the particulars they have attended to. The supplementary declaration should be attached to the main declaration.

Refusal of declarations to be notified.

14. A report should be made to the officer appointed to receive cancelled or suspended certificates of the name, port of registry, and official number of all vessels for which declarations are refused. This should be done as soon as possible after the vessel is withdrawn from survey, and full reasons for the refusal should be given.

A declaration for twelve months should not be granted whenever the Surveyor has any doubt whatever as to the efficiency of any part of the vessel, or her machinery, or equipments for such period.

EXAMINATION OF HULL, &c.

Hulls to be examined.

15. Surveyors are to determine whether the hulls of inland steam-vessels are in good condition and fit for the service for which they are intended; and they are to examine the hulls of such vessels inside once at least in every year, at such time as is most convenient to the owners; and outside on a slip or in dry dock at least once every four years.

Owner should give notice when a vessel is in dry dock.

16. Delays and inconvenience may to a great extent be prevented if notice is given by owners when a vessel, which requires a certificate, is undergoing repairs, or is in dry dock for any other purpose, as this notice might obviate the occasional necessity of re-docking a vessel at an inconvenient time. Surveyors should explain this to owners or their agents whenever an opportunity occurs.

New vessels to be surveyed before being painted or cemented

17. A survey made only after the hull is complete, and is cemented and painted, cannot be regarded as a satisfactory survey of a new steam vessel. Surveyors should therefore decline to grant declarations for any new steamer, unless they inspected her before she was painted or cemented. Any survey made while the vessel is being built is not to interfere with the complete inspection afterwards, but is to be made solely with a view of enabling the Surveyors to form an opinion of the workmanship, material, and construction.

The bottoms of new vessels need not be examined in dry dock after launching, if they have been examined by the Surveyor before launching, unless he has special reasons for considering it necessary.

Water-tight collision bulkheads
Other bulkheads

18. A collision water-tight bulkhead should be fitted in all steamers. As regards bulkheads, the Surveyors should not refuse to grant a declaration upon the ground that they are not fitted, or are defective, unless they are of opinion that the want of, or the defective state of, the bulkheads renders the vessel unsafe.

Examination of the bottom outside.

19. In no case should a Surveyor grant a declaration for a steamer, the outside of the bottom of which has not been examined either on a slip way or in a dry dock by a Surveyor during the four years preceding the date of survey.

Ceiling to be removed as Surveyor thinks necessary.

20. For examining the internal parts of the vessel, they should have parts of the ceiling removed, in order that they may ascertain the condition of the hull; they should also carefully examine the cement to ascertain its condition, and where they find it cracked or doubtful, they should extend their examination, and cause such a portion of the cement to be removed as may, in their judgment, be necessary to enable them to form a correct opinion as to the state of the vessel covered by the cement. The roses for the deck pumps, also those for the bilge pumps, should be taken out of the bilges and cleaned, and the sluices and cocks on the bulkheads inspected and put in good working order.

Examination of vessel in engine-room, coal bunkers, &c.

21. The Surveyors should examine very particularly the plating, stringers, frames, floors, &c., in the engine-room, boiler space, and coal bunkers, the bunkers of course being empty.

Entries in book.

22. The date of the last outside inspection of the bottom is to be entered in the declaration, as it is from that date that the docking time is to count. If the hull is not passed at all, or not passed for the maximum time (12 months), the fact should be noted in the declaration for the vessel. The repairs which have been executed from time to time should be recorded in the office book.

BOATS AND LIFE-BUOYS.

Dimensions of boats.

23. It will be the duty of the Surveyor to take care that all steam vessels are provided with the boats required by these rules, both as to number and cubic contents, and to see that they are efficient and in good order and ready for service, subject to the rules contained in these instructions.

Surveyors are not to insist upon the precise lengths, breadths, and depths inserted in the table, but are to approve of any efficient boats of sufficient strength, the cubic contents of which are respectively equal to, or greater than, the cubic contents of the boats specified in the table.

Rule for ascertaining the capacity of boats.

To ascertain the cubic capacity of a boat, measure the length and breadth outside and the depth inside. Multiply them together and by ·6: the product is the apacity of the boat in cubic feet.

Requisites for use in boats.

24. The Surveyors should see that in all boats the full complement of oars, including steering oar and two spare oars at least, are provided (in large boats more than two spare oars ought to be provided); that each boat has two plugs for each plughole, attached with lanyards and chains, and one set and a half of thole pins or crutches attached to the boat by sound lanyards; a bailer, a rudder and tiller, or yoke and yoke lines; painter of sufficient length, and a boat hook, the rudder and bailer to be attached to the boat by sufficiently long lanyards, and kept ready for use.

BOAT SCALE.

Tons.	Tons.	Cubic capacity.
Vessels of 100 and under 200		one boat of 120 ft.
„ of 200 and upwards		two boats of 600 „

Life-buoys, standard of.

25. As regards life-buoys. No life-buoy stuffed with rushes or with cork shavings or other shavings, or granulated cork, or any loose material should be passed. All cork life-buoys should be built of solid cork and fitted with life-lines and loops securely seized to the life-buoy, and none should be passed that will not float for 24 hours in water with 32 lb. of iron suspended from them. If life-buoys are not made of solid cork, then any other strong life-buoy of an approved pattern

may be passed that is capable of floating in the water for 24 hours with 40 lb. of iron suspended from it. No contrivance is to be passed as a life-buoy that requires inflation before use. Life-buoys with lines attached should be secured by a toggle and becket, or any other similar method, so that they can be quickly released; they must not be lashed nor seized to the rail or any other part of the vessel, but must be kept so as to be ready for use at a moment's notice in case of an emergency.

Steam-launches must carry two life-buoys: vessels other than steam-launches and carrying passengers should carry life-buoys in the ratio of three for every 100 passengers carried; the maximum number need not exceed 12.

Deck pumps to be fitted.

26. There must be for each compartment a pump of sufficient size which can be worked from the upper deck. A rose or perforated box of sufficient size should be fitted at the end of the suction pipe of each pump, and means provided for clearing the end of the suction pipe. A trunk-way leading from the upper deck to the suction of each pump, large enough for a man to go down to the end of the suction pipe, is the best arrangement for this purpose. If portable pumps only are supplied, there must be a trunk-way left in each hatchway leading to the bottom of each compartment.

Deck pumps, when not worked by machinery, should have handles at least long enough for two men to work at them.

Helm indicators.

27. In passing a helm indicator, the Surveyor should ascertain by actual trial that whenever the pointer moves to the word "port" on the dial or plate, wherever that word may be, it shows that the helm is ported, and, whenever the pointer points to the word "starboard," wherever that word may be, it means that the helm is starboarded.

Meaning of port helm.

28. In the foregoing directions, it is assumed that "port helm" means that the helm is so moved as to turn the ship's head to the right, and "starboard helm" means that the helm is so moved as to turn the ship's head to the left.

The man at the helm should be so placed in steamers that frequent crowded harbours or rivers that he has a clear look-out ahead.

Leads and lines.

29. Inland steam vessels plying to places beyond thirty miles from Port of Survey must have on board two hand lead-lines of 25 fathoms each with leads of at least 7 lb. in weight each.

Anchors, chains, cables, hawsers, warps, &c.

30. Surveyors must be very careful to see that each steam-vessel they survey is provided with chain cables and anchors duly certified under the Chain Cable Acts. When the stream and kedge anchors exceed 168 lb. in weight, they also must be tested in accordance with the same Acts. The Surveyors must also see that the chain cables and anchors on board are sufficient for the service and in good condition. The chain cables must be removed from the chain lockers at least once in 12 months, cleaned if necessary, and the pins knocked out of the shackles. The shackle pins should be secured by small pins of hard wood. The spare anchors should not be stowed below, but kept where they will be ready in case they are required. Proper hawsers and warps must also be supplied.

Compass to be fitted.

31. Inland steam-vessels plying to places beyond thirty miles from Port of Survey shall be supplied with a compass properly fixed and adjusted.

Rocket lockers.

32. The locker for keeping the rockets, blue lights, &c., should not be air-tight, but should have sufficient

small safe openings to allow of the escape of any moisture generated: by this means the rockets, blue lights, &c., can be kept for a long period.

Fire hose. 33. Vessels of 100 tons and upwards must be fitted with a steam fire pump; vessels of 200 tons and upwards must be supplied with a portable fire-engine in addition to the steam pump, suitable hose, and conductors, to be fitted; and in length sufficient to reach any part of the vessel. At least one fire-bucket to be carried for each of the crew. The fire-hoses should be connected stretched, to judge of their length, and thoroughly examined at every survey, and at least once a year (and at any other time that the Surveyor thinks it necessary) tested with the conductor in its place, by pumping water through them by the main or donkey engines at full speed. A proper conductor and metal bend or goose neck forms part of its equipment, and must be provided.

Deck to be caulked and have proper hatches, &c. 34. All decks and floors upon which passengers are carried must be caulked and properly secured. Sufficient light and ventilation must be provided. Proper and sufficient means of ingress and egress must be fitted.

Measurement for passengers. 35. In steamers making short daily runs, the clear space on the main deck, below the main deck or cabin and the bridge deck may be measured. The divisors being for the different decks as follows:—

Main deck	...	4·5 sq. ft. for each adult.
Below main deck or in cabin	...	9 „ „ „
Bridge deck	...	9 „ „ „

If the bridge deck be a continuous deck fore and aft and forms a permanent part of the structure of the vessel, and the vessel be sufficiently stable, it may be measured as the upper deck, in which case the decks below will be measured as below main decks at nine square feet for each adult.

For vessels making long voyages inland, and carrying coolies under the Inland Emigration Act, then the divisor will be nine square feet for each adult.

The upper or bridge deck is in no case to be measured, unless there be fitted a roof or sufficient protection from the sun, such as jaffery roof or awnings, that can be carried in all weathers.

Lights and fog signals. 36. All inland steam-vessels must be supplied with lights and fog signals in accordance with the rules for sea-going steam-ships. Small steam-launches may carry lights of a reduced size, but the Surveyor must satisfy himself as to their efficiency. A steam-whistle and a bell is be supplied in every case. In small steamers the mechanical fog horn may be dispensed with.

Boilers and Superheaters.

Board of Trade test certificates. 37. In dealing with boilers that have been made in the United Kingdom, the Surveyor should accept the certificate of the Board of Trade as to pressure to be granted, provided the boilers have been made under the Board's inspection during construction and a test certificate granted by the Board of Trade is produced. In cases where no supervision or inspection has been made during construction the Surveyor should add the factor Y in the rule 44, and such other of the factors as may under the circumstances of the case appear necessary.

The Surveyor to fix pressure on safety valves. 38. The Surveyor is required by the Act to fix the limits of weight to be placed on the safety valves of inland steam-vessels. The Surveyor having himself fixed the limits of the weight is then required to declare that in his judgment the boiler and machinery are

sufficient for the service intended, and in good condition, and that they will be sufficient for twelve months or such other period as he may, in his judgment, determine. For his guidance the following directions are given.

Working pressure to be fixed by calculation.

39. The Surveyor should fix the working pressure for boilers by a series of calculations of the strength of the various parts and according to the workmanship and material. The Surveyors should therefore receive and report on any plans of boilers intended for inland steam-vessels that may be submitted in due course with the form of application and fees. They are not to report on any tracing or plan that is not accompanied by that form, or when they have reason to believe that the boilers, when finished, are not intended to be placed on board steamers that will require survey certificates. When the Surveyor has received plans and tracings of new boilers, or of alterations of boilers, and has approved of them, he will of course be careful in making his examinations from time to time to see that they are followed in construction. When he has not had the plans submitted, but is called in to survey a boiler, he will of course measure the parts, note the details of construction, and, if necessary, bore the plates to ascertain their thickness, &c., before he gives his declaration.

The Surveyor cannot declare a boiler to be safe unless he is fully informed as to its construction, material, and workmanship. He should therefore be very careful how he ventures to give a declaration for a boiler that he is not called in to survey until after it is completed and fixed in the ship.

Respecting stays.

40. In the case of new boilers the Surveyors may allow a stress not exceeding 7,000lb. per square inch of net section on solid iron screwed stays and supporting flat surfaces, but the stress should not exceed 5,000lb. when the stays have been welded or worked in the fire.

The areas of diagonal stays are found in the following way:—Find the area of a direct stay needed to support the surface; multiply this area by the length of the diagonal stay, and divide the product by the length of a line drawn at right angles to the surface supported to the end of the diagonal stay; the quotient will be the area of the diagonal stay required.

When gusset stays are used, their area should be in excess of that found in the above way.

Girders for flat surfaces.

41. When the tops of combustion boxes or other parts of a boiler are supported by solid rectangular girders, the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam; and in the case of combustion chambers, that the ends are fitted to the edges of the tube plate and the back plate of the combustion box:—

$$\frac{C \times d^2 \times T}{(W-P) D \times L}$$ Working pressure.

W = Width of combustion box in inches.
P = Pitch of supporting bolts in inches.
D = Distance between the girders from centre to centre in inches.
L = Length of girder in feet.
d = Depth of girder in inches.
T = Thickness of girder in inches.
C = 500 when the girder is fitted with one supporting bolt.
C = 750 when the girder is fitted with two or three supporting bolts.

C = 850 when the girder is fitted with four supporting bolts.

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays.

42. The pressure on plates forming flat surfaces is found by the following formula :— Flat surfaces of boilers.

$$\frac{C \times (T+1)^2}{S-6} = \text{Working pressure.}$$

T = Thickness of the plate in sixteenths of an inch.
S = Surface supported in square inches.
C = Constant according to the following circumstances.

C = 100 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.*

C = 90 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts only.

C = 60 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plate they cover.

C = 54 when the plates are exposed to the impact of heat or flame, and steam in contact with the plate, and the stays fitted with nuts only.

C = 50 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plate and fitted with nuts.

C = 50 when the plates are exposed to the impact of heat or flame, with water in contact with the plate, and the stays screwed into the plate, having the ends riveted over to form a substantial head.

C = 36 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, with the stays screwed into the plate, and having the ends riveted over to form a substantial head.

When the riveted ends of screwed stays are much worn, or when the nuts are burned, the constants should be reduced; but the Surveyor must act according to the circumstances that present themselves at the time of survey; and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state it will be often necessary to reduce the constant 60 to about 36.

The Surveyors should not in any case allow a greater compressive stress on the tube plates than is obtained by the following formula :— Compressive stress on tube plates.

$$\frac{(D-d) \times 15000}{W \times D} = \text{Working pressure.}$$

D = least horizontal distance between centres of tubes in inches.

d = inside diameter of ordinary tubes in inches.

T = thickness of tube plate in inches.

* If the diameter of riveted washers be at least $\frac{3}{5}$ths the pitch of the stays, and the thickness not less than the plates they cover, the constant may be increased to 100.

When doubling plates are fitted of the same thickness as the plates they cover, and not less in width than $\frac{3}{5}$ths of the pitch of the stays, the constant may be increased to 100.

When doubling plates cover the whole of the flat surface, the case should be submitted for the consideration of the Board.

W= extreme width of combustion box in inches from front of tube plate to back of fire box, or distance between combustion box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Wet-bottomed boilers.

43. The Surveyors should take care that wet-bottomed boilers, the outside of the bottom of which cannot be seen, are lifted for inspection at least once in every four years, or oftener if the Surveyor considers it necessary. It will often be found necessary long before this to reduce the pressure, unless the boilers are lifted from their seats for the latter to judge of their efficiency. If the owners in any special case have any good reasons for not wishing to lift them when the Surveyor requires it, the Surveyor should submit the whole case to the officer authorised to grant certificates of survey. The Surveyor must recollect that he is not to certify as sufficient any boiler respecting which he cannot thoroughly satisfy himself. The Surveyor should record in the hydraulic test book the dates on which wet-bottomed boilers are inspected when lifted, and whether the boilers were out of the ship when examined, and if out of the ship where they were examined. Boilers which have been lifted should in all cases be subjected to the hydraulic test before they are re-set.

Cylindrical boilers.

44. When cylindrical boilers are made of the best material with all the rivet holes drilled in place and all the seams fitted with double butt straps, each of at least ⅝ the thickness of the plates they cover, and all the seams at least double riveted with rivets having an allowance of not more than 75 per cent. over the single shear, and provided that the boilers have been open to inspection during the whole period of construction, then five may be used as a factor of safety. The tensile strength of the iron is to be taken as equal to 47,000lb. per square inch with the grain, and 40,000lb. across the grain. But when the above conditions are not complied with, the additions in the following scale must be added to the factor 5, according to the circumstances of each case:—

A†	·15	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place after bending.
B†	·3	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place before bending.
C	3	To be added when all the holes are fair and good in the longitudinal seams. but punched after bending instead of drilled.
D	·5	To be added when all the holes are fair and good in the longitudinal seams, but punched before bending.
E*	·75	To be added when all the holes are not fair and good in the longitudinal seams.
F	·1	To be added if the holes are all fair and good in the circumferential seams, but drilled out of place after bending.
G†	·15	To be added if the holes are fair and good in the circumferential seams, but drilled before bending.
H	·15	To be added if the holes are fair and good in the circumferential seams, but punched after bending.

I†	·2	To be added if the holes are fair and good in the circumferential seams, but punched before bending.
J*	·2	To be added if the holes are not fair and good in the circumferential seams.
K	·2	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and double riveted.
L	·1	To be added if double butt straps are not fitted to the longitudinal seam, and the said seams are lap and treble riveted.
M	·3	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are double riveted.
N	·15	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are treble riveted.
O	1·	To be added when any description of joint in the longitudinal seams is single riveted.
P	·1	To be added if the circumferential seams are fitted with single butt straps and are double riveted.
Q	·2	To be added if the circumferential seams are fitted with single butt straps and are single riveted.
R	·1	To be added if the circumferential seams are fitted with double butt straps and are single riveted.
S††	·1	To be added if the circumferential seams are lap joints and are double riveted.
T	·2	To be added if the circumferential seams are lap joints and are single riveted.
U	·25	To be added when the circumferential seams are lap and the streaks of plates are not entirely under or over.
V‡	·3	To be added when the boiler is of such a length as to fire from both ends, or is of unusual length, such as flue boilers, and the circumferential seams are fitted as described opposite P, R, and S, but of course when the circumferential seams are as described opposite Q and T, V ·3 will become V ·4.
W*	·4	To be added if the seams are not properly crossed.
X*	·4	To be added when the iron is in any way doubtful, and the Surveyor is not satisfied that it is of the best quality.
Y†††	1·65	To be added if the boiler is not open to inspection during the whole period of its construction.

Where marked * the allowance may be increased still further if the workmanship or material is very doubtful or very unsatisfactory.

† When the holes are to be rimered or bored out in place the case should be specially considered as to the reduction or omission of A, B, G, and I.

‡ When boilers are comparatively short the case should be specially considered as to the omission of V as heretofore.

‡† When the circumferential seams are lapped and treble-riveted the case should be specially considered.

†† When surveying boilers that have not been open to inspection during construction, the case should be specially considered as to the factors to be used.

The strength of the joints is found by the following method :—

$$\frac{(\text{Pitch} - \text{Diameter of rivets}) \times 100}{\text{Pitch}} = \left\{\begin{array}{l}\text{Percentage of strength of plate at joint as compared with the solid plate.}\end{array}\right.$$

$$\frac{(\text{Area of rivets} \times \text{No. of rows of rivets}) \times 100}{\text{Pitch} \times \text{thickness of plate}} = \left\{\begin{array}{l}\text{Percentage of strength of rivets as compared with the solid plate.*}\end{array}\right.$$

Then take iron as equal to 47,000lb. per square inch, and use the smaller of the two percentages as the strength of the joint, and adopt the factor of safety as found from the preceding scale—

(47,000 × percentage of strength of joint) × twice the thickness of the plate in inches.

Inside diameter of the boiler in inches × factor of safety = { Pressure to be allowed per square inch on the safety valves.

In the case of zig-zag riveting, the strength through the plate diagonally between the rivets is equal to that horizontally between the rivets, when diagonal pitch = $\frac{6}{10}$ horizontal pitch + $\frac{4}{10}$ diameter of rivet.

Plates that are drilled in place must be taken apart and the burr taken off, and the holes slightly countersunk from the outsides.

tt straps. Butt straps must be cut from plates and not from bars, and must be of as good a quality as the shell plates, and for the longitudinal seams must be cut across the fibre. The rivet holes may be punched or drilled when the plates are punched or drilled OUT of place, but when drilled in place, must be taken apart and the burr taken off and slightly countersunk from the outside.

When single b utt straps are used and the rivet holes in them punched they must be $\frac{1}{8}$th thicker than the plates they cover.

---

* If the rivets are exposed to double shear, multiply the percentage as found by 75.

The diameter of the rivets must not be less than the thickness of the plates of which the shell is made; but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates.

Dished ends must be stayed as flat surfaces; but when they are theoretically equal to the pressure needed, when considered as portions of spheres, the stays, when solid, may have a stress of 14,000lb. per square inch of net section, but the stress should not exceed 10,000lb. when the stays have been welded or worked in the fire.

Truely hemispherical ends subjected to internal pressure may be allowed double the pressure that is suitable for cylinder of the same diameter and thickness.

All man-holes and openings must be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. The openings in the shells of cylindrical boilers should have their shorter axes placed longitudinally. It is very desirable that the compensating rings round openings in flat surfaces be made of L or T iron. Cast iron doors are not to be passed.

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions. The boilers must be tested by hydraulic pressure to twice the working pressure in the presence and to the satisfaction of the Surveyors.

45. Circular furnaces with the longitudinal joints welded or made with a butt strap:— Circular furnaces.

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches.}}{(\text{Length in feet} + 1) \times \text{diameter in inches.}}$$

= working pressure per square inch, provided it does not exceed that found by the following formula:—

$$\frac{8000 \times \text{thickness in inches}}{\text{Diameter in inches}} = \left\{ \begin{array}{l} \text{Working pressure} \\ \text{per square inch.} \end{array} \right.$$

The second formula limits the crushing stress on the material to 4,000lb. per square inch.

The length is to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap jointed in the ordinary way, then 70,000 is to be used instead of 90,000, excepting only where the lap is bevelled and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above must be reduced, that is to say, the 90,000 will become 80,000; the 80,000 will become 70,000; the 70,000 will become 60,000; and when neither the material nor the workmanship are of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Surveyor, as in the case of old boilers. One of the conditions of best workmanship is that the joints are either double riveted with single butt straps, or single riveted with double butt straps, and the holes drilled after the bending is done and when in place, and after-

wards taken apart, the burr on the holes taken off, and the holes slightly countersunk from the outside.*

The working pressure for corrugated furnaces, practically circular and machine-made, provided the plane parts at the ends do not exceed six inches in length, and the plates are not less than $\frac{7}{16}$ inch thick, should not be greater than found by the following formula:—

$$\frac{9000 \times \text{thickness in inches}}{\text{mean diameter in inches}} = \left\{ \begin{array}{l} \text{Working pressure per} \\ \text{square inch.} \end{array} \right.$$

When the furnaces are riveted in two or more lengths the case should be submitted for consideration, as it may be necessary to make a deduction.

Cylindrical superheaters.

46. The strength of the joints of cylindrical superheaters and the factor of safety are found in a similar manner as for cylindrical boilers and steam receivers, but instead of using 47,000lb. as, the tensile strength of iron 30,000lb is adopted, unless where the heat or flame impinges at, or nearly at, right angles to the plate; then 22,400lb. is substituted.

When a superheater is constructed with a tube subject to external pressure, the working pressure should be ascertained by the rules given for circular furnaces, but the constants should be reduced as 30 to 47.

In all cases the internal steam pipes should be so fitted that the steam in flowing to them will pass over all the plates exposed to the impact of heat or flame.

Superheaters should, as regards survey, be deemed to be the *most important parts* of the boilers, and must be inspected *inside and outside*; those that cannot be entered on account of their size or arrangement must have a sufficient number of doors through which a thorough inspection of the whole of the interior can be made.

Special attention should be paid to the survey of superheaters, as, with high pressure, the plates may become dangerously weak, and not give any sound to indicate their state when tested with a hammer; the plates should therefore be occasionally drilled.

Before commencing the survey, it is prudent to question the Engineer Officers as to the tendency of boilers to flame. If flaming is a frequent occurrence, extra care must be taken in the survey, and in fixing the pressure to be allowed as the tensile strength of the plate, when heated, is often reduced to about four tons per square inch. Drain pipes must in all cases be fitted to superheaters, in which a collection of water in the bottom is possible.

---

* The following examples will serve to shew the application of the constants for the different cases that may arise:—

Furnaces with butt joints and drilled rivet holes.	90,000	when the longitudinal seams are welded.
	80,000	where the longitudinal seams are double riveted and fitted with single butt straps.
	80,000	where the longitudinal seams are single riveted and fitted with single butt straps.
	90,000	where the longitudinal seams are single riveted and fitted with double butt straps
Furnaces with butt joints and punched rivet holes	85,000	where the longitudinal seams are double riveted and fitted with single butt straps.
	75,000	where the longitudinal seams are single riveted and fitted with single butt straps.
	85,000	where the longitudinal seams are single riveted and fitted with double butt straps
Furnaces with lapped joints and drilled rivet holes.	80,000	where the longitudinal seams are double riveted and bevelled
	75,000	where the longitudinal seams are double riveted and not bevelled
	70,000	where the longitudinal seams are single riveted and bevelled.
	65,000	where the longitudinal seams are single riveted and not bevelled
Furnaces with lapped joints and punched rivet holes.	75,000	where the longitudinal seams are double riveted and bevelled
	70,000	where the longitudinal seams are double riveted and not bevelled.
	65,000	where the longitudinal seams are single riveted and bevelled
	60,000	where the longitudinal seams are single riveted and not bevelled

In the case of upright fire boxes of donkey or similar boilers, 10 per cent. should be deducted from the constant given above, applicable to the respective classes of work.

47. Superheaters that can be shut off from the main boilers must be fitted with parliamentary safety valve of sufficient size, but the least size passed should be 3 inches diameter. Safety value for superheaters.

The flat ends of all boilers, as far as the steam space extends, and the ends of superheaters, should be fitted with shield, or baffle plates, where exposed to the hot gases in the uptake; as all plates subjected to the direct impact of heat or flame are liable to get injured unless covered with water.

STEEL BOILERS.

48. As there is up to the present time a certain amount of uncertainty about the quality of steel no allowances can be given for steel over iron unless the plates, &c., have been tested and the conditions, as laid down in the following rules, be carried out. In cases where the boilers have been made in the United Kingdom, the Surveyors should accept the test certificate of the Board of Trade, if made under Board of Trade's supervision.

Owners cannot expect a Surveyor to give the full allowances for a steel boiler unless an opportunity has been afforded him of seeing that the material and workmanship are such as to warrant him in making such allowances.

49. The following should guide the Surveyors when the general quality of the steel has been found suitable for marine boilers.

The steel-makers or boiler-makers should test one or more strips out from each plate for tensile strength and elongation, and stamp both results on a part of the plate, where they can be easily seen when the boiler is constructed. Maker's test.

The Surveyor is not obliged to witness the foregoing tests, although it is very desirable that he should, when his other duties will allow him to do so, but he should, however, select at least one in four of these plates, either at the steel works or the boiler-maker's works, and witness the testing of at least one strip cut from each selected plate. Surveyor's tests.

A few rivets of each size should be selected, and should be turned and tested for tensile stress The tensile stress should be from 28 tons to 32 tons per square inch, with a contraction of area of about 60 per cent. Rivet tests.

If for the plates from which the Surveyor selects the above proportions a greater stress is wished than is allowed for iron, tests for tensile stress and elongation should be made, and those for which no reduction of thickness is asked may be tested for resistance to bending if preferred. Tensile and bending tests.

The breadth of tests trips for tensile stress should be about two inches, and the elongation, taken in a length of ten inches, should be about 25 per cent., and not less than 20 per cent. The test strips must be carefully prepared and measured, and they should be cut from the plate by a planing or shaping machine Test strips

The bending tests for plates *not* exposed to flame should be made with strips in their normal condition; but strips cut from furnaces, combustion boxes, &c., should be heated to a cherry red, then plunged into water of about 80°, and kept there until of the same temperature as the water, and then bent. The bending strips should not be less than two inches broad and 10 inches long, and they should be bent until they break, or until the sides are parallel at the distance from each other of not less than (3) three times the thickness of plate. Bending tests.

Tensile stress, &c. The tensile stress of the plates *not* exposed to flame should be about 28 tons, and should not exceed 32 tons per square inch of section and 28 tons should be the stress used in the calculations for cylindrical shells if the plate comply with all the conditions as stated herein; but when the minimum tensile stress of shell plates exceeds 28 tons, and allowance is wished for the excess, the case should be specially submitted for the consideration of Government. The tensile stress of furnace flanging and combustion box plates should range from 26 tons to 30 tons per square inch.

Annealing. All plates that are punched, flanged, or locally heated must be carefully annealed after being so treated.

Perforating and annealing. The rivet holes in the furnaces and longitudinal seams of cylindrical shells should be *drilled*; but if it is wished to punch them, and afterwards bore or anneal the plates in a proper furnace, the proposed method of the punching and boring or annealing should be submitted for consideration before being done; but all punched holes should be made after bending.

In all cases where assent has been given for plates to be punched after bending and then annealed, the makers should stamp the plates with the words "punched after bending and then annealed," and in all cases where assent has been given for punching and afterwards boring plates, the words "punched and then bored" should be stamped on the plates.

Stress on stays. Bars for stays should be tested. Solid steel screwed stays which have not been welded or otherwise worked after heating may be allowed a working stress of 9,000lb per square inch of net section, provided the tensile stress is from 28 to 32 tons per square inch, and the elongation in 10 inches about 25 per cent. and not less than 20 per cent. Steel stays which have been welded or worked in the fire have been found to be unreliable, therefore they should not be passed.

Constants for flat surfaces. If the flanging plates and those exposed to flame comply with the foregoing conditions, the constant in the rules for iron boilers may be increased as follows:—

The constants for flat surfaces when they are supported by stays screwed into the plate and riveted 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and nutted, or when the stays are nutted in the steam space, 25 per cent. This is also applicable to the constants for flat surfaces stiffened by riveted washers or doubling strips and supported by nutted stays.

The constants for combustion box girders 10 per cent.

Furnaces plane and corrugated. The furnace constants about 10 per cent. when plane. When new corrugated and machine-made, and practically true circles, the working pressure is found by the following formula, provided that the plane parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{5}{16}$ inch thick:—

$\frac{12800 \times T}{D}$ = working pressure.

T = thickness in inches.

D = mean diameter in inches.

(If the furnace is riveted in two or more lengths, the case should be submitted for consideration.)

Compressive stress on tube plates. A greater compressive stress should not be allowed on tube plates that than found by the following formula:—

$\frac{(D-d)\ T \times 20000}{W \times D}$ = working pressure.

D = least horizontal distances between centres of tubes in inches.

d = inside diameter of tubes in inches.

T = thickness of tube plate in inches.

W=extreme width of combustion box in inches from front of tube plate to back of fire box, or distance between combustion box tube plates when boiler is double-ended and the box common to the furnaces at both ends.

Plate and rivet section.

The rivet section, if of iron, in the longitudinal seams of cylindrical shells, where lapped and at least double riveted, should not be less than $\frac{1}{7}$ times the net plate section; but if steel rivets are used, their section should be at least $\frac{1}{11}$ of the net section of the plate, if the tensile stress of the rivets is not less than 28 tons and not more than 32 tons per square inch. Therefore in calculating the working pressure the percentage strength of the rivets may be found in the usual way by the foregoing rules, but in the case of iron rivets, the percentage found should be divided by $\frac{1}{7}$, and in the case of steel rivets by $\frac{1}{11}$, the result being the percentages required. If the percentage strength of the rivets by calculation is less than the calculated percentage strength of the plate, calculate the working pressure by both percentages. When using the percentage strength of the plate, use the nominal factor of safety suitable for the method of construction, as by the rules for iron boilers; but when using the percentage strength of rivets, use 5 as the factor of safety. The less of the two pressures so found is the working pressure to be allowed for the cylindrical portion of the shell.

Local heatin to be avoided.

Local heating of the plates should be avoided, as many plates have failed from having been so treated.

Welding, &c

Steel plates which have been welded should not be passed if subjected to a tensile stress, and those welded and subject to a compressive stress should be efficiently annealed.

In other respects the boilers should comply with the rules for iron boilers.

If the tests are to be made at the steel works, the boiler-makers should inform the Surveyors in their district when and where they will be made, so that the Surveyor from the nearest district to the steel works may be instructed to attend to them. The Surveyor should have due notice two or three days when the plates, &c., will be ready for the test pieces to be cut from them. (Surveyors should report all cases of failures of steel plates, &c., which may come to their knowledge).

Steel for superheaters &c.

When steel is used in superheaters, or in the uptakes of boilers, the parts where the flame impinges at or nearly at right angles to the plate must be protected with baffle plates; but in all cases steel should be discouraged for this purpose.

This applies to the unshielded uptakes of all boilers, including ordinary vertical donkey boilers.

Makers of steel

50. When the steel is not to be made by any of the following makers, the case will receive the special consideration of the Government, and this should be specially noted by the Surveyors:—

Messrs. Beardmore.
" J. Brown & Co.
" C. Cammell & Co.
Mr. D. Colville.
The Landore Steel Company.
The Leeds Forge Company.
The Steel Company of Scotland.
The Weerdale Iron and Coal Company.
The West Cumberland Iron and Steel Company.

Boiler, trusing &c.

51. Difficulty has been experienced with regard to the survey of steel boilers, owing to the fact that some makers were not aware, at the time the boilers

were commenced, that a survey certificate would be necessary, and the makers have therefore omitted to submit tracings until the boilers have been nearly completed. Tracings of boilers may therefore be received for examination upon payment of the usual fee of Rs. 50, and the Surveyors may proceed as far as witnessing the hydraulic test before any further instalment of the survey fee is paid. Engineers and boiler-makers should be advised of this arrangement.

BOILERS, GENERAL.

Donkey boilers. 52. Donkey boilers that are in any way attached to, or connected with, the main boilers, or with the machinery used for propelling the vessel, must be surveyed and be fitted the same way as the main boilers, and have a water and steam gauge, and all other fittings complete, and, as regards safety valves, must comply with the same regulations as the main boilers.

Stop valves. 53. No boiler or steam chamber is to be so constructed, fitted, or arranged so that the escape of steam from it through the safety valve required by these rules can be wholly or partially intercepted by the action of any other valve.

A stop valve must always be fitted between the boiler and the steam pipe, and, where two or more boilers are connected with a steam receiver or superheater, between each boiler and the superheater or steam receiver. The object of this is obvious, viz. to avoid the failure of all the boilers through the failure of one. The necks of stop valves should be as short as practicable.

Gauges, &c. 54. Each boiler must be fitted with a glass water-gauge, at least two test cocks, and steam-gauge; that is to say, each boiler must be fitted with all fittings as complete as if there were only one boiler. Boilers that fire both ends, and those of unusual width, must have water-gauges and test cocks at each end or side, as the case may be. When a steamer has more than one boiler, and these boilers are fitted with stop valves each boiler must be treated as a separate one, and have all the requisite fittings.

Boilers to be tested when too small to enter. 55. When the boilers are not large enough for the Surveyors to get into, they should see them tested by hydraulic pressure at every annual survey at least. The hydraulic test should also be applied at every intermediate survey if the Surveyor considers it necessary. In the case of old boilers the Surveyors must use their own judgment as to the necessary pressure to be applied. This is in no way to interfere with the instructions to test all new boilers to double their working pressure, nor with the proper internal examination of all boilers that are large enough for the Surveyors to get into.

Whenever it is only stays that prevent getting in he may order their removal, and he must see them properly replaced before granting his declaration.

Surveyors not to go into hot boilers. 56. If the boiler is too hot for the Surveyor to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a declaration, until he can make an efficient internal examination.

Strength of boilers to be ascertained, and working pressure fixed by calculation. 57. Before testing a boiler, the Surveyor should examine it, take the necessary measurements, and calculate what the working pressure should be in accordance with the regulations, and only test to double the working pressure; if the test is not satisfactory the defects must be made good, and the boiler re-tested.

This instruction applies to superheaters and steam chests as well as to boilers.

The Surveyor who grants the declaration must examine the boilers thoroughly, and will be held responsible for the pressure allowed.

Hydraulic test.

58. Surveyors should see all new boilers, and boilers that have been taken out of the ship for a thorough repair, tested by hydraulic pressure up to at least double the working pressure that will be allowed previous to the boilers being placed in the vessel, to test the workmanship, &c.; but the working pressure is to be determined by the strength of stays, thickness of plates, and strength of riveting, &c., and not by the hydraulic test.

The hydraulic test should in no case exceed twice the calculated working pressure of the boiler, and it is never to be applied until the boiler has been examined in accordance with paragraph 57 and until the strength has been calculated from the necessary measurements taken from the boiler itself.

When the boilers are in the vessel the Surveyor may, at any time he thinks it necessary, before he gives a declaration, have them tested by hydraulic pressure to satisfy himself as to any doubtful part, or of places not easy of access, care being taken in the case of old boilers not to overstrain them; but the test must always exceed the working pressure.

Surveyors should pay particular attention to the examination and testing of steam pipes.

The hydraulic test should be applied to the boilers of all steamers that have not previously had a survey certificate before a declaration is granted for them.

The amount of the hydraulic pressure test and the date on which it was applied to the boilers should be inserted in the Surveyor's declaration and recorded in the office boiler book.

Cast iron in boilers and steam pipes.

59. In all boilers in which the Surveyors find that cast iron is employed in such a manner as to be subject to the pressure of steam or water, great care must be taken. Cast iron must not be used for stays, and Surveyors should also discourage the use of cast iron for chocks and saddles for boilers. Particular attention should be paid to the chocking of boilers, more especially when they are fired athwartships.

Pressure fixed by one Surveyor not to be increased by another.

60. A pressure once allowed on the boiler of an inland steam-vessel is not to be increased unless, in cases where a Surveyor is of opinion that an increased pressure may with safety be allowed, he has communicated with the Surveyor who last surveyed the vessel; and on learning the reasons why the existing pressure was formerly allowed, the Surveyor is of opinion that it may be increased.

60A. Before granting a declaration or certificate of survey for a steam-vessel where the boilers and machinery are in charge of a native driver, the surveyor should require the production of a certificate either from the Superintending Engineer or from some respectable engineering firm to the effect that the pressure gauges on the boiler or boilers have been overhauled and adjusted and are in proper order.

SAFETY VALVES.

Provisions of the Act as regards safety valves.

61. Every inland steam vessel shall be provided with a safety valve upon each boiler, so constructed as to be out of the control of the Engineer when the steam is up, and if such valve is in addition to the ordinary valve, it shall be so constructed as to have an area not less, and a pressure not greater, than the area of and pressure on that valve.

The Surveyors are instructed that in all *new boilers*, and whenever *alterations can be easily made*, the valve chest should be placed directly on the boiler; and the neck, or part between the chest and the flange which is bolted on to the boiler, should be as short as possible and be cast in one with the chest.

The Surveyors should note that it is not intended by this instruction that vessels with old boilers which have been previously passed with such an arrangement should be detained for the alterations to be carried out.

Of course in any case in which a Surveyor is of opinion that it is positively dangerous to have a length of pipe between the boilers and the safety valve chest, it is his duty at once to insist on the requisite alterations being made before granting a declaration.

If any person places an undue weight on the safety valve of *any* steam ship, or increases such weight beyond the limits fixed by the Engineer-Surveyor, he shall, in addition to any other liabilities he may incur by so doing incur a penalty not exceeding one thousand rupees.

The Engineer-Surveyor shall declare, amongst other things, the limits of the weight to be placed on the safety valves; that the safety valves are such, and in such condition as required by these rules, and that the machinery is sufficient for the service for the time he fixes, and is in good condition for that time.

Area of safety valves.

62. The area of Government safety valves, or (when there is more than one) the combined area of the Government safety valves should be not less per square foot of fire grate surface than that given in the following table opposite the boiler pressure intended, provided the valve is not less than three inches in diameter, or where there are two valves the diameter is not less than two inches for each valve.

When, however, the valves are of the common description, and are made in accordance with the tables, it will be necessary to fit them with springs having great elasticity, or to provide other means to keep the accumulation within moderate limits.

If there is only one safety valve on a main boiler, the Surveyor should not grant a declaration without first referring the case to Government for special instructions.

In the case of small boilers, such as launch boilers, if it is wished to fit valves smaller than three inches diameter, the case should be submitted for the consideration of Government.

Safety valve areas.

Boiler pressure.	Area of valve per square foot of fire-grate.	Boiler pressure.	Area of valve per square foot of fire-grate.	Boiler pressure.	Area of valve per square foot of fire-grate.

Examination of safety valve

63. The Surveyor in his examination of the machinery and boilers is particularly to direct his attention to the safety-valves, and whenever he considers it necessary, he is to satisfy himself as to the pressure on the boiler by actual trial.

The Surveyor is to fix the limits of the weights to be placed on the safety valves, and the responsibility of not issuing a declaration before he is fully satisfied on the point is very grave. The law places on the Surveyors the responsibility of "declaring" that the boilers are in his judgment sufficient with the weights he states.

The Surveyor is to examine the whole of the valves, weights, and springs at every survey.

Surveyor see valves weighted.

64. When the Surveyor has determined the amount of pressure, he is to see the valves weighted accordingly, and the weights or springs fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure. The limits of the weight on the valves is to be inserted in the declaration, and should it at any time come to a Surveyor's knowledge that the weights or the loading of the valve have been shifted, or otherwise altered, or that the

valve has been in any way interfered with, so as to increase the pressure, he is at once to report the facts to Government.

Spring safety-valves.

65. If the following conditions are complied with, the Surveyor need raise no question as to the substitution of spring loaded valves for dead weighted valves:—

(1) That at least two separate valves are fitted to each boiler, except in the case of donkey or other small boilers, in which the grate surface does not exceed 14 square feet, in which case a single safety valve may be passed, provided it is not less than three inches in diameter.

(2) That the valves are of the proper size.

(3) That the spring and valve be so cased in that it cannot be tampered with.

(4) That provision be made to prevent the valve flying off in case of the spring breaking.

(5) That the requisite safety valve area is cased in the usual manner of Government valves.

(6) That screw lifting gear be provided to ease all the valves as by paragraph .

(7) That the size of the steel of which the spring is made is to be found by the following formula:—

$$\sqrt[3]{\frac{s \times D}{c}} = d.$$

s=the load on the spring in lb.

D=the diameter of the spring (from centre the centre of wire) in inches.

d=the diameter or side of square of the wire in inches.

c=8,000 for round steel.

c=11,000 for square steel.

(8) That the springs be protected from the steam and impurities issuing from the valves.

(9) That when valves are loaded by direct springs, that the compressing screw abuts against a metal stop or washer, when the load sanctioned by the Surveyor is on the valve.

In no case is the Surveyor to give a declartion for a spring loaded valve, unless he has examined it and is acquainted with the details of its construction, and unless he has tried it under full steam and full firing for at least 20 minutes with the feed-water and stop valve shut off. If the accumulation of pressure exceeds 10 per cent. of the loaded pressure, he should not give his declaration.

Owners, masters, and Engineers to see that valves are kept in proper order.

66. It is clearly the duty of the masters and engineers of vessels to see, in the intervals between the surveys, that the Government safety valve or valves, as well as the other safety valves and the rest of the machinery, are in proper working order There is no provision in the Inland Steam-vessels Act, exempting the owner of any vessel, on the ground that she has been surveyed, from any liability, civil or criminal, to which he would otherwise be subject. The Government safety valve is to be out of the control of the engineers when the steam is up; this enactment, far from implying that he is not to have access to it, and to see to its working at proper intervals when the vessel is in port, rather implies the contrary; and the master should take care that the engineer has access to it for that purpose. A substantial lock, that cannot be easily tampered with, and as far as possible weather-proof, should be used for locking up the safety-valve boxes.

67. In witnessing the hydraulic tests of boilers, &c., and in witnessing all safety valve tests for accumulation of pressure, the Surveyors are to use the pressure gauges supplied to them for the purpose. All tests for pressure and accumulation] are to be made with proper gauges.

MACHINERY, &c.

68. The machinery to be surveyed comprises the engines and boilers used for propelling the vessel, and all the machinery connected therewith. The boilers of donkey engines are to be surveyed with the boilers and machinery of the vessel, when they are in any way connected with them. What machinery is to be surveyed.

69. Surveyors should, before granting declarations for any period exceeding six months, be careful when examining the machinery—(1) to have the upper brasses of all bearings taken off; (2) the shaft turned round and carefully examined; (3) the cylinder covers and junk rings lifted for examination of the pistons and cylinders; (4) the slide covers or bonnets removed for examination of the slides, and if necessary, the slides taken out; (5) the air and circulating pump covers lifted for examination of the pump buckets and valves; (6) the covers of all feed and bilge pump valves removed for the examination of the valves; (7) all discharge valves and sea-cocks taken out for examination; (8) the propeller shaft to be drawn when necessary, and it and the screw to be examined, and in all cases in which the shaft is drawn, it is to be seen again after the screw is secured in its place; (9) the bridges and fire bars to be removed to permit of a thorough examination of the boilers and furnaces; (10) all cocks and valves on the boilers to be taken out and examined. When to be taken to pieces for examination

When a Surveyor has seen the machinery of a new steamer in the shop before it was put together, and is satisfied with it, it will not be necessary to have it again opened up on board the ship on the first survey for examination, unless in the Surveyor's judgment it is necessary after the vessel has been tried under steam.

It will rest with owners to determine whether or not they will have a certificate for any period exceeding six months; but if they do so determine, then the above instructions are to be complied with before a declaration is granted.

The above instructions are also to apply at least once a year to the survey of all inland steam vessels, whatever may be the period for which the declarations are given. The examination of sea cocks and outside connections can be made when the vessel is in dry dock or beached.

After the examination of the parts has been made as above, the machinery must, when the Surveyors consider it necessary, be tried under steam at full pressure.

70. In the examination of the machinery and boilers the Surveyor should in no case give a declaration without thoroughly satisfying himself that both the boilers and the machinery are sufficient for the service intended, and in good condition. Examination to be carefully made.

71. The boilers of all new sea-going vessels, passenger tugs, and other small passenger vessels should be fitted with separate feeding arrangements in addition to, but unconnected with, the main feed pipes and valves. In very small vessels an efficient hand pump, instead of the donkey pump, may be passed if the Surveyor has satisfied himself as to its efficiency when steam is up, and provided there are Separate feed arrangements to be fitted.

separate feed pipes and valves as directed above. This instruction is to apply also in the case of old vessels of the above description, when being fitted with new boilers.

The Surveyors should discourage the practice of using the same pump for the bilges and for feeding boilers.

Cocks, valves, and pipes.

72. All inlets or outlets in the bottom or side of a vessel near to, at, or below the deep load water-line other than the outlets of watercloset, soil, scupper, lavatory, and urinal pipes must have cocks or valves fitted between the pipes and the ship's side or bottom; such cocks or valves must be attached to the skin of the ship, and be so arranged that they can be easily and expeditiously opened or closed at any time; and the cocks, valves, and the whole length of the pipes should be accessible at all times.

Guards on blow-off cocks.

With a view to the prevention of accidents to boilers through the blow-off cocks being left open after the boiler is run up, and to prevent water getting accidentally or intentionally into the ship by cocks being left open, and also to prevent the donkey engine becoming useless when used for feeding the boilers, all blow-off cocks and sea connections are to be fitted with a guard over the plug, with a featherway in the same, and a key on the spanner, so that the spanner cannot be taken out unless the plug or cock is closed. One cock is to be fitted to the boiler, and another cock on the skin of the ship or on the side of the Kingston valve.

Non-return valves to pipes.

73. In all cases where pipes are so led or placed that water can run from the boiler or the sea into the bilge, either by accidentally or intentionally leaving a cock or valve open, they should be fitted with a non-return valve and a screw not attached, but which will set the valve down in its seat when necessary; the only exception to this is the firemen's ash cock, which should have a cock or valve on the vessel's side, and be above the stock-hole plates.

Cocks or valves standing exceptional distances from the vessel's plating, that is, where the necks are longer than is necessary for making the joint, are to be discouraged, and if passed, they should be made of brass or gun-metal, and well bracketed.

Non-return valves on feed cocks.

74. Where the feed cock or valve is so placed and arranged that more than one boiler can be fed at the same time through this cock or valve, a non-return valve must be fitted between each boiler and this cock or valve; but it is very desirable that all feed cocks or valves should have a non-return valve fitted between the boiler and the cock or valve.

ACCIDENTS AND DAMAGES.

Damage to be inspected.

75. In all cases in which an inland steamer has sustained damage from any accident, or other cause, affecting her seaworthiness or efficiency in any part of her hull, equipments, or machinery, the Surveyors of the port, where the vessel may be, are to go on board and ascertain the extent of the damage. In doing so they will take care not to make any change in the position or condition of things on board, which would be at all likely to affect any legal evidence, should an enquiry into the case afterwards be considered necessary. It is extremely important that the vessel should be surveyed and a report forwarded as early as possible. In this report the Surveyors are to state whether the vessel is rendered inefficient or unsafe either in hull or machinery; and whether, in their opinion, the certificate should be cancelled or only temporarily withdrawn.

UNDER the powers conferred upon him by section 50, clause (1) of Act VI of 1884 (the Inland Steam-vessels Act), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules for the protection of inland steam-vessels from danger by explosion or fire:—

I.—Every inland passenger steamer shall be provided with sufficient hose to reach from her engines to her stem and taffrail, and shall be supplied with fire-buckets in the proportion of one for each of the crew, which shall be kept in a place where they are at once available.

II.—Fire-engines shall be placed under the charge of an officer who should be held responsible that they are ready for immediate use

III.—Inland steamers shall, before proceeding on a voyage, have all their cargo, and that of any flats they may be towing, safely stowed, and in the case of hay or other inflammable material, shall have the same properly covered with tarpaulins or other sufficient protection.

IV.—Before starting, passengers shall be called on to deliver up any gunpowder, or any inflammable articles.

V.—No naked lights shall be used in the hold or on the cargo-deck, or in the passengers' cabins or accommodation.

VI.—The officers and crew are to be divided into parties and assigned stations in case of fire.

VII.—Petroleum shall not be carried by inland passenger steamers in larger quantities than 100 cases, to be stowed apart from other cargo, and as far from the stoke-holds as possible.

VIII.—Fire shall only be permitted in galleys properly constructed for the purpose, and no gunpowder or other explosive shall be allowed to be carried unless in a suitably constructed magazine compartment. And no fire is to be permitted on board any flat or steamer while taking in or discharging gunpowder.

IX.—The tops of the boiler and galley funnels of all inland steamers must be fitted with spark-catchers.

X.—Any person committing a breach of these rules shall be punished with imprisonment or a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

UNDER the powers conferred upon him by section 51, clause (1) of Act VI of 1884 (the Inland Steam-vessels Act), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the carriage of passengers in inland steam-vessels:—

The master of any inland steam-vessel may refuse to receive on board thereof any person who, by reason of drunkenness or otherwise, is in such a state, or misconducts himself in such a manner, as to cause annoyance to other passengers on board, or, if such person is on board, may put him on shore at any convenient place; and no person so refused admittance or put on shore shall be entitled to the return of any fare he may have paid.

The following offenders, that is to say—

(1) Any person who, being drunken or disorderly, has been on that account refused admission into any duly surveyed inland steam-vessel by the owner or any person in his employ, and who, after having had the amount of his fare (if he has paid the same) returned or rendered to him, nevertheless persists in attempting to enter such steamer;

(2) Any person who, being drunken or disorderly on board any such steamer, is requested by the owner or any person in his employ to leave the same at any place at which he can conveniently so do, and who, having had the amount of his fare (if he has paid the same) returned or tendered to him, refuses to comply with such request;

(3) Any person on board any such steamer who, after warning by the master or any other officer of the steamer, molests or continues to molest any passenger;

(4) Any person who, after having been refused admission into any such steamer by the owner or any person in his employ on account of such steamer being full, and who after having had the full amount of his fare (if he has paid the same) returned or tendered to him, nevertheless persists in attempting to enter the same;

(5) Any person having got on board any such steamer, who upon being requested on the like account by the owner or any person in his employ to leave such steamer before the same has quitted the place at which such person got on board, and who, upon having the full amount of his fare (if he has paid the same) returned or tendered to him, refuses to comply with such request;

(6) Any person who travels or attempts to travel in any such steamer without having previously paid his fare, and with intent to avoid payment thereof;

(7) Any person who, having paid his fare for a certain distance, knowingly and wilfully proceeds in any such steamer beyond such distance without previously paying the additional fare for the additional distance, and with intent to avoid payment thereof;

(8) Any person who knowingly and wilfully refuses or neglects, on arriving at the point to which he has paid his fare, to quit any such steamer; and

(9) Any person on board any such steamer who does not, when required by the master or other officer of such steamer, either pay his fare or exhibit such ticket or other receipt (if any) showing the payment of his fare as is usually given to persons travelling by and paying their fare for such steamer

shall, for every such offence, be liable on conviction before a Magistrate to a penalty not exceeding Rs. 20; but such liability shall not prejudice the recovery of any fare payable by him.

[Second Publication.]

NOTICE.

The 6th November 1885.—The following draft of Rules, which it is proposed to issue under section 24 of Act VII of 1884, is published for general information. These rules will be taken into consideration on the expiry of a month from the date of their first publication in the *Calcutta Gazette*; and the Lieutenant-Governor will receive and give due attention to any objections or suggestions which may be made by any person within that period.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

UNDER the powers conferred upon him by section 24 of Act VII of 1884 (the Indian Steam-Ships Act), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor has been pleased to make the following rules for the survey of steam-ships :—

Time and place of surveys.

1. Surveys shall be made at the Port of Calcutta upon due notice or application from the owner, on any day in the year, with the exception of Sundays and Government holidays, by the Surveyor to the Port Commissioners. Certificates of survey shall be given in the form hereunto annexed by the Vice-Chairman to the Port Commissioners, on payment of the fee specified in the schedule to the Act.

Surveyors duties.

2. The Surveyors will be guided by the rules hereunto annexed in making their survey. In cases where two Surveyors are employed, the Engineer-Surveyor will survey the engines, boilers, and all the machinery required to be surveyed under the Act. The Ship-wright Surveyor will inspect the hull equipments and passenger accommodation, measure and determine the number of passengers the vessel is fit to carry, and see that the certificates of the master, mates, and engineers are such as is required by the Act, also that the lights and fog signals are in accordance with the regulations for the prevention of collisions at sea.

Notice of survey to be given.

3. Owners of steam vessels requiring survey are to give the Surveyor at least three days' notice in writing when a survey is required, and should such notice fail to be given, he (the Surveyor) is not responsible for any delay or inconvenience which may occur in consequence.

Particulars to be given in notice.

4. This notice (which is to be preserved by the Surveyor) must state explicitly the name of the steamer to be surveyed, and the time when, and place at which, she will be ready for inspection.

Surveyors to attend at appointed time.

5. In order to prevent inconvenience and delay to the owners, the Surveyors are to be careful to be in attendance at the appointed time and place. Should they be unable to attend as required, notice should be given to the owners to that effect

Survey if deferred.

6. Should a steamer not be ready for inspection at the time arranged, the Surveyors may make such arrangements for the subsequent survey as may be convenient to the owner or his agent. All expenses arising out of this postponement will be charged against the owner when the certificate is issued.

SURVEYORS' DECLARATIONS.

Surveyors' declarations

7. The Surveyor's declaration under section 11 of the Act shall be made in the form hereunto annexed. The particulars required to be given in the declaration for a certificate of survey are the following, which are treated of under separate heads :—

(1.) That the hull of the ship is sufficient for the service intended, and in good condition.

(2.) That the boats, life-buoys, lights, signals, compasses, and shelter for deck passengers, and the certificates of the master, and mate or mates, engineer or engineers, or engine-driver are such and in such condition as required by any law for the time being in force.

(3.) The time (if less than 12 months) for which the said hull and equipments will be sufficient.

(4.) The limits (if any) beyond which, as regards the hull and equipments, the ship is in the Surveyor's judgment not fit to ply.

(5.) The number of passengers which the ship is, in the Surveyor's judgment, fit to carry, distinguishing if necessary between the respective numbers to be carried on deck, and in the cabins and in different parts of the deck and cabins, such numbers to be subject to such conditions and variations according to the time of the year, the nature of the voyage, the cargo carried, and other circumstances as the case requires.

The declarations of the Surveyor as to the boilers and machinery is to contain a statement of the following particulars:—

(1.) That the machinery of the ship is sufficient for the service intended, and is in good condition.

(2.) The time (12 months or less) for which such machinery will be sufficient.

(3.) That the safety valves and fire hose are such, and in such condition, as are required by the Act, and the rules framed thereunder.

(4.) The limits of the weight to be placed on the safety valves.

(5.) The limits (if any) beyond which as regards the machinery, the ship is, in the Surveyor's judgment, not fit to ply.

When a Surveyor is, from any reason whatever, unable to complete his declaration, an incomplete declaration should be sent to those who applied for survey as soon as possible, stating in it the reasons for not being able to fill up all the particulars under the various heading. He must take care to obliterate all the items in this declaration that he is unable to certify to as being in accordance with the Acts and regulations.

Surveyors may go on board ships.

8. Surveyors may go on board any ship at any reasonable time for the purpose of inspecting, either the certificates of the master, mates, or engineers, or the vessel, the machinery, the boats, other equipments, or for any other purpose rendered necessary by the Acts; and the owners, masters, mates, and engineers of steam-ships are required by the Act to give to the Surveyors, on being requested so to do, all such information and assistance within their power as may be requisite for the purpose of making the returns required by the Acts. In the performance of this part of their duties, Surveyors are to be careful to avoid impeding the duty of the vessel, or wilfully giving offence to any of the officers. If they should be hindered or vexatiously obstructed by any person in the performance of their duties, they should by no means mark it by personal resentment, but should communicate the facts without delay to the proper authorities, by whom the case will be taken up, if necessary.

Inspection to be made in the presence of owner, agent, or responsible person.

9. Surveyors should, if possible, make their inspections when the agent, master, or chief mate, and engineer of the vessel are present. Repairs can then be required, and defects can be pointed out to the proper persons without incurring the uncertainty and delay attendant upon messages delivered to the subordinate officers. If the owners do not regard the survey as being of sufficient importance to instruct a responsible representative to be present, the Surveyors will of course make the survey in his absence.

Statement of repairs required to be given by Surveyors.

10. In order to prevent mistakes as to the nature and extent of repairs required by the Surveyors, whenever they cannot give a declaration until repairs are effected or alterations made, a written statement of the nature and extent of the defects to be remedied or alterations required should in all cases be given to the owner or agent, whether applied for by him or not. A copy of the above should always be taken in the office Press Letter Book. If any difference of opinion arises between the Surveyors and the owners, manufacturers, or others, or any questions are raised, the facts should at once be reported.

Declaration not to be given without great caution.

11. Surveyors are in no case to give a declaration either for the hull, machinery, boilers, or equipments of a steamer unless they are satisfied that all the requirements of the law have been complied with.

It is the duty of the Surveyor to satisfy himself personally regarding every detail of the survey of a vessel, and not to trust to any certificate or other document given by any person not responsible to the Government. This instruction does not of course apply to certificates of compass adjustment.

Short declaration when to be granted.

12. In any case in which the Surveyor has reason to believe that the hull, machinery, boilers, or equipments are not fit for so long a time as the owner has applied for, he is to grant his declaration for such shorter period as he may deem expedient, informing the owners, if necessary, of his reasons for so doing. Unless it is the docking time only that limits his declaration, or the latest date for which an excursion certificate can be granted in accordance with the regulations, he is not to grant a declaration for sea-going steamers for less than a period of three months. In such cases, also in cases in which the Surveyor refuses a declaration altogether, he is to give a statement in writing of the repairs he considers necessary to enable him to grant a declaration for the time asked. By this paragraph the Surveyor is to understand that a sea-going steam ship that is not fit for a declaration for three months is not to be deemed by him as fit to hold a certificate at all.

Surveyor to complete survey where possible, but to sign only for details surveyed. Declarations to be in such form as the Government may direct.

13. It is most desirable that a Surveyor should complete the survey of a vessel in every detail when he has commenced it, and if possible, arrangements should always be made to secure this. In exceptional cases, however, when this cannot be arranged, one or more Surveyors should complete the parts of the survey left unfinished. The Surveyor who commenced the survey should not sign a declaration for any details which he has not surveyed, and for which consequently he is not prepared to hold himself personally responsible. He can only relieve himself from entire responsibility for every detail by distinctly noting on his declaration that he has been unable to attend to certain details specified by him, and in respect only of the details so specified will his claim to irresponsibility be accepted. The Surveyor or Surveyors who attend to the details of the survey which have been left unfinished should also give declarations for the particulars they have attended to. The supplementary declaration should be attached to the main declaration.

Refusal of declaratio be notified.

14. A report should be made to the Local Government of the name, port of registry, and official number of all vessels for which declarations are refused. This should be done as soon as possible after the vessel is withdrawn from survey, and full reasons for the refusal should be given. A declaration for twelve months should not be granted whenever the Surveyor has any doubt whatever as to the efficiency of any part of the vessel, or her machinery, or equipments for such period.

The object of rule 14 is to enable the Local Government to communicate to other Local Governments notice that declarations have been refused to such vessels.

EXAMINATION OF HULL, &c.

Hulls to be examined.

15. Surveyors are to determine whether the hulls of sea-going vessels are in good condition and fit for the service for which they are intended; and they are to examine the hulls of such vessels outside and inside once at least in every year, at such time as is most convenient to the owners.

Owner should give notice when a vessel is in dry dock.

16. Delays and inconvenience may to a great extent be prevented if notice is given by owners when a vessel, which requires a certificate, is undergoing repairs, or is in dry dock for any other purpose, as this notice might obviate the occasional necessity of re-docking a vessel at an inconvenient time. Surveyors should explain this to owners or their agents whenever an opportunity occurs.

New ships to be rv eyed before ing painted or cemented.

17. The Government cannot regard as a satisfactory survey of a new steam ship a survey made only after the hull is complete, and is cemented and painted. Surveyors are therefore instructed to decline to grant declarations for any new steamer, unless they inspected her before she was painted or cemented. Any survey made while the vessel is being built is not to interfere with the complete inspection afterwards, but is to be made solely with a view of enabling the Surveyors to form an opinion of the workmanship, material, and construction.

The bottoms of new vessels need not be examined in dry dock after launching, if they have been examined by the Surveyor before launching, unless he has special reasons for considering it necessary.

ater-tight llision bulk-heads and water-tight compartment round stern tube of screw shaft. Other bulk-heads.

18. A collision water-tight bulkhead, also an after water-tight compartment to cover the stern tube to the screw shaft, must be fitted in all sea-going steamers, both new and old. As regards other bulkheads, the Surveyors should not refuse to grant a declaration upon the ground that they are not fitted, or are defective, unless they are of opinion that the want of, or the defective state of, the bulkheads renders the ship unseaworthy.

As to screw tunnels.

19. It is necessary that the screw tunnels of all iron passenger steam vessels should be made of iron, and should be strongly constructed and water-tight, with a stuffing-box round the shaft at the forward end. If there are manholes or openings in the floor, care must be taken that all are efficiently fitted with covers or doors, so arranged that they can easily and rapidly be made water-tight. If means are provided for entering the tunnel by a separate opening abaft the engine-room bulkhead, the passage down from the upper deck must be strongly constructed of iron, perfectly secure, and water-tight. In some cases the inside of an iron mast serves for this purpose. Cocks, or valves, and pipes must be fitted to let the water off the floor of the tunnel, and must be made to open or shut from the upper or main deck. If there is an opening through the engine-room bulkhead into the tunnel, a properly constructed water-tight door should be fitted to it, arrangements being made that it can be easily opened or shut from the upper or main-deck. In vessels which have already received Surveyor's certificates, this regulation need not be enforced if there be an effective arrangement of water-tight bulkheads, decks, floors, and stuffing-boxes, which will so confine any water entering the ship from the aftermost stuffing-box as to prevent it from finding its way into the ship in such quantity as will interfere with her safety.

Examination of the bottom outside.

20. In no case should a Surveyor grant a declaration for a steamer the outside of the bottom of which has not been examined by a Surveyor during the twelve months preceding the date of survey, and in no case should a declaration be granted for a longer period than a period terminating within twelve months

from the date of the last outside examination. For instance, if a steamer be examined outside on the 1st of January, she will (if the law be complied with) be entitled to a certificate for twelve months (*i.e.*, until the 1st of January following). But supposing the survey is not completed until the 1st of February, the Surveyor is (if the vessel be fit) to grant his declaration for a period ending the 1st of January following and no longer, unless the vessel be re-docked for examination.

Examination of bottom to be made before painted. Cocks, &c., to be examined in dry dock.

21. The Surveyors, before granting a declaration for twelve months, should be careful to make a thorough examination of the outside of the bottom of the ship in a dry dock, after it has been cleaned. They should examine the pintles and braces of the rudder, as well as the bearings of the screw shaft and the different openings, valves, bolt-heads, &c., in the ship's bottom. All bolts, connecting cocks, valves, or pipes to the skin of the ship should have the heads outside, and such heads should be either countersunk or cupheaded. All discharge valves and sea-cocks should be taken out for examination while the vessel is in dry dock. Before Surveyors finally pass the hull of a vessel they are to see it fit to go into the water.

Ceiling to be removed as Surveyor thinks necessary.

22. For examining the internal parts of the ship, they should have parts of the ceiling removed, in order that they may ascertain the condition of the ship; they should also carefully examine the cement to ascertain its condition, and where they find it cracked or doubtful, they should extend their examination, and cause such a portion of the cement to be removed as may, in their judgment, be necessary to enable them to form a correct opinion as to the state of the ship covered by the cement. The roses for the deck pumps, also those for the bilge pumps, should be taken out of the bilges and cleaned, and the sluices and cocks on the bulkheads inspected and put in good working order.

Examination of vessel in engine-room, coal bunkers, &c.

23. The Surveyors should examine very particularly the plating, stringers, frames, floors, &c., in the engine-room, boiler space, and coal bunkers, the bunkers of course being empty.

Entries in office book.

24. The date of the last outside inspection of the bottom is to be entered in the declaration, as it is from that date that the docking time is to count. If the hull is not passed at all, or not passed for the maximum time (twelve months), the fact should be noted in the declaration for the vessel. The repairs which have been executed from time to time should be recorded in the office book.

As to coamings skylights, scuppers, ports, gratings, &c.

25. The height of the coamings round all openings in the main deck, and the means provided for securely protecting or fastening down all skylights, bunker openings, &c., as well as the sufficiency of the water, ports and scuppers for relieving the decks of water, are important items to be noted by the Surveyors in sea-going vessels coming under their survey. All side-lights should be fitted with deadlights, and all stern and other ports fitted in such a manner that they can be quickly and efficiently secured. All openings below the weather-deck in sea-going steam and sailing vessels carrying passengers or emigrants, whether such weather-deck be a poop, awning-deck, spar-deck, or forecastle, must be fitted with gratings or hatch covers, and tarpaulins, and also with means for effectually securing the tarpaulins down, and making the openings water-tight. Such gratings or hatch covers must be kept and secured in a suitable place, at all times accessible and near to the openings for which they are intended. Many casualties happen through the engine-room sky-lights, coamings, companions, &c., being of light construction and insufficiently secured, instead of being of sufficient strength to form permanent parts of the

structure of the ship; casualties also arise through the fronts of poops and bridge-houses being weak and insufficiently secured. The fore and aft beams or "strong backs," in the hatchways and the hatches themselves are often too weak to bear the pressure of water which may find its way on to them in a heavy sea. The Surveyors should in granting declarations for passenger steamers look especially to these points, and should in like manner, in the case of ships other than passenger steamers, look to these amongst other points when reporting a ship for detention as unsafe.

BOATS AND LIFE-BUOYS.

Dimensions of boats.

26. It will be the duty of the Surveyor to take care that all steam ships are provided with the boats or rafts required by the law for the time being in force, both as to number and cubic contents; and to see that they are efficient, and in good order and ready for service, subject to the rules contained in these instructions. Surveyors are not to insist upon the precise lengths, breadths, and depths inserted in the table, but are to approve of any efficient boats of sufficient strength, the cubic contents of which are respectively equal to, or greater than, the cubic contents of the boats specified in the table laid down in rule.

If the smaller number of boats required by the law for the time being in force is carried, one of them must be a launch of at least the capacity named in column 2 of the said table.

If the larger number of boats is carried, the cubic contents (equal in their aggregate to the cubic contents required by law) may be spread in any way over the whole number of boats.

Rule for ascertaining the capacity of boats.

27. To ascertain the cubic capacity of a boat. Measure the length and breadth outside and the depth inside. Multiply them together and by ·6; the product is the capacity of the boat in cubic feet. Thus, a boat 28 feet long, 8 ft 6 ins. broad, and 3 ft. 6 ins. deep will be regarded as having a capacity of $28 \times 8{\cdot}5 \times 3{\cdot}5 \times {\cdot}6 = 499{\cdot}8$, or 500 cubic feet. If the oars are pulled in rowlocks the bottom of the rowlock is to be considered the gunwale of the boat for ascertaining her depth.

As to life-boats.

28. A life-boat, fitted with efficient and substantial air casings, is deemed to be capable of carrying one adult for every 10 cubic feet of her capacity. Thus a life-boat measuring $28 \times 8{\cdot}5 \times 3{\cdot}5$, whose cubic contents by the present rule are 500 cubic feet, is deemed to be sufficient for 50 adult persons. The space in the boat must be sufficient for the seating of the persons carried in it, and for the proper use of the oars.

Air cases.

29. No boat should be passed as a life-boat unless she has for every person she carries, or, what is the same thing, for every 10 cubic feet computed as above, at least one and a half cubic feet of strong and serviceable inclosed air-tight compartments, so constructed, fitted, and arranged that water cannot find its way into them. That is to say, the life-boat measuring $28 \times 8{\cdot}5 \times 3{\cdot}5$, whose whole cubic contents are 500 cubic feet, and which is deemed to be sufficient for 50 adults, is to have 75 cubic feet occupied by inclosed air cases.

Zinc is not permitted in the construction of a life-boat or her air cases, neither is copper to be used if the boat is built of iron.

If the boat is built of wood, copper of a good substance is of course a good material for the air cases, but the Surveyor should not insist upon it being employed; if used he should see that it is not too thin, as cases have occurred in which air cases have been

made of sheet copper not much thicker than tin foil, and the fraud has escaped detection at the time.

If the air cases are made of galvanised iron, care should be taken that the galvanising is well done, as otherwise it is nearly as bad as zinc.

The air-tight compartments or cases must be so distributed as to give the boat good buoyancy and stability, whether a part of the air cases should be under thwarts, or whether they should be all in the ends, or along the sides, will, so long as an efficient life-boat is obtained, be left to the option of the owner. If air cases are in the bottom of the boat, the depth of the boat is to be measured from the top of the bottom air cases. It is desirable that the coverings in the boats over the air cases be secured with screws or otherwise so as to enable the cases to be removed without difficulty for examination.

Spaces filled with or containing any material are not to be deemed air spaces.

No boat fitted with a steam-engine is to be passed as a life-boat.

No life-boat other than a metal one should be passed if carried sufficiently near the funnel as to be injuriously affected by the heat therefrom.

Build.

30. Life-boats should be built whale-boat fashion, both ends alike. They should have a sheer of about three-quarters of an inch to a foot, rising equally from the midships to the stem and stern, and they should be made buoyant in accordance with the preceding instructions. A square-sterned boat is not to be passed as a life-boat, and, excepting in small boats, the oars should be double-banked.

Compasses.

31. In sea-going vessels a boat's compass must be supplied for each of the life-boats required.

Boats to be hung in davits. Requisites for use in boats.

32. As regards requisites for use. All boats should be hung in davits and kept ready for service at any moment. The Surveyors should see that in all boats the full complement of oars, including steering oar and two spare oars at least, are provided (in large boats more than two spare oars ought to be provided); that each boat has two plugs for each plughole, attached with lanyards or chains, and one set and a half of thole pins or crutches attached to the boat by sound lanyards; a bailer, a rudder and tiller, or yoke and yoke lines; a painter of sufficient length, and a boat hook, the rudder and bailer to be attached to the boat by sufficiently long lanyards, and kept ready for use.

Lowering gear

Means for speedily detaching the boats from the lower blocks of the davit tackles should be insisted upon; an ordinary fixed hook in the lower block shipping into a fixed eye in the boat should not be allowed. Surveyors should also see that the davits are strong enough, that they are so spaced that the boats can be swung out without unnecessary labour, that the boats' chocks can be expeditiously removed, and that the boats will not foul the ship's side in lowering when the ship has no list, and that the whole of the tackling, including davits, falls, blocks, eye-bolts, and rings, &c., is of sufficient strength to lower the boat, with its full complement on board, into the water. The boat's falls must be long enough to lower the boat into the water when the vessel is light. Life-lines should be fitted to the davits long enough to reach the water, when the vessel is light, and allowance made for the extreme roll of the ship.

Surveyors are to refuse declarations in cases in which the foregoing instructions are not fully carried out, but it is to be left to shipowners themselves to provide such methods as they please for lowering the boats, so long as the intention of the Legislature is complied with.

All the boats should be seen lowered into the water at every survey.

Equipments of life-boats.

33. In the case of life-boats, the Surveyor should see that the hatchet or tomahawk, which is to be kept in each end of each life-boat, is in good order, and attached with a lanyard, and that a mast or masts, with at least one good sail and proper gear for each, and a life-jacket or life-belt for each oarsman and one for the coxswain is also provided; a life-line in loops should run round the outside of the boat and be securely made fast.

Life-jackets standard of.

34. No life-jacket or belt should be passed that is not capable of floating in the water for 24 hours with 23 lb of iron suspended from it; and to ensure this buoyancy a life-jacket, in which the cork must be exposed and have a canvas back and straps only, should weigh 5 lb when dry.

Life-buoys, standard of.

35. As regards life-buoys. No life-buoy stuffed with rushes or with cork shavings or other shavings, or granulated cork, or any loose material should be passed. All cork life-buoys should be built of solid cork and fitted with life-lines and loops securely seized to the life-buoy, and none should be passed that will not float for 24 hours in water with 32 lb of iron suspended from them. If life-buoys are not made of solid cork, then any other strong life-buoy of an approved pattern may be passed that is capable of floating in the water for 24 hours with 40 lb of iron suspended from it. No contrivance is to be passed as a life-buoy that requires inflation before use. Life-buoys with lines attached should be secured by a toggle and becket, or any other similar method, so that they can be quickly released; they must not be lashed nor seized to the rail or any other part of the vessel, but must be kept so as to be ready for use at a moment's notice in case of an emergency.

Life-buoys should in all cases be carefully examined by the Surveyor, who will satisfy himself of the buoyancy, and see that the materials of which they are composed have not become sodden, and that the lines attached to them are sufficient. Surveyors are to call the attention of owners and masters to the penalties imposed for not keeping the boats and efficient life-buoys in constant readiness for use.

Steam-launches.

36. As regards steam-launches or boats fitted with steam power, the contents taken up in the boat by the engine and boiler are not to be deemed part of the clear contents of the boat. The boilers of steam-launches should, as regards fittings and strength, comply with the same regulations as the main boilers. As regards the safety valves fitted to the boilers of steam-launches, and of other boats carried by sea-going steamers, the Surveyors should see that they are out of the control of the engineer when steam is up, and comply with the same rules as the safety valves on the main boilers. The lifting or easing gear for the valve should actually lift the valve and not merely the weight. The boilers should also have a steam-gauge, a glass water-gauge, and test cocks.

As to boats already passed.

37. In carrying these instructions into effect, Surveyors are to be careful not to interfere unduly with life-boats passed before April 1884, provided their buoyancy and efficiency are equal or nearly equal to that indicated above; but in the case of new boats coming under survey for the first time, as well as in all cases in which the fittings of the boats require renewal, the rules contained in these instructions are to be strictly adhered to, whilst the Surveyors are to be careful not to interfere so as to condemn apparatus that may have been already passed, and that still remains efficient.

38. Table of the dimensions of boats required to be carried by passenger steamers under the Merchant Shipping Act.

Number of tons registered.	Either						Or

	If the number of boats in this column are carried, one of them must be a launch of at least the capacity named.						If the number of boats in this column are carried, their cubic contents (equal in the aggregate to the cubic contents required) may be spread in any way over the whole number of boats. The life-boat or life-boats must be the largest boats.					

38*a*. Before granting a declaration or certificate of survey for a steam vessel, where the boilers and machinery are in charge of a native driver, the Surveyor should require the production of a certificate either from the Superintending Engineer or from some respectable engineering firm, to the effect that the pressure gauges on the boiler or boilers have been overhauled and adjusted and are in proper order.

MISCELLANEOUS.

Sail power.

39. As a general rule, if sea going steamers are fitted with sufficient sail power to enable them to work as sailing vessels in the event of their machinery becoming disabled, no question need be raised. They should of course be provided with sufficient spare sails to be kept on board. All the sails must be examined by the Surveyors, who must at every survey be perfectly satisfied with their efficiency, as also with that of the standing and running gear.

Compasses to be adjusted to Surveyor satisfaction.

40. The compasses of every sea-going steam ship employed to carry passengers must be properly adjusted from time to time; such adjustment, in the case of ships surveyed as herein mentioned, to be made to the satisfaction of the Surveyor, and according to such regulations as may be issued by the Government.

The Surveyor should satisfy himself as to the proficiency of the person whose signature is attached to the adjustment certificate in question.

Standard compass.

41. Every foreign-going iron or composite built ship should have a standard compass fitted with the means of taking accurate bearings, and a table of errors for this compass should be furnished by the master.

Certificate of master and mate to be taken in certain cases.

42. In other cases the Surveyor should act as follows, viz.—

The Surveyor should, before he grants his declaration, receive a certificate from the owners to the following effect, viz.—"We the undersigned hereby certify that the compasses of the steamer (*name of steamer*) are in all respects to our satisfaction. We know the errors and can apply them."

Dated at

this day of 18 .

_____ Master.

_____ Mate.

"We hereby attest the above signatures and certify that the said (*master's name*) sailed as master. and that the said (*mate's name*) sailed as mate of the said vessel on her last voyage, ending 18 .

_____ Owners.

This certificate, which must be attested by the owners, must be signed by the master and mate, one of whom at least must have made the previous, and is going to make the next voyage in the vessel.

Deck pump to be fitted.

43. There must be for each compartment a pump of sufficient size, which can be worked from the upper deck. A rose or perforated box of sufficient size should be fitted at the end of the suction pipe of each pump, and means provided for clearing the end of the suction pipe. A trunk-way leading from the upper deck to the suction of each pump, large enough for a man to go down to the end of the suction pipe, is the best arrangement for this purpose.

It is very desirable that the steam winches (if any) be so fitted and arranged that the deck pumps can be worked by them as well as by hand.

Deck pumps, when not worked by machinery, should have handles at least long enough for two men to work at them.

Sounding pipes, &c.

44. There must be fitted at the bottom of each bulkhead means for ascertaining the depth of water in each compartment.

Engine-room pumps.

45. Pipes connected with pumps worked by the engines are to be carried through the bulkheads into the compartments fore and aft of the engine-room, so that each compartment can be pumped out separately by the engines as well as by the deck pump. The pipes should be well secured where they pass through the bulkheads, and it is very desirable that cocks or valves be fitted between these suction pipes and the bulkheads, to be capable of being opened or shut from the upper or main deck.

Pumps not necessary in fore peak, &c.

46. In all sea-going screw vessels there must be a strong water-tight deck over the cast-iron tube aft, so as to make a tank round the tube, and a properly fitted man-hole at the top or fore end. Collision bulkheads must also be fitted in sea-going vessels: if they are not fitted, the Surveyor should decline to grant a declaration. These compartments are generally small, and the Surveyor should not insist on a separate deck pump leading direct into them.

Steering gear.

47. A spare tiller, properly fitted to the rudder head, relieving tackle, &c., should, in all sea-going and home-trade steamers, be kept near the after-steering gear ready for immediate service. Rudder pendants should also be securely fastened to the back of the rudder, with their ends led up to a place accessible in all weathers. In any case where the Surveyor is not satisfied that the rudder pendants are made fast so as to have sufficient power over the rudder, he should see that an efficient bumpkin is securely fitted, to which the rudder pendants must be made fast. The steering gear should be thoroughly overhauled at every survey, and taken to pieces and thoroughly examined at least once a year. The chains and blocks that are liable to interfere with or endanger the passengers or crew should be guarded by portable but properly secured guards.

It is very desirable that the man at the helm should be so placed that he has a clear look-out ahead, more especially in steamers that frequent crowded harbours or rivers.

Helm indicators.

48. In passing a helm indicator, the Surveyor should ascertain by actual trial that whenever the pointer moves to the word "port" on the dial or plate, wherever that word may be, it shows that the helm is ported, and whenever the pointer points to the word "starboard," wherever that word may be, it means that the helm is starboarded.

Meaning of port helm.

49. In the foregoing directions, it is assumed that "port helm" means that the helm is so moved as to turn the ship's head to the right, and "starboard helm" means that the helm is so moved as to turn the ship's head to the left.

Lead-lines.

50. A deep-sea lead-line of at least 120 fathoms, a lead of at least 28 lb weight, and a suitable reel, together with at least two hand lead-lines of at least 25 fathoms, and leads of at least 7 lb should be supplied to all foreign-going steamers In short-voyage steamers two hand lead-lines of 25 fathoms each and leads of at least 7 lb must be demanded. These are the minimum requirements. For a 1st class (*i.e.*, twelve months) declaration double the number of lines and eads must be provided. The Surveyor should see that the lead-lines are properly marked. The following marks are those usually adopted:—

At	2 fathoms	a piece of leather split in two strips.
,,	3 ,,	,, ,, three strips.
,,	5 ,,	,, white bunting.
,,	7 ,,	,, red bunting.
,,	10 ,,	,, leather with a hole.
,,	13 ,,	,, blue bunting.
,,	15 ,,	,, white bunting.
,,	17 ,,	,, red bunting.
,,	20 ,,	a strand with two knots tied in it.

It is always best to have the lines fitted with calico for white marks, bunting for red marks, and serge for blue marks, because a man can tell the difference by the feel in the dark.

Anchors chains cables hawsers, warps, &c.

51. Surveyors must be very careful to see that each steam ship they survey is provided with chain cables and anchors duly certified under the Chain Cable Acts. (34 & 35 Victoria Chapter 101). When the stream and kedge anchors exceed 168 lb in weight they also must be tested in accordance with the same Acts. The Surveyors should upon each survey require the production of the test certificates of all the chain cables and anchors. When from any cause these cannot be produced, the Surveyors should require satisfactory proof that the provisions of the Acts have been complied with.

The Surveyors must also see that the chain cable and anchors on board are sufficient for the service and

in good condition. The chain cables must be removed from the chain lockers at least once in twelve months, cleaned, if necessary, and the pins knocked out of the shackles. The shackle pins should be secured by small pins of hard wood.

The spare anchors should not be stowed below, but kept where they will be ready in case they are required.

Proper hawsers and warps must also be supplied.

ry distress signals.

52. The signals specified in the first schedule of the English Merchant Shipping Act of 1873 shall be deemed to be signals of distress.

In the daytime.—The following signals numbered 1, 2, and 3, when used or displayed together or separately, shall be deemed to be signals of distress in the daytime:—(1) a gun fired at intervals of about a minute; (2) the international code signal of distress indicated by N C; (3) the distant signal, consisting of a square flag having either above or below it a ball, or anything resembling a ball.

At night.—The following signals numbered 1, 2, 3, when used or displayed together or separately, shall be deemed to be signals of distress:—(1) a gun fired at intervals of about a minute; (2) flames on the ship (as from a burning tar barrel, oil barrel, &c.); (3) rockets or shells, of any colour or description, fired one at a time at short intervals.

To be examined.

53. The means for making signals of distress are to be carefully examined by the Surveyors, to see that they are kept dry and in good order, and are protected from fire and accident; and that the cannon or mortar, which is to be of at least the size below specified, is in good condition and ready for use. The means for making flames should be lights that burn in water, or some other approved arrangement.

Description of signals to be provided, size of gun, &c.

54. The signals required are 12 blue lights, two of Holmes' storm or danger signal lights, and six of the smaller lights of the same description with means for attaching them to life-buoys; 12 rockets, each containing 16 ozs. of composition; one gun at least 3½ inches in the bore, or one mortar at least 5½ inches in the bore, with 12 charges of ammunition. The Socket Distress Signals of the Cotton Powder Company may be passed as sufficient for signals of distress, and they may be passed in lieu of guns or in lieu of rockets, but not as equivalent to both in sea-going steam ships and emigrant ships. When a gun is carried, each charge must contain 16 ozs. of pebble or bean powder in a flannel bag. An air-tight copper magazine, rammers, sponges, wads, priming wires, friction tubes, powder flask with fine powder for priming, and means for firing and withdrawing charges should be provided and carefully examined. The Holmes' Patent Storm and Danger Signal Lights must be supplied to each sea-going steam ship.

Rocket lockers.

55. The locker for keeping the rockets, blue lights, &c., should not be air-tight, but should have sufficient small safe openings to allow of the escape of any moisture generated; by this means the rockets, blue lights, &c., can be kept for a long period. Red pyrotechnic lights are dangerous.

Distress signals.

56. Surveyors should in every case in which the regulation distress signals are not on board the passenger (emigrant) ships, and sea-going passenger steamers, which they may be called on to survey, decline to grant papers or declarations, unless a written guarantee is given to them that the signals shall be on board, and an opportunity given for inspecting them before the ship sails.

Fire hose

57. Passenger steamers going to sea are to be provided with a hose adapted for the purpose of extinguishing fire in any part of the ship, and capable of being connected with the engines of the ship or with

the donkey engine if it can be worked from the main boiler. The Surveyor must take care that it answers the required purpose.

The fire-hoses should be connected, stretched to judge of their length, and thoroughly examined at every survey, and at least once a year (and at any other time that the Surveyor thinks it necessary) tested with the conductor in its place, by pumping water through them by the main or donkey engines at full speed. A proper conductor and metal bend or goose neck forms part of its equipment and must be provided. Generally leather hoses are the most durable, and should be supplied when a declaration for twelve months is required.

Deck to be caulked and have proper hatches, &c.

58. All decks and floors upon which passengers are carried, which are the main and lower decks only in sea-going steamers, must be caulked and properly secured. Sufficient light and ventilation must be provided. Scuttles and hatches are not considered as efficient means of ventilation. Proper and sufficient means of ingress and egress must be fitted. Companions or booby hatches must in all cases be fitted to the entrances to passenger spaces, and be so arranged as to open and shut easily. Surveyors should satisfy themselves that there are hatches to batten down in bad weather, or that otherwise the booby hatch is itself so strong, and so securely bolted as to be part and parcel of the ship, and so fitted that it can be securely closed.

Height, &c., of bulwarks.

59. All sea-going passenger steamers must have planked bulwarks of such a height as is, in the Surveyor's judgment, necessary for the proper shelter and protection of the passengers, or rails, stanchions and a weather cloth, to give the required protection.

BOILERS AND SUPERHEATERS.

Board of Trade test certificates to be accepted

60. In the case of boilers built in the United Kingdom for steam ships applying for survey certificates under Act VII of 1884, the Surveyor is authorized to accept test certificates for such boilers duly signed by officers of the Board of Trade. If such a certificate cannot be produced, the addition (Y) in Rule 70 will be made to the factor of safety in computing the strength of the boiler.

The Surveyor to fix pressure on safety valves.

61. The Surveyor is required to fix the limits of weight to be placed on the safety-valves of sea-going steam ships. The Surveyor having himself fixed the limits of the weight, is then required to declare that in his judgment the boiler and machinery are sufficient for the service intended, and in good condition, and that they will be sufficient for twelve months, or such other period as he may, in his judgment, determine. For his guidance the following directions are given.

Working pressure to be fixed by calculation.

62. The Surveyor should fix the working pressure for boilers by a series of calculations of the strength of the various parts and according to the workmanship and material. The Surveyors should therefore receive and report on any plans of boilers intended for sea-going vessels that may be submitted in due course with the form of application and fees. They are not to report on any tracing or plan that is not accompanied by that form, or when they have reason to believe that the boilers, when finished, are not intended to be placed on board steamers that will require survey certificates. When the Surveyor has received plans and tracings of new boilers, or of alterations of boilers, and has approved of them, he will of course, be careful in making his examinations from time to time, to see that they are followed in construction. When he has not had the plans submitted, but is called in to survey a boiler, he will, of

course measure the parts, note the details of construction, and, if necessary, bore the plates to ascertain their thickness, &c., before he gives his declaration.

The Surveyor cannot declare a boiler to be safe unless he is fully informed as to its construction, material, and workmanship. He should therefore be very careful how he ventures to give a declaration for a boiler that he is not called in to survey until after it is completed and fixed in the ship.

Respecting stays.

63. In the case of new boilers the Surveyors may allow a stress not exceeding 7,000lb per square inch of net section on solid iron screwed stays and supporting flat surfaces, but the stress should not exceed 5,000lb when the stays have been welded or worked in the fire.

The areas of diagonal stays are found in the following way :—Find the area of a direct stay needed to support the surface; multiply this area by the length of the diagonal stay, and divide the product by the length of a line drawn at right angles to the surface supported to the end of the diagonal stay; the quotient will be the area of the diagonal stay required.

When gusset stays are used their area should be in excess of that found in the above way.

Girders for flat surfaces.

64. When the tops of combustion boxes or other parts of a boiler are supported by solid rectangular girders the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam; and in the case of combustion chambers, that the ends are fitted to the edges of the tube plate and the back plate of the combustion box :—

$$\frac{C \times d^2 \times T}{(W-P)\ D \times L} = \text{Working pressure.}$$

W = Width of combustion box in inches.
P = Pitch of supporting bolts in inches.
D = Distance between the girders from centre to centre in inches.
L = Length of girder in feet.
d = Depth of girder in inches.
T = Thickness of girder in inches.
C = 500 when the girder is fitted with one supporting bolt.
C = 750 when the girder is fitted with two or three supporting bolts.
C = 850 when the girder is fitted with four supporting bolts.

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays.

Flat surfaces of boilers.

65. The pressure on plates forming flat surfaces is found by the following formula :—

$$\frac{C \times (T+1)^2}{S-6} = \text{Working pressure.}$$

T = Thickness of the plate in sixteenths of an inch.
S = Surface supported in square inches.
C = Constant according to the following circumstances.
C = 100 when the plates are not exposed to the impact of heat of flame, and the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.*
C = 90 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts only.

* If the diameter of riveted washers be at least ⅓rds the pitch of the stays, and the thickness not less than the plates they cover, the constant may be increased to 150.

When doubling plates are fitted of the same thickness as the plates they cover, and not less in width than ⅓rds of the pitch of the stays, the constant may be increased to 160.

When doubling plates cover the whole of the flat surface the case should be submitted for the consideration of the Board.

C = 60 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plate they cover.

C = 54 when the plates are exposed to the impact of heat or flame, and steam in contact with the plate, and the stays fitted with nuts only.

C = 80 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plate and fitted with nuts.

C = 60 when the plates are exposed to the impact of heat or flame, with water in contact with the plate, and the stays screwed into the plate, having the ends riveted over to form a substantial head.

C = 36 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, with the stays screwed into the plate, and having the ends rivete dover to form a substantial head.

When the riveted ends of screwed stays are much worn, or when the nuts are burned, the constants should be reduced, but the Surveyor must act according to the circumstances that present themselves at the time of survey; and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state it will be often necessary to reduce the constant 60 to about 36.

Compressive stress on tube plates.

66. The Surveyors should not in any case allow a greater compressive stress on the tube plates than is obtained by the following formula:—

$$\frac{(D-d) \times 15000}{W \times T} = \text{Working pressure.}$$

D = least horizontal distance between centres of tubes in inches.

d = inside diameter of ordinary tubes in inches.

T = thickness of tube plate in inches.

W = extreme width of combustion box in inches from front of tube plate to back of fire box, or distance between combustion box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Wet-bottomed boilers.

67. The Surveyors should take care that wet-bottomed boilers, the outside of the bottom of which cannot be seen, are lifted for inspection at least once in every four years, or oftener, if the Surveyor considers it necessary. It will often be found necessary long before this to reduce the pressure, unless the boilers are lifted from their seats, for the latter to judge of their efficiency. If the owners in any special case have any good reasons for not wishing to lift them when the Surveyor requires it, the Surveyor should submit the whole case in detail to the Government for consideration. The Surveyor must recollect that he is not to certify as sufficient any boiler respecting which he cannot thoroughly satisfy himself.

The Surveyor should record in the hydraulic test book the dates on which wet-bottomed boilers are inspected when lifted, and whether the boilers were out of the ship when examined, and if out of the ship where they were examined. Boilers which have been lifted should in all cases be subjected to the hydraulic test before they are re-set.

Cylindrical boilers.

68. When cylindrical boilers are made of the best material with all the rivet holes drilled in place and all the seams fitted with double butt straps each of at least ⅞ the thickness of the plates they cover, and all the seams at least double riveted with rivets having an allowance of not more than 75 per cent. over the

single shear, and provided that the boilers have been open to inspection during the whole period of construction, then five may be used as a factor of safety. The tensile strength of the iron is to be taken as equal to 47,000lb per square inch with the grain, and 40,000lb across the grain. But when the above conditions are not complied with, the additions in the following scale must be added to the factor 5, according to the circumstances of each case :—

A†	·15	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place after bending.
B†	·3	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place before bending.
C	·3	To be added when all the holes are fair and good in the longitudinal seams, but punched after bending instead of drilled.
D	·5	To be added when all the holes are fair and good in the longitudinal seams, but punched before bending.
E*	·75	To be added when all the holes are not fair and good in the longitudinal seams.
F	·1	To be added if the holes are all fair and good in the circumferential seams, but drilled out of place after bending.
G†	·15	To be added if the holes are fair and good in the circumferential seams, but drilled before bending.
H	·15	To be added if the holes are fair and good in the circumferential seams, but punched after bending.
I†	·2	To be added if the holes are fair and good in the circumferental seams, but punched before bending.
J*	·2	To be added if the holes are not fair and good in the circumferential seams.
K	·2	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and double riveted.
L	·1	To be added if double butt straps are not fitted to the longitudinal seam, and the said seams are lap and treble riveted.
M	·3	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are double riveted.
N	·15	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are treble riveted.
O	1·	To be added when any description of joint in the longitudinal seams is single riveted.
P	·1	To be added if the circumferential seams are fitted with single butt straps and are double riveted.
Q	·2	To be added if the circumferential seams are fitted with single butt straps and are single riveted.
R	·1	To be added if the circumferential seams are fitted with double butt straps and are single riveted.
S††	·1	To be added if the circumferential seams are lap joints and are double riveted.

T	·2	To be added if the circumferential seams are lap joints and are single riveted.
U	·25	To be added when the circumferential seams a re lap and the strakes of plates are not entirely under or over.
V‡	·3	To be ad ded when the boiler is of such a length as to fire from both ends, or is of unusual length, such as flue boilers; and the circumferential seams are fitted as described opposite P, R, and S, but of course when the circumferential seams are as described opposite Q and T, V ·3 will become V ·4.
W*	·4	To be added if the seams are not properly crossed.
X*	·4	To be added when the iron is in any way doubtful, and the Surveyor is not satisfied that it is of the best quality.
Y†††	1·65	To be added if the boiler is not open to inspection during the whole period of its construction.

Where marked * the allowance may be increased still further if the workmanship or material is very doubtful or very unsatisfactory.

† When the holes are to be rimered or bored out in place the case should be referred for orders as to the reduction or omission of A, B, G, and I as heretofore.

‡ When boilers are comparatively short the cases should be submitted for consideration as to the omission of V.

†† When the circumferential seams are lapped and treble-riveted the case should be submitted for orders.

††† When surveying boilers that have not been open to his inspection during construction, the Surveyor may accept test certificate granted by a Board of Trade Surveyor in the United Kingdom.

The strength of the joints is found by the following method:—

$$\frac{(\text{Pitch}-\text{Diameter of rivets}) \times 100}{\text{Pitch}} = \left\{\begin{array}{l}\text{Percentage of strength of plate at joint as compared with the solid plate.}\end{array}\right.$$

$$\frac{(\text{Area of rivets} \times \text{No. of rows of rivets}) \times 100}{\text{Pitch} \times \text{thickness of plate}} = \left\{\begin{array}{l}\text{Percentage of strength of rivets as compared with the solid plate.*}\end{array}\right.$$

Then take iron as equal to 47,000lb per square inch and use the smaller of the two percentages as the strength of the joint, and adopt the factor of safety as found from the preceding scale—

* If the rivets are exposed to double shear multiply the percentage found by 1·75.

$$\frac{(47{,}000 \times \text{percentage of strength of joint}) \times \text{twice the thickness of the plate in inches.}}{\text{Inside diameter of the boiler in inches} \times \text{factor of safety}} = \left\{ \begin{array}{l} \text{Pressure to be allowed per square inch on the} \\ \text{safety valves.} \end{array} \right.$$

Butt straps.

In the case of zigzag riveting, the strength through the plate diagonally between the rivets is equal to that horizontally between the rivets, when diagonal pitch $= \frac{5}{16}$ horizontal pitch $+ \frac{1}{16}$ diameter of rivet.

Plates that are drilled in place must be taken apart and the burr taken off, and the holes slightly countersunk from the outsides.

69. Butt straps must be cut from plates and not from bars, and must be of as good a quality as the shell plates, and for the longitudinal seams must be cut across the fibre. The rivet holes may be punched or drilled when the plates are punched or drilled OUT of place, but when drilled in place, must be taken apart and the burr taken off and slightly countersunk from the outside.

When single butt straps are used and the rivet holes in them punched they must be one-eighth thicker than the plates they cover.

The diameter of the rivets must not be less than the thickness of the plates of which the shell is made; but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates.

Dished ends must be stayed as flat surfaces; but when they are theoretically equal to the pressure needed, when considered as portions of spheres, the stays, when solid, may have a stress of 14,000lb. per square inch of net section, but the stress should not exceed 10,000lb. when the stays have been welded or worked in the fire.

Truly hemispherical ends subjected to internal pressure may be allowed double the pressure that is suitable for cylinder of the same diameter and thickness.

All man-holes and openings must be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. The openings in the shells of cylindrical boilers should have their shorter axes placed longitudinally. It is very desirable that the compensating rings round openings in flat surfaces be made of ⌊ or ⊤ iron. Cast iron doors are not to be passed.

Circular furnaces.

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions. The boilers must be tested by hydraulic pressure to twice the working pressure in the presence and to the satisfaction of the Surveyors.

70. Circular furnaces with the longitudinal joints welded or made with a butt strap :—

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches.}}{(\text{Length in feet} + 1) \times \text{diameter in inches.}} = \text{working pressure per square inch, provided it does not exceed that found by the following formula :—}$$

$$\frac{8{,}000 \times \text{thickness in inches}}{\text{diameter in inches}} = \left\{ \begin{array}{l} \text{Working pressure} \\ \text{per square inch.} \end{array} \right.$$

The second formula limits the crushing stress on the material to 4,000lb per square inch.

The length is to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap jointed in the ordinary way, then 70,000 is to be used instead of 90,000, excepting only where the lap is bevelled and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above must be reduced, that is to say, the 90,000 will become 80,000; the 80,000 will become 70,000; the 70,000 will become 60,000; and when neither the material nor the workmanship are of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Surveyor, as in the case of old boilers. One of the conditions of best workmanship is that the joints are either double riveted with single butt straps, or single riveted with double butt straps, and the holes drilled after the bending is done and when in place, and afterwards taken apart, the burr on the holes taken off, and the holes slightly countersunk from the outside.*

The working pressure for corrugated furnaces, practically circular and machine-made, provided the plane parts at the ends do not exceed six inches in length, and the plates are not less than $\frac{5}{16}$ inch thick, should not be greater than found by the following formula:—

$$\frac{9{,}000 \times \text{thickness in inches}}{\text{mean diameter in inches.}} = \left\{ \begin{array}{l} \text{Working pressure per} \\ \text{square inch.} \end{array} \right.$$

When the furnaces are riveted in two or more lengths the case should be submitted for consideration, as it may be necessary to make a deduction.

Cylindrical superheaters

71. The strength of the joints of cylindrical superheaters and the factor of safety are found in a similar manner as for cylindrical boilers and steam receivers, but instead of using 47,000 lb as the tensile strength of iron 30,000 lb is adopted, unless where the heat or flame impinges at, or nearly at, right angles to the plate; then 22,400 lb is substituted.

When a superheater is constructed with a tube subject to external pressure the working pressure should be ascertained by the rules given for circular furnaces, but the constants should be reduced as 30 to 47.

In all cases the internal steam pipes should be so fitted that the steam in flowing to them will pass over all the plates exposed to the impact of heat or flame.

Superheaters should, as regards survey, be deemed to be the *most important parts* of the boilers, and must be inspected *inside and outside*; those that cannot be entered on account of their size or arrangement must have a sufficient number of doors through which a thorough inspection of the whole of the interior can be made.

Special attention should be paid to the survey of superheaters, as with high pressure the plates may become dangerously weak, and not give any sound to

---

* The following examples will serve to show the application of the constants for the different cases that may arise:—

Furnaces with butt joints and drilled rivet holes.	90,000 when the longitudinal seams are welded. 90,000 where the longitudinal seams are double riveted and fitted with single butt straps. 80,000 where the longitudinal seams are single riveted and fitted with single butt straps. 70,000 where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with butt joints and punched rivet holes.	85,000 where the longitudinal seams are double riveted and fitted with single butt straps. 75,000 where the longitudinal seams are single riveted and fitted with single butt straps. 65,000 where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with lapped joints and drilled rivet holes.	80,000 where the longitudinal seams are double riveted and bevelled. 75,000 where the longitudinal seams are double riveted and not bevelled. 70,000 where the longitudinal seams are single riveted and bevelled. 65,000 where the longitudinal seams are single riveted and not bevelled.
Furnaces with lapped joints and punched rivet holes.	75,000 where the longitudinal seams are double riveted and bevelled. 70,000 where the longitudinal seams are double riveted and not bevelled. 65,000 where the longitudinal seams are single riveted and bevelled. 60,000 where the longitudinal seams are single riveted and not bevelled.

In the case of upright fire boxes of donkey or similar boilers, 10 per cent. should be deducted from the constant given above, applicable to the respective classes of work.

indicate their state when tested with a hammer; the plates should therefore be occasionally drilled.

Before commencing the survey, it is prudent to question the engineer officers as to the tendency of boilers to flame; if flaming is a frequent occurrence, extra care must be taken in the survey, and in fixing the pressure to be allowed as the tensile strength of the plate, when heated, is often reduced to about four tons per square inch. Drain pipes must in all cases be fitted to superheaters in which a collection of water in the bottom is possible.

Safety valve for superheaters.

72. Superheaters that can be shut off from the main boilers must be fitted with parliamentary safety valve of sufficient size, but the least size passed should be 3 inches diameter.

The flat ends of all boilers, as far as the steam space extends, and the ends of superheaters, should be fitted with shield, or baffle-plates, where exposed to the hot gases in the uptake; as all plates subjected to the direct impact of heat or flame are liable to get injured unless covered with water.

STEEL BOILERS.

73. The following should guide the Surveyors when the general quality of the steel has been found suitable for marine boilers.

Maker's test.

74. The steel-makers or boiler-makers should test one or more strips cut from each plate for tensile strength and elongation, and stamp both results on a part of the plate, where they can be easily seen when the boiler is constructed.

Surveyor's tests.

75. The Surveyor is not obliged to witness the foregoing tests, although it is very desirable that he should, when his other duties will allow him to do so, but he should, however, select at least one in four of these plates, either at the steel works or the boiler-maker's works, and witness the testing of at least one strip cut from each selected plate.

Rivet tests.

76. A few rivets of each size should be selected, and should be turned and tested for tensile stress. The tensile stress should be from 28 tons to 32 tons per square inch, with a contraction of area of about 60 per cent.

Tensile and bending tests.

77. If for the plates from which the Surveyor selects the above proportions a greater stress is wished than is allowed for iron, tests for tensile stress and elongation should be made, and those for which no reduction of thickness is asked may be tested for resistance to bending if preferred.

Test strips.

78. The breadth of test strips for tensile stress should be about two inches, and the elongation, taken in a length of ten inches, should be about 25 per cent., and not less than 20 per cent. The test strips must be carefully prepared and measured, and they should be cut from the plate by a planing or shaping machine.

Bending tests.

79. The bending tests for plates *not* exposed to flame should be made with strips in their normal condition, but strips cut from furnaces, combustion boxes, &c., should be heated to a cherry red, then plunged into water of about 80°, and kept there until of the same temperature as the water, and then bent. The bending strips should not be less than two inches broad and 10 inches long, and they should be bent until they break, or until the sides are parallel at the distance from each other of not less than (3) three times the thickness of plate.

Tensile stress, &c.

80. The tensile stress of the plates *not* exposed to flame should be about 28 tons, and should not exceed 32 tons per square inch of section, and 28 tons should be the stress used in the calculations for cylindrical shells if the plate comply with all the conditions as stated herein; but when the minimum tensile stress of shell plates exceeds 28 tons, and allowance is wished for

the excess, the case should be specially submitted for the consideration of Government. The tensile stress of furnace flanging and combustion-box plates should range from 26 tons to 30 tons per square inch.

Annealing. 81. All plates that are punched, flanged, or locally heated must be carefully annealed after being so treated.

Perforating and annealing. 82. The rivet holes in the furnaces and longitudinal seams of cylindrical shells should be *drilled*, but if it is wished to punch them and afterwards bore or anneal the plates in a proper furnace, the proposed method of the punching and boring or annealing should be submitted for consideration before being done; but all punched holes should be made after bending.

In all cases where assent has been given to for plates to be punched after bending and then annealed, the makers should stamp the plates with the words "punched after bending and then annealed," and in all cases where assent has been given for punching and afterwards boring plates, the words "punched and then bored" should be stamped on the plates.

Stress on stays. 83. Bars for stays should be tested. Solid steel screwed stays which have not been welded or otherwise worked after heating may be allowed a working stress of 9,000 lb per square inch of net section, provided the tensile stress is from 28 to 30 tons per square inch and the elongation in 10 inches about 25 per cent. and not less than 20 per cent. Steel stays which have been welded or worked in the fire have been found to be unreliable, therefore they should not be passed.

Constants for flat surfaces. 84. If the flanging plates and those exposed to flame comply with the foregoing conditions, the constant in the Board of Trade rules for iron boilers may be increased as follows:—

The constants for flat surfaces when they are supported by stays screwed into the plate and riveted 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and nutted, or when the stays are nutted in the steam space, 25 per cent. This is also applicable to the constants for flat surfaces stiffened by revited washers or doubling strips and supported by nutted stays.

The constants for combustion-box girders 10 per cent.

Furnaces, plane and corrugated. 85. The furnace constants about 10 per cent. when plane. When new corrugated and machine-made, and practically true circles, the working pressure is found by the following formula, provided that the plane parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{7}{16}$ inch thick.

$\frac{12,500 \times T}{D}$ = working pressure.

T = thickness in inches.

D = mean diameter in inches.

(If the furnace is riveted in two or more lengths, the case should be submitted for consideration.)

Compressive stress on tube plates. 86. A greater compressive stress should not be allowed on tube plates than that found by the following formula:—

$$\frac{(D-d)\ T \times 20,000}{W \times D} = \text{working pressure.}$$

D = least horizontal distances between centres of tubes in inches.

d = inside diameter of tubes in inches.

T = thickness of tube plate in inches.

W = extreme width of combustion-box in inches from front of tube-plate to back of fire-box, or distance between combustion-box tube-plates when boiler is double-ended and the box common to the furnaces at both ends.

Plate and rivet section.

87. The rivet section, if of iron, in the longitudinal seams of cylindrical shells, where lapped and at least double riveted, should not be less than $\frac{1}{2}$ times the net plate section, but if steel rivets are used, their section should be at least $\frac{1}{1.75}$ of the net section, if the plate of the tensile stress of the rivets is not less than 28 tons and not more than 32 tons per square inch. Therefore in calculating the working pressure the percentage strength of the rivets may be found in the usual way by the foregoing rules, but in the case of iron rivets, the percentage found should be divided by $\frac{1}{2}$, and in the case of steel rivets by $\frac{1}{1.75}$, the result being the percentages required. If the percentage strength of the rivets by calculation is less than the calculated percentage strength of the plate, calculate the working pressure by both percentages. When using the percentage strength of the plate, use the nominal factor of safety suitable for the method of construction, as by the rules for iron boilers; but when using the percentage strength of rivets, use 5 as the factor of safety. The less of the two pressures so found is the working pressure to be allowed for the cylindrical portion of the shell.

Local heating to be avoided.

88. Local heating of the plates should be avoided, as many plates have failed from having been so treated.

Welding, &c.

Steel plates which have been welded should not be passed if subjected to a tensile stress, and those welded and subject to a compressive stress should be efficiently annealed.

In other respect the boilers should comply with the rules for iron boilers.

If the tests are to be made at the steel works, the boiler-makers should inform the Surveyors in their district when and where they will be made, so that the Surveyor from the nearest district to the steel works may be instructed to attend to them. The Surveyor should have due notice two or three days when the plates, &c., will be ready for the test pieces to be cut from them. (Surveyors' should report all cases of failures of steel plates, &c., which may come to their knowledge.)

Steel for superheaters, &c.

89. If steel is proposed to be used in superheaters, the particulars should be submitted to the Government for consideration; but in all cases it should be discouraged for this purpose.

This applies to the unshielded uptakes of all boilers, including ordinary vertical donkey boilers.

Makers of steel.

90. When the steel is not to be made by any of the following makers, the case will receive the special consideration of the Government, and this should be specially noted by the Surveyors:—

Messrs. Beardmore.
" J. Brown & Co.
" C. Cammell & Co.
Mr. D. Colville.
The Landore Steel Company.
The Leeds Forge Company.
The Steel Company of Scotland.
The Weerdale Iron and Coal Company.
The West Cumberland Iron and Steel Company.

Boiler tracings, &c.

91. Difficulty has been experienced with regard to the survey of steel boilers, owing to the fact that some makers were not aware, at the time the boilers were commenced, that a Survey certificate would be necessary, and the makers have therefore omitted to submit tracings until the boilers have been nearly completed. Tracings of boilers may therefore be received for examination upon payment of the usual fee of Rs. 50, and the Surveyors may proceed as far as witnessing the hydraulic test before

any further instalment of the survey fee is paid. Engineers and boiler makers should be advised of this arrangement.

BOILERS GENERAL.

Donkey boilers.

92. Donkey boilers that are in any way attached to, or connected with, the main boilers, or with the machinery used for propelling the vessel, must be surveyed and be fitted the same way as the main boilers, and have a water and steam gauge, and all other fittings complete, and, as regards safety valves, must comply with the same regulations as the main boilers.

Stop valves.

93. No boiler or steam chamber is to be so constructed, fitted, or arranged so that the escape of steam from it through the safety valve required by the Act of Parliament can be wholly, or partially, intercepted by the action of any other valve.

A stop valve must always be fitted between the boiler and the steam pipe, and, where two or more boilers are connected with a steam receiver or superheater, between each boiler and the superheater or steam receiver. The object of this is obvious, viz. to avoid the failure of all the boilers through the failure of one. The necks of stop valves should be as short as practicable.

Gauges, &c.

94. Each boiler must be fitted with a glass water-gauge, at least two test cocks, and steam-gauge; that is to say, each boiler must be fitted with all fittings as complete as if there were only one boiler. Boilers that fire both ends, and those of unusual width, must have water-gauges and test cocks at each end or side, as the case may be. When a steamer has more than one boiler, and these boilers are fitted with stop-valves, each boiler must be treated as a separate one, and have all the requisite fittings.

Boilers to be tested when too small to enter.

95. When the boilers are not large enough for the Surveyors to get into, they should see them tested by hydraulic pressure at every annual survey at least. The hydraulic test should also be applied at every intermediate survey if the Surveyor considers it necessary. In the case of old boilers the Surveyors must use their own judgment as to the necessary pressure to be applied. This is in no way to interfere with the instructions to test all new boilers to double their working pressure, nor with the proper internal examination of all boilers that are large enough for the Surveyors to get into.

Whenever it is only stays that prevent getting in, he may order their removal, and he must see them properly replaced before granting his declaration.

Surveyors not to go into hot boilers.

96. If the boiler is too hot for the Surveyor to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a declaration, until he can make an efficient internal examination.

Strength of boilers to be ascertained, and working pressure fixed by calculation.

97. Before testing a boiler, the Surveyor should examine it, take the necessary measurements, and calculate what the working pressure should be in accordance with the regulations, and only test to double the working pressure; if the test is not satisfactory the defects must be made good, and the boiler re-tested.

This instruction applies to superheaters and steam chests as well as to boilers.

The Surveyor who grants the declaration must examine the boilers thoroughly, and will be held responsible for the pressure allowed.

Hydraulic tes

98. Surveyors should see all new boilers, and boilers that have been taken out of the ship for a thorough repair, tested by hydraulic pressure up to at least double the working pressure that will be allowed previous to

the boilers being placed in the vessel, to test the workmanship, &c.; but the working pressure is to be determined by the strength of stays, thickness of plates, and strength of riveting, &c., and not by the hydraulic test.

The hydraulic test should in no case exceed twice the calculated working pressure of the boiler, and it is never to be applied until the boiler has been examined in accordance with paragraph and until the strength has been calculated from the necessary measurements taken from the boiler itself.

When the boilers are in the vessel the Surveyor may, at any time he thinks it necessary, before he gives a declaration, have them tested by hydraulic pressure to satisfy himself as to any doubtful part, or of places not easy of access, care being taken in the case of old boilers not to overstrain them; but the test must always exceed the working pressure.

Surveyors should pay particular attention to the examination and testing of steam pipes.

The hydraulic test should be applied to the boilers of all steamers that have not previously had a survey certificate, before a declaration is granted for them. The amount of the hydraulic pressure test and the date on which it was last applied to the boilers should be inserted in the Surveyor's declaration and recorded in the office boiler book.

Cast iron in boilers and steam-pipes.

99. In all boilers in which the Surveyors find that cast iron is employed in such a manner as to be subject to the pressure of steam or water, great care must be taken. Cast iron must not be used for stays, and Surveyors should also discourage the use of cast iron for chocks and saddles for boilers. Particular attention should be paid to the chocking of boilers, more especially when they are fired athwartships.

Pressure fixed by one Surveyor not to be increased by another.

100. A pressure once allowed on the boiler of a sea-going steam ship is not to be increased unless, in cases where a Surveyor is of opinion that an increased pressure may with safety be allowed, he has communicated with the Surveyor who last surveyed the vessel; and on learning the reasons why the existing pressure was formerly allowed, the Surveyor is of opinion that it may be increased.

SAFETY VALVES.

Provisions of the Act as regards safety-valves.

101. Every steam ship shall be provided with a safety valve upon each boiler, so constructed as to be out of the control of the engineer when the steam is up, and if such valve is in addition to the ordinary valve, it shall be so constructed as to have an area not less, and a pressure not greater, than the area of and pressure on that valve.

The Surveyors are instructed that in all *new boilers*, and whenever *alterations can be easily made*, the valve chest should be placed directly on the boiler; and the neck, or part between the chest and the flange which is bolted on to the boiler, should be as short as possible and be cast in one with the chest.

The Surveyors should note that it is not intended by this instruction that vessels with old boilers which have been previously passed with such an arrangement should be detained for the alterations to be carried out.

Of course in any case in which a Surveyor is of opinion that it is positively dangerous to have a length of pipe between the boilers and the safety valve chest, it is his duty at once to insist on the requisite alterations being made before granting a declaration.

If any person places an undue weight on the safety valve of *any* steam ship, or increases such weight beyond the limits fixed by the Engineer-Surveyor, he shall, in addition to any other liabilities he may incur by so doing, incur a penalty not exceeding one thousand rupees.

The Engineer-Surveyor shall declare, amongst other things, the limits of the weight to be placed on the safety valves; that the safety valves are such, and in such condition as required by these rules, and that the machinery is sufficient for the service for the time he fixes, and is in good condition for that time.

Area of safety-valves.

102. The area of Government safety valves, or (when there is more than one) the combined area of the Government safety valves should be not less per square foot of fire-grate surface than that given in the following table opposite the boiler pressure intended, provided the valves are not less than three inches in diameter. This applies to new vessels or vessels which have not received survey certificate.

When, however, the valves are of the common description, and are made in accordance with the tables, it will be necessary to fit them with springs having great elasticity, or to provide other means to keep the accumulation within moderate limits.

If there is only one safety valve on a main boiler, the Surveyor should not grant a declaration without first referring the case for special instructions.

In the case of small boilers, such as launch boilers, if it is wished to fit valves smaller than three inches diameter, the case should be submitted for orders.

Safety valve areas.

Examination of safety-valves.

103. The Surveyor, in his examination of the machinery and boilers, is particularly to direct his attention to the safety-valves, and whenever he considers it necessary, he is to satisfy himself as to the pressure on the boiler by actual trial.

The Surveyor is to fix the limits of the weights to be placed on the safety-valves, and the responsibility of not issuing a declaration before he is fully satisfied on the point is very grave. The law places on the Surveyors the responsibility of "declaring" that the boilers are in his judgment sufficient with the weights he states.

The Surveyor is to examine the whole of the valves, weights, and springs at every survey.

Surveyor to see valves weighted.

104. When the Surveyor has determined the amount of pressure, he is to see the valves weighted accordingly, and the weights or springs fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure. The limits of the weight on the valves is to be inserted in the declaration, and should it at any time come to a Surveyor's knowledge that the weights or the loading of the valve have been shifted, or otherwise altered, or that the valve has been in any way interfered with, so as to increase the pressure, he is at once to report the facts to Government.

Spring safety-valves.

105. If the following conditions are complied with, the Surveyor need raise no question as to the substitution of spring loaded valves for dead weighted valves:—

(1) That at least two separate valves are fitted to each boiler, except in the case of donkey or other small boilers, in which the grate surface does not exceed 14 square feet, in which case a single safety-valve may be passed, provided it is not less than three inches in diameter.

(2) That the valves are of the proper size.

(3) That the spring and valve be so cased in that it cannot be tampered with.

(4) That provision be made to prevent the valve flying off in case of the spring breaking.

(5) That the requisite safety-valve area is cased in the usual manner of Government valves.

(6) That screw lifting gear be provided to ease all the valves.

(7) That the size of the steel of which the spring is made is to be found by the following formula:—

$$\sqrt[3]{\frac{s \times D}{c}} = d:$$

s = the load on the spring in lb.

D = the diameter of the spring (from centre to centre of wire) in inches.

d = the diameter, or side of square, of the wire in inches.

c = 8,000 for round steel.

c = 11,000 for square steel.

(8) That the springs be protected from the steam and impurities issuing from the valves.

(9) That when valves are loaded by direct springs, that the compressing screw abuts against a metal stop or washer, when the load sanctioned by the Surveyor is on the valve.

In no case is the Surveyor to give a declaration for a spring-loaded valve, unless he has examined it and is acquainted with the details of its construction, and unless he has tried it under full steam, and full firing, for at least 20 minutes with the feed-water and stop valve shut off. If the accumulation of pressure exceeds 10 per cent. of the loaded pressure, he should not give his declaration.

106. It is clearly the duty of the masters and engineers of vessels to see, in the intervals between the surveys, that the Government safety-valve or valves, as well as the other safety-valves and the rest of the machinery, are in proper working order. There is no provision in the Indian Steam-Ships' Act, exempting the owner of any vessel, on the ground that she has been surveyed, from any liability, civil or criminal, to which he would otherwise be subject. The Government safety-valve is to be out of the control of the engineer when the steam is up; this enactment, far from implying that he is not to have access to it, and to see to its working at proper intervals when the vessel is in port, rather implies the contrary; and the master should take care that the engineer has access to it for that purpose. A substantial lock, that cannot be easily tampered with, and as far as possible weather-proof, should be used for locking up the safety-valve boxes.

Owners, masters, and engineers to see that valves are kept in proper order.

107. In witnessing the hydraulic tests of boilers, &c., and in witnessing all safety-valve tests for accumulation of pressure, the Surveyors are to use the pressure gauges supplied to them for the purpose.

All tests for pressure and accumulation are to be made with proper gauges.

MACHINERY, &C.

108. The machinery to be surveyed comprises the engines and boilers used for propelling the vessel, and all the machinery connected therewith. The boilers of donkey engines are to be surveyed with the boilers and machinery of the vessel, when they are in any way connected with them.

What machinery is to be surveyed.

109. Surveyors should, before granting declarations for any period exceeding six months, be careful when examining the machinery; (1) to have the upper brasses of all bearings taken off; (2) the shaft turned round and carefully examined; (3) the cylinder covers and junk rings lifted for examination of the pistons and cylinders; (4) the slide covers or bonnets removed for examination of the slides, and if necessary, the slides taken out; (5) the air and circulating pump covers lifted for examination of the pump buckets and valves; (6) the covers of all feed and bilge pump valves removed for the examination of the valves; (7) all discharge valves and sea-cocks taken out for examination; (8) the propeller shaft to be drawn when necessary, and it and the screw to be examined, and in all cases in which the shaft is drawn, it is to be seen again after the screw is secured in its place; (9) the bridges and fire-bars to be removed to permit of a thorough examination of the boilers and furnaces; (10) all cocks and valves on the boilers to be taken out and examined.

When to be taken to piece for examination.

When a Surveyor has seen the machinery of a new steamer in the shop before it was put together, and is satisfied with it, it will not be necessary to have it again opened up on board the ship on the first survey for examination, unless in the Surveyor's judgment it is necessary after the vessel has been tried under steam.

It will rest with owners to determine whether or not they will have a certificate for any period exceeding six months; but if they do so determine, then the above instructions are to be complied with before a declaration is granted.

The above instructions are also to apply at least once a year to the survey of all sea-going steamers, with the exception named in the next paragraph, whatever may be the period for which the declarations are given, and to carry out the whole of the above, it must be done when the vessel is in dry dock.

After the examination of the parts has been made as above, the machinery must be tried under steam at full pressure.

Examination to be carefully made.

110. In the examination of the machinery and boilers the Surveyor should in no case give a declaration without thoroughly satisfying himself that both the boilers and the machinery are sufficient for the service intended, and in good condition.

Separate feed arrangements to be fitted.

111. The boilers of all new sea-going vessels, passenger tugs, and other small passenger vessels, should be fitted with separate feeding arrangements in addition to, but unconnected with, the main feed pipes and valves. In very small vessels an efficient hand pump, instead of the donkey pump, may be passed if the Surveyor has satisfied himself as to its efficiency when steam is up, and provided there are separate feed pipes and valves as directed above. This instruction is to apply also in the case of old vessels of the above description, when being fitted with new boilers.

The Surveyors should discourage the practice of using the same pump for the bilges and for feeding boilers.

Cocks, valves and pipes communicating with ship's side.

112. All inlets or outlets in the bottom or side of a vessel near to, at, or below the deep-load water-line other than the outlets of watercloset, soil, scupper, lavatory, and urinal pipes, must have cocks or valves fitted between the pipes and the ship's side or bottom; such cocks or valves must be attached to the skin of the ship, and be so arranged that they can be easily and expeditiously opened or closed at any time; and the cocks, valves, and the whole length of the pipes should be accessible at all times.

Guards on blow-off cocks.

113. With a view to the prevention of accidents to boilers through the blow-off cocks being left open after the boiler is run up, and to prevent water getting accidentally or intentionally into the ship by cocks being left open, and also to prevent the donkey engine becoming useless when used for feeding the boilers, all blow-off cocks and sea connexions are to be fitted with a guard over the plug, with a featherway in the same, and a key on the spanner, so that the spanner cannot be taken out unless the plug or cock is closed. One cock is to be fitted to the boiler, and another cock on the skin of the ship or on the side of the Kingston valve.

Non-return valves to pipes.

114. In all cases where pipes are so led or placed that water can run from the boiler or the sea into the bilge, either by accidentally or intentionally leaving a cock or valve open, they should be fitted with a non-return valve and a screw not attached, but which will set the valve down in its seat when necessary; the only exception to this is the firemen's ash cock, which should have a cock or valve on the ship's side, and be above the stoke-hole plates.

Exhaust pipe of donkey engine not led through ship's side

115. The exhaust pipe for the donkey engine must not be led through the ship's side, but must be led on deck or into the main waste-steam pipe; and in all cases it should have a drain-cock on it. This will prevent water getting into the pipe when the ship is deeply laden or rolling.

Cocks or valves standing exceptional distances from the ship's plating, that is where the necks are longer than is necessary for making the joint, are to be discouraged, and if passed, they should be made of brass or gun-metal, and well bracketed.

Non-return valves on feed cocks.

116. Where the feed-cock or valve is so placed and arranged that more than one boiler can be fed at the same time through this cock or valve, a non-return valve must be fitted between each boiler and this cock or valve; but it is very desirable that all feed-cocks or valves should have a non-return valve fitted between the boiler and the cock or valve.

Cast-iron stand-pipes or cocks through which hot brine has to pass must never be passed.

117. In the case of the outlets of watercloset, soil, scupper, lavatory and urinal pipes which are below the weather deck, there should be an elbow of good substantial metal other than cast-iron or lead, and the pipe connected with this elbow should, if of lead, have a sufficient bend to provide for expansion in the pipe or any movement from the working of the ship. Pipes, no matter of what material they may be constructed, are never to be fitted in a direct line between the aparture in the ship's side and its connexion with the deck, or closet, or other fitting. Unless the waterclosets and scupper pipes and their outlets are fitted in the way hereby required, or in a manner that will in the opinion of the Surveyor be more or equally efficient and safe, the Surveyor should refuse to grant a declaration. This paragraph applies only to sea-going vessels coming under survey for the first time. Outlets of waterclosets and scupper pipes.

118. No question as to gear need be raised if the following spare gear and stores are supplied. The heavier portions of this gear must have been fitted and tried in its place, and must be kept on board where access can at all times be had to it:— Spare gear and stores to be carried.

1 pair of connecting-rod brasses.
1 air-pump bucket, and rod, with guide.
1 circulating pump bucket and rod.
1 air-pump head valve, seat, and guard.
1 set of india-rubber valves for air pumps.
1 circulating pump head valve, seat and guard.
1 set of india-rubber valves for circulating pumps.
2 main bearing bolts and nuts.
2 connecting-rod bolts and nuts.
2 piston-rod bolts and nuts.
8 screw shaft coupling bolts and nuts.
1 set of piston springs.
3 sets, if of india-rubber, or 1 set if of metal, of feed-pump valves and seats.
3 sets, if of india-rubber, or 1 set if of metal, of bilge pump valves and seats.
1 hydrometer.
Boiler tubes, 3 for each boiler.
100 iron assorted bolts, nuts, and washers, screwed, but need not be turned.
12 brass bolts and nuts, assorted, turned and fitted.
50 iron " " " "
60 condenser tubes.
100 sets of packing for condenser tube ends, or an equivalent.
At least one spare spring of each size for escape valves.
1 set of water gauge glasses.
$\frac{1}{10}$th of the total number of fire-bars necessary.
3 plates of iron, assorted.
6 bars of iron, assorted.
1 complete set of stocks, dies, and taps, suitable for the engines.
1 smith's anvil.
1 fitter's vice.
Ratchet-braces, and suitable drills.
1 copper or metal hammer.
Suitable blocks and tacking for lifting weights.
1 dozen files, assorted, and handles for the same.
1 set of drifts, or expanders for boiler tubes.
1 set of safety valve springs (if so fitted) for every four valves; if there are not four valves, then at least one set of springs must be carried.
1 screw jack.
And a set of engineer's tools suitable for the service, including hammers and chisels for vice and forge; solder and soldering iron; sheets of tin and copper; spelter; muriatic acid, or other equivalent, &c., &c.

119. Main, and tunnel, and propeller shafts must not be passed without reference to Government if found Size of shafting.

to be less in diameter than that found by the following rules :—

For compound engine, with two cylinders :—

$$\text{Diameter of shaft in inches} = \sqrt[3]{\frac{(d^2 \times P) + (D^2 \times 15)}{f}} C,$$

where d=diameter of high pressure cylinder in inches.
D=diameter of low pressure cylinder in inches.
P=boiler pressure.
C=length of crank in inches.
f=constant from following table.

For ordinary condensing engines, with two cylinders, when the pressure is not low :—

$$\text{Diameter of shaft in inches} = \sqrt[3]{\frac{D^2 \times P \times 2}{f}} C,$$

where D=diameter of cylinder.
P=boiler pressure.
C=length of crank in inches.
f=constant from following table.

TABLE.

Constant.	Angle between Cranks.	For Crank and Propeller Shafts.	For Tunnel Shaft.

Surveyors should not grant a declaration for twelve months whenever they have any doubt whatever as to the efficiency of any portion of the vessel, or her machinery, for such period.

Distilling apparatus for making fresh water.

120. The distilling apparatus of emigrant ships must be taken to pieces every voyage, except in the cases of steamers holding passenger certificates, which must be taken to pieces at least once every six months, or oftener, if the Surveyor thinks it necessary, and the tubes or coils tested to at least twice the highest working pressure of the boiler from which the apparatus can be worked, and the machinery and boilers thoroughly examined. After the distilling apparatus is put together again, it must be tested as to the quantity and quality of the water made.

How to be examined, and what is to be capable of doing.

The water must be perfectly cool, pure, and fit to drink immediately it is drawn off from the filter. No distilling apparatus is to be passed, unless fitted with a suitable sized filter, charged with animal charcoal, the charcoal must be taken out, cleansed, or renewed every voyage, except in cases of steamers holding passenger certificates, in which case it need not be taken out, unless the Surveyor think it necessary, oftener than every six months. In such cases (where sea-going steamers are coming frequently in for survey under the Emigration Acts, and such complete examination is not made previous to each voyage,) the Surveyor will be held wholly responsible for the efficiency of the apparatus; but the quantity and quality of the water

must be tried previous to every voyage. It therefore rests with him whether he orders the distilling apparatus to be taken to pieces every voyage or not. The boilers must be at least equal in strength to the boilers of passenger steamers, and must have the same fittings as is necessary for them, in accordance with the Regulations. The Surveyor must satisfy himself as to the capability of the man who is to have charge of the apparatus.

The steam for working the apparatus is not to be taken from the main boilers. No exhaust-steam must be permitted to go into the condenser if appliances for the introduction of lubricants be fitted to the steam pipes, or steam cylinder of the pumping engine. The boiler of the apparatus must not be filled or fed with water from the surface condensers of the main engines, and must not be fitted with cocks, &c., for the introduction of tallow or oil.

When the water is pumped into the condenser, there should be an escape valve fitted to it, which cannot be readily tampered with ; and if the condensing portion of the apparatus or the cooler and filter be unfit to bear the pressure on the boiler, an efficient safety-valve, that cannot be readily overloaded, should be fitted between the steam-pipe and the apparatus.

Pump for distilling apparatus to be fitted as fire-engine.

121. It is advisable that the donkey-engine for pumping water through the condenser be so fitted that it can be available in case of emergency for extinguishing fire in any part of the ship; a leather hose, with suitable bends and conductors, are to be supplied for this purpose.

Stores to be carried with distilling apparatus.

122. The following list of tools and materials must be provided for distilling apparatus:—

1 set of stoking tools.
1 scaling tool.
1 spanner for boiler doors.
1 set of fire-bars, suitable for boiler.
1 14-inch flat bastard file.
1 14-inch half-round file.
1 10-inch round file.
3 file handles.
2 hand cold-chisels.
1 chipping hammer.
1 pair patent gas-tongs.
1 soldering iron.
10 lbs. of solder.
2 „ of rosin.
6 gauge-glasses.
24 india-rubber gauge-glass washers.
30 bolts and nuts, assorted.
1 slide-rod for donkey-pump.
5 lbs. spun-yarn.
10 „ cotton-waste.
1 deal box, with lock complete.
2 gallons machinery oil.
Animal charcoal sufficient to charge the filter at least twice.
1 can for machinery oil.
1 oil-feeder.
1 small bench vice.
1 ratchet-brace.
4 drills, assorted.
1 set dies and taps, suitable for the bolts.
2 glass salinometers.
1 hydrometer and pot.
1 shifting spanner.
1 lamp for engineer.

And other articles that the particular distiller and boiler supplied may, in the Surveyor's judgment, require.

List of distilling apparatus that have been approved by the :—

1. Normandy's patent.
2. Winchester and Graveley's patent.
3. Chaptin & Co.'s patent.
4. Brown & Co.'s patent.
5. Fraser's patent.
6. Hocking & Co.'s patent.
7. Kirkaldy's patent.
8. Siddeley & Co.'s patent.
9. Rayner's patent.
10. Union S. S. Co.'s patent.
11. Willoughby & Co.'s patent.

ACCIDENTS AND DAMAGES.

Damage to be inspected.

123. In all cases in which a steam-ship has sustained damage from any accident, or other cause, affecting her seaworthiness or efficiency in any part of her hull, equipments, or machinery, the surveyors of the port where the vessel may be, are to go on board and ascertain the extent of the damage. In doing so they will take care not to make any change in the position or condition of things on board, which would be at all likely to affect any legal evidence, should an enquiry into the case afterwards be considered necessary.

It is extremely important that the vessel should be surveyed and a report forwarded as early as possible.

Report to be sent to Government.

124. They are forthwith to send a report, together with a rough figured sketch, showing the position of all the bulkheads, and distinguishing the compartments that may have been injured, to the Government, in order that the certificate may be cancelled, if necessary. In this report they are to state whether the vessel is rendered inefficient or unseaworthy either in hull or machinery; and whether, in their opinion, the certificate should be cancelled or only temporarily withdrawn.

Lights to be examined.

125. The Surveyor should at the same time examine the lights and screens of the vessel, and if the vessel with which she has been in collision is in port, he should examine the lights of that vessel also, and should forward to the Government, in a separate report, a statement respecting the size, condition, and place of her lamps and screens, and whether, in his opinion, they comply with the requirements of the regulations, and if not, in what respects they are deficient.

The Surveyors shall be very careful in wording their reports as to lights and screens, as they may be used in evidence in cases taken into court.

Surveyor may order vessel to be docked.

126. If, in consequence of any accident to a steam-ship, or for any other reason, the Surveyor considers it necessary to require the vessel to be taken into dock for the purpose of surveying the hull thereof, he may do so, but he is to be cautious never to exercise this power unless the circumstances of the case actually require it.

Certificate to be held during repairs.

127. Unless directions to the contrary are given, the Surveyor is to hold the certificate of the vessel during the time she is under repair, and for this purpose he is to require it of the master, unless the damage is such that in the Surveyor's judgment the certificate should be cancelled, in which case he should forward it to the officer authorized to grant certificates of survey under the Act, who will obtain the orders of Government on the subject. In all cases of serious damage the certificates should be cancelled.

Certificate may be endorsed if it has not been cancelled.

128. When the vessel is in every respect rendered sea-worthy and efficient, both in hull and machinery, to the entire satisfaction of the Surveyor, he is to put an endorsement on the back of the certificate and duplicate, if they have not previously been cancelled

to the effect that the damage has been made good so as to last for the period for which the certificate was granted, and return the certificate to the master or owner, or his agent, and allow the vessel to proceed.

CERTIFICATES OF MASTERS, MATES, AND ENGINEERS.

Surveyors inspect certificates.

129. It will be the duty of the Surveyor to report in his declaration that the certificates of the Master, Mates, Engineers, and Engine-drivers of the vessel under survey are such as are required by the Act.

The Surveyors are to state on their declarations, in the appropriate place, the number and description of these certificates.

The details of the officers' certificates should be taken from the certificates themselves at every survey, the Surveyors carefully noting that by their certificates the officers are qualified for the positions they occupy.

PASSENGER ACCOMMODATION.*

Passenger in sea-going steam-ships

130. The upper weather deck and the upper surface of the poop, forecastle, and spar deck being exposed to the weather are not to be included in the measurements for passengers in sea-going steamers, during the foul season as defined by Government notification No. 1366, dated Simla, 26th May 1882, nor on voyages extending to 120 hours and upwards; nor are the poop, round-house, or deck-house to be measured for passengers, unless they form part of the permanent structure of the vessel. They should in all cases be railed round at the top to prevent passengers from falling overboard.

Care should be taken that the means provided for ventilation are sufficient to allow of a good supply of air in the event of the hatches being closed in bad weather. Places ventilated by hatches only, or in which provision is not made for a sufficient supply of air and light under *ALL* circumstances, should not be measured for passengers.

Divisors for space check.

131. Sea-going steam-ships carrying more than 12 passengers, and not coming within the operation of the Passengers Act, 1876, are to be measured as follows:—

Saloon or 1st class.—The number of properly constructed fixed berths or sofas that are fitted determine the number of passengers to be allowed, if sufficient light and ventilation is provided and a reasonable amount of floor space—2nd class.—The number is found in the same way as the 1st class. The number of 3rd-class passengers may be determined in like manner, if berths are fitted; if not, the number of passengers for each deck shall be determined according to the following scale:—

	Fair season, square feet.	Foul season, square feet.	Long voyage.
Hurricane deck, bridge or poop ...	... 6	0	0
Main or upper deck	... 6	9	0
Upper 'tween decks	... 9	9	9
Lower „ „	... 12	15	15

When 'tween deck passengers are carried, for each person so carried a space of 4 square feet is to be allowed on the upper deck or hurricane deck, bridge or poop.

The height of between decks to be in no case less than 6 feet from deck to deck when 'tween deck passengers are carried

The breadth of the deck is taken inside the waterway, or at the greatest tumble home, if the sides do tumble home.

* Detailed instructions as to the proper mode of ascertaining the maximum number of passengers to be carried under the different classes of passenger certificates will be found in the appendix. (See Appendix A.)

Deduction when stores are carried in passenger space.

132. When cargo or stores are carried in the space measured for passengers, the area in superficial feet of deck space so occupied is to be deducted.

In the following rules the words "deck passengers" are intended to include all passengers, whether carried on deck or in the cabins, except passengers entered as 2nd class or saloon passengers in the way bill.

Water-closets in sea-going ships.

133. In addition to, and exclusive of, closets for cabin and saloon passengers, closets are to be provided for the *exclusive use of deck passengers* in the ratio of three for every two hundred deck passengers allowed by the survey certificate, and a fair proportion are to be allotted to the sole use of women and children, and so marked outside. Clear passages to these closets must always be maintained. In no case is a less number than two to be provided. These closets should be clean, well lighted, and well drained, and must be of sufficient height and size, and effectually protected from weather and sea.

Arrangement necessary when cattle are carried

134. If cattle are carried under cover on the same level deck as passengers, they are to be separated from the passenger space by a moveable close bulkhead running athwartships across the deck, and extending from the deck to the covering above, or must be otherwise efficiently separated.

When the cattle are not under cover, the space occupied by the cattle shall be effectually shut off from the passenger space by bulk-heads, wooden partitions, or otherwise. The partitions need not be close; but efficient wash-boards must be fitted to prevent the dung or urine of the cattle from getting on to the passenger space.

If cattle are carried either in the 'tween decks or holds, then the passenger space must be effectually shut off from the cattle space, and separately ventilated, so that no effluvia from the cattle space can escape into the passenger space.

135. The Surveyors should measure the ship in sections or parts, as set forth in the applications for survey, taking care that some definite limits, or some mark, or conspicuous object, indicates the boundary of each space which is measured separately.

The deck space set apart for deck or third class passengers is always to be measured from abaft the windlass (as at present), to a mark which, in paddle steamers, shall be placed over the shafts, and in other vessels shall be an arbitrary line marked vertically on the house or bulwarks amidships, or as near thereto as convenient. From this mark aft the deck space is to be measured as far as the deck or third class passengers accommodation extends, whether to a break or raised quarter-deck; to a poop or the entire after length of the deck, to the wheel, as the case may be. The breadth of measurement shall be to a point which affords good and convenient foot-room.

Spaces on deck for first class passengers, and for all passengers other than those included in the category of deck or third class passengers, are to be measured in a similar manner.

The breadths are taken from inside the gutter waterway, or the inside edge of the raised covering board, or inside edge of the rail, if the bulwarks tumble home further than the inside edge of water-way or covering board. Clear area means the space after all incumbrances, such as hatchways, skylights, companions, steam-chest casings, funnel casings, wheel, windlass, binnacles, masts, dunnage for luggage, boats carried inboard, and fittings for cattle, &c., are deducted, and in no case is the crew space to be included.

Where cargo, cattle, &c., are carried in the space measured for passengers in sea-going passenger

[Second Publication.]

NOTICE.

The 6th November 1885.—The following draft of Rules, which it is proposed to issue under section 29 of Act VI of 1884 and section 36 of Act VII of 1884, is published for general information. These rules will be taken into consideration on the expiry of a month from the date of their first publication in the *Calcutta Gazette*; and the Lieutenant-Governor will receive and give due attention to any objections or suggestions which may be made by any person within that period.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

Rules for the examination of, and grant of Certificates to, Masters of Inland Steam Vessels under section 29, *Act VI of* 1884.

1. Candidates for certificates as first class Masters of Inland Steam vessels must be not less than twenty-one years of age and must have served either three years at sea and three years as Mate of a river steamer or Master of a flat, or six years as Mate of a river steamer or Master of a river flat.

2. Every such Candidate shall apply for permission to appear for examination in a printed form* to be filled up by him and forwarded to the Port Officer, Calcutta, together with such documentary evidence as shall satisfy the Port Officer that the Candidate has complied with the conditions of Rule 66 above, and that he is of sober habits and of good character. Each Candidate shall forward with his application a fee of Rs. 16, which will not be returned in case of failure.

* Copies will be supplied to intending Candidates by the Port Officer, Calcutta, on application.

3. The Port Officer shall notify to accepted Candidates the date and hour of examination, in fixing which he shall have due regard to the convenience of their employers. The fees of any Candidate who is not accepted shall be returned to him.

4. The examination of Candidates shall ordinarily be conducted by the Committee which sits quarterly for the examination of Pilots, assisted by two persons selected in each case by the Port Officer, holding certificates as first class Masters of Inland Steam Vessels, duly in force under these rules. But the Port Officer may at any time convene a Special Committee for the examination of Candidates under these rules.

5. Before proceeding to examine any Candidate in the manner provided in the rule next following, the Committee shall carefully test his ability to distinguish the following colours which enter largely into the combinations of signals by day and night, viz. black, white, red, green, yellow, and blue. In the event of any Candidate failing to satisfy completely the usual tests for colour-blindness in respect of all of these colours, the Committee will decline to proceed with his examination, and will report the case through the Port Officer for the information of the local Government.

6. The Committee will examine each Candidate apart, and *viva voce*, in each and all of the following subjects:—

(1).—The names and courses of the river reaches from Calcutta to Mud Point, and the extent of the sands in such reaches.

(2).—The sets of the tides within the said limits.

(3).—The names of all points in the river within the said limits.

(4).—The candidate's general knowledge of soundings in the channels and over the sands within the said limits.

(5).—The tracks over the Moyapore and Royapore flats, the Fultah tracks, and the Eastern and Western Guts.

(6).—The marks for fair channels or hauling in to reaches where such exist.

(7).—The marks for the limits of sands where such exist.

(8).—The rules of the road.

(9).—The management of river steamers under all contingencies of meeting, overtaking, and passing vessels in all possible positions within the limits described in No. 1.

(10).—The Tide Table.

(11).—The rules of the Port of Calcutta including the prescribed Storm Signals.

(12).—The provisions of Act VI of 1884, and the rules framed under it.

7. If the Candidate satisfy the Committee as to his knowledge of the subjects set forth in the foregoing rule, and generally as to his competency to command an inland river steamer, they shall certify the same to the Port Officer, who will then grant a certificate of such competency in the form appended to these rules

8. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate and the other shall be kept and recorded by the Port Office.

9. No Candidate who fails to satisfy the Committee shall be at liberty to submit a fresh application for examination until six months have passed from the date of such failure.

10. A candidate for a certificate as second class Master of an Inland Steam vessel must produce satisfactory certificates of sobriety and intelligence, and that he has served four years as mate of a small steam vessel or helmsman of a large steam vessel, and shall be examined by the examining body defined in rule 69 *viva voce* as to his knowledge in the following subjects:—Colours, rule of the road and lights, management of small river steamers, rules of the Port of Calcutta and storm signals.

11. A fee of Rs. 6 will be charged, which will not be returned in case of failure.

By the Honourable the Lieutenant-Governor of Bengal.

Government of Bengal.

Certificate of Competency

AS

FIRST CLASS MASTER OF AN INLAND STEAM VESSEL UNDER ACT VI OF 1884.

To

Mr. _____

Whereas *it has been reported to me that you have been found, after examination, duly qualified to fulfil the duties of First-class Master of an Inland Steam Vessel under Act VI of* 1884, *I do hereby grant you this CERTIFICATE OF COMPETENCY as such First-class Master.*

Given *under my* Hand and Seal, By order of the Government of Bengal,

Port Officer, Calcutta.

This _____ *day of* _____.

Registered at the Office of the Port Officer.

No. of Certificate

Address of Owner _____

Date and Place of Birth _____

Signature _____

N.B.—Any person other than the owner thereof becoming possessed of this Certificate is required to transmit it forthwith to the Port Officer, Calcutta.

Issued at the Port of Calcutta on the _____ *day of* _____ 18____.

By the Honourable the Lieutenant-Governor of Bengal.

Government of Bengal.

Certificate of Competency

AS

SECOND CLASS MASTER OF AN INLAND STEAM VESSEL UNDER ACT VI OF 1884.

To

Mr. _____

Whereas *it has been reported to me that you have been found, after examination, duly qualified to fulfil the duties of Second-class Master of an Inland Steam Vessel under Act VI of* 1884, *I do hereby grant you this CERTIFICATE OF COMPETENCY as such Second-class Master.*

Given *under my* Hand and Seal,

By order of the Government of Bengal,

Port Officer, Calcutta.

This _____ *day of* _____ 18____.

Registered at the Office of the Port Officer.

No. of Certificate

Address of Owner _____

Date and Place of Birth _____

Signature _____

N.B.—Any person other than the owner thereof becoming possessed of this Certificate is required to transmit it forthwith to the Port Officer, Calcutta.

Issued at the Port of Calcutta on the _____ *day of* _____ 18____.

REGULATIONS

RELATING TO THE

EXAMINATIONS OF ENGINEERS AND ENGINE-DRIVERS.

UNDER SECTION 29, ACT VI OF 1884, AND SECTION 36, ACT VII OF 1884.

EXAMINATION OF ENGINEERS FOR CERTIFICATES OF COMPETENCY.

Preliminary.

The penalties incurred by persons proceeding to sea in the capacity of Engineers or Engine-drivers without possessing the necessary certificate are laid down in the Indian Steam Ships Act, VII of 1884, and the Inland Steam Vessels Act, VI of 1884.

Certificates of competency granted to persons who pass requisite examinations.

1. CERTIFICATES of competency will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions.

2. Examinations will be held once every two months by the Chief Engineer of the Dockyard, and two Engineers who will be appointed by the local Government under section 22 of Act VI of 1884, and section 26 of Act VII of 1884. The Chief Engineer will be the permanent President of the Examining Committee, and the other members will usually be selected from the Superintending Engineers of the different Steam Companies in the port. Each examiner will receive a fee of Rs. 32 for the examination.

3. Every certificate of competency shall be made in duplicate, and one copy shall be delivered to the person entitled to the certificate and the other shall be kept and recorded by the Port Officer.

Examinations continued till all the candidates are examined.

4. The examinations will commence early in the forenoon and will be continued from day to day until all the candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Application how to be made.

5. The application for examination is to be made on Form Exn. 3, which may be obtained at the Port Office. The Exn. 3 properly filled in, together with the Candidate's testimonials, must be lodged with the Port Officer not later than the day before the day of examination.

Testimonials required.

6. Applicants will be required to produce, in addition to the usual Forms of Discharge, satisfactory testimonials as to sobriety, experience, ability, and general good conduct for at least the 12 months immediately preceding the date of application to be examined, and without producing them no person will be examined. If the service has been on shore the testimonial must be signed by an Employer, if at sea by the Master Managing Owner, and Chief or Superintending Engineer.

7. As such testimonials and discharges have to be verified before the candidates can be examined, it is desirable that they should be handed in, together with the Form Exn. 3, as early as possible.

Testimonials of Foreigners.

8. The testimonials of servitude of Foreigners and of British Seamen serving in foreign vessels which cannot be verified by the Port Officer must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Local Government.

Certificate as to age.

9. Should any doubt exist as to the age of a Candidate he will be required to produce a Certificate of Birth or Baptism.

Foreigners to know English.

10. Foreigners must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel.

Verification of services, &c., by Articles.

11. Services which cannot be verified by proper entries in the Articles of the Ships in which the Candidates have served cannot be counted.

12. Service performed on rivers, or within smooth or partially smooth water limits, cannot be accepted, except for inland steamers.

Assistant Engineer.

13. Service entered upon a Ship's Articles as having been performed in the capacity of Assistant Engineer must be supported by proof of the Candidate having acted as 2nd, 3rd, 4th, &c., Engineer, as the case may be.

Service in Home or Coasting Trade.

14. The service required by the Regulations to qualify a candidate for examination is to be regarded as referring to service in the Foreign Trade only. Service in the Home or Coasting Trade must amount to at least half as much again as that required by the Regulations to make up for the time spent in Port, *e.g.*, for every twelve months' service under the Regulations, eighteen months' service in Home Trade or Coasting Vessels will be required.

Service as Engineer only accepted as qualifying service.

15. Service in the engine-room (afterwards referred to) for qualifying a candidate to be examined for a Second-class Engineer's Certificate must be only in those capacities which afford opportunities of obtaining practical experience as an engineer; and service in the capacity of fireman stoker, donkeyman, greaser, winchman, labourer, engineer's steward, or any other capacity than that of engineer taking watch will not be accepted

Service as Third Engineer.

16. Service as a Third Engineer in Steamers, where more than three Engineers are carried, their names being entered on the Articles in their respective ratings on board, may be accepted as equivalent to service as Second Engineer for qualifying a candidate for examination for a First-class Engineer's Certificate, provided the candidate has been in possession of a Second-class Engineer's Certificate (Imperial or under an Order in Council) during the performance of such service, and his name has been entered on the Articles as Third Engineer.

Service as Second Engineer where Certificate not required.

17. If a candidate has served in the Engine-Room with a Second-class Certificate in the capacity of a Second Engineer in Foreign-going Steam Ships under 100 horse-power or in Home Trade Passenger Steam Ships, which are not required by law to carry a certificated Second Engineer, his service may be accepted without reference to the vessel's horse-power, provided he has been on the ship's articles as Second Engineer, and produces certificates of discharge as Second Engineer, for the required period.

First-class Certificates without Second.

18. The Port Officer may see fit to allow an applicant who, in consequence of service abroad, has been unable to obtain a Second-class Certificate, to be examined for a First-class Certificate, without first obtaining a Certificate of the lower grade, provided he is able to satisfy him as to the satisfactory character of his services.

Unsuccessful candidates may in certain cases receive Certificates for inferior grade.

19. In such cases (para. 17) or in cases where the candidate is already in possession of a Certificate of Service, should he fail to pass the examination for the higher grade, but passes the examination for the lower grade, he may receive a Certificate accordingly, but no part of the fee will be returned.

Consequence of failure in such cases.

20. A candidate who under the above regulation (para. 17) has been permitted to be examined for a First-class Certificate without first obtaining a Second-class Certificate of Competency, and who fails in his *viva voce* examination, may not be re-examined for a Certificate of the higher grade until he has served 12 months as Second Engineer with a Second-class Engineer's Certificate of Competency as required by the Regulations.

21. If the candidate fails altogether, *i.e.*, both in the examination for the lower as well as for the higher grade of Certificate (para. 17) he may be re-examined for a *Second-class Certificate only*, subject to the usual regulations relating to failure.

Inaccurate statements of service.

22. Every person who makes, or procures to be made, or assists in making, any false representation for the purpose of obtaining for himself or for any other person a Certificate of Competency, shall for each offence be liable to punishment under chapters V and XI of the Indian Penal Code.

23. These provisions will be *strictly enforced* by the Local Government, and any candidate for a Certificate of Competency as First or Second Engineer who shall, for the purpose of obtaining any such Certificate, present to the Examiner any "application to be examined for a Certificate of Competency" (Exn. 3.), or statutory declaration containing any false or inaccurate statement of service, and any other person who shall make or prepare, or assist in making or preparing, any such false or inaccurate statement will be *prosecuted*.

If after passing examination services are found to have been insufficient.

24. If after a candidate has passed his examination it is discovered on further investigation, *e.g.*, by verification on the part of the Port Officer that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, it will not be granted to him; but if the Local Government are satisfied that the error in the calculation of his services did not occur through any fault or wilful misrepresentation on his part, the Certificate may be issued to him, or he may be allowed to go up for re-examination without payment of further fee, when he has performed the amount of service in which he was deficient as the Local Government may direct.

Certificate of lower grade may be granted on certain conditions.

25. If, in such a case, the applicant's services are sufficient to entitle him to receive a Certificate of a lower grade, provided as aforesaid he has not wilfully misrepresented the amount of his services, an Inferior Certificate may be granted to him, and the difference between the fee paid by him for the Superior Certificate and the fee payable for the Inferior Certificate may be placed to his credit.

Must be re-examined for certificate of higher grade.

26. In such a case when the applicant has by further service made up the time in which he was found to be short, he may be required, before he can receive the higher Certificate, to be re-examined in all the subjects.

Qualifications for Certificates of Competency

27. AS ENGINE-DRIVERS.

a. Such certificates of competency will be granted only to those persons who possess the qualifications hereinafter detailed and otherwise comply with the requisite conditions.

b. Applications for such certificates of competency are to be made to the Port Officer, on whose recommendation examiners will be appointed to test the qualifications of candidates under the following rules.

c. A candidate for a certificate of competency under these rules must have attained the age of twenty-two years.

d. He must have the testimonial shown in one of the appendices to this code of rules filled up by the engineer with whom he has last served, or his other testimonials must contain all the particulars therein required.

e. The fee for examination under these rules will be ten rupees, and the amount must be remitted with the application to the Port Officer. If a candidate fails, no part of the fee he has paid will be returned to him.

f. Such certificates will be granted by the Port Officer in the form prescribed in one of the appendices to this code.

g. In case of failure, candidates may be re-examined *de novo* after a lapse of six months, if the past examination showed that they might reasonably be expected to qualify.

FOR INLAND STEAMERS UNDER ACT VI OF 1884.

a. He must have been three years principal serang or tindal in the engine-room of a steamer, or have been three years in charges of the engine of a factory or mill under a European manager or engineer, as well as one year principal serang or tindal or assistant engineer in the engine-room of a steamer under a certificated engineer, or he must prove that he has been employed for not less than five years in the making and repairing of engines, and has been employed as assistant in the engine-room of a steamer or in charge of a steam launch for a period of not less than twelve months.

b. He must pass a *vivâ voce* examination before the Board of Examiners as to the working of an engine and the use of its different parts.

c. He must be able to show his practical qualifications by one week's trial in a Government steamer after fulfilling the other tests to which he will be subjected.

FOR SEA-GOING STEAMERS UNDER ACT VII OF 1884.

A candidate will be required to have served three years as principal serang or as tindal in the engine-room of a sea-going steamer under a certificated Engineer, and to show, in addition to the qualifications required of a candidate for a certificate of competency as engine-driver of an inland steamer under Act VI of 1884, a knowledge of the use of brine cocks and blowing off of the salinometer, and of the care of the boiler in salt-water.

FOR INLAND STEAMERS UNDER ACT VI OF 1884.

Qualification of candidate for Inland Engineer's Certificate.

28. A candidate for a certificate as Engineer for Inland Steamers must have served an apprenticeship to an Engineer, of three years in England or five years in India, and must prove that during the period of his apprenticeship he has been employed on the making and repairing of engines. Or, if he has not served an apprenticeship, he must prove that for not less than three years in England or five years in India he has been employed as a journeyman or master-hand in some factory or workshop on the making or repairing of engines. In either case he must also have served two years thereafter as an engine-driver or Engineer afloat. Any one who has passed as a Second class Engineer under Act VII of 1884 will be considered to be qualified as an Engineer for inland steamers.

FOR SEA-GOING STEAMERS.

Qualification of candidate for Second-class Engineer's Certificate.

29. SECOND-CLASS ENGINEER.—A candidate for a Second-class Engineer's Certificate must be 21 years of age;

He must have served an apprenticeship to an Engineer for three years in England or five in India at least, and prove that during the period of his apprenticeship he has been employed on the making and repairing of engines. Or if he has not served an apprenticeship, he must prove that for not less than three years in England or five in India he has been employed as a journeyman mechanic in some factory or workshop on the making or repairing of engines.* In either case he must also have served one year at sea in the engine-room as an Engineer on the Watch in the Foreign, or eighteen months in the Home or Coasting Trade; or

He must have served at least four years at sea in the engine-room as an Engineer on the Watch in the Foreign, or six years in the Home, or Coasting Trade.

* These may be either land or marine engines.

FOR BOTH CLASSES OF CANDIDATES.

(*a*) He must be able to give a description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes, and connections.

(*b*) He must understand how to correct defects from accident, decay, &c., and the means of repairing such defects.

(*c*) He must understand the use of the barometer, thermometer, and salinometer, and the principles on which they are constructed.

(*d*) He must state the causes, effects, and usual remedies for incrustation and corrosion.

(*e*) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total break down.

(*f*) He must write a legible hand, and understand the first five rules of arithmetic, and decimals, and their application to questions about consumption of stores, and full capacities of tanks and bunkers, the duty of pumps, and the direct strains in engines and boilers.

(*g*) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines in general use; as to the details of the different working parts, external and internal, and the use of each part.

FOR SEA-GOING STEAMERS.

Qualification of candidate for First-class Engineer's Certificate.

30. FIRST-CLASS ENGINEER.—A candidate for a First-class Engineer's Certificate must be 22 years of age.

31. In addition to the qualification required for a Second-class Engineer;

(*a*) He must have served for one year at sea as Second Engineer with a Second-class Engineer's Certificate of Competency *(See also para. 15 as regards service as Third Engineer)*.

(*b*) The Examiner should therefore be satisfied that an applicant for a First-class Engineer's Certificate has not only been *in possession* of a Second-class Certificate for the periods above stated, but that he has actually *served* for such periods in the engine-room, at sea with a Second-class Certificate, in the capacities referred to, and that his name has been entered in the articles of agreement accordingly. *(See also para. 17.)*

32. (*a*) He will be required to make an intelligible hand sketch, or a working drawing of some one or more of the principal parts of a steam-engine; and to mark in, without a copy, all the necessary dimensions in figures, so that the sketch or drawing could be worked from.*

(*b*) He must also be able to take off and calculate indicator diagrams.

(*c*) He must be able to calculate safety-valve pressures and the strength of the boiler, shell, stay, and rivetting.

(*d*) He must be able to state the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct strain, the twisting strain, and the bending strain in rectangular bars, and in round bars with given loads.

(*e*) He must be able to explain the method of testing and altering the setting of the slide valves, and to sketch about what difference any alteration in the slide valve will make in the indicator diagram, and of testing the fairness of the paddle and screw shafts and of adjusting them.

(*f*) He must be conversant with surface condensation, superheating, and the working of steam expansively.

(*g.*) His knowledge of arithmetic must include the mensuration of superficies and solids and the extraction of the square root, and the application of these rules to questions relating to the power, duty and economy of engines and boilers, and to the strains in rods, shafts, and levers of the engine.

Service in the Royal Navy or Indian Marine.

Engineers.

83. Retired Engineers of the Royal Navy or Indian Marine are qualified to be examined for First-class Engineer's Certificates in the Mercantile Marine, provided that their character and ability have been satisfactory.

Assistants Engineers.

84. Retired First-class Assistant or Assistant Engineers of the Royal Navy or Indian Marine may be examined for Second-class Engineer's Certificates in the Mercantile Marine under similar conditions.

Temporary service.

85. Temporary service in the Royal Navy or Indian Marine does not count.

Engineer Artificer.

86. Service performed on shore in the capacity of Engineer Artificer may count as workshop service to qualify a candidate for examination for a Second-class Engineer's Certificate of Competency in the Mercantile Marine.

87. Application for permission to be examined must be made to the Port Officer.

Fees.

Fees to be paid by applicants for examination. (S. 133, Exn. 17.)

38. Candidates for examination, in making their application on Form Exn. 8, will be required to pay the examination fees before any step is taken, whether by inquiring into their services or testing their qualifications, &c.

39. The fee for examination must be paid to the Port Officer.

40. If a candidate fails in his examination, *no part of the fee he has paid will be returned to him.*

41. The fees are as follow:—

Engine-driver's Certificate - -	Rs.	10
Inland Engineer's Certificate - -	„	12
Second-class Engineer's Certificate -	„	12
First-class Engineer's Certificate -	„	24
First-class Engineer's Certificate if candidate is already in possession of a Second-class Certificate of competency granted by the Board of Trade or by the Government of a British Possession under Section 8 of the Merchant Shipping (Colonial) Act, 1869 - - - -	„	12
Renewal of any certificate - -	„	5

General Rules as to Examinations.

Candidates not to take books, &c., into examination room.

42. All books necessary for the use of candidates under examination will be provided by the Local Government, and applicants will not be permitted to take into the examination room any book, paper, document, or memoranda of any description whatever, and subject to the provisions referred to hereafter. They will also not be allowed to work out their problems on a slate or on waste paper.

43. Candidates will be allowed in the time allotted to cancel any part of their work, and when required additional papers will be supplied by the examiners. These additional sheets must be attached to and form part of the examination papers.

44. Candidates for First-class Certificates have to pass an examination in Rough Working Drawing, which may be either hand sketches clearly dimensioned and complete in the necessary *views* and *sections*, or drawings to a scale. Drawing boards and T squares will be provided by the Local Government, but the applicants will have to bring with them any drawing instruments they may require.*

Punishment for breaking rules.

45. In the event of any candidate being discovered copying from another, or affording any assistance or giving any information to another, or communicating in any way with another during the time of examination, he will be regarded as having failed in his examination, and will be turned back for three months, in the same manner as if he had failed in the practical part of the examination; and no part of the fees he may have paid for examination will be returned to him.

Leaving examination room.

46. If a candidate leaves the room before answering any question which has been given to him, he cannot afterwards be permitted to answer it, but the Examiners may substitute other data or another question.

Questions from Form Exn. 15*a*.

47. All applicants presenting themselves for examination will be required to give written answers to eight out of a list of ten questions selected from Form Exn. 15*a*.,† "Elementary "Questions for the first examinations of Engineers for certificates of competency." These questions are intended to furnish a record to some extent of the candidate's knowledge at the time of his examination, and also to induce the candidates to pay more attention to their handwriting and spelling.

48. The Form Exn. 15*b*.,† on which these answers will be written, contains also some questions as to the experience of the applicant, to be answered by him in writing.

49. Examiners may add to their *vivâ voce* questions on the practical management of steam engines and boilers any of those contained in Exn. 15*a*.

50. If at the expiration of the time allowed the Candidate has worked out correctly the whole of the questions set to him, and given satisfactory answers in the *vivâ voce* examination, he will be declared to have passed.

51. If at the expiration of the time allowed he has not worked out the whole of the questions set to him, but if the result of the *vivâ voce* examination taken in connection with the answers to such of the questions as he has worked out is sufficient to satisfy the Examiner that the applicant is competent to take charge of engines, he will be declared to have passed.

52. In other cases he will be declared to have failed.

53. A report of the examination, and the examination papers, will be forwarded to the Port Officer on the Form Exn. 15).

Notification of having passed will be given to successful candidates. (Exn. 16.)

54. If the candidate passes he will receive the Form Exn. 16, which authorises the Port Officer to issue the Certificate to the candidate, whose testimonials, &c., will be returned at the same time. It is therefore important that the port of destination of the certificate should be the same on both the Form Exn. 16 and the Form Exn. 2. If circumstances should make any alteration necessary, the examiners should see that it is made in both forms, otherwise delay in the issue of the certificate may be caused.

Failure.

55. If the applicant fails in the *vivâ voce* or practical part of the examination he may not present himself for re-examination until he can produce proofs of THREE MONTHS' further service at sea as Engineer from the date of failure. If he fails in arithmetic or drawing only, he may come up again at any time. Engine-drivers may be examined *de novo* after six months, if the past examination shewed that they might reasonably be expected to qualify.

By the Honourable the Lieutenant-Governor of Bengal.

Government of Bengal.

The Calcutta Gazette.

WEDNESDAY, NOVEMBER 18, 1885.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 10th November 1885.—It is notified for general information that the declaration, dated the 9th August 1884, published at page 869, Part I of the *Calcutta Gazette* of the 20th idem, regarding the acquisition of land by the South Suburban Municipality, required for the construction of a public road in the village of Sursoona, in the district of the 24-Pergunnahs, is hereby cancelled.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 10th November 1885.—It is notified for general information that the declaration of the 31st March 1884, published at page 513, Part I of the *Calcutta Gazette* of the 9th April 1884, regarding the acquisition of land required for the construction of a dry earth shed in mohulla Chowdhury Gully, pergunnah Azimabad, in the district of Patna, is hereby cancelled.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 11th November 1885.—Whereas a notification, dated the 15th August 1885, declaring the intention of the Lieutenant-Governor to confirm the bye-law reproduced below, which has been framed by the Commissioners of the Durbhunga Municipality under section 350 of Act III (B. C.) of 1884, was published in the *Calcutta Gazette* of the 26th idem, and whereas no objection has been raised to it, it is hereby notified that, in the exercise of the power conferred upon him by section 351 of Act III (B. C.) of 1884 and on the recommendation of the Commissioners of the Durbhunga Municipality made at a meeting, the Lieutenant-Governor confirms the said bye-law.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

Bye-law.

Whoever in contravention of a direction of the Commissioners, made under section 236 of Act III (B. C.) of 1884, erects, renews or repairs the external roof or wall of any hut or other building with grass, leaves, mats or other inflammable materials, or without the sanction of the Commissioners keeps any stack or heap of thatching grass, leaves or other inflammable materials within such limits as may be fixed by the Commissioners under section 236 of Act III (B. C.) of 1884, shall be liable to a fine not exceeding Rs. 50.

NOTIFICATION.

The 12th November 1885.—The following gentlemen are appointed to be members of the Committee for the management of the charitable dispensary at Bhaggakool in the district of Dacca:—

Baboo Sita Nath Rai.
„ Binod Lal Rai.
„ Mukunda Lal Rai.
Baboo Radhika Lal Rai.
„ Harendra Lal Rai.
„ Nanda Lal Rai.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 12th November 1885.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Surgeon W. Beatson to be a Commissioner for the municipality of Monghyr, *vice* Dr. H. Whitwell, transferred.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 12th November 1885.—It is hereby notified that the Lieutenant-Governor is pleased to appoint, under section 27 of Act III (B.C.) of 1884, Baboo Radhica Narain Ghose to be a Commissioner of the North Barrackpore Municipality, *vice* Mr. A. Cooke.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 13th November 1885.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor appoints Baboo Mohendra Nath Bhattacharjya to be a Commissioner of the Jamalpore Municipality, in the district of Mymensingh, *vice* Baboo Huricharan Guha, resigned.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 13th November 1885.—It is hereby notified that, under section 59 of Act III (B.C.) of 1884, the Lieutenant-Governor approves the election by the Commissioners of the English Bazar Municipality, in the district of Maldah, of Assistant Surgeon Poorno Chunder Singh to be their Chairman, *vice* Baboo Mohesh Chandra Sen, resigned.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 14th November 1885.—Whereas a notification was published at page 3, Part IB of the *Calcutta Gazette* of the 19th August 1885, declaring the Lieutenant-Governor's intention to extend the provisions of Part IX of the Bengal Municipal Act III (B.C.) of 1884 to the Arrah Municipality, in the district of Shahabad, and whereas no objection has been raised to such extension within one month from the date of the publication of the notification within the municipality, it is hereby notified for general information that, in the exercise of the powers conferred upon him by section 221 of the Act, and in compliance with the recommendation of the Commissioners of the said municipality, made at a meeting, the Lieutenant-Governor directs that Part IX of the Act be extended to the municipality with effect from the 1st January next.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 14th November 1885.—It is hereby notified for general information that, in the exercise of the power vested in the Local Government by rule 17 of the rules under section 9 of Act VIII of 1881, the Lieutenant-Governor is pleased to appoint the Commissioner of Police and the Deputy Commissioner of Police, Calcutta, to be the officers to grant licenses for the possession and transport of petroleum (other than dangerous petroleum, in quantities exceeding 40 gallons) within the municipality of the suburbs of Calcutta.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 11th November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the municipality of Tumlook for a public purpose, viz. for extending the municipal market at Tumlook, in the village of Bazar Sankarara, pergunnah Tumlook, zillah Midnapore, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigah and 5 cottahs of standard measurement is required. The land is bounded on the south by Roma Nath Kamar and Dina Nath Dhoba's jote land, on the east by the Roopnarain river, on the north by the municipal market, and on the west by the district road.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 11th November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the municipality of Tumlook for a public purpose, viz. for the improvement of the Ramsagar tank at Tumlook, in the village of Norpota, pergunnah Tumlook, zillah Midnapore, it is hereby declared that for the above purpose the undermentioned three pieces of land measuring, more or less, 6 cottahs and 11½ chittacks are required. The boundaries of piece No. I which measures, more or less, 1 cottah and 10½ chittacks, are as follows:—On the south by the Ramsagar road, on the east by a piece of land belonging to the Tumlook Municipality, on the north by the land in the possession of Shek Abdool, and on the west by municipal lands.

The boundaries of piece No. II which measures, more or less, 1 cottah and 12½ chittacks, are as follows:—On the south by the Ramsagar road, on the east by a piece of land in the possession of the Tumlook Municipality, on the north by that of Kasimannesa, and on the west by that of Shek Maizudi.

The third piece which measures, more or less, 3 cottahs and 4½ chittacks, is bounded on the south by the Ramsagar road, on the east by a piece of land in the possession of Kasimannesa, on the north by Shek Maizudi's tank and land, and on the west by the drain of the Ramsagar tank.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 14th November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Motihari Municipality for a public purpose, viz. for a road to connect the Motihari road with the Old Cutcherry road, passing east to the municipal market of Motihari, in the village of Motihari, pergunnah Majhowa, zillah Chumparun, it is hereby declared that for the above purpose a piece of land measuring, more or less, 7 cottahs of local measurement is required. The land is bounded on the north by the Old Cutcherry road, on the east by Mr. Edward's indigo field, on the south by Telyaputti tolah, and on the west by the municipal market.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 14th November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Motihari Municipality for a public purpose, viz. for the construction of a slaughter-house for the municipality in the village of Khodaragur, appertaining to mehal Motihari, pergunnah Majhowa, zillah Chumparun, it is hereby declared that for the above purpose a piece of land measuring, more or less, 5 cottahs of local measurement is required. The land is bounded on the north by Durbari Mungta's land, on the east by Mr. Edward's indigo field, on the south by Abdul Guffur Mungta's land; and on the west by Pirbux's land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 11th November 1885.—Mr. A. H. Rennie is re-appointed to be a member of the Sitamarhi Branch Road Committee in the district of Mozufferpore.

Balance against India

PUBLIC DEBT OFFICE, BANK OF BENGAL,
Calcutta, 2nd November 1885.

(692—1)

R. HARDIE,
Secretary and Treasurer.

Notice.

Oudh Forest Department.

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of sál beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet length, at Rs. 2-10 per cubic foot.
22 „ „ 2-12 „
23 „ „ 2-14 „
24 „ „ 3 „

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at „ 2-4 „
Under 7 feet at „ 2 „

The above prices are for ordinary building purposes.

For *Planking, Sleepers*, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion

Second and Third Class Timber will be sold and price fixed by agreement

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KANHYA LAL,
Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1883.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking twenty pounds at a time, from the Superintendent, Botanic Garden, Calcutta, for cash only, at the rate of Rs. 24 per pound. The general public can be supplied by the Superintendent, Botanic Garden, for cash only, and also by the principal European and Native druggists at Rs. 32 per pound. Postage twelve annas extra.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers *for* public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin, *Rs.* 4 *ans.* 8; per eight ounce tin, *Rs.* 8 *ans.* 8; per pound tin, *Rs.* 16 *ans.* 8. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates:—per four ounce tin, *Rs.* 5 *ans.* 8; per eight ounce tin, *Rs.* 10 *ans.* 8; per pound tin, *Rs.* 20. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

Notice.

THE Public are hereby informed that the well-known Kartick Baruni Mela, which is held every year on the banks of the Dhaleshwari, near Munshigunge, in the district of Dacca, will commence on the 21st November 1885 A.D., corresponding to the 7th Augrahyan 1292 B.S., and continue up to the 3rd January 1886. Tradesmen, dealers, and others may buy and sell there during these six weeks.

F. WYER, Collector.

Notice.

GYA MICA MINES.

IT is proposed to give leases to prospect for and extract mica in the Government estates of Dubour and Chatkari in the district of Gya. Offers from persons likely to work the mines in a scientific manner will be received by the Collector of Gya.

D. NORTON, Offg. Collector

The 1st October 1885.

Wanted

A SURVEYOR and Draftsman for the Singbhoom Road Cess works for six months on a salary of Rs. 60 and fixed travelling allowance of Rs. 15 per mensem. Candidates must have the qualifications of a Public Works Department Overseer. Applications should be made to the Chairman before the 15th November with copies of testimonials.

UPENDRANATH BANERJEA, B.C.E.,
District Engineer, Singbhoom.

Chybassa, the 19th October 1885. (680—3)

Wanted

A SURVEYOR and Leveller to prepare a map and take levels of the municipal town of Kandi, consisting of an area of nearly six square miles. A lump sum will be paid for the whole work. Apply stating terms to the undersigned before the end of November current.

BEPIN BEHARI MOOKERJEE,
Chairman, Kandi Municipality.

Dated Kandi, the 2nd November 1885. (685—2)

DESTROYED.—The Government Promissory Note No. 142763 of the 4 % of 1842-43 for Rs. 1,000, originally standing in the name of the Bank of Bengal, and last endorsed to Bholanath Banerjee, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of a duplicate in favour of the proprietor.

(682—3) BHOLANATH BANERJEE, Boinchee.

R. Scott, Thomson & Co., "Ld."

THE Forty-fifth Half-yearly Ordinary General Meeting of Shareholders will be held at the registered office of the Company, 15, Government Place, on Friday, the 27th instant, at noon, for the purpose of declaring an *ad interim* dividend for the half-year which ended on the 30th September last.

By order of the Directors,
ROBT. J. CARBERY, Secretary and Accountant.

Calcutta, 3rd November 1885. (684—3)

Notice.

THE Transfer Register of the Rajmahal Stone Company, Limited, will be closed for the 14 days next preceding the meeting to be held on the 2nd December next, and during the meeting.

By order of the Directors,
ATKINSON BROS., Managers, Agents, and Secs.

Calcutta, the 14th November 1885. (695—1)

Commissariat Notice No. 13.

TWO flour mills, each workable by a pair of bullocks, are available for sale one at Golaghat, and the other at Dinapore; and likewise water-mill apparatus (forming four mills) at the latter place. This has never been brought into use, and comprises the following:—

6 Boards, wooden.
2 Top boards, wooden.
4 Boards in pieces.
1 Bottom board.
15 Cross beams.
1 Centre beam.
8 Mill-stones.
4 Wooden funnels.
7 Brass brushes.
32 Screws, small.
8 Do., large.
5 Flying wheels.

Gross weight of the water-mills is about 35 maunds, and that of the bullock mills about 70 maunds each.

Offers are invited for the purchase—

1st.—Deliverable at the places where the intending purchasers may wish.

2nd.—Deliverable at the place of sale. The bullock mills, though brought into use, are as good as new.

E. DEC. RENNICK, Captain,
Assistant Commissary-General.

Shillong, Executive Commissariat Office, the 18th September 1885.

P. B. ROBERTS, C.E., *Executive Engineer, Nuddea Rivers Division.*

Berhampore, the 16th November 1885.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884 :—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows :—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage.	With postage.
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
,, each of the Madras, Bombay, and Allahabad Series ...	,, 6 0	,, 7 0
,, a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	,, 2 0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ...	.....	,, 1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.

,, Thacker & Co., Bombay.

,, Higginbotham & Co., Madras.

The Government Central Book Depôt, Bombay.

,, Curator of Government Books, North-Western Provinces and Oudh.

,, Superintendent of Government Printing Bengal.

Orders and subscriptions for 1885 *should be at once remitted.*

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

Notice.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1*st*.—Bay of Bengal Daily Report giving observations taken at 17 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2*nd*.—Bengal Daily Report containing observations taken at 30 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, i.e. from May, 15th, to November, 15th. Price Rs. 2-8 per mensem, including postage.

3*rd*.—A Weekly and Monthly Statement of Meteorological Observations taken at 38 observing stations, and of rainfall recorded at 160 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

JOHN ELIOT,

Meteorological Reporter to the Govt. of Bengal.

Meteorological Office, Bengal, the 3rd July 1883.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 15th October, 1885 :—

No. 17 OF 1885.

A Bill rendering it permissive to the members of the Maimon Community to declare themselves subject to Muhammadan Law.

WHEREAS there is in the Presidency of Bombay and elsewhere a class of persons known as Maimons, and questions have from time to time arisen in the case of some of those persons as to the law by which in certain particulars they are governed, and whereas some of those persons consider that they are governed or desire to be governed in those particulars by the Muhammadan law as established in the Hanafi School;

And whereas it is expedient that a procedure should be provided whereby the applicability of that law to them in those particulars could be placed beyond dispute;

It is hereby enacted as follows :—

Short title.

1. This Act may be called the Maimons Act, 1886.

Declaration to be made by Maimons.

2. *(1)* When any Maimon who has attained his majority has declared in manner next hereinafter provided that he desires to be governed by the Muhammadan law as established in the Hanafi School, that law shall thereafter, notwithstanding any custom to the contrary, apply to him in each part of British India in the same particulars and to the same extent as it applies to other persons in that part of British India who are governed by it.

(2) A declaration to take effect under sub-section *(1)* must be made by a written instrument under the hand of the person making the same, in the form given in the schedule to this Act or in a form to the like effect, and must—

(a) if made in a part of British India in which the Indian Registration Act, 1877, is for the time being in force, be registered during his lifetime under that Act; and [Act III of 1877, s. 33] III of 1877.

(b) if made elsewhere, be executed before, and authenticated by, a notary public or a Court, Judge, Magistrate, British Consul or Vice-Consul or representative of Her Majesty or of the Government of India.

(3) Nothing in this Act shall prevent any person being or becoming subject to any form of Muhammadan law in any other manner than that provided by this Act.

THE SCHEDULE.

FORM OF DECLARATION.

I hereby declare that I wish to be governed to the extent provided by the Maimons Act, 1886, by the Muhammadan law as established in the Hanafi School.

STATEMENT OF OBJECTS AND REASONS.

1. THE Maimons, like the Khojás, were originally Hindus, and have been converted to Muhammadanism, but though they are said, as a rule, to be Muhammadans in a fuller sense than the great body of the Khojás, it has been held by the Courts that certain sections of them are in some particulars still governed by Hindu customs instead of by Muhammadan law.

2. From a petition lately received by the Government, it appears that to a large number of the Maimons in question this position is not satisfactory. They hold that they should be governed, or they wish to be governed, by the Muhammadan law of the Hanafi School, and they ask that it may be declared by the legislature that they are so governed.

3. It is not to be expected that any such declaration would be made by the legislature unless it were shown that it was desired by the entire community to which it would apply, and it must be admitted that there is a want of unanimity among them on this subject.

It seems but reasonable, however, that some simple procedure should be provided by which the petitioners and other members of the Maimon class, who may be of their way of thinking, would be enabled to secure the application to themselves of those portions of the Muhammadan law which are applied by our Courts to ordinary Muhammadans, and to avoid all risk of being held to be governed by customs which are distasteful to them, and which it is to be apprehended are far from being well settled.

4. Such a procedure is to be found in the clause which it has been proposed to insert in the Khojá Succession Bill now under consideration, and which provides that a Khojá of full age may by a registered declaration withdraw himself from the peculiar law of succession by which Khojás are to be governed and place himself under the Muhammadan law of succession.

The present Bill has been prepared with a view to providing a similar procedure for Maimons. It is, however, not restricted to the matter of succession, as the difficulty which it is intended to meet is not confined to that branch of the law; and as, from all that has appeared up to this, the Hanafi form of the Muhammadan law is the only one to which Maimons would desire to be subject, it provides for the application to them only of that form of the law.

5. As it is obviously undesirable that any doubt should be thrown on the legal position of Maimons who may be already fully subject to the Muhammadan law, or that it should be suggested that a Maimon could not after the passing of the Bill become fully subject to that law in any way in which he, in common with Hindus and others, might become subject to it at present, a clause has been inserted in the Bill, providing that nothing therein contained shall prevent any person from being or becoming subject to any form of Muhammadan law in any other manner than that provided by the Bill.

AMÍR ALÍ.

The 15th October, 1885.

D. FITZPATRICK,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 22nd October, 1885:—

No. 18 OF 1885.

THE INDIAN TRAMWAYS BILL, 1885.

CONTENTS.

Preliminary.

SECTIONS.

1. Short title and commencement.
2. Local extent.
3. Definitions.

Orders authorising the Construction of Tramways.

4. Application for and consent necessary to making of order.
5. Consent of local or road authority not necessary in certain cases.
6. Procedure for making order.
7. Contents of order.
8. Further orders.
9. Power to authorise joint work by local authorities.
10. Cesser of powers given by an order.

Construction and Maintenance of Tramways.

11. Mode of formation of tramway.
12. Inspection of tramway before opening.
13. Agreement between road-authority and promoter as to repair of roadway.

Traffic on Tramways.

14. Rights of promoters and the public over tramways.
15. Tolls leviable by promoter or lessee.
16. Carriage of dangerous or offensive goods.

Licenses to use Tramways.

17. Grant to third parties of licenses to use tramway in certain events.
18. Licensee to give to promoter or lessee an account of traffic.

SECTIONS.

Discontinuance of Tramways.

19. Cesser of powers of promoter and lessee on discontinuance of tramway.
20. Powers of road-authority on cesser of powers of promoter.

Insolvency of Promoter.

21. Proceedings in case of insolvency of promoter.

Purchase of Tramways.

22. Future purchase of undertaking by local authority.

Working of Tramways owned by Local Authorities.

23. Lease of, or working of, tramway by local authority.

Rules.

24. Power to make rules.
25. Power to impose penalty by rule.
26. Procedure for making, and publication of, rules.

Offences.

27. Penalty for failure of promoter, lessee or licensee to comply with Act or order.
28. Penalty for obstructing promoter in exercise of his powers.
29. Penalty for interfering with tramway.
30. Penalty for using tramway with carriage having flange-wheels.
31. Penalty for evading payment of proper toll.
32. Penalty for taking or sending dangerous or offensive goods without giving notice.
33. Penalty for licensee not giving to promoter or lessee an account of traffic or giving false account.
34. Saving of prosecutions under other laws.

Settlement of Differences.

35. Differences between promoters or lessees and authorities.

Recovery of Tolls.

36. Recovery of moneys due from promoters and in certain cases, from lessees.
37. Recovery of tolls from licensees.
38. Recovery of tolls from passengers.

Savings.

39. Promoter to have right of user only.
40. Saving of power over roads traversed by tramways.
41. Saving of power of local authority and police to regulate traffic on roads.

The Indian Tramways Bill, 1885.—Sections 1-4.

Supplemental Provisions.

SECTIONS.
42. Promoters, lessees and licensees to be responsible for all injuries.
43. Want of funds not a sufficient reason for default.
44. Power to exempt from municipal taxation.
45. Application by local authorities of local funds to tramways.
46. Extension of Act to existing tramways.
47. Meaning of "tramway" in Railway Act.
48. Powers of Local Government exercisable from time to time.

A Bill to facilitate the construction and to regulate the working of Tramways.

WHEREAS it is expedient to facilitate the construction and to regulate the working of tramways; It is hereby enacted as follows:—

Preliminary.

Short title and commencement.

1. *(1)* This Act may be called the Indian Tramways Act, 1886; and

(2) It shall come into force at once.

Local extent.

2. *(1)* It extends, in the first instance to the whole of British India, except the territories administered by the Governor of Fort Saint George in Council, the Governor of Bombay in Council, and the Lieutenant-Governor of Bengal.

(2) But the Governor of Fort Saint George in Council, the Governor of Bombay in Council or the Lieutenant-Governor of Bengal may, by notification in the official Gazette, extend this Act to the whole or any part of the territories under his administration.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

[Act XIII, 1885, s. 3, clause (7).] *(1)* "local authority" means a municipal committee, district board, body of port commissioners or other authority legally entitled to, or entrusted by the Government with, the control or management of a municipal or local fund:

[Act XXII, 1883, s. 2.] *(2)* "road" means the way of a road, street, thoroughfare, passage or place along or across which a tramway authorised under this Act is, or is intended to be, laid, and includes the surface soil and sub-soil of a road, and the footway and drains of a road, and any bridge, culvert or causeway forming part of a road:

[33 & 34 Vic., c. 78, s. 3.] *(3)* "road-authority", in relation to a road, means—

(a) if a local authority maintains and repairs the road, then that authority:

(b) if a local authority does not maintain and repair the road, and the road is neither vested in Her Majesty nor maintained and repaired by the Government, then the person in whom the road is vested; and

(c) if a local authority does not maintain and repair the road, and the road is vested in Her Majesty or maintained and repaired by the Government, then the Local Government:

[33 & 34 c. 78, s. 3.] *(4)* "circle", in relation to a local authority or road-authority, means the area within the control of that authority:

[Act XXII, 1883, s. 2.] *(5)* "tramway" means a tramway, or any part of a tramway, or any siding, turnout, connection, line or track belonging to a tramway:

(6) "order" means an order authorising the construction of a tramway under this Act, and includes a further order substituted for, or amending, extending or varying, that order:

[33 & 34 c. 78, s. 4; 43 & 44; Act XXII, 1883, Schedule, Articles 1, 26.] *(7)* "promoter" means a local authority or person in whose favour an order has been made, and includes a local authority or person on whom the rights and liabilities conferred and imposed on the promoter by this Act and the order and any rules made under the Act, as to the construction, maintenance and use of the tramway, have devolved:

(8) "undertaking" includes all moveable and immoveable property of the promoter suitable to and used by him for the purposes of the tramway:

(9) "carriage", in the case of a tramway on which steam-power or any other mechanical power is used, includes an engine worked on the tramway for the purpose of producing that power

(10) "toll" includes any charge leviable in respect of the use of a tramway:

(11) "lessee" means a person to whom a lease has been granted of the right of user of a tramway and of demanding and taking the authorised tolls:

(12) "District Magistrate" includes an officer empowered by the Local Government by name or by virtue of his office to discharge within any local area all or any of the functions of a District Magistrate under this Act:

(13) "Collector" means the chief officer in charge of the revenue-administration of a district, and includes an officer empowered by the Local Government by name or by virtue of his office to discharge within any local area the functions of a Collector under this Act; and

(14) "prescribed" means prescribed by rules made by the Local Government under this Act.

Orders authorising the Construction of Tramways.

Application for and consent necessary to making of order.

[33 & 34 c. 78, s. 4.]

4. *(1)* The Local Government may make an order authorising the construction of a tramway in a circle on the application of—

(a) the local authority of the circle, with, where that authority is not the road-authority of a road or part of a road to be traversed by the tramway, the consent of the road-authority in respect of that road or part, or

(b) any person with the consent of the local authority and, where that authority is not the road-authority of a road or part of a road to be traversed by the tramway, of the road-authority in respect of that road or part:

Provided that, if any part of the proposed tramway is to traverse land which is not included within the limits of a municipality or of a cantonment, the Local Government shall not make the order without the previous sanction of the Governor-General in Council.

The Indian Tramways Bill, 1885.—Sections 5-7.

(2) A local authority shall not make an application for an order, or be deemed to consent to an application being made by any person for an order, unless the making of the application or the giving of the consent has been approved by the local authority in manner prescribed.

34 & 34 Vic., c. 78, s. 5.]

Consent of local or road authority not necessary in certain cases.

5. When it is proposed to lay a tramway in two or more circles, and a local authority or road-authority having control in either or any of the circles does not consent thereto, the Local Government may, nevertheless, make an order authorising the construction of the tramway in the circle, if, after considering the objections of the dissenting authority, and the benefit which the public is likely to derive from the tramway being laid in the circle of that authority, it is satisfied that the construction of the tramway therein is expedient.

33 & 34 Vic., c. 78, ss. 7 & 8 & Act XV, 1871, s. 68.]

Procedure for making order.

6. *(1)* The Local Government on receiving an application shall consider it, and, if satisfied as to the propriety of proceeding thereon, publish in the official Gazette, and in such other manner as it deems sufficient for giving information to persons interested, a draft of a proposed order authorising the construction of the tramway.

(2) A notice shall be published with the draft stating that any objection or suggestion which any person may desire to make with respect to the proposed order will, if submitted to the Local Government on or before a date to be specified in the notice, be received and considered.

(3) If, after considering any objections or suggestions which may have been made with respect to the draft on or before the date so specified, the Local Government is of opinion that the application should be granted, with or without addition or modification, or subject or not to any restriction or condition, it may settle and make an order accordingly.

(4) Every order authorising the construction of a tramway shall be published in the official Gazette in English, and in the other prescribed language or languages, if any, and that publication shall be conclusive proof that the order has been made as required by this section.

33 & 34 Vic., c. 78, s.

Contents of order.

7. *(1)* An order made under section 6 shall empower the promoter therein specified to construct and maintain the tramway therein described in the manner therein provided, and shall specify the time within which the tramway shall be commenced and the time within which it shall be completed and opened for public traffic.

As to 33 & 34 Vic., c. 78, s. and s. 10 Provisional Order Bill.]

(2) The order may also provide, in manner consistent with this Act, for all or any of the following, among other matters, that is to say:—

Provisional Order Clause 3.]

(a) a period before the expiration of which the tramway shall not be commenced, and the conditions subject to which the local authority, when it is not itself the promoter, may, within that period, elect to be substituted in the place of the promoter in respect of the undertaking or of so much thereof as is within its circle; and the limits of time within which, and the terms upon which, the local authority may, after the tramway has been constructed, require the promoter to sell to it the undertaking or so much thereof as is within its circle;

34 Vic., 78, s. 43.]

(b) the acquisition by the promoter of land for the purposes of the tramway, and the disposal by him of land which has been acquired but is no longer required for those purposes; [33 & 34 Vic., c. 78, ss. 8 & 15; Provisional Order Clauses 2 and 5; and Report of House of Lords Committee, 1879, paragraph 11.]

(c) the conditions subject to which roads may be opened and broken up for the purposes of the construction or maintenance of the tramway or any part thereof, and the method of, and materials to be used in, the re-instating of the roads, and the approval of the method and materials by the Local Government or the road-authority before the commencement of the work; [33 & 34 Vic., c. 78, ss. 26 & 27, and Provisional Order Clause 9.]

(d) the conditions on which the tramway may be constructed over a bridge or across a railway or tramway when the carriageway over the bridge is to form part of the tramway or when the tramway is to cross a railway or another tramway on the level; [33 & 34 Vic. c. 78, s. 26.]

(e) the space which shall ordinarily intervene between the outside of the carriageway on either side of a road whereon the tramway is to be constructed and the nearest rail of the tramway, and the conditions on which a smaller space may be permitted; [33 & 34 Vic., c. 78, s. 9, and Provisional Order Clause 13.]

(f) the gauge of the tramway; the rails to be used, and the mode in which, and the level at which, they shall be laid and maintained; and the adoption and application by the promoter of such improvements in the rails, and in their situation, and in the sub-structure upon which they rest, as the Local Government may require; [33 & 34 Vic., c. 78, s. 25, and Provisional Order Clauses 8 and 10.]

(g) the portion of the road or roads traversed by the tramway to be kept in repair by the promoter, the maintenance by the promoter to the satisfaction of the Local Government or the road-authority, or both, of that portion of the road or roads, and the liability of the promoter, on the requisition of the Local Government, from time to time to adopt and apply such improvements in the tramway as the Local Government may consider necessary or desirable for the safety and convenience of the public, and to alter the position or level of the tramway to suit future alterations in the road or roads; [33 & 34 Vic., c. 78, s. 28, and Provisional Order Clauses 8, 11 & 12.]

(h) the application of material excavated by the promoter in the construction or maintenance of the tramway; [32 & 34 Vic., c. 78, s. 27, and Provisional Order Clause 17.]

(i) the provision of such crossings, passing-places, sidings, junctions and other works, in addition to those specified in or authorised by the order, as may from time to time be necessary or convenient to the efficient working of the tramway; [Provisional Order Clause 15.]

(j) the powers which may from time to time be exercised by the Local Government, the local authority, the road-authority or any person in respect of sewers, drains, telegraph-lines, gas-pipes or water-pipes in or [33 & 34 Vic., c. 78, s. 32, and Provisional Order Clause 18.]

The Indian Tramways Bill, 1885.—Sections 8-10.

on land occupied by the tramway; the notice (if any) to be given of the intended exercise of those powers; the manner in which the powers shall be exercised; and the extent to which the tramway and the traffic thereon may be interfered with in the exercise thereof;

[33 & 34 Vic., c. 78, ss. 30 & 31.]

(k) the conditions subject to which the promoter may from time to time interfere with, or alter or require the alteration of the position of, drains (not being sewers or main drains), telegraph-lines, gas-pipes or water-pipes;

[Provisional Order Clause 16.]

(l) the provision of a temporary tramway in place of a part of a tramway which has been removed, or of which the use has been discontinued, by reason of the execution of any work affecting a road along which the part of the tramway was laid;

[33 & 34 Vic., c. 78, s. 34; and Provisional Order Clauses 25, 26 & 27.]

(m) the motive power to be used on the tramway, and the conditions on which steam-power or any other mechanical power may be used;

[33 & 34 Vic., c. 78, s. 34; Schedule A to form of Provisional Order; and Regulations and Bye-laws of the Board of Trade with respect to the use of steam-power on tramways.]

(n) the nature, dimensions, fittings, appliances and apparatus of the carriages to be used on the tramway, and the inspection and examination thereof by officers of the Local Government or the local authority, and the liability of the promoter or lessee, on the requisition of the Local Government, from time to time, to adopt and apply such improvements in the carriages, and in the fittings, appliances and apparatus, as the Local Government may consider necessary or desirable for the safety and convenience of the public;

[33 & 34 Vic., c. 78, s. 10, and Provisional Order Clauses 33 to 36 and 38 to 43.]

(o) the traffic which may be carried on the tramway, the traffic which the promoter or lessee shall be bound to carry, and the traffic which he may refuse to carry; the tolls to be leviable by the promoter or lessee, and the periodical revision thereof by the Local Government; and the regulation of the traffic and of the levy of the tolls;

[Provisional Order Clause 37.]

(p) the use of the tramway free of toll by the local authority, with its own carriages, for specified purposes, during specified hours, with power to the local authority to make such sidings and other works as may be necessary for communication between its premises and the tramway;

[33 & 34 Vic., c. 78, s. 41, and Provisional Order Clause 48.]

(q) the conditions subject to which the promoter may transfer the undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise; and the conditions subject to which the local authority may be the transferee;

[33 & 34 Vic., c. 78, s. 28, provisn.,

(r) the performance by the Local Government or by the local authority or road-authority of any work required by the Act or the order to be done by the promoter; and

[Provisional Order Clauses 10, 11, 26, 27 and 40.]

(s) the penalty to be incurred by the promoter or lessee for failure to observe any condition or direction contained in the order, and the application of the penalty when recovered.

[Report of House of Lords Committee, 1879, para. 11.]

(3) The Local Government may, in providing in the order for the acquisition of land for the purposes of a tramway of which the promoter is not a company, direct that land may be acquired for the promoter under the provisions of the Land Acquisition Act, 1870, in the same manner and on the same conditions as it might be acquired for the purposes of the tramway if a company were the promoter. X of 1870.

(4) The order shall imply the condition—

(a) in the case of a tramway of which a local authority is the promoter, that a lease thereof shall be granted only in manner by this Act provided, and

(b) in the case of a tramway of which a local authority is not the promoter, that a lease thereof shall be only of the right of user and of demanding and taking the authorised tolls, and shall not confer or impose on the lessee any of the powers or duties of the promoter in respect of the construction or maintenance of the tramway.

8. *(1)* The Local Government may, on the application of the promoter, revoke, amend, extend or vary the order by a further order. [33 & 34 V c. 78, s. 1

Further orders.

(2) An application for a further order shall be made in the same manner and subject to the same conditions as an application for an order.

(3) The Local Government may, in its discretion, either grant or reject the application.

(4) If it grants the application, it shall make the further order in the same manner as an order, except that no addition to, or modification of, the rights, powers and authorities asked for in the application, or restriction or condition with respect thereto, shall be made or imposed by the further order without the consent in writing of the promoter.

9. *(1)* Subject to, and in accordance with, the provisions of this Act, the Local Government may, on a joint application, or on two or more separate applications, settle and make an order empowering two or more local authorities, respectively, jointly to construct the whole, or separately to construct parts, of a tramway, and jointly or separately to own the whole or parts thereof. [33 & 34 V c. 78, s. 1

Power to authorise joint work by local authorities.

(2) All the provisions of this Act which relate to the construction of tramways shall extend and apply to the construction of the whole and the separate parts of the tramway, and the form of the order may be adapted to the circumstances of the case.

10. *(1)* If a promoter authorised by an order to construct a tramway— [33 & 34 V c. 78, s. 1

Cesser of powers given by an order.

(a) does not within the time specified in the order substantially commence the construction of the tramway, or

(b) having commenced the construction, suspends it without a reason sufficient in the opinion of the Local Government to warrant the suspension, or

(c) does not within the time specified in the order complete the tramway and open it for public traffic,—

the following consequences shall ensue :—

(i) the powers given by the order to the promoter for constructing the tramway and otherwise in relation thereto shall, unless

the Local Government, by special direction in writing, prolongs the time or condones the suspension, cease to be exercised except as to so much of the tramway as is then completed;

(ii) as to so much of the tramway as is then completed, the Local Government may either permit, or refuse to permit, the powers given by the order to continue;

(iii) if the Local Government refuses to permit the powers to continue, then so much of the tramway as is then completed may be dealt with, under the provisions of this Act relating to the discontinuance of tramways, as a tramway of which the discontinuance has been proved to the satisfaction of the Local Government.

[Sections 19 & 20 of this Bill.]

(2) A notification published by the Local Government in the official Gazette to the effect that on a date specified in the notification the construction of a tramway had not been substantially commenced or a tramway had not been completed and opened for public traffic, or that the construction of a tramway had been suspended without sufficient reason, shall, for the purposes of this section, be conclusive proof of the matter stated therein.

Construction and Maintenance of Tramways.

[33 & 34 Vic., c. 78, s. 25.]

Mode of formation of tramway.

11. A tramway shall be constructed and maintained in the manner provided by the order.

[33 & 34 Vic., c. 78, s. 25, & Act IV, 1879, s. 5.]

Inspection of tramway before opening.

12. A tramway, or portion or extension of, or addition to, a tramway, shall not be opened for public traffic until an engineer appointed in this behalf by the Local Government has inspected it and certified it to be fit for such traffic.

[33 & 34 Vic., c. 78, s. 29.]

Agreement between road-authority and promoter as to repair of roadway.

13. The road-authority and the promoter may from time to time enter into agreements with respect to the keeping in repair of the whole or a part of a road traversed by a tramway, and with respect to the proportion to be paid by either of them of the expense of keeping the road or part in repair.

Traffic on Tramways.

[33 & 34 Vic., c. 78, ss. 34 & 62, and Act XXII, 1883, s. 8.]

Rights of promoters and the public over tramways.

14. *(1)* The promoter of a tramway shall, subject to the provisions of sub-section *(2)* and to the other provisions of this Act and of the order, have the exclusive use of the tramway for carriages with flange-wheels or other wheels suitable to run on the rail described in the order as the rail to be used on the tramway:

Provided that nothing in this Act or the order or in any rule made under the Act shall affect the right of any person authorised to use a tramway or railway to pass across a tramway constructed under this Act with carriages having wheels suitable to run on the rail thereof.

(2) The public shall have a right to pass along or across any part of a road along or across which a tramway is constructed, whether on or off the tramway, with carriages not having flange-wheels or other wheels suitable to run on the rail of the tramway: provided—

(a) that this sub-section shall not apply where the tramway is constructed on land the right to the exclusive possession of which has been acquired by the promoter, and

(b) that the Local Government may by an order authorise the construction of a tramway on any part of a road with rails raised above the surface of the road, if it is satisfied that the convenience of the public will not be injuriously affected thereby.

[33 & 34 Vic., c. 78, s. 45.]

Tolls leviable by promoter or lessee.

15. *(1)* The promoter or lessee may demand and take, in respect of the tramway, tolls not exceeding the limits specified in or determinable under the order, or if the order contains no provision in this behalf, then such sums as may from time to time be fixed by the promoter or lessee with the previous sanction of the Local Government.

[33 & 34 Vic., c. 78, s. 53; and Act XXII, 1883, s. 13.]

(2) A list of all the tolls authorised to be levied shall be exhibited, in such languages as the District Magistrate may direct, in a conspicuous place inside and outside each of the carriages used upon the tramway.

Carriage of dangerous or offensive goods.

16. *(1)* A person shall not be entitled to carry, or to require to be carried, on a tramway constructed under this Act, any goods of a dangerous or offensive nature.

(2) A person taking such goods with him on the tramway shall, before entering the carriage, give notice of their nature to the servant of the promoter or lessee in charge of the carriage.

(3) A person sending such goods by the tramway shall distinctly mark their nature on the outside of the package containing them, or otherwise give notice thereof in writing to the servant of the promoter or lessee with whom he leaves them for the purpose of their being sent by the tramway.

(4) Any servant of the promoter or lessee may refuse to carry upon the tramway a parcel which he suspects to contain goods of a dangerous or offensive nature, and, if any such parcel has been received for the purpose of being carried upon the tramway, may stop the transit thereof until he is satisfied as to the nature of its contents.

Licenses to use Tramways.

[33 & 34 Vic., c. 78, s. 35.]

Grant to third parties of licenses to use tramway in certain events.

17. If, at any time after a tramway or part of a tramway has been for three years opened for public traffic in a circle, the local authority of the circle represents in writing to the Local Government that the public is deprived of the full benefit of the tramway or of the part thereof, the Local Government may, if after such enquiry as it deems necessary it is satisfied as to the truth of the representation, grant a license to any person to use the tramway conformably to this Act and the order and to the rules made under the Act, subject to the following provisions, namely:—

(a) the license shall be for a period not less than one year or more than three years from the date of the license, but the Local Government may in its discretion renew it;

(b) the license shall be to use the whole of the tramway for the time being opened for public traffic, or such part or parts of the tramway as the Local Government, having regard to the cause for granting the license, thinks fit;

The Indian Tramways Bill, 1885.—Sections 18-22.)

(c) the license shall specify the number of carriages which the licensee shall run upon the tramway, the mode in which, and times at which, the carriages shall be run, the tolls to be paid to the promoter or lessee by the licensee for the use of the tramway, and the tolls, being those for the time being leviable by the promoter or lessee, which the licensee may demand and take for the use of his carriages;

(d) the licensee and his officers and servants shall permit one person, duly authorised for that purpose by the promoter or lessee, to travel free of toll in or upon each carriage of the licensee run upon the tramway for the whole or any part of a journey; and

(e) the Local Government may revoke, alter or modify the license for any cause sufficient in its opinion to warrant the revocation, alteration or modification thereof.

[33 & 34 Vic., c. 78, s. 37.]

Licensee to give to promoter or lessee an account of traffic.

18. A licensee shall, on demand, give to an officer or servant authorised in that behalf by the promoter or lessee an exact account in writing, signed by the licensee, of the number of passengers, or number or quantity of goods, conveyed by any and every carriage used by him on the tramway.

Discontinuance of Tramways.

[33 & 34 Vic., c. 78, s. 41.]

Cesser of powers of promoter and lessee on discontinuance of tramway.

19. If it is proved to the satisfaction of the Local Government, at any time after the opening of a tramway for public traffic, that the working of the tramway, or any part thereof, has been discontinued, for the space of three months, without a reason sufficient, in the opinion of the Local Government, to warrant the discontinuance, the Local Government, if it thinks fit, may, by notification in the official Gazette, declare that the powers of the promoter and of the lessee, if any, in respect of the tramway or the part thereof so discontinued, shall, from the date of the notification, be at an end, and thereupon the said powers shall cease and determine, except in so far as they may be purchased by a local authority in manner by this Act provided.

[Section 22 of this Bill.]

[33 & 34 Vic., c. 78, s. 41.]

Powers of road-authority on cesser of powers of promoter.

20. *(1)* Where a notification has been published under section 19, the road-authority may, at any time after the expiration of two months from the date of the notification, remove the tramway or part of the tramway so discontinued, and use the materials thereof in re-instating the road.

(2) The promoter shall pay to the road-authority the cost incurred by that authority in removing the tramway or the part thereof and in re-instating the road.

(3) The cost shall be certified by an officer of the road-authority, and his certificate, countersigned by the District Magistrate, shall be conclusive proof as to the cost incurred.

(4) If the promoter does not pay the amount so certified within one month after the delivery to him of the certificate or of a copy thereof, the road-authority may, without any previous notice to the promoter and without prejudice to any other remedy which it may have for the recovery of the amount, sell and dispose of such materials of the tramway or part thereof removed as it has not used in re-instating the road, either by public auction or by private sale, and for such sum or sums, and to such person or persons, as it thinks fit, and may, out of the proceeds of the sale, pay and reimburse itself the amount of the cost aforesaid and of the expenses of the sale, and shall pay over the residue (if any) of the proceeds of the sale to the promoter.

[Section 36 of this Bill.]

Insolvency of Promoter.

[33 & 34 Vic., c. 78, s. 42.]

Proceedings in case of insolvency of promoter.

21. *(1)* If, at any time after the opening of a tramway in a circle for public traffic, it appears to the road-authority or local authority of the circle that the promoter of the tramway is insolvent, so that he is unable to maintain the tramway, or work it with advantage to the public, and either of those authorities makes a representation to that effect to the Local Government, the Local Government may, if after such enquiry as it deems necessary it is satisfied as to the truth of the representation, declare, by notification in the official Gazette, that the powers of the promoter shall, at the expiration of six months from the publication of the notification, be at an end; and the powers of the promoter shall cease and determine at the expiration of that period, except in so far as they may be purchased by a local authority in manner by this Act provided.

[Section 22 of this Bill.]

(2) Where a notification has been published under sub-section *(1)*, the road-authority may, at any time after the expiration of six months from the date thereof, remove the tramway in the same manner, and subject to the same provisions as to the payment of the cost of the removal, and to the same remedy for recovery of the cost, in every respect as in cases of removal under section 20.

Purchase of Tramways.

[33 & 34 Vic., c. 78, s. 43.]

Future purchase of undertaking by local authority.

22. *(1)* Where the promoter of a tramway in a circle is not the local authority, the local authority, with the previous sanction of the Local Government, may—

(a) within such limits of time as may be specified in this behalf in the order, or

(b) if a time was not specified in the order, then within six months after the expiration of a period of twenty-one years from the date of the order, and within six months after the expiration of every subsequent period of seven years, or

(c) within two months after the publication of a notification under section 19 or within six months after the publication of a notification under section 21,—

by notice in writing, require the promoter to sell to the local authority his undertaking or the part thereof which is within the circle of the local authority; and thereupon the promoter shall sell the same upon the terms specified in the order, or, if the terms were not specified in the order, then upon the terms of paying the then value of the undertaking or of the part thereof, exclusive of any allowance for past or future profits of the undertaking or any compensation for compulsory sale or other consideration whatsoever.

(2) A requisition shall not be made under sub-section *(1)* unless the making thereof has been

approved by the local authority in manner prescribed.

(3) When a sale has been made under this section, all the rights, powers and authorities of the promoter in respect of the undertaking or part thereof sold, or, where a notification has been published under section 19 or section 21, all the rights, powers and authorities of the promoter previous to the publication of the notification in respect of the undertaking or part thereof sold, shall be transferred to the authority to whom the undertaking or part has been sold, and shall vest in, and may be exercised by, that authority in the same manner as if the tramway had been constructed by it under an order made under this Act.

(4) Subject to, and in accordance with, the preceding provisions of this section, two or more local authorities may jointly purchase an undertaking or so much thereof as is within their circles.

Working of Tramways owned by Local Authorities.

[33 & 34 Vic., c. 78, s. 19.]

Lease of, or working of, tramway by local authority.

23. *(1)* When a local authority has under the authority of an order completed a tramway, or has under the provisions of this Act or of an order acquired possession of a tramway, it may, by a lease to be approved by the Local Government, let to any person the right of user of the tramway and of demanding and taking the authorised tolls.

(2) On the determination of a lease, the local authority may from time to time let the right for such further term and on such conditions as the Local Government may approve.

(3) Every lease made under this section shall imply a condition of re-entry if at any time after the making thereof it is proved to the satisfaction of the Local Government that the lessee has discontinued the working of the tramway leased, or of any part thereof, for the space of three months, without a reason sufficient, in the opinion of the Local Government, to warrant the discontinuance.

(4) Notice of the intention of the local authority to make a lease shall be given in manner prescribed.

(5) If the local authority cannot by means of a lease obtain what it deems to be a fair rent for the tramway, it may itself, with the previous sanction of the Local Government and for such term as the Local Government directs, place and run carriages upon the tramway, and demand and take the authorised tolls in respect of the use of the carriages.

Rules.

[33 & 34 Vic., c. 78, ss. 46 & 48 and Act XXII, 1883, s. 20.]

Power to make rules.

24. *(1)* In addition to any other power to make rules expressly or by implication conferred by this Act, the Local Government may make rules consistent with this Act—

(a) as to the form in which an application for an order shall be made;

(b) as to the costs to be paid by an applicant in respect of an order, and the time when, and the place where, those costs shall be paid;

(c) as to the payment of money or lodgment of securities, by way of deposit, by the applicant for an order before the order is published under section 6, sub-section *(4)*, or a further order is made under section 8; the investment of money so paid; the disposal of interest or dividends from time to time accruing due on money or securities so paid, lodged or invested; the application of the money or securities or the produce thereof to the discharge of any liability incurred by the promoter, and the forfeiture, repayment or return of the money or securities;

(d) as to the plans and sections of any works to be deposited by applicants for orders or by promoters;

(e) for regulating the use of steam-power or any other mechanical power on a tramway;

(f) as to any matter specified in section 7, sub-section *(2)*, clauses (c), *(d)*, *(e)*, *(j)* and *(k)*, as a matter which may be provided for in an order, when that matter has not been so provided for, or has not, in the opinion of the Local Government, been effectually so provided for;

(g) as to any matter respecting which rules may be made under this section by a local authority or a promoter or lessee; and,

(h) generally, as to any other matter or thing in respect of which it may seem to the Local Government to be expedient to make rules for the purpose of carrying this Act into execution.

[33 & 34 Vic., c. 78, s. 46; and Act XXII, 1883, s. 20.]

(2) A local authority may, from time to time, with the previous sanction of the Local Government, make rules, consistent with this Act and the order and any rules made by the Local Government under the Act, for regulating—

(a) the rate of speed to be observed in travelling upon a tramway within the circle of the local authority;

(b) the use of animal power on the tramway;

(c) the distances at which carriages using the tramway shall be allowed to follow one after the other;

(d) the stopping of carriages using the tramway;

(e) the traffic on roads along or across which the tramway is laid;

(f) the number of passengers which may be carried in any carriage;

[33 & 34 Vic., c. 78, s. 48.]

(g) the licensing and control of drivers, conductors and other persons having charge of the carriages of the promoter or lessee or a licensee; and,

[Act XXII, 1883, s. 20.]

(h) generally, the mode of use of the tramway.

[33 & 34 Vic., c. 78, s. 46; and Act XXII, 1883, s. 20.]

(3) The promoter or lessee of a tramway may, from time to time, with the previous sanction of the Local Government, make rules consistent with this Act and the order and any rules made under the Act—

(a) for preventing the commission of any nuisance in or upon any carriage, or in or against any premises belonging to him; and

(b) for regulating the travelling in any carriage belonging to him.

[33 & 34 Vic., c. 78, s. 47.]

Power to impose penalty by rule.

25. The authority making any rule under section 24 may direct that a breach of it shall be punishable with fine which may extend—

[Act XXII, 1883, s. 14.]

(a) if the authority making the rule is the Local Government, to two hundred rupees, and

[Act XXII, 1883, s. 20, sub-section (3).]

(b) if that authority is a local authority or a promoter or lessee, to twenty rupees;

and, when the breach is a continuing breach, with a further fine which may extend—

[Act XXII, 1883, s. 14.]

(c) if the authority making the rule is the Local Government, to fifty rupees, and

[33 & 34 Vic., c. 78, s. 47.]

(d) if that authority is a local authority or a promoter or lessee, to five rupees,

for every day after the first during which the breach continues.

Procedure for making, and publication of, rules.

26. *(1)* Every authority having power to make rules under any section of this Act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(2) The publication shall be made, in the case of rules made by the Local Government, in such manner as may in its opinion be sufficient for giving information to persons interested, and, in the case of rules made by a local authority or by a promoter or lessee, in manner prescribed.

(3) There shall be published with the draft a notice specifying a date, not earlier than the expiration of one month after the date of publication, at or after which the draft will be taken into consideration.

(4) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(5) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive proof that it has been duly made.

(6) The Local Government may cancel any rule made by a local authority or by a promoter or lessee under section 24.

Offences.

Penalty for failure of promoter, lessee or licensee to comply with Act or order.

27. If a promoter—

(a) constructs or maintains a tramway otherwise than in accordance with the order;

[Act XXII, 1883, s. 14.]

(b) opens the tramway for traffic, or permits it to be so opened, before it has been inspected and certified in manner required by section 12; or

(c) fails to observe any requirement or condition of the order for neglect or breach whereof no penalty has been expressly provided in the order;

or if a promoter, lessee or licensee runs a carriage on a tramway otherwise than in accordance with the order;—

he shall (without prejudice to the enforcement of specific performance of the requirements of this Act or of the order, or to any other remedy which may be obtained against him in a Court of Civil Judicature), on the complaint of the Local Government or of the local authority or road-authority or of any person injuriously affected thereby, be punished with fine which may extend to two hundred rupees, and in the case of a continuing offence to a further fine which may extend to fifty rupees for every day after the first during which the offence continues to be committed.

Penalty for obstructing promoter in exercise of his powers.

28. If any person without lawful excuse, the burden of proving which shall lie upon him, wilfully obstructs any person acting under the authority of the promoter in the lawful exercise of his powers in constructing or maintaining a tramway, or injures or destroys any mark made for the purpose of setting out the line of the tramway, he shall be punished with fine which may extend to fifty rupees.

[33 & 34 Vic. c. 78, s. 19, and Act XXII, 1883, s. 15.]

Penalty for interfering with tramway.

29. If any person without lawful excuse, the burden of proving which shall lie upon him, wilfully does any of the following things, namely:—

[33 & 34 Vic. c. 78, s. 5, and Act XXII, 1883, s. 16.]

(a) interferes with, removes or alters any part of a tramway constructed under this Act, or of the works connected therewith;

(b) places or throws upon or across any such tramway any wood, stone, refuse or other thing;

(c) does anything in such a manner as to obstruct any carriage using any such tramway; or

(d) abets within the meaning of the Indian Penal Code the doing of, or attempts to do, anything mentioned in clause *(a)*, clause *(b)* or clause *(c)*,

XLV of 1860.

he shall (without prejudice to any other remedy which may be obtained against him in a Court of Civil Judicature) be punished with fine which may extend to one hundred rupees.

Penalty for using tramway with carriage having flange-wheels.

30. If any person, except under a lease from, or by agreement with, the promoter, or under license from the Local Government granted under this Act, uses on a tramway, otherwise than as permitted by section 14, a carriage having flange-wheels or other wheels suitable to run on the rail of the tramway, he shall be punished with fine which may extend to two hundred rupees.

[33 & 34 Vic. c. 78, s. 54.]

Penalty for evading payment of proper toll.

31. *(1)* If any person travelling or having travelled in a carriage of the promoter or lessee or a licensee evades or attempts to evade payment of toll, or if any person having paid toll for a certain distance wilfully proceeds in any such carriage beyond that distance and does not pay the additional toll for the additional distance or attempts to evade payment thereof, or if any person wilfully refuses or neglects on arriving at the point to which he has paid toll to quit the carriage, he shall be punished with fine which may extend to ten rupees.

[33 & 34 Vic. c. 78, s. 55, and Act XXII, 1883, s. 18.]

(2) When a person commits an offence under this section and refuses, on demand of a servant of the promoter, lessee or licensee, to give his name and residence, or gives a name or residence which the servant has reason to believe to be false, he may be arrested and taken to the nearest police-station by the servant or any person whom the servant may call in for his assistance.

[33 & 34 Vic. c. 78, s. 56, Act XXII, 1883, s. 19, and Act X, 1882, s. 67.]

(3) When the person is taken to the police-station, he shall with the least possible delay be forwarded to the nearest Magistrate unless his true name and residence are ascertained, in which case he shall be released on his executing a bond for his appearance before a Magistrate if so required.

The Indian Tramways Bill, 1885.—Sections 32-39.

[33 & 34 Vic., c. 78, s. 53, and Act XXII, 1883, s. 17.]

Penalty for taking or sending dangerous or offensive goods without giving notice.

32. If any person takes or sends by a tramway any goods of a dangerous or offensive nature without giving the notice required by section 16, he shall be punished with fine which may extend to fifty rupees.

[33 & 34 Vic., c. 78, s. 38.]

Penalty for licensee not giving to promoter or lessee an account of traffic or giving false account.

33. *(1)* If a licensee fails on demand to give the account mentioned in section 18, or, with intent to evade the payment of tolls, gives a false account when he is called upon to give an account under that section, he shall be punished with fine which may extend to fifty rupees.

(2) The fine shall be in addition to any tolls payable by the licensee to the promoter or lessee in respect of the passengers or goods conveyed by the carriage or carriages used by the licensee on the tramway.

[Act XIII, 1884, s. 158.]

Saving of prosecutions under other laws.

34. Nothing in this Act shall prevent a person from being prosecuted under any other law for an act or omission which constitutes an offence against this Act or the rules made under it, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Act or the rules made under it: Provided that a person shall not be punished twice for the same offence.

Settlement of Differences.

[33 & 34 Vic., c. 78, s. 33.]

Differences between promoters or lessees and authorities.

35. *(1)* If any difference arises between the promoter or lessee on the one hand and the Local Government, or the local authority, or the road-authority, or a person having the charge of any sewers, drains, telegraph lines, gas-pipes or water-pipes, on the other hand, with respect to any interference or control exercised or claimed to be exercised by, or on behalf of, either party by virtue of this or any other Act, or of the order, or of rules made under this Act, or with respect to the propriety of, or the mode of, the execution of any work, or with respect to any compensation to be made by or to the promoter or lessee, or on the question whether any work is such as ought reasonably to satisfy the Local Government or the road-authority or both, or with respect to any other subject or thing regulated by, or comprised in, this Act or the order or rules made under the Act, and not otherwise expressly provided for therein, the matter in difference shall, on the application of either party, be settled by a referee.

(2) Where the difference is between the promoter or lessee on the one hand and the Local Government, either as such or as the road-authority, on the other, the referee shall be the District Court within the jurisdiction of which the tramway is situate, or, where the tramway is within the jurisdiction of more than one District Court, the District Court within the jurisdiction of which the greater part of the tramway is situate.

(3) In other cases, the referee shall be appointed by the Local Government.

(4) The powers and procedure of the referee may be prescribed.

(5) The decision of the referee shall be binding and conclusive on both parties.

Recovery of Tolls.

[33 & 34 Vic. c. 78, s. 56; & Act XIII, 1884, s. 61.]

Recovery of moneys due from promoters and, in certain cases, from lessees.

36. Any of the following moneys, namely, any rent due to a local authority from a lessee, any penalty recoverable from a promoter or lessee under an order, any sum payable by a promoter or lessee under an award of a referee, the cost of the performance under this Act by the Local Government or by a local authority or road-authority of any work required by this Act or an order to be done by a promoter, and the cost incurred by a road-authority in removing a tramway and reinstating a road under this Act, may, without prejudice to any other remedy the authority to which the money is due may have by suit or otherwise, be recovered by that authority, on application made in this behalf to the Collector, as if the sum due were an arrear of land-revenue due by the promoter or lessee or his surety (if any):

Provided that nothing in this section shall authorise the arrest of the promoter or lessee or his surety in execution of any process issued by the Collector.

[Act XIII, 1884, s. 172.]

Recovery of tolls from licensees.

37. *(1)* If a licensee fails to pay on demand the tolls due for the use of a tramway, the promoter or lessee to whom the tolls are due may, without prejudice to the remedy which he may have by suit, apply to a Magistrate to recover the amount of the tolls, and the Magistrate may, after giving notice to the licensee if possible and allowing him an opportunity of being heard, proceed to recover the amount by distress and sale of any carriages or other moveable property of the licensee which may be found on the tramway or on premises connected therewith.

(2) When a licensee has failed to pay on demand the tolls due from him, the promoter or lessee to whom the tolls are due may seize any carriage or other moveable property of the licensee on the tramway or on premises connected therewith, and detain the same for forty-eight hours unless the tolls are sooner paid.

(3) When application is made to a Magistrate under sub-section *(1)*, he may make an interim order of distraint pending his final decision.

[Act XIII, 1884, s. 172.]

Recovery of tolls from passengers.

38. Any toll due to a promoter, lessee or licensee from a passenger may be recovered either by suit or, on application to a Magistrate having jurisdiction within any local area in which any part of the tramway is laid, by distress and sale of any moveable property belonging to the passenger within the local limits of the jurisdiction of the Magistrate.

Savings.

[33 & 34 Vic., c. 78, s. 57; and Act XXII, 1883, s. 9.]

Promoter to have right of user only.

39. *(1)* Notwithstanding anything contained in this Act or in an order, a promoter shall not acquire any right other than that of user only over a road along or across which he lays a tramway, nor shall anything contained in this Act or in an order exempt the promoter of a tramway, or any other person using the tramway, from the payment of such charges as may lawfully be levied in respect of the use of a road or bridge along or across which the tramway is laid.

[Act VIII, 1851.]

[Act XVII, 1878, s. 18.]

(2) The Local Government may, if it thinks fit, fix rates at which a promoter, lessee or licensee

may compound for the charges payable in respect of the use of a road or bridge.

[33 & 34 Vic. c. 78, ss 32 & 60.]

Saving of power over roads traversed by tramways

40. *(1)* Nothing in this Act or in an order shall take away or abridge any power which a road-authority, local authority or other person has by law to break up, widen, alter, divert or improve a road, railroad or tramway along or across which a tramway is laid.

(2) The road-authority, local authority or other person executing any work referred to in sub-section *(1)* shall not be liable to pay to a promoter, lessee or licensee any compensation for injury done to a tramway by the execution of the work or for loss of traffic occasioned by the reasonable use of any power lawfully exercised for the execution thereof.

33 & 34 Vic., c. 78, s. 61; and Act XXII, 1883, s 10.]

Saving of power of local authority and police to regulate traffic on roads.

41. Nothing in this Act or in an order shall affect the powers of a local authority or of a magistrate or police-officer to regulate the passage of traffic along or across a road along or across which a tramway is laid; and the authority, magistrate or officer aforesaid may exercise its or his powers as well on as off the tramway and with respect as well to the traffic of a promoter, lessee or licensee as to the traffic of other persons.

Supplemental Provisions.

[33 & 34 Vic., c. 78, ss 10 & 56.]

Promoters, lessees and licensees to be responsible for all injuries.

42. A promoter, lessee or licensee shall be answerable for all injuries happening through his act or default, or through the act or default of any person in his employment, by reason or in consequence of any of his carriages or works, and shall save harmless all authorities and persons collectively and individually, and their officers and servants, from all damages and costs in respect of injuries so happening.

[Act XXII, 1883, s. 21.]

Want of funds not a sufficient reason for default.

43. For the purposes of this Act, want of funds shall not be deemed to be a sufficient reason for the suspension of the construction, or the discontinuance of the working, of a tramway by a promoter or lessee.

[Act XXII, 1883, s 22.]

Power to exempt from municipal taxation.

44. When a tramway is constructed under this Act within the limits of a municipality, the Local Government may exempt the animals, plant, rolling-stock, yards, workshops, engine-sheds and depôts of the promoter or lessee, for such period as it thinks fit, from all or any municipal taxes leviable within those limits.

[33 & 34 Vic c. 78, s 20.]

Application by local authorities of local funds to tramways.

45. The fund to or with the control or management of which the local authority of a municipality, cantonment or district is entitled or entrusted shall, notwithstanding anything in any Act respecting the purposes to which that fund may be applied, be applicable, subject to the control of the Local Government, to the payment of expenses incidental to the exercise of the powers and functions which may be vested in or exercised by a local authority under this Act.

Extension of Act to existing tramways

46. The Local Government may, with the consent of the local authority and road-authority and of the promoter, extend any part of this Act or of any rules made thereunder, either with or without modification, to the whole or any part of a tramway constructed, or authorised to be constructed, before the passing of this Act, and to any extension of, or addition to, any such tramway, and may withdraw any part of the Act so extended.

IV of 1879.

Meaning of "tramway" in Railway Act.

47. In section 54 of the Indian Railway Act, 1879, the word "tramway" shall have the meaning assigned to it by section 3 of this Act.

[Act XIII, 1881, s 173.]

Powers of Local Government exercisable from time to time.

48. All powers conferred by this Act on a Local Government may be exercised from time to time as occasion requires.

STATEMENT OF OBJECTS AND REASONS.

THE introduction of this Bill has been rendered necessary by the projected construction of tramways in parts of India beyond the reach of a local legislature. In 1883 a special Act was passed by the Governor General in Council to authorise the making, and regulate the working, of tramways in Rangoon. Since that year application has been made for special Acts for tramways in Lahore and Amritsar, and legislation would probably be found to be necessary to regulate the use of tramways in other large towns in which their construction has been approved by, or is under the consideration of, the local authorities.

2. The Bill has been drawn on the lines of the Tramways Act, 1870 (33 & 34 Vic., c. 78), and of the provisional orders and rules made by the Board of Trade under that statute. These orders and rules, and the fullest discussion on almost all points connected with the subject of tramways, will be found in Mr. Sutton's "Tramway Acts of the United Kingdom."

3. The Bill extends in the first instance to the whole of British India except the territories comprised within the sphere of a local legislature, and is extendible to those territories by the Local Government.

4. "Orders" take the place of the "provisional orders" of the English statute, but differ from those orders in not being "provisional" and not being confirmed by a subsequent Act of the Legislature. They also differ from provisional orders in that they must be consistent with the Act and cannot vary or except any part of it.

5. Sections 4 to 6 of the Bill prescribe the conditions on which, and the manner in which, an order may be made; and section 7 specifies the matters for which provision may be made in an order. A reference to the authorities cited against the several clauses of that section will show how those matters are now provided for in the United Kingdom. If an order is found on experience to be defective, it can be supplemented by a further order on the

application of the person in whose favour the original order was made (section 8), or, in certain particulars, by rules (section 24).

6. When the order has been made, the tramway must be constructed, maintained and worked in the manner provided by the order (sections 11 and 27). If the tramway is constructed by a local authority, it will ordinarily be worked by a lessee (section 23). If it is constructed by a private speculator, it may be worked by him or by a lessee to whom he has let the right of user and of demanding and taking the authorised tolls (section 7, sub-section *(4)*). If the owner of the tramway or his lessee so works the tramway that the public is deprived of the full benefit of it, the Local Government may grant a license to any person to use the tramway on the payment of tolls to the owner or the lessee (section 17). If the owner discontinues the working of the tramway (section 19) or through want of funds is unable to maintain the tramway or work it with advantage to the public (section 21), the Local Government may revoke his powers. When the powers of the owner are so revoked, the tramway may either be removed by the authority which has charge of the road on which the tramway is laid (section 20 and section 21, sub-section *(2)*), or it may be purchased by the local authority (section 22).

7. Section 22 provides for tramways which have been constructed by companies and private persons being purchased by local authorities on the expiration of the periods, and upon the terms, specified in the order, or, if the periods and terms were not specified in the order, then on the expiration of the periods, and upon the terms, prescribed in the English statute.

8. When a tramway is purchased by a local authority, it will ordinarily be worked by a lessee. There may, however, be cases in which the authority would be unable to let a tramway for an adequate consideration. It has been provided, therefore (section 23), that in those cases the Local Government may authorise the local authority itself to engage in the business of running carriages.

9. Differences between owners or lessees of tramways and the Local Government or local authorities are to be settled by a referee (section 35), who, if the Local Government is directly interested, is to be the District Judge. The decision of the referee will be final.

10. Sections 36 to 38 provide for the recovery by suit or summary process of moneys due to and from owners, lessees and licensees of tramways.

11. Sections 39 to 41 contain the savings usually found in enactments and agreements relating to the construction of tramways, and section 44 enables the Local Government to exempt from local taxation the animals, plant, rolling-stock and premises of owners and lessees of tramways constructed within the limits of municipalities.

12. Section 46 enables the Local Government, with the consent of the owner and the local authorities, to extend any part of the Act, with or without modification, to a tramway or any part of a tramway constructed, or authorised to be constructed, before the passing of the Act.

The 22nd October, 1885.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE TRIBUTARY STATES OF ORISSA FOR THE YEAR 1884-85.

POLITICAL.

Calcutta, the 12th November 1885.

RESOLUTION.

READ—

The Annual Report on the Administration of the Tributary States of Orissa for the year 1884-85.

Read also—

The Reports for the years 1882-83 and 1883-84, and the orders of Government recorded thereon.

The only administrative change in the management of the Tributary States during the past year was caused by the death of the Rajah of Nursingpore, who was succeeded by his minor son. This State, therefore, together with those of Baramba, Dhenkenal, and Mohurbhunj, is now under direct management. Of the remaining 15 States, 13 are administered by their own Chiefs under the supervision of the Superintendent of the Tributary Mehals; and two—Angul and the Khond Mals—are Government estates.

2. Of the total yearly tribute of Rs. 33,249 payable to Government, the sum of Rs. 3,482 was paid in before the commencement of the year, and during it the entire balance was realized, together with Rs. 6,546 of the claim for the current year.

3. The rainfall during the year is reported to have been generally sufficient. In Pal Lehara, Dhenkenal, Angul, and Hindole, the rains commenced late, and the crops suffered somewhat in consequence. In Baramba and Nursingpore some damage was caused by floods. In Dhenkenal and Angul the rice was only an 8 to 12 annas crop owing to the late setting in of the monsoon, while the cold-weather crops were a total failure. The highest rainfall registered was 64 inches at Duspalla. The rainfall registered at Keonjhur was only 28½ inches, which is evidently incorrect. In his report for the year 1883-84, the Superintendent remarked on the inaccuracy of the registration in Keonjhur, and stated that the Maharajah would be asked to place the rainfall register in better hands. The change, if any has been made, has apparently failed to correct the evil. The Maharajah's attention should again be drawn to the subject with a view to such arrangements being made as will ensure at least approximately correct returns.

4. The general health of the people was good during the past year, though there was an outbreak of cholera in the Nilgiri and Khandpara States. There was also a slight epidemic of the disease in Runpore, Duspalla and Baramba, but not in any of the other States. Two first-class dispensaries exist—one at Mohurbhunj and the other at Dhenkenal—which are in charge of Assistant Surgeons. In eight other States there are dispensaries in charge of hospital assistants, and in a ninth, one of the same class is about to be opened. Some slight progress was made in vaccination. In Mohurbhunj 7,230 persons were vaccinated, and in Baramba, into which State vaccination was for the first time introduced, 1,801 operations were performed. In Pal Lehara, on an epidemic of small-pox breaking out, the Rajah had some persons inoculated: prior to this no one in that State had been either vaccinated or inoculated. In Dhenkenal 1,540 persons were vaccinated, but the work is said to proceed slowly in this State as the people, at the instigation of inoculators, oppose it. The Rajah of Talchere asked for a vaccinator and one was sent, but unfortunately the lymph was bad and the failure of most of the operations creating a bad impression the work had to be stopped. The Superintendent, however, states that a fresh attempt will be made during the current year with better lymph. This subject was specially referred to in the Resolution on the report of 1883-84. It is not necessary here to do more than again draw attention to the remarks there made. With the addition of Nursingpore, more than one-third of the Tributary States are now under direct management, and the time has therefore arrived for a real effort to be made to overcome the people's prejudice against vaccination, and so gradually to remove the superstitious notions that now prevail as to the cause of small-pox.

5. No improvements were made during the year in the general means of communication in the States. The Superintendent remarks that the two most important lines of communication from Cuttack to Sumbulpore—one *vid* Angul and the other along the course of the Mahanuddy—are below flood-level and unbridged, and are useless for more than half the year. He considers that no reasonable expenditure would make them available for traffic during the whole year. It appears, however, that a road could be constructed at a reasonable cost, which would run above the watershed of the country and be thus independent of the floods. The decision of the local Public Works Department, under whose consideration the matter is at present, should be reported to Government. The road will be a useful one, and the Lieutenant-Governor trusts that enquiry may show that its execution is practicable The Rajah of Athgur has, it appears, at length consented to construct the portion of the Cuttack-Dhenkenal road which will lie within his State. It is to be regretted that he has shown hitherto so much opposition to a work from which his State will undoubtedly derive benefits, and the Lieutenant-Governor now hopes that nothing will be allowed to interfere with the fulfilment of his promise. The question of the road between Dhenkenal and Tangy is also one which should be taken up, and the Cuttack Road Cess Committee should give their best consideration to the proposal to construct the portion of it which lies within the Cuttack district. The slow progress in the material development of these Tributary States, which every annual report brings to notice, is due mainly to the want of roads and proper communications. It may be hoped that in the course of a few years railways will be established in the province. The surveys for some of

these have already been completed or are under prosecution, and it is of urgent importance that the roads which connect different parts of the country with the railway should be now taken in hand. The Lieutenant-Governor will hope to have the opportunity of discussing the question with the Commissioner on his approaching tour in Orissa, and it seems to him, if the impecuniosity of the Chiefs stands in the way of road extensions, some plan might be devised by which, under a system of advances from Government, the work would be commenced and carried through.

6. The question regarding the status of the Tributary Mehals of Orissa, which arose in consequence of a decision of the High Court, that Mohurbhunj is not a part of British India, is one which has for some time been before Government. The Government of India finally decided that this ruling must be accepted as conclusive, and that no steps should be taken "in any way indicating a desire to claim Mohurbhunj as part of British India." The Government of India also hold that it was not impossible that the principles which governed the Mohurbhunj case might be held applicable to the other Orissa States, and it was directed that the proceedings of this Government in regard to these States should be so regulated "as to avoid, as far as possible, the risk of the complications which might arise from a decision that the Mehals are not British territory." The Government of India reserved, however, "the fullest right to interfere to such extent as might seem fit for the purpose of securing the good administration of the Mehals, and, when necessary, of conferring upon their officers powers to be exercised within the Mehals." The Superintendent was, in consequence of this decision, asked to consider what arrangements should be made for the trial of cases in the Mehals. His reply has been received, and is now under the Lieutenant-Governor's consideration. With regard to Angul lists of the enactments which are, and which are not, in force in that Mehal were forwarded, prior to publication, for the sanction of the Government of India. A subsequent letter was, however, received from that Government on the subject, and after consulting the Legal Remembrancer and the Superintendent, the Lieutenant-Governor has decided that it is not necessary to publish any notification under section 3 of the Scheduled Districts Act, and information to this effect has been sent to the Government of India. The Superintendent remarks on the difficulties connected with the administration of justice in the Tributary States, and the doubts and uncertainties which exist. The Lieutenant-Governor is aware of the fact, but until orders are issued on the report of the Superintendent regarding the practice at present obtaining in the States, the procedure now in force should be maintained.

7. There was a large increase in the number of civil and revenue suits for disposal in the courts of original jurisdiction during the past year, of which no explanation has been given. The number of cases pending at the close of 1883-84 was 1,553, and to these must be added 2,681 cases of Nursingpore, which was brought under direct management during the year. The number of fresh cases instituted was 11,444 as compared with 6,774 in 1883-84. The total number of cases for disposal was thus 15,678 as compared with 8,136 in the preceding year. Of these 12,873 were disposed of, leaving 2,805 pending at the close of the year. The number of cases disposed of by tehsildars and managers was 12,599, and the number of pending cases on their files 2,496.

8. The number of criminal offences reported during the year was 1,725 as compared with 1,456 in 1883-84. Of these, 1,402 were returned as true. The number of persons concerned in criminal cases, who were under trial during the year, was 2,657, including 134 whose cases were pending from the previous year, the number in 1883-84 being 2,129. Of these, 1,413 were convicted, 1,102 were acquitted or discharged, 37 died, escaped, or were transferred, and 105 remained under trial at the close of the year. There was an increase, as compared with 1883-84 from 321 to 441 in the number of cases of theft returned as true, from 184 to 269 in cases of assault, and from 12 to 48 in the number of cases of criminal misappropriation; while, on the other hand, the number of cases of mischief decreased from 107 to 77.

9. The number of appeals in criminal cases was 159 as compared with 66 in the preceding year. Of these, the appeal was rejected in 11 cases, the sentence or order was confirmed in 121, reduced or altered in 7, reversed in 17, and 3 appeals were pending at the close of the year. There were 250

appeals in civil and revenue cases, including 20 miscellaneous appeals. Of these, the original orders were reversed in 29 cases only, and 35 appeals were pending at the close of the year.

10. The area of the reserved forests in Angul was not increased during the year, but after its close an additional block was added. Steps were taken with some success to prevent injury to these reserved forests from the firing of the jungles beyond the forest reserve to clear the land for *toyla* cultivation: in spite of the precautions taken considerable damage was caused to the forests by fires. The Superintendent being unable to visit the Khond Mals, the report which was promised regarding the steps to be taken for a partial forest conservancy has not been submitted. The Lieutenant-Governor trusts that the Superintendent may be able to submit it after his visit to the Mals during the ensuing cold weather. Regarding the States which are under the management of their Chiefs, the Superintendent remarks: "In the Native States there now appears to be some reaction. The forests of Ranpore, Nayagur, Khandpara, Athgur, and Boad have been either reserved or protected by their Chiefs, and the cutting of trees in Baramba and Nursingpore, which are under the management of this office, has for the present been absolutely prohibited. * * * In Athmullick, the Rajah himself looks after his forests. He cuts large timber trees on his own account and transports them to Cuttack for sale; the felling of sapplings or even of small timber trees is not permitted. Hindole was a few years ago almost denuded of valuable timber trees, but great care is now taken to allow the sapplings to grow." All this is satisfactory. It shows that some of the Chiefs are at length becoming aware of the value of their forests, and are making some efforts to put a stop to the wanton destruction which prevailed while indiscriminate felling was allowed. The Lieutenant-Governor regrets, however, to learn that the Rajah of Duspulla has let out on lease some of his best forests, and for a very inadequate consideration. The Superintendent should explain to him the folly of his action, if he has not already done so, in order that the Rajah may, if possible, be deterred from sacrificing such other portions of his forests as have not been alienated.

11. During the year three new post offices were opened, one of which is a Government post office, while the other two are maintained partly from the Gurjat post fund and partly by Government. Of the 18 offices which exist, three are Government post offices, nine are maintained entirely from the Gurjat post fund, four partly from the latter and partly by Government, and two, at Keonjhur and Bahalda, are private, and are supported by the Keonjhur and Mohurbhunj States, respectively. The contributions of the Chiefs to the Gurjat post fund had to be increased from Rs. 2,200 to Rs. 2,400 during the past year owing to the state of disrepair into which the office buildings and dâk sheds had been allowed to fall, and to the want of proper arrangements for crossing the mails at the different ferries. These matters, which had hitherto been left to the Chiefs themselves, were accordingly taken charge of by the Postal Department, and some expenditure was necessarily incurred. There is little doubt, however, that as the postal system becomes more appreciated, the Chiefs will be relieved of all contributions to the fund. The Lieutenant-Governor notices that the balance due from the States of Boad, Khandpara, Nayagur, and Duspulla on this account are considerable. The Chiefs should be requested to liquidate them. The Chiefs were permitted to send official covers containing magisterial and police papers free of charge to the other Tributary Chiefs of Orissa from the 15th May last, whereas previously they could only send official covers free to the office of the Superintendent.

12. The number of schools at the close of the year was 1,151 as compared with 1,060 at the close of 1883-84, and the number of students increased from 13,667 to 14,836. The increase of 91 schools was due to an increase of 103 in the number of lower primary schools, of one in the number of private institutions, and of three in the number of girls' schools; while, on the other hand, there was a decrease of 16 in the number of upper primary schools. This decrease was due to the fact that, while there was an increase of four in the number of these schools in the other States, 20 out of 26 such schools in the Khond Mals, which had been erroneously entered as upper primary, were removed from that heading and entered as lower primary schools. The number of Government schools was seven, as in the preceding year. The number

of cess schools also remained at 26, but the primary fund schools decreased from 138 to 126, while the number of unaided schools increased from 889 to 992. The total expenditure during the past year was Rs 59,364, of which Government contributed Rs. 8,122, as compared with Rs. 60,029, expended in 1883-84, of which Rs. 7,589 was paid by Government. The inspecting agency, consisting of five Sub-Inspectors and six inspecting pundits, is stated to be insufficient, and proposals, which will give some increase in connection with a revision of the Dhenkenal and Mohurbhunj educational establishments, have been submitted to Government. When orders have been passed on the subject, the Superintendent is prepared to submit further proposals. Of 69 candidates who went up for the upper primary examination, 47 passed, while 187 out of 294 passed the lower scholarship examination.

13. Mr. Wylly, the Manager, was in charge of the Mohurbhunj State during the year, and performed his duties with judgment and ability. During the year Baboo Brindabun Chunder Bhunj, brother of the late Maharajah, again petitioned Government to be appointed Manager. This question had been thoroughly considered by the Lieutenant-Governor before Mr. Wylly was appointed, and the conclusion arrived at was that the Baboo was in no respect a suitable person for the charge. Several memorials have from time to time been presented by the Baboo and his mother against this decision. These were, after a full review of all the circumstances, dealt with in a Resolution dated 30th May last, in which Sir Rivers Thompson finally declined to make any change in the existing arrangements. It may be as well to mention that in Baboo Brindabun Chunder Bhunj's last memorials charges of various kinds were made against the officers connected with the administration, which were found on enquiry to be absolutely untenable. Some of the settlements made by the late Maharajah have expired, and during the past two years four pergunnahs were resettled at an increase of Rs. 20,634 in the rents. Three other pergunnahs remain to be resettled The cost of the Settlement Department in the State during the past year was Rs. 4,709. The expenditure on public works during 1884-85 was Rs. 55,870. The current demand on account of land revenue for 1884-85 was Rs. 1,59,377 as compared with a current demand of Rs. 1,70,780 in 1883-84. The decrease is caused by the exclusion of part of the revenue from the Nayabasan zemindari in Midnapore, only Rs. 7,000 actually received from the Collector of Midnapore being shown, instead of the whole current demand. The total demand for 1884-85, including arrears, was Rs. 2,68,233 as compared with Rs. 3,32,099, the similar demand for 1883-84. The difference is due to the exclusion of the portion of the rent for Nayabasan, to the fact of the inclusion in the figures for 1883-84 of an item under the head "Extraordinary Miscellaneous Revenue" amounting to Rs. 29,110 on account of refund of salaries drawn in excess, which does not appear in the items of receipt for 1884-85, and, lastly, to the fact that in 1883-84 the arrear demands amounted to Rs. 1,00,866, while last year they only amounted to Rs. 73,701. It is very satisfactory that with a smaller demand the collections exceeded those of the preceding year, the collections being Rs. 1,86,358 and Rs. 1,82,505 respectively. Taking the receipts at Rs. 1,86,358 and the expenditure at Rs. 1,82,786, the balance in hand at the close of the year was Rs. 49,484 as compared with a balance of Rs. 45,912 at the close of the preceding year. The minor Chief resides with his tutor at Cuttack, and attends the Ravenshaw College there. The Lieutenant-Governor regrets to learn that the progress of the minor in school is not so good as it should be. The explanation which has been called for from Mr. Kiddell, the minor's private tutor, on this point will be considered at Cuttack. The Lieutenant-Governor is satisfied that the boy is by no means wanting in intelligence, and as he is decidedly stronger and in better health generally than he was a couple of years ago, there is no apparent reason for his not being able to do as well as other boys in his class.

14. In consequence of the turbulent state of the Nilgiri Mehal, Mr. Ricketts was, on the Rajah's special request for a European officer, appointed Manager in 1883-84. The Superintendent reports that peace and tranquillity have been restored, that the relations between the Rajah and the Manager appear friendly, and that no complaints are made against the present administration. This is satisfactory. The Rajah appears to have made over the management of the State to his Manager. The Superintendent observes that a balance

of about Rs. 8,000 is due to the Rajah on account of land revenue from persons who are resident in British India, but that he cannot recover the amount as "the decrees against them in the Rajah's Court cannot be enforced on the debtors for want of any procedure for the enforcement of decrees of Native Courts in British India." The subject will receive the consideration of Government. The Lieutenant-Governor hopes after the ensuing cold weather to receive the report regarding the contested claim to adoption between the nephew of the Rajah and the son of the late Chief of Mohurbhunj.

15. Keonjhur is next to Mohurbhunj the largest State in Orissa. It has an area of 3,000 square miles and frequent disputes regarding its boundaries have arisen during the year. A boundary dispute between the Keonjhur State and the zemandari mehal of Balasore assumed so serious a form that a party of police under an Inspector had to be stationed on the spot till the Superintendent arrived and settled the dispute. Two other disputes in the same State regarding the boundary with Singbhoom and with the Sukinda estate in Cuttack were settled during the year. It is not stated whether, during the past year, anything was done towards improving the internal communications. Much improvement in this respect cannot, of course, be expected, as, with a very extensive area, this State has an income of not more than a lakh of rupees.

16. The total demand in Dhenkenal for the past year, including arrears, was Rs. 99,251, out of which Rs. 90,624 was realized, Rs. 785 was remitted, and Rs. 7,842 was outstanding at the close of the year. A measurement which has been made shows that the area of land under cultivation amounts to 95,513 acres The cost of settlement operations during the past year was Rs. 5,172, the total cost up to the end of the year from the commencement of operations extending over eight years being Rs. 45,007, while the increase in revenue up to the same time was Rs. 19,241. Since the close of the year, the Lieutenant-Governor has sanctioned experimentally for one year the opening of a new subdivision in the State, at the termination of which period a report on the working of the new arrangement will be submitted by the Superintendent. Vaccination was, the Superintendent reports, introduced systematically during the year, and two vaccinators were appointed. Vaccination is not yet appreciated by the people, and only 1,540 operations were performed during the year, out of which 1,266 were successful. The amount spent on public works during the year was Rs. 31,264, of which Rs. 23,453 was spent on original works, including roads, buildings, bridges, the construction of embankments, and the excavation of a tank. Since the close of the year the Lieutenant-Governor has received with much regret the intelligence of the death of the young Rajah, who was only in his 20th year. The event is all the more to be mourned because the young Chief gave promise of being a worthy successor to his father, whose enlightened policy was the cause of Dhenkanal being recognized as the most advanced of all the Tributary Mehals.

17. The agricultural class in Talchere is stated by the Superintendent to be the poorest that he has seen in the Gurjats. Their poverty is said to be due to their over-assessment in 1877. The settlement which was first made for seven years, and subsequently extended for a further period of 10 years, has yet some nine years to run. Under these circumstances it is reassuring to learn that the Rajah takes a personal interest in the administration of his State, "has seen the unreasonableness of the demand, and has in a praiseworthy manner revised and reduced the demand where it pressed heavily." The middle vernacular school at the head-quarters of the State is stated to be a very good school, and it is greatly to the credit of the Rajah that he entirely supports the institution at an annual cost of Rs. 417. The Rajah has also established a dispensary and is constructing roads. He also issued during the past year a report on the administration of his State, which he had published in the local press and circulated to other Chiefs. His example might advantageously be followed in the other States. The Lieutenant-Governor is glad to learn that the Rajah attends Court and decides cases regularly. The very marked improvements in this State are in a great measure attributable, in the first instance, to the Dewan, Baboo Jagabandhu Ghose.

18. When the Baramba State came under the direct management of the Superintendent, it was burdened with a debt of Rs. 28,000. The whole of this

has been paid off, and most of the cesses which the people had to pay have been abolished. The total demand for the past year was Rs. 29,919 as compared with Rs. 29,900 for 1883-84; of this amount Rs. 24,599 was realized and Rs. 1,288 was remitted. The Rajah, who is not yet six years of age, has suffered in health apparently from the bad position of the house he inhabits with his mother. The Manager has been asked to select a better site for his residence.

19. The total revenue demand for Angul for the past year, excluding Rs. 11-8 remitted on account of lands relinquished, was Rs. 32,854 as compared with Rs. 32,984 in the preceding year. The sum of Rs. 4,330 had been paid in advance during 1883-84, and Rs. 28,507 was collected during the year, leaving a balance of only Rs. 17 at its close. There was a falling off in the number of schools and also of scholars, the number of schools decreasing from 144 in 1883-84 to 132 in the past year, and the number of scholars falling from 2,255 to 2,037. There has been a gradual increase in the number of patients treated at the dispensary since 1880-81, the number in that year being 1,791 and during 1884-85, 5,397. The Superintendent remarks that the supply of English medicines, and especially those for the treatment of fever, is insufficient for such a feverish place, and recommends a more liberal supply of medicines to the Angul dispensary as well as to that in the Khond Mals. This recommendation will be forwarded to the Medical Department of this Government for consideration. The construction of a pucca building for the dispensary at Angul has been sanctioned, but as no funds are available the work cannot be carried out at present.

20. The report regarding Pal Lehara is unsatisfactory. The Superintendent states that, with an annual income of a little over Rs. 15,000, the Rajah is in debt to the amount of Rs. 37,000; there is no administrative difficulty in the management of Pal Lehara, but the Rajah's administration is far from satisfactory. The Superintendent thinks that a dewan should be appointed, and that the Rajah should take no active part in the management of the State till the debts have been paid off. Mr. Metcalfe was unable to visit the State personally during the past year, but the Lieutenant-Governor hopes that he may be able to do so this cold weather. After his visit to the State, a report should be submitted to Government embodying such proposals for the better administration of the State and the liquidation of the debts as may seem advisable after a personal and local enquiry into the existing circumstances.

21. The Duspalla State was not visited either during 1883-84 or during the past year by the Superintendent. Mr. Metcalfe should, if possible, do so during the next camping season, as it is very undesirable to leave any State for any length of time without local supervision.

22. The total demand, including arrears and miscellaneous receipts for the past year in Nayagur was Rs. 47,629, out of which Rs. 41,808 were realized. The Rajah is reported to be expensive in his tastes, and to spend almost all his revenue on himself and very little for the public benefit. The Superintendent thinks that it may be necessary to appoint a dewan for this State also. The further communication on this subject is promised.

23. In Boad, in order to assist in the administration of justice in the interior, where there are no courts, it used, until recently, to be the custom to permit the sarbarakars, with the aid of punchayets, to try petty criminal cases, and to impose fines not exceeding Rs. 2. It is reported that these persons, probably from want of supervision, not only tried and disposed of cases which they should not have tried, but further that they imposed fines exceeding Rs. 2, and the Rajah has now abolished the system. It is further reported that it was the custom to allow the sarbarakars to retain half the fines. Such a procedure was most irregular and improper; for the judge, having a pecuniary interest in the result of the case he was trying, had this incentive not only to convict the accused, but to impose the heaviest possible fine. The Superintendent considers that some plan must be devised by which justice can be brought to the doors of the rough aborigines who reside at a distance from head-quarters, and who cannot be expected to bring all their cases before the courts there. The Lieutenant-Governor will be glad to receive definite proposals on the subject.

24. The Rajah of Runpore vested his dewan during the year with powers similar to those of a Magistrate of the second class, a Munsif, and a Deputy Collector. This was done with the approval of the Superintendent. The Lieutenant-Governor must request that all questions of vesting subordinates may be submitted to Government, who will, if necessary, confer the powers; the chiefs should not be permitted to exercise their discretion in this matter.

25. Though only in charge as Superintendent for the last five months of the year, Mr. Metcalfe has submitted an excellant report, for which the Lieutenant-Governor desires to express his thanks. The remarks regarding the officers mentioned in paragraphs 234 to 244 have been noted by Sir Rivers Thompson, and will be recorded in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE TRIBUTARY AND POLITICAL STATES OF CHOTA NAGPORE FOR 1884-85.

POLITICAL.

Calcutta, the 13th November 1885.

RESOLUTION.

READ—

The Administration Report of the Tributary and Political States of Chota Nagpore for 1884-85.

Read also—

The Reports for 1882-83 and 1883-84, and the orders of Government recorded thereon.

Mr. Hewitt, the late Commissioner of the Chota Nagpore Division, was in charge of the division for 10 months out of the year, and was after its close succeeded by Mr. C. C. Stevens, by whom the Annual Report has been submitted.

2. Mr. Hewitt passed a considerable part of the cold weather in the Tributary Mehals. Entering Gangpore in the beginning of December, he was during his stay in it occupied for some time in settling a dispute which had been going on since 1865 about the Tetarkera taruf between the zemindar of Nagra and two other persons. The cause of quarrel was at first a question of boundaries and the improper inclusion in the demarcation of certain "tolas" which were claimed as separate villages. The Commissioner, in the presence of all the subordinate landholders and village headmen concerned in the dispute, made a full investigation and arrived at a decision which was subsequently confirmed by the Government. Mr. Hewitt subsequently visited Bonai and Jushpore; in the latter State he enquired into a statement made to Government by the Vaccination Department, that the Rajah obstructed vaccination The Commissioner found that there was no ground whatever for such a charge; and that the Rajah had acted quite within his rights in resisting the claim for fees which the vaccinators demanded in excess of the regular authorized fee of two annas in each case It has since been settled that an Inspector of Vaccination shall be appointed for the Jushpore and Gangpore States, each State contributing a moiety of his salary; and under such an arrangement there should be no more complaints of extortionate proceedings on the part of the subordinates of the Department. The next States visited were Sirgoojah and Oodeypore. In Oodeypore, Mr. Hewitt temporarily settled a dispute between the Rajah and his brother, Lal Dharam Pal Sing; the dispute, however, broke out again, and has been referred to the Rajah of Sirgoojah, who is the head of the family, as it is one which involves the division of family property. The Commissioner during his tour in Sirgoojah enquired into an oldstanding quarrel which had revived between the Rajah of Korea and his Dewan. During the Rajah's minority, from 1869 to 1876, the State had been managed with excellent results by Bhyro Singh. "During all these years," the Commissioner says, "there were no troubles in Korea." But with the Rajah's assumption of personal authority he wished to displace his Dewan in favour of alien advisers. Both in Colonel Dalton's time, and again in the past year, the Rajah's action has been the cause of serious trouble and confusion, and the Commissioner rightly insisted that the Rajah must get rid of the foreign advisers who were plundering the State. Against these orders the Rajah appealed to Government, and requested confirmation of his order dismissing the Dewan. The Lieutenant-Governor, in refusing to comply with the Rajah's requests, has addressed a serious warning to him regarding the condition of his State, which, from the Commissioner's report, will be rapidly ruined and the country depopulated under the Rajah's misrule. In the meantime the present Commissioner has been directed to visit the State during the ensuing cold weather with a view to the enforcement of salutary reforms. Kharsowan was also visited by Mr. Hewitt, and Seraikella by Lieutenant-Colonel Garbett, the

Deputy Commissioner of Singbhoom, who enquired into the condition of the people, the state of the crops, and inspected the Chyebassa-Purulia road which traverses this State. Arrangements also were made for the establishment of primary schools in several places. The young Chief of Seraikella was invested during the year with the insignia and title of Rajah of the State.

3. The rainfall was sufficient in most of the States, and in Sirgoojah, Oodeypore and Chang Bhakur, as well as in Seraikella and Kharsowan, the crops were all good. Excessive rain in Gangpore and Bonai reduced the outturn in those States to half that of an average year; while in Korea the crops suffered from want of rain. The general health of the people was good, though in Sirgoojah there were 391 deaths from cholera, as compared with 197 in the preceding year; the deaths from small-pox in this State fell, however, from 179 in 1883-84 to 99 during the past year. Cattle-disease prevailed in some of the States, the number of cattle dying in Sirgoojah alone being 23,499, as compared with 8,628 during 1883-84. The mortality amongst the cattle, and the injury to the crops in some of the States, affected the material condition of the people to some extent. The failure in the harvest was chiefly felt in Korea. The only opposition offered to vaccination in the mehals during the past year was in Bonai, where the Rajah admitted that he did not allow the vaccinators deputed to his State to work, because he had had two daughters married during the year. Mr. Hewitt told him he was quite wrong on grounds of mere suspicion in preventing them. In other States, particularly in Sirgoojah, Jushpore and Gangpore, vaccination operations were extensively and successfully carried on.

4. But little was done during the past year for the improvement of education in the States. The general complaint appears to be that the people themselves do not care to send their children to school. The best results were found in Seraikella, where the Rajah and the Babu of Icha, one of his subordinate zemindars, have been showing an intelligent interest in the subject, by frequently visiting existing schools, examining the pupils and distributing prizes Both too have been liberal in their pecuniary contributions to the cause of education. If the action of the Rajah and the Babu of Icha was followed in some of the other States, the backwardness of education generally in the Tributary Mehals would cease to be an object of remark.

5. No new roads were constructed during the year, but the present lines of communication were kept in repair. Mr. Hewitt, when in Sirgoojah, discussed the question of a road in connection with the Bengal-Nagpore Railway. He left on record the following remarks with reference to the matter:—

"The general question discussed this year in Sirgoojah was that relating to the roads. The Rajah and zemindars all agreed to join and construct a series of roads along lines defined in their proceedings, all of which were to meet a centre Grand Trunk Road, beginning opposite Burghur on the banks of the Kunhar in Palamow, and going south-west towards Korba down the Matranga Ghât. The road from Burghur to Garwa, through which almost all the Sirgoojah trade passes, will be made by the Lohardugga Road Committee, and I have written to the Commissioner of Chattisgurh in the Central Provinces to ask whether he cannot arrange for making the road down the Matranga Ghât to Korba. It is absolutely necessary that this road should be made if any of the Sirgoojah trade is to reach the Bengal-Nagpore Railway."

The Lieutenant-Governor will await a further communication regarding the result of the reference made to the Commissioner of Chattisgurh. In the Resolution on the Report for 1883-84, the Commissioner was asked for fuller information regarding the communications in the States, and for any suggestions he might have to make regarding improvements. Mr. Stevens remarks that Mr. Hewitt has left no notes on the subject of improvements, and that, as he himself has as yet no personal knowledge of the various States, he must defer his recommendations to a later period. The Lieutenant-Governor trusts that in the next report, when Mr. Stevens has gained some experience of the country, this important subject will receive his careful consideration. With the not distant prospect of railway extension through parts of the Division, the question of interior road connections becomes of paramount importance.

6 There were 27 cases instituted in the Commissioner's office during the year and 27 were pending from the preceding year. Of the total of 54 cases, only 18 were disposed of, leaving 36 pending on the 31st March 1885. Out of

13 appeals from the decisions of the Chiefs, 8 were disposed of, the order being confirmed in 6 cases, and reversed in 2; the other 5 appeals were pending at the close of the year. The number of persons committed by the Chiefs for trial by the Court of Sessions was 22. Of these, 15 were convicted and 7 were acquitted.

7. The number of criminal cases instituted during the past year amounted to 638, as compared with 505 instituted during the preceding year. There was an increase of 42 in the number of cases of causing hurt, of 58 in the number of theft cases, and of 61 in the number of cases of house-breaking. There were, however, only two cases of murder, as compared with 12 in the preceding year; and under the head of culpable homicide, also, there was a slight decrease, there being only 8 cases, as compared with 10 in 1883-84. The total number of persons concerned in the criminal cases was 1,367, as compared with 905 during the preceding year. There were 295 persons fined during the year, the fines imposed amounting to Rs. 2,313, of which Rs. 1,967 were realized, as compared with 214 persons fined, fines to the amount of Rs. 2,088 imposed, and Rs. 1,724 realized during 1883-84. There were 136 prisoners in jail at the commencement of the year, as compared with 105 at the commencement of the preceding one; and 517 were admitted during the year, making a total of 653, as compared with a total of 382 during 1883-84. Of the total number, 448 were released, 3 died, 9 escaped, and 193 were in jail at the close of the year. It is satisfactory to observe that during the past year, with a jail population greater by nearly 75 per cent. than during the preceding year, the deaths fell from 5 to 3. The total number of accidental deaths was 346, as compared with 311 during 1883-84; of these, 137 were caused by snake-bite, 58 persons were killed by wild animals, 67 were drowned, the rest of the deaths were due to various other causes.

8. Including suits pending at the commencement of the year, there were 492 civil suits for disposal during 1884-85, as compared with 359 for disposal during 1883-84. Of these, 333 were disposed of during the year, and 159 were pending at its close. There were 28 execution cases pending on the 31st March 1884, and 90 were instituted during the year. Of these, 78 were disposed of, and 40 were pending at the end of the year. The amount of civil work in the Tributary States is not large, and is generally limited to petty land disputes and bond debts. The powers of the Chiefs are exercised under the appellate control of the Commissioner of the Division.

9. The report of the management of the Sirgoojah State by the Rajah is again favourable. The Chief continues to receive valuable assistance from his Dewan, Jaffir Ali Khan, and is said to be always "most anxious to do what is right." No disturbance by the Korwas has been mentioned, and the measures alluded to in the Resolution on the Report for 1883-84 appear to have had the anticipated effect of repressing the turbulence of this lawless clan.

10. The Rajahs of Oodeypore and Jushpore have both been commended for their management of their respective States during the past year, and it is also stated that the son of the latter Chief is "beginning to take an active share in business." The Lieutenant-Governor joins in the expression of the Commissioner's hope that he will prove a worthy successor to his father.

11. The Chief of Gangpore acted unwisely in allowing himself to be persuaded by a Sumbulpore Brahmin, whom he employed as a tutor for his son, to impose fees on suitors in civil cases, and to charge a percentage on tradesmen's profits. He also allowed the Brahmin to try civil suits. The Commissioner, however, pointed out to the Chief the impropriety of preventing the people in so poor a State as Gangpore from seeking justice except at a cost which was beyond their means, and that taxes on trades were illegal, and informed him that he had no power to depute the trial of civil suits to a subordinate. The Chief at once agreed to cease to realise the taxes, and to dispense with the services of the Brahmin. The ill-advice given to the Rajah is, as the Commissioner remarks, another instance of "the evil that is done by introducing unscrupulous outsiders in these States."

12. Sir Rivers Thompson is glad that the Superintendent should be able to report so well of the Chief of Seraikella, who only succeeded to the State on the death of his father during the year preceding that to which the report

relates. He has given practical evidence during his first year of administration of a wish to promote the welfare of his people. The late Commissioner, Mr. Hewitt, whose remarks are quoted by Mr. Stevens, speaks well also of the minor Chief of Kharsowan, whose state is for the time under a manager appointed by Government.

13. The tribute payable by the States amounted to Rs. 4,686, and the whole of this amount, as well as Rs. 533 due from Oodeypore on account of the previous year, was realized during the past year.

14. The administration of the different States, with the exception of Korea, has been satisfactory. During the ensuing cold season, Mr. Stevens will no doubt be able to visit most of the Tributary States and to form a personal acquaintance with their Chiefs. He will then be able to speak from his own experience and observation regarding many matters with reference to which he could, in the report under review, merely repeat what he had heard.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of Chota Nagpore for information and guidance.

Ordered also that a copy of the Resolution, together with a copy of the Report, be forwarded to the Government of India in the Foreign Department.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secretary to the Government of Bengal.

SELECTION OF CANDIDATES FOR ADMISSION INTO THE STATUTORY CIVIL SERVICE.

RESOLUTION.

APPOINTMENT.

Dated Calcutta, the 14th November 1885.

READ—

Letter from the Secretary to the Government of India, Home Department, No. 1894, dated the 29th October 1885, calling for the submission, in due course, of the names of candidates for appointment under the Rules framed under 33 Vic., Cap. 3, Section 6.

The Government of India have intimated that the number of nominations of natives of India to offices ordinarily held by members of the Covenanted Civil Service, to be made in 1886 under the rules framed under the Statute 33 Vic., Cap. 3, Section 6, will probably be two for Bengal, and that the Governor-General in Council will be glad to receive, in due course, the names of three selected candidates for each of the said appointments arranged in order of merit.

2. The Government of India have allowed the Government of Bengal to choose its candidates in any manner that may appear to it desirable, special regard being paid (in the case of candidates whose merits and abilities have not been already proved by employment in the public service) to educational attainments and proficiency. It is left open to this Government to select candidates from the Uncovenanted Service or the learned professions, to institute a test of limited competition among nominated candidates, or to follow any other mode of selection that may be thought suitable.

3. The Lieutenant-Governor has, after full consideration, resolved to select out of the whole number of applicants ten for each appointment to be given, and to subject them to a competitive examination to be held in January next on dates to be hereafter notified, and on the conditions specified below. On the conclusion of the examination, Sir Rivers Thompson will submit, with his recommendations, the names, in order of merit, of the first six most successful candidates, from whom two will be finally selected by the Government of India.

4. For the purpose of conducting the proposed examination, a Committee will be appointed, consisting of the Director of Public Instruction, the

Secretary to the Board of Revenue, and the Legal Remembrancer. The examinations will extend over four days. On the first day an essay in English, on a subject to be prescribed hereafter, will be written by the candidates; on the second day a general paper of literary, historical, and philosophical questions will be set; on the third day there will be a general paper on mathematics and physical science; and the subjects of the fourth day's examination will be the Penal and Criminal Procedure Codes and Mr. Field's Introduction to the Bengal Regulations. The candidates allowed to appear at the examination will hereafter be informed by the Committee, which will be appointed as above indicated, of the place at which the examination will be held, and of any other circumstances necessary for their information.

5. The Lieutenant-Governor will make his selection of candidates for examination from (*a*) officers in the service of Government who have specially distinguished themselves; (*b*) persons who have taken the degree of B.A. at the Calcutta University, provided that such persons can produce certificates of their having a thorough practical knowledge of the English language, of their being physically fitted for the service of Government, of their being of good moral character, of active habits and able to ride; (*c*) persons of proved merit and ability in the practice of a learned profession. No candidate not in the service of Government, or who has not been at least five years engaged in the service of a learned profession, will be selected after he has attained the age of 25 years. Applications, which must be accompanied by the certificates above mentioned, and, when necessary, by certificates of age, should be made to the Under-Secretary in the Appointment Department by the 15th December next, after which date no applications will be received.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Chief Secretary to the Government of Bengal.

DISTRICT ROAD FUND.

PUBLIC WORKS DEPARTMENT—ROAD CESS.

Calcutta, the 10th November 1885.

No. 3792R.C.

READ—

Letter from the Accountant-General, Bengal, No. 439L.F., dated the 31st October 1885, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1885.

RESOLUTION.

THE Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees for the third quarter of the cess year 1884-85 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this resolution, and of the abstract referred to, be forwarded to all Commissioners of Divisions, to all Superintending Engineers of Public Works Circles in Bengal, and to the Financial Department of this Government for information.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Under-Secy. to the Govt. of Bengal, P. W. Dept.

Cess Districts.

E. T. ATKINSON,

Accountant-General, Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government during the week ending the 14th November 1885.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL.		
	Western Districts.		
Burdwan Divn. 1	Burdwan, Nov. 14 '85	Nil	Weather—seasonable. Prospects of *amun* continue good. Cultivation of *rubbee* crops and *boro* paddy continues. Public health fair. Price of rice 11 to 16½ seers per rupee.
Burdwan Divn. 2	Bankoora, „ 14 „	0·04	Cold weather setting in, but midday sun still hot. Harvesting of *aus* paddy going on with an outturn of 12 to 16 annas. Condition of all other crops continues very favourable. Public health good.
Burdwan Divn. 3	Beerbhoom, „ 14 „	0·10	Weather—warm. *Aus* crop being harvested. Rain wanted for *amun* on high lands. Prices falling. Public health good.
Burdwan Divn. 4	Midnapore, „ 14 „	Nil	Weather—seasonable. Prospects of crops excellent except in flooded tracts. *Boro* paddy and *rubbee* crops being cultivated. Public health good
Burdwan Divn. 5	Hooghly, „ 14 „	Nil	Weather—seasonable. Prospects of crops good everywhere except rice in inundated parts. Public health fair.
Burdwan Divn.	Howrah, „ 16 „	Nil	Weather—sultry, but cooler in the morning and at night. Prospects of crops favourable where not destroyed by flood. Reaping of *amun* has commenced in some places.
	Central Districts.		
Presidency Divn. 6	24-Pergha. Nov. 17 '85	Nil	Weather—seasonable. Prospects of *amun* crops good except in inundated parts of district. *Rubbee* crops doing well. Public health generally good.
Presidency Divn. 7	Nuddea, „ 14 „	Nil	Weather—seasonable. All crops promise well. *Rubbee* sowings unusually extensive Public health good, but sporadic cholera reported from Kushtea.
	Meherpore ...	0·05	
Presidency Divn. 8	Khoolna, „ 14 „	Nil	Weather—clear. Prospects of *amun* good. Winter crops being sown. Some fever in Satkhira; in other places public health satisfactory.
Presidency Divn. 9	Jessore, „ 14 „	Nil	Weather—seasonable. Prospects of both *amun* and *rubbee* crops continue good. Harvesting of *chhotan amun* has commenced. Fever continues.
Presidency Divn. 10	Moorshedabad, „ 14 „	Nil	Weather—seasonable. More rain wanted for *amun* in the *Rarh*, but on the whole there will be a good crop. *Kalai* doing extremely well. Sowing of other *rubbee* crops nearly finished. Sugarcane good. Public health generally good. Common rice 16 to 17 seers per rupee.
Rajshahye Divn. 11	Dinagepore Nov. 13 '85	Nil	Weather—fair and cool. State and prospects of *amun* crop promising well. Rice selling at from 15 to 25 seers per rupee.
Rajshahye Divn. 12	Rajshahye, „ 14 „	Nil	Weather—seasonable Prospects of *amun* paddy good. Harvesting of *amun* has commenced, also cutting of sugarcane. Sowing of mustard and other cold-weather crops going on. Prices improved. Fever general.
Rajshahye Divn. 13	Rungpore „ 14 „	Nil	Weather—seasonable. Prospects of *amun* and other standing crops continue good. Potato and tobacco being sown. Land being prepared for sowing mustard. Fever excessively prevalent in the Sudder and Nilphamari sub-divisions.
Rajshahye Divn. 14	Bogra, „ 14 „	Nil	Earthquakes and tremors have not quite ceased. Weather not at all cold yet. State and prospects of crops continue very good. Public health fair.
Rajshahye Divn. 15	Pubna, „ 14 „	Nil	Weather—seasonable. Nights getting cold. Prospects of crops continue good. Fever and sporadic cholera about Serajgunge.
Rajshahye Divn. 16	Darjeeling, „ 14 „	Nil	Weather—bright and cold. State and prospects of crops good.
Rajshahye Divn. 17	Julpigoree, „ 14 „	Nil	Cold weather setting in; sun still very hot Condition of all crops good. Fever and cattle-disease prevail in the Alipore sub-division; otherwise public health good.
	Eastern Districts.		
Dacca Division. 18	Dacca, Nov. 14 '85	Nil	Weather—seasonable. Sowing of winter crops going on. Prospects of crops good. Public health good.
Dacca Division. 19	Furreedpore, „ 14 „	Nil	Weather—seasonable. *Dhigha* paddy being reaped. Prospects of *amun* good. Cases of fever here and there.
Dacca Division. 20	Backergunge, „ 12 „	0·11	Weather—seasonable. Prospects of *amun* crop promising. General health poor, fever prevailing in several stations.
Dacca Division. 21	Mymensingh, „ 13 „	Nil	Weather—cool and bright. State of all crops good.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—*concld.*			
	***Eastern District*—contd.**		
Chittagong Divs. 22	Chittagong Nov. 17 '85	Nil	Weather—seasonable. Prospects of crops generally fair. Public health good. Prices falling.
23	Noakholly, Feuny „ 13 „	Nil Nil	Weather—cloudy sky by day; clear and cold by night. About six annas of *raja shail* rice reaped on churs. Prospects good. Land being prepared for cold-weather crops. Price of rice stationary. Health good.
24	Tipperah Chaudpur „ 12 „	0·13 0·20	Bright, clear weather with hot sunshine and cool nights. *Aman* paddy beginning to ripen and continues to promise well. Prices stationary. Public health fairly good; but while there is a remarkable absence of epidemics, there is a good deal of fever prevalent.
25	Chittagong Hill Tracts. „ 10 „	Nil	Weather—occasionally cloudy; foggy mornings. Cotton being gathered. Rain wanted for *aman* paddy. Sugarcane doing well. Lands being prepared for mustard.
	Hill Tipperah, „ 11 „	Nil	Weather—getting cold. *Aman* paddy doing well. Cotton and *til* still being gathered. Public health good.
BEHAR.			
Patna Div. 26	Patna, Nov. 14 '85	Nil	Weather—clear; evenings and mornings cool. Paddy on high lands suffering from want of rain. Sowing of *rubbee* crops in progress but rain wanted in several places. Cotton and castor growing well. *Rahar* in flower in some places. Fever still prevalent in some parts of the district.
27	Gya, „ 14 „	Nil	Temperature still higher than usual at this season. Harvesting of portions of the rice crop has begun. *Rubbee* and poppy sowing going on. Health good. No change in prices.
28	Shahabad, „ 14 „	Nil	Weather—seasonable. Prospects of paddy continue favourable, but more rain wanted for a good harvest. *Rubbee* sowings progressing vigorously. Weather favourable for poppy; early sowings germinating freely, but for want of rain artificial irrigation has to be resorted to universally. Fever and cholera abating.
29	Durbhunga, „ 14 „	Nil	Weather—seasonable. Holding off of rain has caused some injury to paddy in places; prospects, however, generally favourable. *Rubbee* sowings still going on; crops already sown coming on well. Price of rice fallen a little. A few sporadic cases of cholera still reported from Madhubani.
30	Mozufferpore, „ 14 „	Nil	Weather fair. *Rubbee* sowings almost completed and the crop has germinated well in most places. Poppy sowings commenced. Prospects of rice promising. Public health fair generally. Cholera still reported from Sitamurhee
31	Sarun, „ 14 „	Nil	Weather—fine and clear; days warm, nights cool. Prospects of *aghani* paddy continue good. *Rubbee* and poppy sowings going on; early sowings promise well. Irrigation being resorted to where practicable. A shower of rain will be very beneficial. Prices fair. Cases of fever reported; public health otherwise good.
32	Chumparun „ 14 „	Nil	Weather—seasonable. Harvesting of *bhadoi* crops completed. Prospects of *aghani* crops good. Prices of food-grains steady. Public health fair.
Bhagulpur Divs. 33	Monghyr, Nov. 14 '85	Nil	Weather—seasonable. Prospects of standing crops continue good, but the failure of the later rain will injure the paddy on high lands. *Rubbee* sowings in progress. Prices stationary. Public health good.
34	Bhagulpore, „ 14 „	Nil	Weather—cloudy and warm. Prospects of *aghani* crops fair; those on high lands suffering from want of water. *Rubbee* sowings going on, but rain wanted for them also. Cholera still prevails in the north. Prices steady.
35	Purneah „ 14 „	Nil	Weather—rather warm for the season; cool in the morning Prospects of crops good. New rice 20 seers per rupee. Fever less than in previous year. Some cholera in Arrareah and south of the district.
36	Maldah „ 14 „	Nil	Weather—cool and fine. Prospects of all crops continue good. Sowing of cold-weather crops still going on. Coarse rice 17 to 21 seers per rupee. Public health good.
37	Sonthal Pergha. „ 14 „	Nil	Weather—seasonably cold and fine. Some damage to high land paddy for want of rain reported from Godda sub-division; otherwise prospects of rice crop good. Public health good.
ORISSA.			
Orissa Divn. 38	Cuttack Nov. 13 '85	Nil	Weather—clear; nights cold. Early *sarad* rice being reaped with fair outturn Late *sarad* flowering, and in some places in ear. Common rice 12 seers per rupee in town. Cholera has appeared in town and in some parts of Jajpore sub-division; otherwise public health good
39	Pooree, „ 12 „ Khoorda ...	0·84 0·33	Weather—seasonable. Early *sarad* being harvested. Late *sarad* in ear. *Rubbee* sowing has begun. Relief works going on in the Chilka tracts which have suffered loss of crops from drought. Common rice sells at an average of 17 seers 6 chittacks per rupee in Sudder sub-division and 14 seers 5 chittacks in Khoorda sub-division. Cholera has appeared in town.
40	Balasore, „ 13 „	Nil	Weather—seasonable. Early *sarad* crops ripening and are being cut in some places. Late *sarad* crops in ear. *Rubbee* crops progressing well. A few cases of cholera reported from Dhamnagar Chakla. Public health generally good.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
CHOTA NAGPORE.			
South-West Frontier Agency.			
41	Hazaribagh, Nov. 13 '85	Nil	Weather—seasonable. Paddy being harvested with good outturn generally. Cold weather crops doing well. General health fair. A few cases of cholera still continue to be reported.
42	Lohardugga, „ 14 „	Nil	Weather—seasonable. Paddy being harvested. *Rubbee* sowing still continues. Prices steady. Sporadic cases of fever and small-pox reported; public health otherwise good.
43	Singbhoom, „ 13 „	Nil	Weather—seasonable. All crops doing well. Harvesting of paddy continues. General health good.
44	Manbhoom, „ 14 „	Nil	Weather—fine and cool. Paddy on high lands being reaped; outturn seems good everywhere. Cold weather crops coming on. Coarse rice (new) quoted this day (14th) in Purulia market at 24 seers per rupee.

The average fall of the corresponding period for 24 years, S. G.'s Office ...	..	65·11

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o. overcast, d. drizzling rain, ≡ fog, ⌓ dew.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

The mean temperature of the seven days	°	74·4
The extreme variation of temperature		22 2
The maximum temperature		86·1
The mean relative humidity	%	71
The total fall of rain from 8th to 14th November 1885	Ins.	Nil

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

Meteorological Office; India,
Calcutta, the 16th November 1885.

Henry. F. Blanford,
Meteorological Reporter to the Govt. of India.

MEMORANDA.

THE birth and death returns of the principal Municipalities in Bengal furnish the following results for the week ending 31st October 1885 :—

1. That births and deaths were registered in these Municipalities in the proportions per 1,000 of population of 27 3 and 37·0 respectively, as opposed to 24 5 and 34·0 per 1,000 respectively, in the preceding week ending 24th October, indicating a sensible advance in the registration of both events.

2. That the highest proportions of births and deaths were returned from the following Municipalities :—

Births.

	Ratio per *mille.*
Beauleah	49·9
Naraingunge	49·7
Utterpara	47·2
Serampore	47·1
Bhagulpore	45 3
Patna	35 3
Arrah	33·5
Hughli	32 2
Gya	30·8
Durbhanga	30·0

Deaths.

	Ratio per *mille.*
Serampore	60·8
Gya	60·8
Arrah	59 8
Bhagulpore	54·3
Comillah	53·9
Patna	53 5
Puri	46·2
Suburbs of Calcutta	43 2
Purneah	41 6
Naraingunge	37·2
Jessore	36·7
Burdwan	35·1

3. That the mortality from the principal diseases under record stood during the week under review as follows, contrasted with similar information for the preceding week :—

	Ratio per *mille* during the weeks ending—	
	31st October 1885.	24th October 1885.
Cholera	2·4	1·6
Small-pox	,,	·1
Fever	19·8	16·2
Bowel-complaints	6·0	6·8
Injury	·5	·4
Other causes	9·3	8 9

indicating a noticeable increase of mortality from cholera and fever, particularly from the latter.

4. That of the diseases mentioned above, excluding small-pox, from which no death was reported, and injury, the mortality from which was high nowhere, cholera, fever, bowel-complaints and the maladies recorded under the head of "Other causes" proved most fatal in the undermentioned Municipalities—

Cholera.

	Ratio per *mille.*
Arrah ...	29·9
Bhagulpore...	6·3
Monghyr ...	4·5
Patna ...	2·6

Fever.

	Ratio per *mille.*
Comillah ...	42·4
Purneah ...	41·6
Gya ...	36 9
Jessore ...	36·7
Bhagulpore ...	29·9
Arrah ...	27·5
Burdwan ..	24·4
Patna ...	24 3

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "Age," the ratios under which have been omitted, inasmuch as the census of the Europeans, above alluded to, cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorised form of age classification.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 3620A.

GENERAL.—*The 9th November* 1885.—Baboo Mohanund Gupta, Deputy Magistrate and uty Collector, Cuttack, is appointed to perform the functions of a Collector under VII (B.C.) of 1880 in that district.

The 13th November 1885.—Baboo Doorga Churn Ghose, Officiating Khas Tehsildar, Chittagong, is vested with the powers of a Deputy Collector under Regulation IX of 1833.

The 16th November 1885.—Mr. R. F. Rampini, Officiating District and Sessions Judge, 24-Pergunnahs, is appointed to act, until further orders, in the first grade of District and Sessions Judges with effect from the 14th September 1885.

Mr. E. H. Ruddock, Magistrate and Collector, Rajshahye, is appointed to act, until further orders, in the first grade of Magistrates and Collectors with effect from the 13th September 1885.

Mr. Ruddock also acted in the first grade of Magistrates and Collectors from the 30th May to the 13th July 1885, both days inclusive.

Mr. C. C. Quinn, Magistrate and Collector, Patna, acted in the first grade of Magistrates and Collectors from the 13th to the 25th September 1885, both days inclusive.

Mr. Quinn also acted in the first grade of Magistrates and Collectors from the 4th June to the 5th July 1885, both days inclusive.

Mr. R. Cornish, Officiating Magistrate and Collector, Midnapore, is appointed to act, until further orders, in the second grade of Magistrates and Collectors with effect from the 10th September 1885.

Mr. Cornish also acted in the second grade of Magistrates and Collectors from the 30th May to the 13th July 1885, both days inclusive.

Mr. A. C. Tute acted in the second grade of Magistrates and Collectors from the 4th June to the 5th July 1885, both days inclusive, and from the 10th September to the 17th October 1885, both days inclusive.

Mr. C. W. Bolton, Officiating Magistrate and Collector, Gya, is appointed to act, until further orders, in the second grade of Magistrates and Collectors with effect from the 13th September 1885.

Mr. H. J. H. Fasson, Officiating Magistrate and Collector, Backergunge, is appointed to act, until further orders, in the second grade of Magistrates and Collectors, with effect from the 13th September 1885.

Mr. A. Boroouh, Joint-Magistrate and Deputy Collector, Tipperah, on leave, acted in the second grade of Magistrates and Collectors from the 14th to the 25th September 1885, both days inclusive.

Lieutenant-Colonel E. G. Lillingston, Officiating Deputy Commissioner, Lohardugga, acted in the first grade of Deputy Commissioners from the 16th to the 27th October 1885, both days inclusive.

Mr. L. R. Forbes, Officiating Deputy Commissioner, Sonthal Pergunnahs, is appointed to act, until further orders, in the second grade of Deputy Commissioners with effect from the 16th October 1885.

Mr. Forbes also acted in the second grade of Deputy Commissioners from the 26th July to the 25th September 1885, both days inclusive.

The 17th November 1885.—The order of the 18th July last, granting privilege leave for twenty-six days to Mr. Horace A. Cockerell, C.S.I., Member of the Board of Revenue, is cancelled.

The 19th November 1885.—Baboo Kedar Nath Dutt, Deputy Magistrate and Deputy Collector, on special duty, is allowed leave for two months, under section 72, chapter V of the Civil Leave Code, with effect from such date as he may avail himself of it.

Baboo Otool Chunder Chatterjee, Deputy Magistrate and Deputy Collector, Bishenpore, Bankoora, is allowed leave for one month, under section 72, chapter V of the Civil Leave Code, with effect from the 25th instant.

Baboo Juggut Chunder Shome, Deputy Magistrate and Deputy Collector, Rampore Hât, Beerbhoom, is transferred to Bankoora, and is appointed temporarily to have charge of the Bishenpore sub-division of that district, during the absence, on leave, of Baboo Otool Chunder Chatterjee, or until further orders.

The 20th November 1885.—Mr. H. G. Cooke, C.S., has been granted by Her Majesty's Secretary of State for India an extension of furlough for two months.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

ERRATUM.

The 18th November 1885.—In the notification, dated the 3rd October 1885, published at page 38, Part 1B of the *Calcutta Gazette* of the 14th idem, appointing, under section 27 of the Bengal Municipal Act, certain gentlemen to be Commissioners of the Nasirabad Municipality, in the district of Mymensingh—

For "Mr. W. R. Donough" *read* "Mr. W. R. Donogh."

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—Whereas a notification was published at page 14. Part IB of the *Calcutta Gazette* of the 9th September 1885, declaring the Lieutenant-Governor's intention to extend the provisions of Part VI of the Bengal Municipal Act III (B.C.) of 1884 to the Madhubani Municipality, in the district of Durbhunga, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within he said municipality, it is hereby notified for general information that in the exercise of the powers conferred on the Local Government by section 221 of the Act, and in compliance with the recommendation of the Commissioners of the said municipality, made at a meeting, the Lieutenant-Governor directs that Part VI of the Act be extended to the municipality.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—Whereas a notification was published at page 2, Part IB of the *Calcutta Gazette* of the 12th August last, declaring the Lieutenant-Governor's intention to extend the provisions of Part VI of Act III (B.C.) of 1884 to the Bettiah Municipality, in the district of Chumparun, and whereas no objection has been raised to such extension within one month from the date of publication of the notification within the Municipality, it is hereby notified for general information that, in the exercise of the powers conferred upon him by section 221 of the Act, and in compliance with the recommendation of the Commissioners of the said Municipality, made at a meeting, the Lieutenant-Governor directs that Part VI of the Act be extended to the Municipality, with effect from the 1st January next.

J WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power conferred on him by section 1, Act IV (B.C.) of 1873, to extend the provisions of the said Act, so far as they relate to the registration of deaths, to the municipality of Dinagepore, in the district of Dinagepore, unless good reasons be shown to the contrary within one month from the date of the publication of this notification.

J. WARE EDGAR,
Offg. Secy to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—Whereas a notification was published at page 788, Part I, of the *Calcutta Gazette* of the 5th August 1885, declaring the Lieutenant-Governor's intention to extend the provisions of Part X of Act III (B.C.) of 1884 to the Chupra Municipality, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within the said Municipality, it is hereby notified for general information that, in the exercise of the powers conferred on the Local Government by section 221 of the Act, and in compliance with the recommendation of the Commissioners of the said Municipality, made at a meeting, the Lieutenant-Governor directs that Part X of the Act be extended to the Municipality.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—Whereas a notification, dated the 3rd August 1885, was published in the *Calcutta Gazette* of the 5th idem, declaring the Lieutenant-Governor's intention to extend the provisions of Parts VI, IX and X of the Bengal Municipal Act, III (B.C.) of 1884, to the Sahibgunge Municipality, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within the said municipality, it is hereby notified for general information that, in the exercise of the powers conferred upon the Local Government by section 221 of the Act, and in compliance with the recommendation of the Commissioners of the said municipality, made at a meeting, the Lieutenant-Governor directs that Parts VI, IX and X of the Act be extended to the municipality, with effect from the 1st January next.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—It is hereby notified that, under section 27, Act III (B. C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Rajendra Nath Roy to be a Commissioner of the Chupra Municipality, in the district of Sarun, *vice* Mr. H. Lee, C.S., transferred.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—It is hereby notified that, under section 27, Act III (B. C.) of 1884, the Lieutenant-Governor is pleased to appoint Dr. J. Moorhead to be a Commissioner of the Nasirabad and Muktagacha municipalities, in the district of Mymensingh, *vice* Dr. T. R. Macdonald, transferred.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th November 1885.—It is hereby notified that, under section 59, Act III (B. C.) of 1884, the Lieutenant-Governor approves the election by the Commissioners of the Furreedpore Municipality, of Baboo Ambika Charan Majumdar to be their Chairman, *vice* Dr. D. Basu, resigned.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th November 1885.—It is hereby notified that the Commissioners of the Howrah Municipality, at a meeting, having requested the Local Government to appoint a Chairman, the Lieutenant-Governor is pleased, under section 27 of Act III (B.C.) of 1884, to appoint Mr. R. Carstairs, C.S., to be Chairman of that municipality, *vice* Mr. W. H. Grimley, resigned.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th November 1885.—It is hereby notified for general information that the declaration, dated the 3rd April 1884, published at page 530, Part I of the *Calcutta Gazette* of the 16th idem, regarding the acquisition of a plot of land in mohullah Mohurumpore, in the town of Patna, required by the Patna Municipality for the purpose of excavating a tank, is hereby cancelled.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th November 1885.—Whereas a notification, dated the 6th June 1885, was published at page 553, Part I of the *Calcutta Gazette* of the 10th idem, declaring the intention of the Lieutenant-Governor, in accordance with the recommendation of the Commissioners of the Motihari Municipality, made at a meeting to extend, under section 221 of the Bengal Municipal Act III (B C.) of 1884, the provisions of Part X of that Act to that Municipality, and whereas no valid objections have been raised to the proposal, it is notified for general information that the Lieutenant-Governor hereby extends the provisions of Part X of the Act to the Motihari Municipality.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th November 1885.—In supersession of the notification, dated the 4th September last, published at page 17, Part IB of the *Calcutta Gazette* of the 16th idem, it is hereby notified for general information that an election will be held, under section 27, Act III (B.C.) of 1884, on the 15th January 1886, in Wards Nos. III and IV of the Satkhira Municipality, in the district of Khoolna, for the purpose of filling the vacancies in the place of Baboo Purna Chundra Roy and Baboo Upendra Nath Mookerjee, respectively.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 20th November 1885.—It is hereby notified for general information that an election will be held, under section 27 of Act III (B.C.) of 1884, on the 8th January 1886, in Ward No. IV of the Kandi Municipality, in the district of Moorshedabad, for the purpose of filling a vacancy in that ward in the place of Baboo Radha Madhub Ghosh Roy.

J WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 21st November 1885.—It is hereby notified for general information that an election will be held, under section 27, Act III (B C.) of 1884, on the 16th January 1886, in Ward No. I of the Old Maldah Municipality, for the purpose of filling the vacancy caused by the resignation of Baboo Krishto Mohan Satyar.

J. WARE EDGAR,
Offg. Secy. to the Govt of Bengal.

NOTIFICATION.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—Whereas a notification, dated the 26th May 1885, was published at page 515, Part I of the *Calcutta Gazette* of the 3rd June last, declaring the intention of the Lieutenant-Governor to extend, in accordance with the request of the Commissioners of the North Barrackpore Municipality, made at a meeting, the provisions of sections 224 to 253, 258, 261 to 273, and 275 to 278 of Part VI of Act III (B.C.) of 1884 to the said municipality, and whereas no valid objections have been raised to such extension within one month from the date of the publication of the notification within the municipality, it is hereby notified that in the exercise of the power vested in the Local Government by section 221 of the aforesaid Act, the Lieutenant-Governor directs that the sections of Part VI of the Act referred to above be extended to the municipality of North Barrackpore.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Haran Chunder Mookerjea to be a Commissioner of the South Barrackpore Municipality, *vice* Baboo Bunko Bihary Chatterjea, resigned.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—It is hereby notified that Baboo Shib Chundra Miser has been elected to be a Commissioner of the Bhuddessur Municipality, in the district of Hooghly, *vice* Baboo Jogendro Nath Chatterjea, removed.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—It is hereby notified for general information that an election will be held, under section 27, Act III (B.C.) of 1884, on the 15th January 1886, in Ward No. VII of the Jungipore Municipality, in the district of Moorshedabad, for the purpose of electing a Commissioner in the place of Baboo Bepin Behary Saha, who has ceased to be a Commissioner under section 20 of the Act.

J. WARE EDGAR,
Offg. Secy to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—In continuation of Government notification dated the 19th January 1885, published at page 42, Part I of the *Calcutta Gazette* of the 21st idem, the Lieutenant-Governor sanctions, under section 35, Act V (B.C) of 1870, the expenditure of Rs. 4,109-9-4 incurred in excess of the amount of Rs 43,518 sanctioned for the construction of two screw pile jetties at the spurs which have been provided for the accommodation of the Howrah and Ganges Mills.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—Whereas a notification, dated the 25th August 1885, was published at page 10, Part IB of the *Calcutta Gazette* of the 2nd September last, declaring the intention of the Lieutenant-Governor to sanction, under section 86, Act III (B.C.) of 1884, the levy by the Commissioners of the Mozufferpore Municipality, under section 131 of the Act, of a tax on carriages, horses, and other animals mentioned in the fifth schedule of the Act, at the rates not exceeding those specified in the said schedule, and of a fee, under section 143, on the registration of carts kept or habitually used within or let on hire within or without the municipality, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within the municipality, it is hereby notified for general information that, in accordance with the recommendation of the Commissioners of the municipality made at a meeting, the Lieutenant-Governor sanctions the levy by the Commissioners of the municipality of the said tax on carriages, horses, and other animals specified in the said schedule, and of the said fee on the registration of carts.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 23rd November 1885.—Whereas a notification, dated the 22nd August 1885, was published at page 10, Part IB of the *Calcutta Gazette* of the 2nd September last, declaring the Lieutenant-Governor's intention to sanction, under section 86, Act III (B.C.) of 1884, and in accordance with the recommendation of the Commissioners of the Julpigoree Municipality, the levy by the Commissioners of a tax under section 131 of the Act on carriages, horses, and other animals specified in the fifth schedule of the Act at half the rates mentioned in the said schedule, and of a fee at Rs 3 per annum under section 143 on the registration of carts kept or habitually used within the municipality, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within the municipality, it is hereby notified for general information that the Lieutenant-Governor sanctions the levy by the Commissioners of the Julpigoree Municipality of the said tax on carriages, horses, and other animals at rates not exceeding those specified in the schedule mentioned above, and of the said fee on the registration of carts.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th November 1885.—Whereas a notification, dated the 2nd September 1885, was published at page 15, Part IB of the *Calcutta Gazette* dated the 9th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of Part IX of the Act III (B.C.) of 1884 to the portion of the Howrah Municipality called Bajoh Shibpore, situated within the following boundaries, and whereas no objection has been raised to the proposal within one month from the date of the publication of the notification within the municipality, hereby notified for general information that in exercise of the powers conferred upon Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the municipality, the Lieutenant-Governor directs that Part IX of the Act be extended to the portion of the municipality above referred to:—

On the North.—A line drawn east and west from the south side of Shibpore thana

On the South.—Kally Kumar Mookerjee's lane.

On the East.—Grand Trunk Road.

On the West.—Chunder Kumar Banerjee's Lane.

J. WARE EDGAR,
Offg. Secy. to the Govt of Bengal.

NOTICE.

The 24th November 1885.—The following draft of rules which the Lieutenant-Governor proposes to make under clauses (*f*) and (*q*) of section 138 of the Bengal Local Self-Government Act, 1885, is published for general information under section 143 of the said Act, and notice is hereby given that the said rules will be taken into consideration on or after the 1st January 1886, when any objections or suggestions which may be made by any person and received before that date will also be considered.

EDUCATION.

GENERAL.

1. Throughout these rules the term "Inspector" includes the Circle Inspector, and a Joint or Assistant Inspector authorized to act on his behalf, and the term "schools under public management" includes all schools in which the course of study conforms to the standards prescribed by the Department of Public Instruction or by the University, and which are aided or inspected by the Department or regularly present pupils at the public examinations held by the Department, or by the University.

SECTION I.—BOARD SCHOOLS

1. All schools under public management, with the maintenance and management of which a District Board shall be charged, and for the management and maintenance of which it shall become responsible under sections 62 and 63 of the Act, shall be deemed Board Schools. They are divided into three classes,—Middle Schools maintained and managed directly by the Board, Aided Schools, and Primary Schools.

2. Subject to the approval of the Educational Department, and also subject to the rules hereinafter to be prescribed in regard to Aided schools and schools maintained by Union Committees, the administration of Board schools as regards teaching and discipline, the appointment, punishment, and dismissal of masters, the fixing and payment of the masters' salaries, allowances, and pension contributions, and the grant of leave of absence to the masters, shall be conducted by the District or Local Board, or by the Committee of Management, under the general control of the District or Local Board.

3. District Boards shall be liable for the payment of the stipends of Board school teachers under training in institutions provided by Government for that purpose.

4. Board schools shall be liable to periodical inspection and examination by officers of the Educational Department and by the Magistrate of the district.

5. Every member of the District Board, and in cases where the management and maintenance of a school shall have been made over to a Local Board, every member of the Local Board, and in cases where a Committee of Management shall have been appointed, every member of the Committee of Management shall be entitled to be present at such inspections and examinations.

6. The Bills of Board schools shall be passed by the District Board.

SECTION II.—HIGH ENGLISH SCHOOLS.

1. Whenever by order under section 64 of the Act the management and maintenance of a High English school shall have been entrusted to a Joint Committee, the following rules shall be in force.

2. Subject to the approval of the Educational Department, the administration of the school as regards teaching and discipline, the fixing of the monthly, admission, and re-admission fees, to be paid by the pupils, the award of prizes to the pupils, the appointment, punishment, and dismissal of masters, the fixing and payment of the master's salaries, allowances, and pension contributions, and the grant of leave of absence to the masters shall be conducted by the Joint Committee.

3. No vacations or holidays shall be allowed to the masters and pupils of the school other than those sanctioned by Government.

4. The Joint Committee shall be bound to furnish such reports and returns as shall be from time to time required by the Educational Department and by the authorities of the University of Calcutta.

5 The Joint Committee shall conform to such regulations as the authorities of the University of Calcutta shall from time to time make with regard to the conduct of examinations.

6. The school shall be liable to inspection and examination by the Inspector, the Magistrate of the district, the Principal of any Government College within the Municipality in which the school is situated, and any Fellow of the University of Calcutta. Any report that the Inspector, the Principal of any Government College within the Municipality, or any Fellow of the University of Calcutta shall think fit to make, shall be forwarded in writing to the Joint Committee, and a copy shall at the same time be sent to the Director of Public Instruction.

7. The buildings of the school shall be liable to inspection by any officer of the Public Works Department whom the Government may entrust with this duty. He shall forward his remarks in writing to the District Board, and shall [illegible] a copy of them [illegible] Director of Public Instruction

SECTION III.—MIDDLE SCHOOLS.

1. All Middle Schools, not being grant-in-aid schools, shall be managed and maintained directly by the District Board.

2. With regard to all such schools, the District Board shall have, within the Board's jurisdiction, the following powers :—

(1) Of deciding where new schools shall be opened and the manner in which accommodation therefor shall be provided.

(2) Of deciding upon the transfer or abolition of existing schools.

(3) Of fixing the class of every such school : the selection to be made from classes recognized by the Educational Department.

(4) Of prescribing the standard of teaching in every such school : the selection to be made from standards recognized by the Educational Department.

(5) Of fixing, subject to such limitations as may be from time to time prescribed by the Education Department, the rate of monthly, admission, and re-admission fees to be paid by pupils in every such school.

SECTION IV.—GRANT-IN-AID SCHOOLS.

1. Nothing contained in this section shall entitle a District Board to interfere in the management of an aided school further than is necessary to ascertain whether the terms of the grant are being complied with.

2. The Lieutenant-Governor shall have power to exempt any school or class of schools from the operation of the rules contained in this section.

3. Whenever under section 63 of the Act funds shall have been made over to a District Board for the management and maintenance of grant-in-aid schools within the district, the District Board shall be charged with and responsible for their distribution in accordance with the following rules.

4. The managers of any school on behalf of which application for a grant is made must appoint a Secretary to conduct their correspondence with the District Board and with the Educational Department.

5. In respect of any school for which application is made, full information must be supplied on the following points in the form prescribed in the grant-in-aid rules sanctioned by the Government of Bengal :—

(*a*) The pecuniary resources—permanent and temporary—on which the school will depend for support.

(*b*) The proposed monthly expenditure in detail.

(*c*) The average number of pupils to be instructed.

(*d*) The persons who will form the Committee of Management.

(*e*) The standard of instruction : the selection to be from standards recognized by the Educational Department.

(*f*) The number and salary of the teachers.

(*g*) The amount of aid sought.

(*h*) The existence of other schools within a distance of six miles.

6. An application for a grant shall be made directly to the District Board. Should the Board refuse to sanction the application either in whole or in part, it shall record its reasons for such refusal. The applicant may then appeal from such refusal to the Inspector, who shall consult the Magistrate, and, if necessary, report the matter through the Director of Public Instruction to the Government for final orders.

7. No grant to a school shall exceed in amount the sums to be expended from private sources, except in special cases under special orders of Government.

8. Grants may be of two kinds—annual and special.

9. No annual grant to a middle school shall exceed one-half of the income guaranteed from private sources.

10. No annual grant to a primary school, a girl's school, a training school, or a special school, shall exceed the full amount of the income guaranteed from private sources.

11. Annual grants shall be sanctioned ordinarily for a period of five years, but the Board may at any time during its currency, for reasons specified in writing, and which shall have reference to the Board's finances, or to the character of the teaching and discipline in the school, or to the general circumstances of education in the district, revise the grant. Against such an order of revision, however, an appeal shall lie to the Inspector, who shall deal with it in the manner specified in Rule No. 6.

12. The sanction to a grant shall be given in a form prescribed by Government.

13. Special grants up to a maximum of half the total expenditure may be given by District Boards towards the cost of furnishing school-houses and providing maps and other school apparatus in consideration of expenditure from private sources incurred in the establishment and equipment of schools, and on condition that the managers undertake to refund the amount of any such grant if the school obtaining it should be abolished within a period of five years.

14. Special grants may be given towards the cost of building school-houses, provided such school-houses are masonry structures.

15. Grants shall not be given to pay off debts for buildings, nor in consideration of former expenditure for building, nor for the maintenance of buildings.

16. Before a building grant is sanctioned by a District Board, the site, plans, estimates, specifications, title and trust deeds must be approved by the Inspector.

17. In the event of a difference of opinion between a District Board and an Inspector with reference to a building grant, the matter shall be referred to the Commissioner through the Magistrate, and if the Commissioner does not concur in the view of the Inspector, to Government through the Director of Public Instruction.

18. Any school to which aid is given by a District Board, together with all its accounts, books and other records shall at all times be open to inspection and examination by any officer appointed by Government for that purpose; and to this end the records and accounts shall be placed in such custody that they shall always be accessible on the visit of any inspecting officer. Such inspection shall have no reference to religious instruction, but only to secular education.

19. Should an Inspecting officer discover that the instruction or discipline in any school aided by a District Board is not efficient, or that the accounts are not properly kept, or that any of the conditions on which grants are made are not observed, he shall refer the matter to the Magistrate, who may, if he thinks fit, make a representation to the District Board. Should the District Board not comply with his representation, he shall report the fact to Government through the Director of Public Instruction.

20. District Boards shall not be allowed to make a grant to any school, except a school for training teachers, that does not require some fee from all its scholars, without the permission of the Director of Public Instruction. Before giving a grant-in-aid to any school, the District Board shall require the managers of the school to which aid is proposed to be given, to sign an agreement on stamped paper to the effect that they will conduct the school in accordance with the conditions of the grant.

SECTION V.—PRIMARY SCHOOLS.

1. Subject to the powers entrusted to Union Committees by section 112 of the Act, District Boards shall be charged with the duty of maintaining and managing all primary schools under public management within the district, and of determining the rates of stipends or rewards payable to the gurus and pupils of such schools, in accordance with the rules prescribed by the Educational Department.

2. District Boards shall grant rewards to the gurus and pupils of all primary schools within the district on the result of periodical examinations.

3. Such examinations shall be conducted under the supervision of the Deputy Inspector by the Sub-Inspectors and Examiners appointed by the District Board in consultation with the Deputy Inspector, at times to be settled beforehand by the Inspector in consultation with the District Board.

4. All payments and rewards to gurus and pupils to be granted on the result of such examinations shall be sanctioned by the Board on the report of a Sub-Inspector, confirmed by the Deputy Inspector.

5. The District Board shall, in consultation with the Deputy Inspector, make payments to chief gurus and other agents (exclusive of Sub-Inspectors) employed to inspect primary schools within the district.

6. Every District Board may make grants and contributions to primary schools under private management within the district, provided such grants and contributions be in accordance with the rules from time to time prescribed by Government.

7. Should any difference of opinion arise between the District Board and the Deputy Inspector, the matter shall be referred for the decision of the Inspector. Should the District Board be dissatisfied with the decision of the Inspector, the matter shall be referred through the Magistrate to the Commissioner; and if the Commissioner does not concur in the views of the Inspector, to Government through the Director of Public Instruction.

8. Should the District Board be dissatisfied with the decision of the Inspector, it may request him to refer the matter to Government through the Director of Public Instruction.

9. District Boards shall be responsible for the payment of the stipends of primary school teachers under training in institutions provided by Government for this purpose.

SECTION VI.—LOCAL BOARDS.

1. In every case where a District Board shall, under section 101 of the Act, transfer the management and maintenance of any school or schools to a Local Board, the provisions contained in the preceding rules shall be generally applicable to such Local Board: provided that the District Board shall, in all cases, have a general power of control.

SECTION VII.—UNION COMMITTEES.

1. Every primary school under public management maintained by a Union Committee under section 112 of the Act shall be called a Union Committee school.

2. Every Union Committee shall have the power within the Union—

(1) Of determining the places at which Union Committee schools shall be opened.

(2) Of deciding upon the transfer or abolition of existing Union Committee schools.

(3) Of fixing the class of every such school, the selection to be made from classes recognized by the Educational Department.

(4) Of prescribing the standard of instruction in every such school, the selection to be made from standards recognized by the Educational Department.

(5) Of fixing the salary of the guru of every such school and of removing or transferring him within the Union.

(6) Of fixing the rate of monthly, admission, or re-admission fees payable by the pupils of every such school.

3. With reference to section 112 of the Act, by which Union Committees are declared responsible for the transmission to gurus of Union Committee schools for the rewards granted by the District or Local Boards, it shall be the duty of each Union Committee to compel the guru of each such school to attend such examinations and gatherings, and to present his pupils at such examinations and gatherings as shall be from time to time ordered by the District or Local Board or the Deputy Inspector.

4. Every Union Committee school will be subject to periodical inspection and examination by officers of the Educational Department and by the Magistrate of the district.

5. Nothing in these rules shall preclude the establishment and maintenance of primary schools within the Union by private individuals or self-constituted local associations, and the pupils of all such schools shall be entitled to present themselves at all examinations for rewards and grants payable by the District Board to the pupils and gurus of primary schools.

SECTION VIII.—SCHOLARSHIPS.

1. Lower primary scholarships shall be awarded by the District Board in consultation with the Deputy Inspector, and a list of the scholars elected shall be forwarded to the Inspector, who will pass the bills as at present.

2. The lower primary scholarship examination shall be conducted in every district by the Sub-Inspectors under the supervision of the Deputy Inspector.

3. It shall be competent to the District Board, before the award of upper primary and middle scholarships, to make representations to the Inspector in favour of particular schools or tracts which it may deem deserving of special encouragement on account of their less advanced state, or for other reasons, and the Inspector shall be bound to take such representations into consideration.

4. The District Board shall be furnished every year with an abstract of the results of the upper primary and middle scholarship examinations

SECTION IX.—FINANCE.

1. For the purpose of the maintenance and management of schools, the Lieutenant-Governor shall every year make over to the District Board the primary allotment of the district, the grant-in-aid allotment for Board schools falling under section IV of these rules, a contribution to the support of those schools to be managed directly by the Boards, and any additional sum that may be granted in support of education under the control of the District Board.

2. The Deputy Inspector shall prepare educational budget estimates for the district, and shall submit them to the District Board before the 1st of August in the year immediately preceding that for which they are framed. The approved budget estimates shall be forwarded by the Board to the Director of Public Instruction before the 1st of September.

3. The Inspector shall prepare budget estimates for every High English School within his circle, the management and maintenance of which shall, under section 64 of the Act, be entrusted to a Joint Committee, and shall submit them to the Joint-Committee before the 1st of August in the year immediately preceding that for which the estimates are framed. The approved estimates shall be forwarded to the Director of Public Instruction before the 1st of September.

SECTION X.—RELATION OF DISTRICT BOARDS TO EDUCATIONAL CONTROLLING AGENCIES.

1. All Sub-Inspectors within the district shall submit their diaries to the District Board through the Deputy Inspector, who will forward them with his remarks. They will conduct all examinations for rewards under the orders of the District Board in consultation with the Deputy Inspector.

2 Sub-Inspectors may be degraded or suspended by the District Board, but no Sub-Inspector shall be dismissed without the consent of the Director of Public Instruction. Sub-Inspectors who have been degraded or suspended shall have an appeal through the Magistrate to the Commissioner.

3. Subject to the veto of the Inspector, Sub-Inspectors shall be appointed by the District Board. Leave may be granted to Sub-Inspectors by the District Board, in accordance with the provisions of the Civil Leave Code, notice of the fact being at the same time communicated to the Inspector. Applications for leave from Deputy Inspectors shall be forwarded through the Inspector to the Director of Public Instruction.

4. The salary and travelling bills of Sub-Inspectors shall be passed by the District Board.

5. The Deputy Inspector shall forward to the District Board a copy of so much of the quarterly return of his inspection of schools as has reference to Board schools.

6. The correspondence of District Boards with the Director of Public Instruction shall be carried on through the Inspector.

SECTION XI.—MISCELLANEOUS.

1. No school building or extension of a school building shall be constructed by a District Board unless the plans and estimate for the same shall have been approved by the Inspector if the cost of the work is not to exceed Rs. 1,000, or by the Director of Public Instruction in any other case.

2. Before a District Board commences to erect a building for the accommodation of a school of the estimated cost of Rs. 200 and upwards, the site for the same must be approved by the Inspector.

3. In the event of a difference of opinion between a District Board and the Inspector as to the suitableness of a proposed site, the question shall be referred to the Commissioner, and if the Commissioner does not concur in the views of the Inspector, to Government through the Director of Public Instruction.

4. Every Inspector shall specially notice in his annual report the state of the building, library, furniture, and play-ground of every middle school under the management of a District Board within his circle. The annual report of the Inspector shall briefly discuss the points raised by District or Local Boards, or by Committees of Management, or by District Officers during the year.

5. A quarterly statement of all payments made for educational purposes within the District on the authority of the District Board shall be forwarded by the District Board to the Inspector.

6. At the close of every financial year the District Board shall submit a report of its operations, which shall reach the Inspector's office on or before the 1st of May, and shall be forwarded by him to the Director.

7. All schools managed and maintained by District or Local Boards shall be bound to submit such annual and periodical returns as may be called for by the Educational Department, and periodical or other indents in regard to all such schools shall be submitted in forms approved by the department.

8. All schools not being grant-in-aid schools managed and maintained by District Boards shall be obliged to select their text-books from a list published by the Director of Public Instruction.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 21st November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz. for a latrine in Schalch's Street, it is hereby declared that for the above purpose a piece of land No. 11, Koomertooly Street, in the town of Calcutta, district 24-Perguunahs, measuring, more or less, 1 cottah only, is required.

The boundaries of the land are as follow:—On the north and east, premises No. 11, Koomertooly Street; on the south, land belonging to the Port Commissioners; and on the west, a passage.

A plan and a specification of the land are filed in the office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 21st November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz. for a latrine at No. 215, Upper Chitpore road, it is hereby declared that for the above purpose a piece of land No. 215, Upper Chitpore road, in the town of Calcutta, district 24-Perguunahs, measuring, more or less, 1 cottah only, is required. The boundaries of the land are as follow:—On the north, premises No. 214, Upper Chitpore road; on the south and west, premises No. 215, Upper Chitpore road; and on the east, Upper Chitpore road.

A plan and a specification of the land are filed in the office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 23rd November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Motihari Municipality for a public purpose, viz. for the construction of a slaughter-house for the municipality, in the village of Khodanagur, appertaining to *mehal* Motihari, *pergunnah* Majhowa, *zillah* Chumparun, it is hereby declared that for the above purpose a piece of land measuring, more or less, 5 cottahs of local measurement, is required. The boundaries of the land are as follows:—

On the North.—The indigo field of Motihari factory.
On the East.—The old slaughter-house and *sissoo* tree of Motihari concern.
On the South.—The indigo field of Motihari factory.
On the West.—Doma Mean Kabari's garden.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern. It supersedes the declaration, dated the 14th instant, published in page 77, Part 1B of the *Calcutta Gazette* of the 18th idem.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 24th November 1885.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Motihari Municipality for a public purpose, viz. for the construction of a conservancy cattle shed, in the village of Motihari, *pergunnah* Majhowa, *zillah* Chumparun, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 cottahs 12 chittacks of local measurement, is required. The land is bounded:—

On the North.—By the Old Jail Hospital and road;
On the East.—By a public road;
On the South.—By Mr. F. H. Elphinstone's garden; and
On the West.—By waste land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

ROAD CESS NOTIFICATION.

DISTRICT OF MIDNAPORE.

The 16th November 1885.—It is hereby notified that the District Road Committee of Midnapore have determined to levy road cess for the cess year, commencing from the 1st October 1885, at the maximum rate of six pies or two pice on each rupee of the annual value of lands, and the said rate having been approved by the Commissioner of the division, is hereby published for general information.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 20th November 1885.—Whereas a notification, dated the 27th July 1885, was published at page 769, Part I of the *Calcutta Gazette* of the 29th idem, declaring the intention of the Lieutenant-Governor to confirm certain bye-laws framed by the District Road Committee of Chumparun under section 180 of the Cess Act IX (B.C.) of 1880 at a meeting, and whereas no objections have been raised to those bye-laws, it is hereby notified for general information that they are confirmed.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

The following revised advertisement is published in substitution of that which appeared at page 1084, Part II of the *Calcutta Gazette* of the 9th July 1884:—

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co., are distributed by that firm; and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1885, the terms of subscription and sale will be as follows:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage.	With postage
For the Calcutta Series ...	Rs. 10 0	Rs. 12 8
„ each of the Madras, Bombay, and Allahabad Series ...	„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	„ 2 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ...	.....	„ 1 0

Persons desiring to subscribe for or purchase the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
„ Thacker & Co., Bombay.
„ Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.
„ Superintendent of Government Printing Bengal.

Orders and subscriptions for 1885 *should be at once remitted.*

Notes on Forestry,

BY C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wyman & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. Trübner & Co., Ludgate Hill, London. Price five shillings.

31. Penalty for evading payment of proper toll.
32. Penalty for taking or sending dangerous or offensive goods without giving notice.
33. Penalty for licensee not giving to promoter or lessee an account of traffic or giving false account.
34. Saving of prosecutions under other laws.

Settlement of Differences.

35. Differences between promoters or lessees and authorities.

Recovery of Tolls.

36. Recovery of moneys due from promoters and in certain cases, from lessees.
37. Recovery of tolls from licensees.
38. Recovery of tolls from passengers.

Savings.

39. Promoter to have right of user only.
40. Saving of power over roads traversed by tramways.
41. Saving of power of local authority and police to regulate traffic on roads.

The Indian Tramways Bill, 1885.—Sections 1-4.

Supplemental Provisions.

SECTIONS.

42. Promoters, lessees and licensees to be responsible for all injuries.
43. Want of funds not a sufficient reason for default.
44. Power to exempt from municipal taxation.
45. Application by local authorities of local funds to tramways.
46. Extension of Act to existing tramways.
47. Meaning of "tramway" in Railway Act.
48. Powers of Local Government exercisedble from time to time.

A Bill to facilitate the construction and to regulate the working of Tramways.

WHEREAS it is expedient to facilitate the construction and to regulate the working of tramways; It is hereby enacted as follows:—

Preliminary.

Short title and commencement.

1. (*1*) This Act may be called the Indian Tramways Act, 1886; and

(*2*) It shall come into force at once.

Local extent.

2. (*1*) It extends in the first instance to the whole of British India, except the territories administered by the Governor of Fort Saint George in Council, the Governor of Bombay in Council, and the Lieutenant-Governor of Bengal.

(*2*) But the Governor of Fort Saint George in Council, the Governor of Bombay in Council or the Lieutenant-Governor of Bengal may, by notification in the official Gazette, extend this Act to the whole or any part of the territories under his administration.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context,—

[Act XIII, 1885, s. 3, § clause (7).] (*1*) "local authority" means a municipal committee, district board, body of port commissioners or other authority legally entitled to, or entrusted by the Government with, the control or management of a municipal or local fund:

[Act XXII, 1883, s. 2.] (*2*) "road" means the way of a road, street, thoroughfare, passage or place along or across which a tramway authorised under this Act is, or is intended to be, laid, and includes the surface soil and sub-soil of a road, and the footway and drains of a road, and any bridge, culvert or causeway forming part of a road:

[33 & 34 Vic., c. 78, s. 3.] (*3*) "road-authority", in relation to a road, means—

(*a*) if a local authority maintains and repairs the road, then that authority:

(*b*) if a local authority does not maintain and repair the road, and the road is neither vested in Her Majesty nor maintained and repaired by the Government, then the person in whom the road is vested; and

(*c*) if a local authority does not maintain and repair the road, and the road is vested in Her Majesty or maintained and repaired by the Government, then the Local Government:

[33 & 34 c. 78, s. 3.] (*4*) "circle", in relation to a local authority or road-authority, means the area within the control of that authority:

[Act XXII, 1883, s. 2.] (*5*) "tramway" means a tramway, or any part of a tramway, or any siding, turnout, connection, line or track belonging to a tramway:

(*6*) "order" means an order authorising the construction of a tramway under this Act, and includes a further order substituted for, or amending, extending or varying, that order:

[33 & 34 V c. 78, ss. 4, 43 & 44, a Act XXII, 1883 Schedule, Articles 1 26.] (*7*) "promoter" means a local authority or person in whose favour an order has been made, and includes a local authority or person on whom the rights and liabilities conferred and imposed on the promoter by this Act and the order and any rules made under the Act, as to the construction, maintenance and use of the tramway, have devolved.

(*8*) "undertaking" includes all moveable and immoveable property of the promoter suitable to and used by him for the purposes of the tramway:

(*9*) "carriage", in the case of a tramway on which steam-power or any other mechanical power is used, includes an engine worked on the tramway for the purpose of producing that power:

(*10*) "toll" includes any charge leviable in respect of the use of a tramway:

(*11*) "lessee," means a person to whom a lease has been granted of the right of user of a tramway and of demanding and taking the authorised tolls:

(*12*) "District Magistrate" includes an officer empowered by the Local Government by name or by virtue of his office to discharge within any local area all or any of the functions of a District Magistrate under this Act;

(*13*) "Collector" means the chief officer in charge of the revenue administration of a district, and includes an officer empowered by the Local Government by name or by virtue of his office to discharge within any local area the functions of a Collector under this Act; and

(*14*) "prescribed" means prescribed by rules made by the Local Government under this Act.

Orders authorising the Construction of Tramways.

Application for and consent necessary to making of order.

[33 & 34 c. 78, s. 4.] 4. (*1*) The Local Government may make an order authorising the construction of a tramway in a circle on the application of—

(*a*) the local authority of the circle, with, where that authority is not the road-authority of a road or part of a road to be traversed by the tramway, the consent of the road-authority in respect of that road or part; or

(*b*) any person with the consent of the local authority and, where that authority is not the road-authority of a road or part of a road to be traversed by the tramway, of the road-authority in respect of that road or part:

Provided that, if any part of the proposed tramway is to traverse land which is not included within the limits of a municipality or of a cantonment, the Local Government shall not make the order without the previous sanction of the Governor General in Council.

The Indian Tramways Bill, 1885.—Sections 5-7.

(2) A local authority shall not make an application for an order, or be deemed to consent to an application being made by any person for an order, unless the making of the application or the giving of the consent has been approved by the local authority in manner prescribed.

& 34 Vic., 8, s. 5.]

Consent of local or road authority not necessary in certain cases.

5. When it is proposed to lay a tramway in two or more circles, and a local authority or road-authority having control in either or any of the circles does not consent thereto, the Local Government may, nevertheless, make an order authorising the construction of the tramway in the circle, if, after considering the objections of the dissenting authority, and the benefit which the public is likely to derive from the tramway being laid in the circle of that authority, it is satisfied that the construction of the tramway therein is expedient.

& 34 Vic., s. 7 & Act XV, 4, s. 68]

Procedure for making order.

6. (1) The Local Government on receiving an application shall consider it, and, if satisfied as to the propriety of proceeding thereon, publish in the official Gazette, and in such other manner as it deems sufficient for giving information to persons interested, a draft of a proposed order authorising the construction of the tramway.

(2) A notice shall be published with the draft stating that any objection or suggestion which any person may desire to make with respect to the proposed order will, if submitted to the Local Government on or before a date to be specified in the notice, be received and considered.

(3) If, after considering any objections or suggestions which may have been made with respect to the draft on or before the date so specified, the Local Government is of opinion that the application should be granted, with or without addition or modification, or subject or not to any restriction or condition, it may settle and make an order accordingly.

(4) Every order authorising the construction of a tramway shall be published in the official Gazette in English, and in the other prescribed language or languages, if any, and that publication shall be conclusive proof that the order has been made as required by this section.

34 c. 78, s.

Contents of order.

7. (1) An order made under section 6 shall empower the promoter therein specified to construct and maintain the tramway therein described in the manner therein provided, and shall specify the time within which the tramway shall be commenced and the time within which it shall be completed and opened for public traffic.

3 & 34 c. 78, s. d s. 10 Bill]

(2) The order may also provide, in manner consistent with this Act, for all or any of the following, among other matters, that is to say:—

onal Clause

(a) a period before the expiration of which the tramway shall not be commenced, and the conditions subject to which the local authority, when it is not itself the promoter, may, within that period, elect to be substituted in the place of the promoter in respect of the undertaking or of so much thereof as is within its circle; and the limits of time within which, and the terms upon which, the local authority may, after the tramway has been constructed, require the promoter to sell to it the undertaking or so much thereof as is within its circle;

31 Vic. 43]

(b) the acquisition by the promoter of land for the purposes of the tramway, and the disposal by him of land which has been acquired but is no longer required for those purposes; [33 & 34 Vic. c. 78, ss. 8 & 15; Provisional Order Clauses 2 and 5; and Report of House of Lords Committee, 1879, paragraph 11.]

(c) the conditions subject to which roads may be opened and broken up for the purposes of the construction or maintenance of the tramway or any part thereof, and the method of, and materials to be used in, the re-instating of the roads, and the approval of the method and materials by the Local Government or the road-authority before the commencement of the work; [33 & 34 Vic., c. 78, ss. 26 & 27, and Provisional Order Clause 9.]

(d) the conditions on which the tramway may be constructed over a bridge or across a railway or tramway when the carriageway over the bridge is to form part of the tramway or when the tramway is to cross a railway or another tramway on the level; [33 & 34 Vic., c. 78, s. 26.]

(e) the space which shall ordinarily intervene between the outside of the carriageway on either side of a road whereon the tramway is to be constructed and the nearest rail of the tramway, and the conditions on which a smaller space may be permitted; [33 & 34 Vic., c. 78, s. 9, and Provisional Order Clause 13.]

(f) the gauge of the tramway; the rails to be used, and the mode in which, and the level at which, they shall be laid and maintained; and the adoption and application by the promoter of such improvements in the rails, and in their situation, and in the sub-structure upon which they rest, as the Local Government may require; [33 & 34 Vic., c. 78, s. 25, and Provisional Order Clauses 8 and 10.]

(g) the portion of the road or roads traversed by the tramway to be kept in repair by the promoter, the maintenance by the promoter to the satisfaction of the Local Government or the road-authority, or both, of that portion of the road or roads, and the liability of the promoter, on the requisition of the Local Government, from time to time to adopt and apply such improvements in the tramway as the Local Government may consider necessary or desirable for the safety and convenience of the public, and to alter the position or level of the tramway to suit future alterations in the road or roads; [33 & 34 Vic., c. 78, s. 28, and Provisional Order Clauses 8, 11 & 12.]

(h) the application of material excavated by the promoter in the construction or maintenance of the tramway; [32 & 34 Vic., c. 78, s. 27, and Provisional Order Clause 17.]

(i) the provision of such crossings, passing-places, sidings, junctions and other works, in addition to those specified in or authorised by the order, as may from time to time be necessary or convenient to the efficient working of the tramway; [Provisional Order Clause 15.]

(j) the powers which may from time to time be exercised by the Local Government, the local authority, the road-authority or any person in respect of sewers, drains, telegraph-lines, gas-pipes or water-pipes in [33 & 34 Vic., c. 78, s. 32, and Provisional Order Clause 18.]

The Indian Tramways Bill, 1885.—Sections 8-10

or on land occupied by the tramway; the notice (if any) to be given of the intended exercise of those powers; the manner in which the powers shall be exercised; and the extent to which the tramway and the traffic thereon may be interfered with in the exercise thereof;

[33 & 34 Vic., c. 78, ss. 30 & 31.]

(*k*) the conditions subject to which the promoter may from time to time interfere with, or alter or require the alteration of the position of, drains (not being sewers or main drains), telegraph-lines, gas-pipes or water-pipes;

[Provisional Order Clause 16.]

(*l*) the provision of a temporary tramway in place of a part of a tramway which has been removed, or of which the use has been discontinued, by reason of the execution of any work affecting a road, along which the part of the tramway was laid;

[33 & 34 Vic., c. 78, s 34; and Provisional Order Clauses 25, 26 & 27.]

(*m*) the motive power to be used on the tramway, and the conditions on which steam-power or any other mechanical power may be used;

[33 & 34 Vic., c. 78, s. 34; Schedule A to form of Provisional Order; and Regulations and Bye-laws of the Board of Trade with respect to the use of ste m-power on tramways.]

(*n*) the nature, dimensions, fittings, appliances and apparatus of the carriages to be used on the tramway, and the inspection and examination thereof by officers of the Local Government or the local authority, and the liability of the promoter or lessee, on the requisition of the Local Government, from time to time, to adopt and apply such improvements in the carriages, and in the fittings, appliances and apparatus as the Local Government may consider necessary or desirable for the safety and convenience of the public;

[33 & 34 Vic., c. 78, s. 10, and Provisional Order Clauses 33 to 36 and 38 to 43.]

(*o*) the traffic which may be carried on the tramway, the traffic which the promoter or lessee shall be bound to carry, and the traffic which he may refuse to carry; the tolls to be leviable by the promoter or lessee, and the periodical revision thereof by the Local Government; and the regulation of the traffic and of the levy of the tolls;

[Provisional Order Clause 37.]

(*p*) the use of the tramway free of toll by the local authority, with its own carriages, for specified purposes, during specified hours, with power to the local authority to make such sidings and other works as may be necessary for communication between its premises and the tramway;

[33 & 34 Vic., c. 78, s. 44, and Provisional Order Clause 48.]

(*q*) the conditions subject to which the promoter may transfer the undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise; and the conditions subject to which the local authority may be the transferee;

[33 & 34 Vic., c. 78, s. 28, Proviso.]

(*r*) the performance by the Local Government or by the local authority or road-authority of any work required by the Act or the order to be done by the promoter; and

[Provisional Order Clauses 10, 11, 26, 27 and 40.]

(*s*) the penalty to be incurred by the promoter or lessee for failure to observe any condition or direction contained in the order, and the application of the penalty when recovered.

[Report of House of Lords Committee, 1879, para. 11.]

(*3*) The Local Government may, in providing in the order for the acquisition of land for the purposes of a tramway of which the promoter is not a company, direct that land may be acquired for the promoter under the provisions of the Land Acquisition Act, 1870, in the same manner and on the same conditions as it might be acquired for the purposes of the tramway if a company were the promoter. X of 1870

(*4*) The order shall imply the condition—

(*a*) in the case of a tramway of which a local authority is the promoter, that a lease thereof shall be granted only in manner by this Act provided, and

(*b*) in the case of a tramway of which a local authority is not the promoter, that a lease thereof shall be only of the right of user and of demanding and taking the authorised tolls, and shall not confer or impose on the lessee any of the powers or duties of the promoter in respect of the construction or maintenance of the tramway.

[33 & 34 V c. 78, s. 16.]

8. (*1*) The Local Government may, on the application of the promoter, revoke, amend, extend or vary the order by a further order.

Further orders.

(*2*) An application for a further order shall be made in the same manner and subject to the same conditions as an application for an order.

(*3*) The Local Government may, in its discretion, either grant or reject the application.

(*4*) If it grants the application, it shall make the further order in the same manner as an order except that no addition to or modification of the rights, powers and authorities asked for in the application, or restriction or condition with respect thereto, shall be made or imposed by the further order without the consent in writing of the promoter.

[33 & 34 c. 78, s. 1

9. (*1*) Subject to, and in accordance with, the provisions of this Act, the Local Government may, on a joint application, or on two or more separate applications, settle and make an order empowering two or more local authorities, respectively, jointly to construct the whole, or separately to construct parts, of a tramway, and jointly or separately to own the whole or parts thereof.

Power to authorise Joint work by local authorities.

(*2*) All the provisions of this Act which relate to the construction of tramways shall extend and apply to the construction of the whole and the separate parts of the tramway, and the form of the order may be adapted to the circumstances of the case.

[33 & 34 c. 78, s. 4

10. (*1*) If a promoter authorised by an order to construct a tramway—

Cesser of powers given by an order.

(*a*) does not within the time specified in the order substantially commence the construction of the tramway, or

(*b*) having commenced the construction, suspends it without a reason sufficient in the opinion of the Local Government to warrant the suspension, or

(*c*) does not within the time specified in the order complete the tramway and open it for public traffic,—

the following consequences shall ensue:—

(i) the powers given by the order to the promoter for constructing the tramway and otherwise in relation thereto shall, unless

The Indian Tramways Bill, 1885.—Sections 11-17.

the Local Government, by special direction in writing, prolongs the time or condones the suspension, cease to be exercised except as to so much of the tramway as is then completed;

(ii) as to so much of the tramway as is then completed, the Local Government may either permit, or refuse to permit, the powers given by the order to continue;

(iii) if the Local Government refuses to permit the powers to continue, then so much of the tramway as is then completed may be dealt with, under the provisions of this Act relating to the discontinuance of tramways, as a tramway of which the discontinuance has been proved to the satisfaction of the Local Government.

[Sections 19 & 20 of this Bill]

(2) A notification published by the Local Government in the official Gazette to the effect that on a date specified in the notification the construction of a tramway had not been substantially commenced or a tramway had not been completed and opened for public traffic, or that the construction of a tramway had been suspended without sufficient reason, shall, for the purposes of this section, be conclusive proof of the matter stated therein.

Construction and Maintenance of Tramways.

[33 & 34 Vic., c. 78, s. 25]

11. A tramway shall be constructed and maintained in the manner provided by the order.

Mode of formation of tramway.

[33 & 34 Vic., c. 78, s. 24 & Act IV, 1878, s. 5.]

12. A tramway, or portion or extension of, or addition to, a tramway, shall not be opened for public traffic until an engineer appointed in this behalf by the Local Government has inspected it and certified it to be fit for such traffic.

Inspection of tramway before opening.

[33 & 34 Vic., c. 78, s. 31]

13. The road-authority and the promoter may from time to time enter into agreements with respect to the keeping in repair of the whole or a part of a road traversed by a tramway, and with respect to the proportion to be paid by either of them of the expense of keeping the road or part in repair.

Agreement between road-authority and promoter as to repair of roadway.

Traffic on Tramways.

[33 & 34 Vic., c. 78, ss. 34 & 82, and Act XXII, 1883, s. 8]

14. (1) The promoter of a tramway shall, subject to the provisions of sub-section (2) and to the other provisions of this Act and of the order, have the exclusive use of the tramway for carriages with flange-wheels or other wheels suitable to run on the rail described in the order as the rail to be used on the tramway:

Rights of promoter and the public over tramways.

Provided that nothing in this Act or the order or in any rule made under the Act shall affect the right of any person authorised to use a tramway or railway to pass across a tramway constructed under this Act, with carriages having wheels suitable to run on the rail thereof.

(2) The public shall have a right to pass along or across any part of a road along or across which a tramway is constructed, whether on or off the tramway, with carriages not having flange-wheels or other wheels suitable to run on the rail of the tramway: provided—

(a) that this sub-section shall not apply where the tramway is constructed on land the right to the exclusive possession of which has been acquired by the promoter, and

(b) that the Local Government may by an order authorise the construction of a tramway on any part of a road with rails raised above the surface of the road, if it is satisfied that the convenience of the public will not be injuriously affected thereby.

[33 & 34 Vic., c. 78, s. 45.]

15. (1) The promoter or lessee may demand and take, in respect of the tramway, tolls not exceeding the limits specified in or determinable under the order, or if the order contains no provision in this behalf, then such sums as may from time to time be fixed by the promoter or lessee with the previous sanction of the Local Government.

Tolls leviable by promoter or lessee.

[33 & 34 Vic., c. 78, s 53; and Act XXII, 1883, s. 13.]

(2) A list of all the tolls authorised to be levied shall be exhibited, in such languages as the District Magistrate may direct, in a conspicuous place inside and outside each of the carriages used upon the tramway.

16. (1) A person shall not be entitled to carry, or to require to be carried, on a tramway constructed under this Act, any goods of a dangerous or offensive nature.

Carriage of dangerous or offensive goods.

(2) A person taking such goods with him on the tramway shall, before entering the carriage, give notice of their nature to the servant of the promoter or lessee in charge of the carriage.

(3) A person sending such goods by the tramway shall distinctly mark their nature on the outside of the package containing them, or otherwise give notice thereof in writing to the servant of the promoter or lessee with whom he leaves them for the purpose of their being sent by the tramway.

(4) Any servant of the promoter or lessee may refuse to carry upon the tramway a parcel which he suspects to contain goods of a dangerous or offensive nature, and, if any such parcel has been received for the purpose of being carried upon the tramway, may stop the transit thereof until he is satisfied as to the nature of its contents.

Licenses to use Tramways.

[33 & 34 Vic., c. 78, s. 35]

17. If, at any time after a tramway or part of a tramway has been for three years opened for public traffic in a circle, the local authority of the circle represents in writing to the Local Government that the public is deprived of the full benefit of the tramway or of the part thereof, the Local Government may, if after such enquiry as it deems necessary it is satisfied as to the truth of the representation, grant a license to any person to use the tramway conformably to this Act and the order and to the rules made under the Act, subject to the following provisions, namely:—

Grant to third parties of licenses to use tramway in certain events.

(a) the license shall be for a period not less than one year or more than three years from the date of the license, but the Local Government may in its discretion renew it;

(b) the license shall be to use the whole of the tramway for the time being opened for public traffic, or such part or parts of the tramway as the Local Government, having regard to the cause for granting the license, thinks fit;

The Indian Tramways Bill, 1885.—Sections 18-22.

(*c*) the license shall specify the number of carriages which the licensee shall run upon the tramway, the mode in which and times at which, the carriages shall be run, the tolls to be paid to the promoter or lessee by the licensee for the use of the tramway, and the tolls, being those for the time being leviable by the promoter or lessee, which the licensee may demand and take for the use of his carriages;

(*d*) the licensee and his officers and servants shall permit one person, duly authorised for that purpose by the promoter or lessee, to travel free of toll in or upon each carriage of the licensee run upon the tramway for the whole or any part of a journey; and

(*e*) the Local Government may revoke, alter or modify the license for any cause sufficient in its opinion to warrant the revocation, alteration or modification thereof.

[33 & 34 Vic., c. 78, s. 37.]

Licensee to give to promoter or lessee an account of traffic.

18. A licensee shall, on demand, give to an officer or servant authorised in that behalf by the promoter or lessee an exact account in writing, signed by the licensee, of the number of passengers, or number or quantity of goods, conveyed by any and every carriage used by him on the tramway.

Discontinuance of Tramways.

[33 & 34 Vic., c. 78, s. 41.]

Cesser of powers of promoter and lessee on discontinuance of tramway.

19. If it is proved to the satisfaction of the Local Government, at any time after the opening of a tramway for public traffic, that the working of the tramway, or any part thereof, has been discontinued, for the space of three months, without a reason sufficient, in the opinion of the Local Government, to warrant the discontinuance, the Local Government, if it thinks fit, may, by notification in the official Gazette, declare that the powers of the promoter and of the lessee, if any, in respect of the tramway or the part thereof so discontinued, shall, from the date of the notification, be at an end, and thereupon the said powers shall cease and determine, except in so far as they may be purchased by a local authority in manner by this Act provided.

[Section 22 of this Bill.]

[33 & 34 Vic., c. 78, s. 42.]

Powers of road-authority on cesser of powers of promoter.

20. (*1*) Where a notification has been published under section 19, the road-authority may, at any time after the expiration of two months from the date of the notification, remove the tramway or part of the tramway so discontinued, and use the materials thereof in re-instating the road.

(*2*) The promoter shall pay to the road authority the cost incurred by that authority in removing the tramway or the part thereof and in re-instating the road.

(*3*) The cost shall be certified by an officer of the road authority, and his certificate, countersigned by the District Magistrate, shall be conclusive proof as to the cost incurred.

(*4*) If the promoter does not pay the amount so certified within one month after the delivery to him of the certificate or of a copy thereof, the road-authority may, without any previous notice to the promoter and without prejudice to any other remedy which it may have for the recovery of the amount, sell and dispose of such materials of the tramway or part thereof removed as it has not used in re-instating the road, either by public auction or by private sale, and for such sum or sums, and to such person or persons, as it thinks fit, and may, out of the proceeds of the sale, pay and reimburse itself the amount of the cost aforesaid and of the expenses of the sale, and shall pay over the residue (if any) of the proceeds of the sale to the promoter.

[Section 36 of this Bill.]

Insolvency of Promoter.

[33 & 34 Vic., c. 78, s. 42.]

Proceedings in case of insolvency of promoter.

21. (*1*) If, at any time after the opening of a tramway in a circle for public traffic, it appears to the road-authority or local authority of the circle that the promoter of the tramway is insolvent, so that he is unable to maintain the tramway, or work it with advantage to the public, and either of those authorities makes a representation to that effect to the Local Government, the Local Government may, if after such enquiry as it deems necessary it is satisfied as to the truth of the representation, declare, by notification in the official Gazette, that the powers of the promoter shall, at the expiration of six months from the publication of the notification, be at an end; and the powers of the promoter shall cease and determine at the expiration of that period, except in so far as they may be purchased by a local authority in manner by this Act provided.

[Section 22 this Bill.]

(*2*) Where a notification has been published under sub-section (*1*), the road-authority may, at any time after the expiration of six months from the date thereof, remove the tramway in the same manner, and subject to the same provisions as to the payment of the cost of the removal, and to the same remedy for recovery of the cost, in every respect as in cases of removal under section 20.

Purchase of Tramways.

[33 & 34 Vic., c. 78, s. 43.]

Future purchase of undertaking by local authority.

22. (*1*) Where the promoter of a tramway in a circle is not the local authority, the local authority, with the previous sanction of the Local Government, may—

(*a*) within such limits of time as may be specified in this behalf in the order, or

(*b*) if a time was not specified in the order, then within six months after the expiration of a period of twenty-one years from the date of the order, and within six months after the expiration of every subsequent period of seven years, or

(*c*) within two months after the publication of a notification under section 19 or within six months after the publication of a notification under section 21,—

by notice in writing, required the promoter to sell to the local authority his undertaking or the part thereof which is within the circle of the local authority; and thereupon the promoter shall sell the same upon the terms specified in the order, or, if the terms were not specified in the order, then upon the terms of paying the then value of the undertaking or of the part thereof, exclusive of any allowance for past or future profits of the undertaking or any compensation for compulsory sale or other consideration whatsoever.

(*2*) A requisition shall not be made under sub-section (*1*) unless the making thereof has been

approved by the local authority in manner prescribed.

(3) When a sale has been made under this section, all the rights, powers and authorities of the promoter in respect of the undertaking or part thereof sold, or, where a notification has been published under section 19 or section 21, all the rights, powers and authorities of the promoter previous to the publication of the notification in respect of the undertaking or part thereof sold, shall be transferred to the authority to whom the undertaking or part has been sold, and shall vest in, and may be exercised by, that authority in the same manner as if the tramway had been constructed by it under an order made under this Act.

(4) Subject to, and in accordance with, the preceding provisions of this section, two or more local authorities may jointly purchase an undertaking or so much thereof as is within their circles.

Working of Tramways owned by Local authorities.

[34 Vic., s. 19.]

Lease of, or working of, tramway by local authority.

23. (1) When a local authority has under the authority of an order completed a tramway, or has under the provisions of this Act or of an order acquired possession of a tramway, it may, by a lease to be approved by the Local Government, let to any person the right of user of the tramway and of demanding and taking the authorised tolls.

(2) On the determination of a lease, the local authority may from time to time let the right for such further term and on such conditions as the Local Government may approve.

(3) Every lease made under this section shall imply a condition of re-entry if at any time after the making thereof it is proved to the satisfaction of the Local Government that the lessee has discontinued the working of the tramway leased, or of any part thereof, for the space of three months, without a reason sufficient, in the opinion of the Local Government, to warrant the discontinuance.

(4) Notice of the intention of the local authority to make a lease shall be given in manner prescribed.

(5) If the local authority cannot by means of a lease obtain what it deems to be a fair rent for the tramway, it may itself, with the previous sanction of the Local Government and for such term as the Local Government directs, place and run carriages upon the tramway, and demand and take the authorised tolls in respect of the use of the carriages.

Rules.

[34 Vic., s. 46 & 2nd Act of 1883, s.

Power to make rules.

24. (1) In addition to any other power to make rules expressly or by implication conferred by this Act, the Local Government may make rules consistent with this Act—

(a) as to the form in which an application for an order shall be made;

(b) as to the costs to be paid by an applicant in respect of an order, and the time when, and the place where, those costs shall be paid;

(c) as to the payment of money or lodgment of securities, by way of deposit, by the applicant for an order before the order is published under section 6, sub-section (4), or a further order is made under section 8; the investment of money so paid; the disposal of interest or dividends from time to time accruing due on money or securities so paid, lodged or invested; the application of the money or securities or the produce thereof to the discharge of any liability incurred by the promoter, and the forfeiture, repayment or return of the money or securities;

(d) as to the plans and sections of any works to be deposited by applicants for orders or by promoters;

(e) for regulating the use of steam-power or any other mechanical power on a tramway;

(f) as to any matter specified in section 7, sub-section (2), clauses (c), (d), (e), (j) and (k), as a matter which may be provided for in an order, when that matter has not been so provided for, or has not, in the opinion of the Local Government, been effectually so provided for;

(g) as to any matter respecting which rules may be made under this section by a local authority or a promoter or lessee; and

(h) generally, as to any other matter or thing in respect of which it may seem to the Local Government to be expedient to make rules for the purpose of carrying this Act into execution.

[33 & 34 Vic., c. 78, s. 46; and Act XX 20.]

(2) A local authority may, from time to time, with the previous sanction of the Local Government, make rules, consistent with this Act and the order and any rules made by the Local Government under the Act, for regulating—

(a) the rate of speed to be observed in travelling upon a tramway within the circle of the local authority;

(b) the use of animal power on the tramway;

(c) the distances at which carriages using the tramway shall be allowed to follow one after the other;

(d) the stopping of carriages using the tramway;

(e) the traffic on roads along or across which the tramway is laid;

(f) the number of passengers which may be carried in any carriage;

(g) the licensing and control of drivers, conductors and other persons having charge of the carriages of the promoter or lessee or a licensee; and

[33 & 34 Vic., c. 78, s. 48.]

(h) generally, the mode of use of the tramway.

[Act XXII. 1883, s. 20.]

[33 & 34 Vic., c. 78, s. 46; and Act XXII. 1883, s. 20.]

(3) The promoter or lessee of a tramway may, from time to time, with the previous sanction of the Local Government, make rules consistent with this Act and the order and any rules made under the Act—

(a) for preventing the commission of any nuisance in or upon any carriage, or in or against any premises belonging to him; and

(b) for regulating the travelling in any carriage belonging to him.

[33 & 34 Vic. c. 78, s 47

Power to impose penalty by rule.

25. The authority making any rule under section 24 may direct that a breach of it shall be punishable with fine which may extend—

[Act XXII. 1883, s. 14;

(a) if the authority making the rule is the Local Government, to two hundred rupees, and

The Indian Tramways Bill, 1885.—Sections 26-31.

[Act XXII, 1883, s. 20, sub-section (3).]

(*b*) if that authority is a local authority or a promoter or lessee, to twenty rupees;

and, when the breach is a continuing breach, with a further fine which may extend—

[Act XXII, 1883, s. 14.]

(*c*) if the authority making the rule is the Local Government, to fifty rupees, and

[33 & 34 Vic., c. 78, s. 47.]

(*d*) if that authority is a local authority or a promoter or lessee, to five rupees,

for every day after the first during which the breach continues.

Procedure for making, and publication of, rules.

26. (*1*) Every authority having power to make rules under any section of this act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(*2*) The publication shall be made, in the case of rules made by the Local Government, in such manner as may in its opinion be sufficient for giving information to persons interested, and, in the case of rules made by a local authority or by a promoter or lessee, in manner prescribed.

(*3*) There shall be published with the draft a notice specifying a date, not earlier than the expiration of one month after the date of publication, at or after which the draft will be taken into consideration.

(*4*) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*5*) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive proof that it has been duly made.

(*6*) The Local Government may cancel any rule made by a local authority or by a promoter or lessee under section 24.

Offences.

Penalty for failure of promoter, lessee or licensee to comply with Act or order.

27. If a promoter—

(*a*) constructs or maintains a tramway otherwise than in accordance with the order;

[Act XXII, 1883, s. 14.]

(*b*) opens the tramway for traffic, or permits it to be so opened, before it has been inspected and certified in manner required by section 12; or

(*c*) fails to observe any requirement or condition of the order for neglect or breach whereof no penalty has been expressly provided in the order;

or if a promoter, lessee, or licensee runs a carriage on a tramway otherwise than in accordance with the order;—

he shall (without prejudice to the enforcement of specific performance of the requirements of this Act or of the order, or to any other remedy which may be obtained against him in a Court of Civil Judicature), on the complaint of the Local Government or of the local authority or road-authority or of any person injuriously affected thereby, be punished with fine which may extent to two hundred rupees, and in the case of a continuing offence to a further fine which may extend to fifty rupees for every day after the first during which the offence continues to be committed.

Penalty for obstructing promoter in exercise of his powers.

[33 & 34 V c. 78, s. 49 and Act X 1883, s. 15

28. If any person without lawful excuse, the burden of proving which shall lie upon him, wilfully obstructs any person acting under the authority of the promoter in the lawful exercise of his powers in constructing or maintaining a tramway, or injures or destroys any mark made for the purpose of setting out the line of the tramway, he shall be punished with fine which may extend to fifty rupees.

Penalty for interfering with tramway.

[33 & 34 V c. 78, s. 50 and Act X 1883, s. 1

29. If any person without lawful excuse, the burden of proving which shall lie upon him, wilfully does any of the following things, namely:—

(*a*) interferes with, removes or alters any part of a tramway constructed under this Act, or of the works connected therewith;

(*b*) places or throws upon or across any such tramway any wood, stone, refuse or other thing;

(*c*) does anything in such a manner as to obstruct any carriage using any such tramway; or

(*d*) abets within the meaning of the Indian Penal Code the doing of, or attempts to do, anything mentioned in clause (*a*), clause (*b*) or clause (*c*),

XLV of 1

he shall (without prejudice to any other remedy which may be obtained against him in a Court of Civil Judicature) be punished with fine which may extend to one hundred rupees.

Penalty for using tramway with carriage having flange-wheels.

[33 & 34 c. 78, s. 5

30. If any person, except under a lease from, or by agreement with, the promoter, or under license from the Local Government granted under this Act, uses on a tramway, otherwise than as permitted by section 14, a carriage having flange-wheels or other wheels suitable to run on the rail of the tramway, he shall be punished with fine which may extend to two hundred rupees.

Penalty for evading payment of proper toll.

[33 & 34 c. 78, s. and Act 1881, s

31. (*1*) If any person travelling or having travelled in a carriage of the promoter or lessee or a licensee evades or attempts to evade payment of toll, or if any person having paid toll for a certain distance wilfully proceeds in any such carriage beyond that distance and does not pay the additional toll for the additional distance or attempts to evade payment thereof, or if any person wilfully refuses or neglects on arriving at the point to which he has paid toll to quit the carriage, he shall be punished with fine which may extend to ten rupees.

[33 & 34 c. 78, s Act XX 1883, and Act 1882,

(*2*) When a person commits an offence under this section and refuses, on demand of a servant of the promoter, lessee or licensee, to give his name and residence, or gives a name or residence which the servant has reason to believe to be false, he may be arrested and taken to the nearest police-station by the servant or any person whom the servant may call in for his assistance.

(*3*) When the person is taken to the police-station, he shall with the least possible delay, be forwarded to the nearest Magistrate unless his true name and residence are ascertained, in which case he shall be released on his executing a bond for his appearance before a Magistrate if so required.

The Indian Tramways Bill, 1885.—Sections 32-39.

[33 & 34 Vic., c. 78, s. 53, and Act XXII, 1883, s. 17.]

Penalty for taking or sending dangerous or offensive goods without giving notice.

32. If any person takes or sends by a tramway any goods of a dangerous or offensive nature without giving the notice required by section 16, he shall be punished with fine which may extend to fifty rupees.

[33 & 34 Vic., c. 78, s. 38.]

Penalty for licensee not giving to promoter or lessee an account of traffic or giving false account.

33. (*1*) If a licensee fails on demand to give the account mentioned in section 18, or, with intent to evade the payment of tolls, gives a false account when he is called upon to give an account under that section, he shall be punished with fine which may extend to fifty rupees.

(*2*) The fine shall be in addition to any tolls payable by the licensee to the promoter or lessee in respect of the passengers or goods conveyed by the carriage or carriages used by the licensee on the tramway.

[Act XIII, 1884, s. 158.]

Saving of prosecutions under other laws.

34. Nothing in this Act shall prevent a person from being prosecuted under any other law for an act or omission which constitutes an offence against this Act or the rules made under it, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Act or the rules made under it: Provided that a person shall not be punished twice for the same offence.

Settlement of Differences.

[33 & 34 Vic., c. 78, s. 33.]

Differences between promoters or lessees and authorities.

35. (*1*) If any difference arises between the promoter or lessee on the one hand and the Local Government, or the local authority, or the road-authority, or a person having the charge of any sewers, drains, telegraph lines, gas-pipes or water-pipes, on the other hand, with respect to any interference or control exercised or claimed to be exercised by, or on behalf of, either party by virtue of this or any other Act, or of the order, or of rules made under this Act, or with respect to the propriety of, or the mode of, the execution of any work, or with respect to any compensation to be made by or to the promoter or lessee, or on the question whether any work is such as ought reasonably to satisfy the Local Government or the road-authority or both, or with respect to any other subject or thing regulated by, or comprised in, this Act or the order or rules made under the Act, and not otherwise expressly provided for therein, the matter in difference shall, on the application of either party, be settled by a referee.

(*2*) Where the difference is between the promoter or lessee on the one hand and the Local Government either as such or as the road-authority, on the other, the referee shall be the District Court within the jurisdiction of which the tramway is situate, or, where the tramway is within the jurisdiction of more than one District Court, the District Court within the jurisdiction of which the greater part of the tramway is situate.

(*3*) In other cases, the referee shall be appointed by the Local Government.

(*4*) The powers and procedure of the referee may be prescribed.

(*5*) The decision of the referee shall be binding and conclusive on both parties.

Recovery of Tolls.

[33 & 34 Vic., c. 78, s. 56; & Act XIII, 1884, s. 61.]

Recovery of moneys due from promoters and, in certain cases, from lessees.

36. Any of the following moneys, namely, any rent due to a local authority from a lessee, any penalty recoverable from a promoter or lessee under an order, any sum payable by a promoter or lessee under an award of a referee, the cost of the performance under this Act by the Local Government or by a local authority or road-authority of any work required by this Act or an order to be done by a promoter, and the cost incurred by a road-authority in removing a tramway and reinstating a road under this Act, may, without prejudice to any other remedy the authority to which the money is due may have by suit or otherwise, be recovered by that authority, on application made in this behalf to the Collector, as if the sum due were an arrear of land-revenue due by the promoter or lessee or his surety (if any):

Provided that nothing in this section shall authorise the arrest of the promoter or lessee or his surety in execution of any process issued by the Collector.

[Act XIII, 1884, s. 172.]

Recovery of tolls from licensees.

37. (*1*) If a licensee fails to pay on demand the tolls due for the use of a tramway, the promoter or lessee to whom the tolls are due may, without prejudice to the remedy which he may have by suit, apply to a Magistrate to recover the amount of the tolls, and the Magistrate may, after giving notice to the licensee if possible and allowing him an opportunity of being heard, proceed to recover the amount by distress and sale of any carriages or other moveable property of the licensee which may be found on the tramway or on premises connected therewith.

(*2*) When a licensee has failed to pay on demand the tolls due from him, the promoter or lessee to whom the tolls are due may seize any carriage or other moveable property of the licensee on the tramway or on premises connected therewith, and detain the same for forty-eight hours unless the tolls are sooner paid.

(*3*) When application is made to a Magistrate under sub-section (*1*), he may make an interim order of distraint pending his final decision.

[Act XIII, 1884, s. 172.]

Recovery of tolls from passengers.

38. Any toll due to a promoter, lessee or licensee from a passenger may be recovered either by suit or, on application to a Magistrate having jurisdiction within any local area in which any part of the tramway is laid, by distress and sale of any moveable property belonging to the passenger within the local limits of the jurisdiction of the Magistrate.

Savings.

[33 & 34 Vic., c. 78, s. 57; and Act XXII, 1883, s. 9.]

Promoter to have right of user only.

39. (*1*) Notwithstanding anything contained in this Act or in an order, a promoter shall not acquire any right other than that of user only over a road along or across which he lays a tramway, nor shall anything contained in this Act or in an order exempt the promoter of a tramway, or any other person using the tramway, from the payment of such charges as may lawfully be levied in respect of the use of a road or bridge along or across which the tramway is laid.

[Act VIII, 1851.]

[Act XVII, 1878, s. 18.]

(*2*) The Local Government may, if it thinks fit, fix rates at which a promoter, lessee or licensee

The Indian Tramways Bill, 1885.—Sections 40-48.

may compound for the charges payable in respect of the use of a road or bridge.

[33 & 34 Vic, c. 78, ss. 32 & 60.]

Saving of power over roads traversed by tramway.

40. (*1*) Nothing in this Act or in an order shall take away or abridge any power which a road-authority, local authority or other person has by law to break up, widen, alter, divert or improve a road, railroad or tramway along or across which a tramway is laid.

(*2*) The road-authority, local authority or other person executing any work referred to in sub-section (*1*) shall not be liable to pay to a promoter, lessee or licensee any compensation for injury done to a tramway by the execution of the work or for loss of traffic occasioned by the reasonable use of any power lawfully exercised for the execution thereof.

[33 & 34 Vic., c. 78, s. 61; and Act XXII, 1883, s. 10.]

Saving of power of local authority and police to regulate traffic on roads.

41. Nothing in this Act or in an order shall affect the powers of a local authority or of a magistrate or police-officer to regulate the passage of traffic along or across a road along or across which a tramway is laid; and the authority, magistrate or officer aforesaid may exercise its or his powers as well on as off the tramway and with respect as well to the traffic of a promoter, lessee or licensee as to the traffic of other persons.

Supplemental provisions.

[33 & 34 Vic., c. 78, ss. 40 & 55.]

Promoters, lessees and licensees to be responsible for all injuries.

42. A promoter, lessee or licensee shall be answerable for all injuries happening through his act or default, or through the act or default of any person in his employment, by reason or in consequence of any of his carriages or works, and shall save harmless all authorities and persons collectively and individually, and their officers and servants, from all damages and costs in respect of injuries so happening.

[Act XXII, 1883, s. 21.]

Want of funds not a sufficient reason for default.

43. For the purposes of this Act, want of funds shall not be deemed to be a sufficient reason for the suspension of the construction, or the discontinuance of the working, of a tramway by a promoter or lessee.

[Act XXII, 1883, s. 22.]

Power to exempt from municipal taxation.

44. When a tramway is constructed under this Act within the limits of a municipality, the Local Government may exempt the animals, plant, rolling-stock, yards, workshops, engine-sheds and depôts of the promoter or lessee, for such period as it thinks fit, from all or any municipal taxes leviable within those limits.

[33 & 34 Vic. c. 78, s. 20.]

Application by local authorities of local funds to tramways.

45. The fund to or with the control or management of which the local authority of a municipality, cantonment or district is entitled or entrusted shall, notwithstanding anything in any Act respecting the purposes to which that fund may be applied, be applicable, subject to the control of the Local Government, to the payment of expenses incidental to the exercise of the powers and functions which may be vested in or exercised by a local authority under this Act.

Extension of Act to existing tramways.

46. The Local Government may, with the consent of the local authority and road-authority and of the promoter, extend any part of this Act or of any rules made thereunder, either with or without modification, to the whole or any part of a tramway constructed, or authorised to be constructed, before the passing of this Act, and to any extension of, or addition to, any such tramway, and may withdraw any part of the Act so extended.

IV. of 1879.

Meaning of "tramway" in Railway Act.

47. In section 54 of the Indian Railway Act, 1879, the word "tramway" shall have the meaning assigned to it by section 3 of this Act.

[Act XII 1884, s. 17.]

Powers of Local Government exercisable from time to time.

48. All powers conferred by this Act on a Local Government may be exercised from time to time as occasion requires.

STATEMENT OF OBJECTS AND REASONS.

THE introduction of this Bill has been rendered necessary by the projected construction of tramways in parts of India beyond the reach of a local legislature. In 1883 a special Act was passed by the Governor General in Council to authorise the making, and regulate the working, of tramways in Rangoon. Since that year application has been made for special Acts for tramways in Lahore and Amritsar, and legislation would probably be found to be necessary to regulate the use of tramways in other large towns in which their constructions has been approved by, or is under the consideration of, the local authorities.

2. The Bill has been drawn on the lines of the Tramways Act, 1870 (33 & 34 Vic., c. 78), and of the provisional orders and rules made by the Board of Trade under that statute. These orders and rules, and the fullest discussion on almost all points connected with the subject of tramways, will be found in Mr. Sutton's "Tramway Acts of the United Kingdom."

3. The Bill extends in the first instance to the whole of British India except the territories comprised within the sphere of a local legislature, and is extendible to those territories by the Local Government.

4. "Orders" take the place of the "provisional orders" of the English statute, but differ from those orders in not being "provisional" and not being confirmed by a subsequent Act of the Legislature. They also differ from provisional orders in that they must be consistent with the Act and cannot vary or except any part of it.

5. Sections 4 to 6 of the Bill prescribe the conditions on which, and the manner in which, an order may be made; and section 7 specifies the matters for which provision may be made in an order. A reference to the authorities cited against the several clauses of that section will show how those matters are now provided for in the United Kingdom. If an order is found on experience to be defective, it can be supplemented by a further order on the

application of the person in whose favour the original order was made (section 8), or, in certain particulars, by rules (section 24).

6. When the order has been made, the tramway must be constructed, maintained and worked in the manner provided by the order (sections 11 and 27). If the tramway is constructed by a local authority, it will ordinarily be worked by a lessee (section 23). If it is constructed by a private speculator, it may be worked by him or by a lessee to whom he has let the right of user and of demanding and taking the authorised tolls (section 7, sub-section (*4*)). If the owner of the tramway or his lessee so works the tramway that the public is deprived of the full benefit of it, the Local Government may grant a license to any person to use the tramway on the payment of tolls to the owner or the lessee (section 17). If the owner discontinues the working of the tramway (section 19) or through want of fund is unable to maintain the tramway or work it with advantage to the public (section 21), the Local Government may revoke his powers. When the powers of the owner are so revoked, the tramway may either be removed by the authority which has charge of the road on which the tramway is laid (section 20 and section 21, sub-section (*2*)), or it may be purchased by the local authority (section 22)).

7. Section 22 provides for tramways which have been constructed by companies and private persons being purchased by local authorities on the expiration of the periods, and upon the terms, specified in the order, or, if the periods and terms were not specified in the order, then on the expiration of the periods, and upon the terms, prescribed in the English statute.

8. When a tramway is purchased by a local authority, it will ordinarily be worked by a lessee. There may, however, be cases in which the authority would be unable to let a tramway for an adequate consideration. It has been provided, therefore (section 23), that in those cases the Local Government may authorise the local authority itself to engage in the business of running carriages.

9. Differences between owners or lessees of tramways and the Local Government or local authorities are to be settled by a referee (section 35), who, if the Local Government is directly interested, is to be the District Judge. The decision of the referee will be final.

10. Sections 36 to 38 provide for the recovery by suit or summary process of moneys due to and from owners, lessees and licensees of tramways.

11. Sections 39 to 41 contain the savings usually found in enactments and agreements relating to the construction of tramways, and section 44 enables the Local Government to exempt from local taxation the animals, plant, rolling-stock and premises of owners and lessees of tramways constructed within the limits of municipalities.

12. Section 46 enables the Local Government, with the consent of the owner and the local authorities, to extend any part of the Act, with or without modification, to a tramway or any part of a tramway constructed, or authorised to be constructed, before the passing of the Act.

The 22nd October, 1885.

COLONIAL AND INDIAN EXHIBITION, LONDON (1886).

THE following papers are published for general information.

A. P. MACDONNELL,
Secy. to the Govt. of Bengal.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

NOTIFICATION—MUSEUMS AND EXHIBITIONS.

Circular No. 66Ex.—1L-49, dated 6th November 1885.

The appended forms of application for the use of Private Exhibitors, received from the Royal Commission for the Colonial and Indian Exhibition, 1886, are published for general information. The sections of the Exhibition to which the forms refer are independent of, and distinct from, the courts intended for the display of specimens of arts, manufactures and products collected under the direction of the Government of India and the several Local Governments.

COLONIAL AND INDIAN EXHIBITION, LONDON (1886).

Form of application for space to show goods in the Private Exhibitors' Court.

INDIAN SECTION.

The Royal Commission invite applications for space to exhibit in the Indian section of this Exhibition from *bonâ fide* Merchants and Manufacturers having places of business in India. It must be distinctly understood that no applications from Importers or Agents can be entertained; but Indian Exhibitors may appoint London representatives as their Agents in the forthcoming Exhibition.

Allotments will be made by the Royal Commission in accordance with the space available.

Applications must be made by Indian Firms on this form, and no allotment will be finally made before such application has been received.

Applications to be made, through the Secretary to the Government of India, Revenue and Agricultural Department, or through Messrs. HENRY S. KING & Co., and their Indian Branches, to the Secretary to the Royal Commission.

TO THE SECRETARY TO THE ROYAL COMMISSION.

Please allot to me (us) the following amount of space for the exhibition of articles described opposite.

Floor Space.....feet × .....feet.

NOTE.—The private Exhibitors have a Special Gallery alloted to them, with a space twelve feet deep on either side of a central passage. This space is divided into bays or lengths of ten feet, which are available for conversion into small shops, two or three of which can be thrown into one where a larger space is required. The erection of a Screen on Façade along the front by the Exhibitor is compulsory, and can either be done by the Exhibitor, who must submit a design for approval, or will be furnished by the Commission, at the nominal cost of £1 per foot run.

Special arrangements will be made for exhibiting Carpets, which must not exceed 12 feet by 9 feet.

This form does not apply to Exhibits of Paintings, Tea, Coffee, Cocoa, Tobacco, and Cigars, for which special forms of application are prepared.

DESCRIPTION OF ARTICLES.

See Regulation No. 32 (on other side).

In case of my application being granted (wholly or in part), I declare that I will strictly adhere to the published Regulations of the Royal Commission, as printed overleaf, which I will consider as binding, and to any further Regulations which may be issued from time to time.

LONDON REPRESENTATIVE (IF ANY).

Name

Address

Date

* As this description will form the basis of the Catalogue entry, it is requested that it may be carefully written.

REGULATIONS.

1. The Exhibition will be opened on or about the 1st May 1886, and will remain open for a period of about six months.

2. Subject to the condition stated in Regulations 3 and 4, the objects to be exhibited are left entirely to the discretion of the Governments participating, in so far as they illustrate the resources, products, and manufactures of the Colonies and the Indian Empire. For reasons stated elsewhere, no classification has been attempted by the Royal Commission; but each Government is invited to classify its own collection.

3. All fulminating and explosive substances and all dangerous substances are absolutely forbidden to be sent, but they may be represented by models or dummies.

4. Spirits, oils, essences, corrosive substances, and generally all substances which might spoil other articles or cause inconvenience to the public, can only be received in substantial and suitable vessels of small size.

5. There will be no charge for space.

6. Motive power and water will be supplied free of cost, *provided that notice by letter or cable is given before the 1st January* 1886. Foundations can be laid, under the superintendence of the Secretary to the Royal Commission, upon requisition from the Executive Commissioners with their order for payment. The work will be done at the expense of the Commissions requiring it; and full particulars of the size, character, and intended position of machines should be given.

7. As the allotments of space have in most cases been already notified to the Colonial and Indian Governments, no further applications can, except under special circumstances, be entertained. Applications to exhibit from any individual or firm will be referred to the Executive Commissioners for the various Colonies and for India.

8. The Executive Commissioners appointed by their respective Governments will have the entire control of the arrangements of the goods exhibited in their respective sections, subject to the conditions stated in Regulations 9 to 16.

9. At least one main passage of not less than fifteen feet must extend throughout each Court from end to end; and, where doors or openings occur, passages of not less than ten feet in width must be provided communicating with the main central passage. The necessity of providing adequate space for allowing the proper inspection of articles exhibited need scarcely be insisted upon.

10. Signs or name-boards should be placed parallel with the main passages; that is, parallel with the frontage of the respective stands. It is suggested that they should be black with gold letters. Care should be taken to prevent any interference with the electric lighting arrangements.

11. All handbills, printed matter, &c., connected with exhibits, and intended for gratuitous distribution, should be duly authorised by the Executive Commissioners for each country, who will find the Secretary to the Royal Commission ready to cooperate with them.

12. It is especially requested that no cases or goods shall exceed the height of ten feet. This rule is not intended to prevent the erection of any special trophies; but designs to scale of all trophies should, previous to their erection, be notified to the Secretary to the Royal Commission.

13. As the Exhibition Buildings are leased by the Royal Commission, no alterations affecting the structure of the buildings as regards the floor, walls, or roofing can be permitted without special application to the Secretary to the Royal Commission.

14. Executive Commissioners will be required to provide all necessary attendance for keeping the stands and exhibits in their section properly cleaned and in good order; all stands should remain uncovered during the hours the Exhibition is open to the public.

15. It is probable that the hours during which the Exhibition will remain open to the public will be from 10 A.M. to 10 P.M. on all days, except Wednesdays and Saturdays, when the hour of closing will be 11 P.M. These arrangements are, however, subject to alteration. The Exhibition will not be open on Sundays.

*16. No Exhibit may be removed from the Exhibition Buildings until the close of the Exhibition without the permission of the Executive Commissioners, countersigned by the Secretary to the Royal Commission; and consequently no selling, with a view to removal prior to the close of the Exhibition, should be allowed.

17. No article exhibited may be photographed, drawn, copied, or reproduced in any manner whatsoever without the special sanction of the Executive Commissioner of the section: this sanction should be noticed to the Secretary to the Royal Commission.

18. All packages containing goods intended for exhibition must have painted on them the distinctive mark *C. I. E.*, together with the name of the colony from which they are sent. They must in all cases be consigned to the Executive Commissioner of the Colony from which they are sent.

19. All goods intended for Exhibition should reach the Exhibition Buildings on or before the 31st January 1886, and, if convenient to Executive Commissioners, they can be received from 1st January 1886: it is hoped that everything will be reported as ready for inspection at least fourteen days previous to the end of April.

20. Cases should be unpacked with the greatest possible despatch, and when empty should be removed immediately from the buildings. The Secretary to the Royal Commission will have pleasure in recommending places of storage for empty cases; but it must be distinctly understood that all arrangements for the unpacking, removal, storage, and bringing back of cases must be made, and expenses borne, by the various Colonial and Indian Commissions.

21. All expenses connected with the installation and display of Exhibits will be defrayed by the Colonial and Indian Commissions.

22. The Royal Commission reserves to itself the right of refusing to admit any Exhibit.

23. The Royal Commission reserves to itself the sole right of publishing and selling a General Catalogue, and General Guide and Plans of the Exhibition; and for this purpose requests that a descriptive list, duly classified of the goods intended for exhibition, may be forwarded to the Secretary to the Royal Commission by the respective Commissions not later than the 1st December 1885. Each Commission will, however, be at liberty to publish and sell through the official publishers to the Royal Commission a special Catalogue of its collection. It is hoped, for the sake of uniformity, that the size of all such publications may be the same size as that of the General Catalogue, known as Demy 8vo. (8¾ in. by 5⅝ in.).

24. A Colonial Dining Room will be organised, under the superintendence of the Royal Commission, to which Exhibitors are invited to send, through their Executive Commissioners, Colonial preserved food and wines for consumption by Visitors. Special Regulations have been prepared for this department.

25. Arrangements will be made for the sampling of Wines; and an Officer will be appointed to superintend this department. Cellarage accommodation will be provided.

26. No Refreshment or Tasting Bars will be allowed beyond those arranged for by the Royal Commission.

27. It is proposed to organise a Fruit and Vegetable Market, at which Colonial and Indian produce will be on sale. Special regulations will be framed for this section of the Exhibition.

28. It is proposed to hold an Exhibition of Living Animals from the Colonies and India. Special rules will be framed for its regulation.

29. The right to add to, alter, amend, or expunge any of these rules is reserved by the Royal Commission.

30. The Royal Commission, while taking every precaution for the protection of articles in the buildings, cannot hold itself responsible for their loss or damage, from whatsoever cause arising.

31. If any damage or injury shall be caused or occasioned during the Exhibition by any exhibited machine, implement, or article to any visitor or other person, or to any officer, servant, or others then and there employed by the Royal Commission of the Colonial and Indian Exhibition, 1886, then the Executive Commissioner in whose section such machinery, implement, or article may be placed shall indemnify and hold harmless the said Royal Commission from and against all actions, suits, expenses, and claims on account or in respect of any such damage or injury which may be so caused or occasioned.

32. Only objects of British East Indian manufacture will be admitted; and under no pretence whatever will Persian, Turkish, Chinese, or Japanese Art Works be permitted to be either shown or stored in the Exhibition. The Royal Commission reserves the right of ordering the removal of any objects it considers disqualified; and the Exhibitors hereby engage to remove any such Exhibits after due notice, or to permit the removal by Officers of the Commission.

33. All communications to be addressed to the Secretary to the Royal Commission, Exhibition Buildings, South Kensington, London, S. W.

---

* *N.B.*—A modification of this rule as applied to the Private Exhibitors' Court has already been notified by me to Mr. Buck. It will be understood, however, that the rule cannot be cancelled, although a special exception or modification has been allowed as regards this Court.

9th *September* 1885.

J. R. ROYLE,
Asst. Secy. to the Royal Commission.

COLONIAL AND INDIAN EXHIBITION, LONDON (1886).

Form of application to exhibit paintings, &c.

INDIAN SECTION.

The Royal Commission is prepared to receive applications from persons desirous of exhibiting Oil-paintings, Water-colours, and Drawings of Indian Subjects by Artists and Amateurs resident in India.

The Royal Commission will defray the cost of packing and freight from Bombay to London of pictures from India, subject to the following conditions :—

(1) All paintings and drawings will be inspected at Bombay, in order that any which may be considered unsuitable should not be sent forward.

(2) The paintings and drawings, which must be without frames, must be sent to Messrs. King, King & Co., of Bombay, not later than the 30th of November 1885.

(3) Frames for pictures will be provided by Messrs. Henry S. King & Co., London ; full particulars of cost, &c., can be obtained from Messrs. King, King & Co., Bombay, and Messrs. King, Hamilton & Co., Calcutta.

(4) Artists and Amateurs now in Europe, and formerly resident in India, who desire to exhibit pictures of interest connected with India should communicate with Messrs. Henry S. King & Co., 65, Cornhill, not later than the 31st December 1885.

(5) It must be understood that the Royal Commission undertakes no risk, and that Exhibitors must make their own arrangements as to Insurance.

(6) It must be distinctly stated when pictures are intended for sale ; and the price in English currency must be notified on the application form. Messrs. King & Co. are authorised to make a charge of 5 per cent. on all pictures sold.

To the Secretary to the Royal Commission.

Please allot to me space to exhibit Pictures as described below:

Distinctive Mark or Number.	Size Unframed.	Size Framed.	Description: if Oil, or Water Colours, &c.	Subject.	Name of Artist.

In case of my application being granted, I declare that I will adhere to the published Regulations of the Royal Commission.

COLONIAL AND INDIAN EXHIBITION, LONDON (1886).

Form of application to exhibit Tea, Coffee, and Cocoa.

The Royal Commission invites applications for space to exhibit samples of Tea, Coffee, and Cocoa, of Indian or Colonial production, from *bona fide* planters and manufacturers having places of business in India or the Colonies.

It must be distinctly understood that no applications from importers can be entertained.

Indian samples must be delivered, carriage free, to Messrs. King, Hamilton and Co., Calcutta, or Messrs. Henry S. King & Co., 65, Cornhill, London, who will bear all expenses of subsequent transit and exhibition.

Colonial samples must be delivered, carriage free, to Messrs. Henry S. King & Co., 65, Cornhill, London.

Applications to be made to Messrs. King, Hamilton & Co., Calcutta, or Messrs. Henry S. King & Co., 65, Cornhill, London, who will submit same to the Secretary to the Royal Commission.

To the Secretary to the Royal Commission.

Please allot to me (us) space for the exhibition of the following samples*:—

Distinguishing No. or Mark of sample.	Name or description of sample.	Name of garden or estate producing sample.	District.

In case of my application being granted, I declare that I will adhere to the published Regulations of the Royal Commission.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government during the week ending the 21st November 1885.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL.		
	Western Districts.		
Burdwan Divn. 1	Burdwan, Nov. 21 '85	Nil	Weather—seasonable. Prospects of *amun* excellent. *Rubbee* promises well. Price of rice 14 to 18½ seers per rupee.
Burdwan Divn. 2	Bankoora, „ 21 „	Nil	Weather—fine and clear; temperature a little higher than usual at this season. Harvesting of *amun* about to commence. *Rubbee* sowings, where germinated, are being irrigated and promise well. Prices improving. Health good
Burdwan Divn. 3	Beerbhoom, „ 21 „	Nil	Weather—fine. *Aus* crop being harvested. Prospects of crops generally good. Prices of food-grains falling. General health good.
Burdwan Divn. 4	Midnapore, „ 21 „	Nil	Weather—seasonable. A good *amun* harvest is secured in three-fourths of the district. *Boro* rice and *rubbee* crops doing well. Public health generally fair, but some cases of cholera reported.
Burdwan Divn. 5	Hooghly, „ 21 „	Nil	Weather—slightly warm for the season; cloudy to-day (21st). Prospects of all crops satisfactory. *Amun* harvest about to commence. General health fair, but there is much fever about.
	Howrah, „ 23 „	Nil	Weather—cloudy; sultry at times. State and prospects of crops favourable except in flooded parts. *Boro* paddy is being sown.
	Central Districts.		
Presidency Divn. 6	24-Pergha. Nov. 23 '85	Nil	Weather—warm for the season with passing clouds. Prospects of *amun*, except on low and inundated tracts, good. *Rubbee* crops doing well. Public health on the whole good.
Presidency Divn. 7	Nuddea, „ 21 „	Nil	Weather—seasonable. *Rubbee* crops everywhere excellent. Public health fairly good. Mortality amongst cattle is widely reported as due to their feeding on grass which has been long submerged under water.
Presidency Divn. 8	Khoolna, „ 21 „	Nil	Weather cloudy and rather close, without rain. Late rice being cut on high lands; outturn average. Winter crops have been sown and are coming up. Fever reported from some places
Presidency Divn. 9	Jessore, „ 20 „	Nil	Weather—cloudy and hot for the time of year. Sowing of *rubbee* crops not yet completed Harvesting of *amun* crop continues. Prospects good. Fever continues, and cholera has also appeared in the district.
Presidency Divn. 10	Moorshedabad, „ 21 „	Nil	Weather—rather cloudy, otherwise seasonable. *Amun* will yield more than an average outturn. *Kalai* doing very well, and so are *rubbee* crops generally. Indigo being sown. Public health good. Common rice 16 to 19 seers per rupee.
Rajshahye Divn. 11	Dinagepore Nov. 20 '85	Nil	Weather—fair and seasonable. State and prospects of *amun* crops good. Rice 18 to 25 seers per rupee.
Rajshahye Divn. 12	Rajshahye, „ 21 „	Nil	Weather—seasonable. Harvesting of *amun* paddy continues; outturn expected to be good. Cutting of sugarcane going on. Prospects of *rubbee* generally good as yet. Fever general
Rajshahye Divn. 13	Rungpore „ 21 „	Nil	Weather—cool with continued north-west wind. Prospects of *amun* and other standing crops continue good. Tobacco being planted. Cholera has broken out in Jaldhaca station in the Nilphamari sub-division. Fever prevalent.
Rajshahye Divn. 14	Bogra, „ 21 „	Nil	Weather—fine, but by no means cold. State and prospects of crops continue very favourable. Public health fair
Rajshahye Divn. 15	Pubna, „ 21 „	Nil	Weather—cool, some threatening of rain. Crops promise well. *Amun* in Serajgunge sub-division is said to be very good. Mustard, *kalai* and *til* coming up. A good deal of fever in Serajgunge, and some cholera.
Rajshahye Divn. 16	Darjeeling, „ 21 „	0·04	Weather—bright and cold. Prospects of crops good.
Rajshahye Divn. 17	Julpigoree, „ 21 „	Nil	Weather—cold and seasonable. Reaping of *kaimanti* paddy commenced; outturn fair. Prospects of other crops good. Sowing of winter crops progressing. Public health good.
	Eastern Districts.		
Dacca Division 18	Dacca, Nov. 21 '85	Nil	Weather—seasonable. Sowing of winter crops going on. Cutting of *amun* paddy commenced. Prospects of crops good. A few sporadic cases of cholera in town. Public health generally good.
Dacca Division 19	Furreedpore, „ 21 „	Nil	Weather—seasonable Prospects of crops good. Cold-weather crops being fast cultivated.
Dacca Division 20	Backergunge, „ 19 „	Nil	Weather—seasonable. Prospects of *amun* good. General health poor; fever prevailing.
Dacca Division 21	Mymensingh, „ 20 „	Nil	Weather—seasonable. State and prospects of crops excellent. Public health fair.
Chittagong Divn. 22	Chittagong Nov. 24 '85	4·77	Standing crops partly damaged by rain and grubs, *Amun* being harvested. Prices steady. Public health good
Chittagong Divn. 23	Noakholly, „ 20 „	0·13	Weather—first part of the week clear and latter part cloudy. Rice being harvested. Sowing of cold-weather crops progressing. Prospects fair. General health good.
Chittagong Divn. 24	Tipperah, „ 19 „	Nil	Weather—occasionally cloudy and generally very hot for the time of year. Paddy harvest commenced; outturn good. Public health fair.
Chittagong Divn. 25	Chittagong Hill Tracts. ...	...	Report not received.
Chittagong Divn.	Hill Tipperah, „ 18 „	Nil	Cold weather gradually setting in. Prospects of *amun* paddy and sugarcane good. Chillies and tobacco being transplanted. Cotton and *til* being gathered. Public health good.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.			
Patna Divn. 26	Patna, Nov. 21 '85	Nil	Weather—clear, evenings and mornings cool. Paddy on high lands suffering from want of rain. *Rubbee* crops germinating well. Sowing still going on, but rain wanted. Public health good.
27	Gya, „ 21 „	Nil	Weather—seasonable. Harvesting of rice crop proceeding; general outturn will be good. *Rubbee* and poppy sowings, which have germinated, look well. Health good Prices easier than at the corresponding period of last year.
28	Shahabad, „ 21 „	Nil	Weather—seasonable Winter rice being harvested. *Rubbee* sowings almost completed. Poppy sowings in full progress, but with the help of artificial irrigation. Where the seed has germinated it is doing well. Fever and cholera still reported from Sasseram and Bhabuah, but abating. Cattle-disease prevalent in Sasseram.
29	Durbhunga, „ 21 „	Nil	Weather—seasonable. Paddy crop generally favourable and nearly ready for reaping. *Rubbee* coming on well. Price of rice falling slightly. A few cases of cholera still reported from Madhubani.
30	Mozufferpore, „ 21 „	Nil	Weather—fair. *Rubbee* sowings almost completed. Seeds grown thriving well. Prospects of rice crop favourable. Poppy sowings progressing favourably. Cholera still reported from Sitamurhee; in the rest of the district public health generally good
31	Sarun, „ 21 „	Nil	Weather—fair and clear; days warm for the time of the year, nights cool. *Aghani* paddy ripening. *Rubbee* coming on well. Bulk of the poppy lands has been sown. A fall of rain would do much good. Irrigation is being done where practicable. Prices easy. Cases of fever reported, otherwise public health good
32	Chumparun „ 21 „	Nil	Weather—seasonable. Harvesting of *bhadoi* crops completed. Prospects of *aghani* crops continue good. Sowing of poppy seeds progressing; germination fine and healthy. Prices of food-grains stationary. Public health fair.
Bhagulpore Divn. 33	Monghyr, Nov. 21 '85	Nil	Weather—seasonable. *Rubbee* sowings in progress for which a shower of rain would be beneficial. Prices falling. Public health good.
34	Bhagulpore, „ 21 „	Nil	Weather—warm for the time of year; sometimes cloudy. Rice prospects fair. Upland rice has suffered for want of rain. *Rubbee* prospects good Caterpillars have appeared near the Ganges. Mustard and linseed crops in Banka reported very bad Cholera still prevalent in the north. Prices stationary.
35	Purneah „ 21 „	Nil	Weather—very fine. *Aghani* good where rainfall was sufficient. *Rubbee* very good. Much cholera and fever.
36	Maldah „ 21 „	Nil	Weather—fine and cool. Harvesting of winter rice begun; good outturn expected. All other crops also promise well. Common rice 17 to 22 seers per rupee. Public health good.
37	Sonthal Pergha. „ 21 „	Nil	Weather—seasonable. Paddy on high lands being harvested; outturn good everywhere Prospects of standing crops on the whole excellent. Coarse rice (new) 25 seers per rupee. Health fair.
ORISSA.			
Orissa Divn. 38	Cuttack Nov. 20 '85	Nil	Weather—cloudy since 19th. Early *sarad* being reaped with fair outturn; late *sarad* flowering. Common rice selling at 12 seers per rupee in town and 15 to 17 seers in the interior. Cases of cholera reported from some parts of Jajpur and Kendrapara sub-divisions; otherwise public health good.
39	Pooree, „ 19 „	Nil	Weather—seasonable. Cloudy during last two days of the week. *Laghu sarad* being harvested; late *sarad* ripening. *Rubbee* being sown. Relief works going on in the Chilka tracts which have suffered loss of crops from drought. Common rice selling at an average of 19 seers 3 chittacks per rupee in the Sudder sub-division and 16 seers in the Khoorda sub-division. Cases of cholera still reported from town.
40	Balasore, „ 20 „	Nil	Weather—cool and cloudy. Harvesting of early *sarad* crop is going on. Prospects of late *sarad* good. *Rubbee* crops doing well A few cases of cholera in Dhamnagore and Balasore Chaklas; public health generally good.
CHOTA NAGPORE.			
South-West Frontier Agency.			
41	Hazaribagh. Nov. 20 '85	Nil	Weather—clear and cold. Paddy harvest continues with a good outturn. Prospects of *rubbee* crops favourable. Poppy being sown in places. Public health generally good.
42	Lohardugga. „ 21 „	Nil	Weather seasonable. Winter paddy being harvested; outturn appears to be good. *Rubbee* sowing still continues. A few cases of fever reported; general health otherwise good
43	Singhbhoom, „ 20 „	Nil	Weather—cloudy. Rice crop being reaped and stored. *Rubbee* doing well. Fever prevalent Prices easy.
44	Manbhoom, „ 21 „	Nil	Weather—fine and cool. Reaping of rice progresses with good outturn. Cold-weather crops promise fairly. Coarse new rice quoted this day (21st) in the Purulia market at 26 seers per rupee.

Published for general information.

CALCUTTA; REVENUE DEPT.,
The 24th November 1885.

A. P. MACDONNELL,
Secretary to the Govt. of Bengal.

The following Statement shows the Quantities of the Principal Staples of Traffic imported into Calcutta from the Interior during the month of July 1885.

Period for the past ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater by 10. The number denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head "District" observations for the period in question during the past 12 years. The means of the "district" are the numerical averages of the rainfall return receive. day is one on which at least hundredth of an inch fell.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 20th of November 1885.

Meteorological division.	District.	Station.	Rainfall. Saturday, 14th November.	Sunday, 15th November.	Monday, 16th November.	Tuesday, 17th November.	Wednesday, 18th November.	Thursday, 19th November.	Friday, 20th November.	Total. Number of rainy days.	Total. Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May.	Average rainfall from 15th May to date.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

Calcutta, *the 16th November* 1885.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE TWO WEEKS ENDING FRIDAY, THE 13TH AND 20TH OF NOVEMBER 1885.

THE meteorology of the week ending Friday, the 13th of November, calls for no detailed notice, as all the conditions were typical of normal north-east monsoon weather. During this period skies were almost cloudless, pressure was generally from about 0·02″ to 0·06″ above the normal, temperature was about normal, and rainfall was practically absent over the whole province. On the first day of the following week the weather conditions in the south of the Bay became disturbed. Winds commenced to strengthen at all the southern stations, while pressure fell rather rapidly off the Ceylon coast. These conditions continued on Sunday, the 15th, and it was clear that stormy weather was commencing. On the 15th there were the first indications of the formation of a cyclonic storm in the extreme south of the Bay, and on this day Negapatam reported 8 inches of rain and Madras 4 inches. Weather continued very stormy along the coast on the following day, and at Negapatam, on the 17th, the excessive rainfall of 13·61 inches was reported, while on the same day Madras reported 5·73 inches; on these two days Negapatam reported no less than 21·62 inches of rain and Madras 9·74 inches. The unsettled and stormy weather then commenced to move in a northerly direction, and on the 18th the storm was a little to the south of Madras and rather close to the coast. It then moved slowly in a north-easterly direction, and on Friday, the 20th, or the last day of the week under review, it was nearly in the centre of the Bay, and in about the latitude of Masulipatam and Diamond Island. At this time the storm was giving strong winds in the south and west of the Bay, and very strong winds at Diamond Island.

During the period of the formation and gradual advance of the storm, and particularly when it reached the centre of the Bay, winds in Lower Bengal became north-easterly, skies began to cloud over rapidly, and temperature and humidity increased very considerably, so that at the close of the week the conditions, particularly at the southern stations, were decidedly disturbed. For the second week under review pressure was decidedly irregular, and in some cases slightly below the normal, while in others it was decidedly in excess; the defect was largest at Cuttack, where it equalled 0·01″, while at Durbhunga there was an excess of 0·1.″ For the whole province the mean variation for the week was equal to an excess of 0·036.″

Temperature has also been above the normal over the whole province, the largest excess in any meteorological district being one of 2° in East Bengal, while the smallest excess was in Orissa, where it has equalled 0·6.° For the whole province the average excess temperature was about 1·3°. Humidity has also been largely above the normal for the week, and the air over almost the whole province has been decidedly damp, particularly at the close of the week.

The average rainfall during the week, from the 13th to the 20th, was equal over the whole province to only one hundredth of an inch, and, practically speaking, except in the Midnapore district, at Cox's Bazar and at two stations in the Noakholly district the whole province has been rainless. The rainfall in these districts has occurred entirely within the last two or three days of the week, when the general conditions were disturbed. The heaviest falls of rain recorded were 1·05 inches at Feuny and 0·64 inch at Burrisal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 20th of November 1885:—

Meteorological Divisions.	Temperature.						Rainfall.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 13th May 1885.

The total fall from 1st January to 21st November 1885		65·81
The average fall of the corresponding period for 24 years, S. G.'s Office		65·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, d drizzling rain, Δ dew.

N.B.—In the weekly abstract from 1st to 7th November 1885, *read* 137·3 *instead of* 13· as the maximum in sun of the 6th.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 23rd November 1885.

HENRY F. BLANFORD,
Meteorological Reporter to the Govt. of India.

MEMORANDA.

THE mortuary returns of the districts in Bengal for the month of September 1885 disclose the following results :—

1. That 146,092 deaths occurred among a population of 66,163,884, representing an annual death-rate of 26·40 per 1,000, against 24·72 per 1,000 in the preceding month, and 18·12 per 1,000 in the corresponding month of the past year, showing, as compared with both the past periods, a considerable improvement in the registration of deaths.

2. That the highest casualty-rates were returned from the undermentioned districts :—

Districts.	Ratio per *mille.*	*Districts.*	Ratio per *mille*
Monghyr	54·24	Hughli	34·56
Bhagulpore	45·12	Nuddea	33·72
Chumparun	42·60	Sonthal Pergunnahs	32·40
Mozufferpore	40·56	Hazaribagh	32·40
Gya	39·72	Birbhum	30·84
Patna	39·60	Rungpore	29·52
Shahabad	39·48	Murshidabad	26·28
Sarun	35·52	Durbhanga	25·20

3. That the total mortality from the following specific heads of disease stands as follows :—

	Ratio per *mille* during—	
	September 1885.	September 1884.
Cholera	3·48	·60
Small-pox	·02	·04
Fever	18·00	13·56
Bowel-complaints	1·08	·72
Injury	·72	·48
Other causes	3·00	2·40

The above figures indicate that, as compared with the results of the corresponding month of the preceding year, there was an enhancement of mortality from all diseases, excepting small-pox, notably from fever and cholera.

4. That, referring to the death-causes above indicated, while the maladies grouped under the head of "other causes" were noticeably fatal only in the Sarun district, viz. at 11·76 per 1,000 of its population, and the casualties from small-pox, bowel-complaints and injury were nowhere conspicuously large, cholera and fever caused the greatest loss of life in the following districts :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
Mozufferpore	21·60	Monghyr	42·96
Chumparun	20·64	Bhagulpore	32·16
Sarun	9·00	Gya	31·50
Sonthal Pergunnahs	8·04	Nuddea	30·00
Bhagulpore	7·20	Shahabad	29·16
Birbhum	6·36	Rungpore	27·14
Hughli	6·00	Patna	25·92
Monghyr	5·76	Hazaribagh	23·04
Hazaribagh	5·52	Sonthal Pergunnahs ...	21·84
Durbhanga	5·28	Murshidabad	21·36
Shahabad	5·04	Pubna	20·52
Cuttack	3·96	Hughli	20·16
Gya	2·88		
Puri	2·88		
Maldah	2·04		

5. That the death-rates in relation to *Sex*, *Class* and *Age* stand as indicated below :—

According to Sex.	Ratio per *mille.*
Males	28·32
Females	24·48
Ratio of male deaths to every 100 female deaths.	114

According to Class.	Ratio per *mille.*
Christians ...	12·48
Hindus ...	29·28
Mahomedans	21·36
Buddhists ...	12·12
Other classes	21·12

According to Age.	Ratio p *mille*
Under 1 year ...	137·52
1 and under 5 years ...	33·00
5 „ 10 „ ...	15·96
10 „ 15 „ ...	13·92
15 „ 20 „ ...	17·52
20 „ 30 „ ...	18·24
30 „ 40 „ ...	20·28
40 „ 50 „ ...	25·56
50 „ 60 „ ...	37·08
60 years and upwards ...	59·28

R. LIDDELL, M.D., *Deputy Surgeon-General,*

The 23rd November 1885. *Sanitary Commissioner for Bengal.*

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 23rd November 1885.

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

MEMORANDA.

THE returns of the principal Municipalities in Bengal, exhibit for the week ending 7th November 1885, the birth and death-rates of 26·5 and 41·0 per 1,000 of population, respectively, as opposed to 27 3 and 37·0 per 1,000, respectively, during the preceding week ending 31st October, indicating a considerable advance in the registration of deaths and a small falling off in that of births.

2. These events were registered at the highest rates in the following Municipalities :—

Births.

	Ratio per *mille.*
Comillah	50·1
Beauleah	47·3
Serampore	47·2
Chittagong	46·9
Mozufferpore	42·5
Bhagulpore	38·9
Bali	38·6
Gya	37·6
Patna	34·4
Hughli	32·2

Deaths.

	Ratio per *mille.*
Gya	62·2
Puri	58·7
Bhagulpore	58·0
Purneah	55·4
Serampore	55·0
Patna	50 0
Utterpara	47·2
Suburbs of Calcutta	46·9
Dacca	46·8
Mozufferpore	43·8
Burdwan	38·1
Howrah	37·8
Durbhanga	37·8
Monghyr	34·4
Hughli	33·5
Kishnaghur	30 3

3. The mortality from the specific death-causes stood as follows, in comparison with the similar information for the preceding week :—

	Ratio per *mille* during the weeks ending—	
	7th November 1885.	31st October 1885.
Cholera	2·3	2·4
Small-pox	·1	...
Fever	20·4	19·8
Bowel-complaints	7·7	6·0
Injury	·2	·5
Other causes	10·3	9·3

The noticeable point apparent from the above figures is that there was a sensible increase of fatal results from fever, bowel-complaints, and the maladies coming under the head of "Other causes."

4. Excluding small-pox and injury, the mortality from which was nowhere high, the rest of the death-causes proved most fatal in the undermentioned Municipalities :—

Cholera.

	Ratio per *mille.*
Puri ...	18·9
Arrah ...	14·3
Howrah ...	5·7
Monghyr ...	3·6
Suburbs of Calcutta ...	3·1
Durbhanga ...	3·1

Fever.

	Ratio per *mille.*
Purneah ...	48·5
Utterpara ...	37·8
Gya ...	37·6
Mozufferpore ...	31·6
Bhagulpore ...	29·0
Patna ...	27·6

Serampore ...	23·6
Hughli ...	22·8
Beauleah ...	21·0

Bowel-Complaints.

	Ratio per *mille.*
Serampore ...	17·7
Puri ...	16·7
Bhagulpore ...	14·5
Suburbs of Calcutta ...	11·4
Burdwan ...	10·7
Patna ...	10·4

Other Causes.

	Ratio per *mille.*
Gya ...	19·1
Midnapore ...	15·5
Kishnaghur ...	15·1
Dacca ...	14·9
Puri ...	14·7
Suburbs of Calcutta ...	14·3
Serampore ...	13·7
Bhagulpore ...	13·6
Patna ...	12·0

5. The death-rates in relation to *Sex*, *Class* and *Age* are shown below :—

According to Sex.

	Ratio per *mille.*
Males	40·4
Females	41·7
Ratio of male deaths to every 100 female deaths	109

According to Class.

	Ratio per *mille.*
Christians	21·7
Hindus	44·1
Mahomedans ...	34·6
Other classes ...	30·4

According to Age.

	Ratio per *mille.*
Under 1 year ...	30·7
1 and under 5 years ...	52·1
5 „ „ 10 „ ...	21·0
10 „ „ 15 „ ...	21·7
15 „ „ 20 „ ...	27·2
20 „ „ 30 „ ...	25·9
30 „ „ 40 „ ...	25·5
40 „ „ 50 „ ...	32·4
50 „ „ 60 „ ...	44·2
60 years and upwards ...	111·1

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

The 23rd November 1885.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 7th November 1885.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "deaths" the ratios under which

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 3784A.

GENERAL.—*The 25th September* 1885.—Mr. C. M. W. Brett, Joint-Magistrate and Deputy Collector, 24-Pergunnahs, is allowed special leave for three months under section 61, chapter V of the Civil Leave Code, with effect from the 23rd October.

The 28th November 1885.—Baboo Juggobundhoo Bhuttacharjee, Deputy Magistrate and Deputy Collector, Midnapore, is allowed leave for six months, under section 128, chapter X of the Civil Leave Code, with effect from the date on which he may avail himself of it.

This cancels the order of the 26th October 1885 appointing Baboo Juggobundhoo Bhuttacharjee to have charge of the Tumlook sub-division.

The order of the 26th October 1885 appointing Baboo Mohinee Mohun Chuckerbutty, Deputy Magistrate and Deputy Collector, Tumlook, Midnapore, to have charge of the Madaripore sub-division, in the district of Furreedpore, is cancelled.

Baboo Shama Churn Dass, Deputy Magistrate and Deputy Collector, Mymensingh, is allowed leave for one month, under section 72, chapter V of the Civil Leave Code, with effect from the 2nd December next, or such subsequent date as he may avail himself of it.

The services of Baboo Obhoy Chunder Das, Deputy Magistrate and Deputy Collector, 24-Pergunnahs, are placed at the disposal of the Financial Department of this Government for employment on special duty.

Baboo Upendro Chunder Mookerjee, Temporary Deputy Magistrate and Deputy Collector, Midnapore, is vested with the powers of a Collector under Act X of 1870 in that district.

Baboo Grish Chandra Dass Gupta is appointed to act as a Sub-Deputy Collector in the district of Chittagong, during the absence, on leave, of Baboo Kalipada Chuckerbutty, or until further orders, with effect from the date on which he joined his appointment.

Mr. J. Tweedie, C.S., has been granted by Her Majesty's Secretary of State for India an extension of furlough for one month.

The 30th November 1885.—Mr. S. J. Douglas, Officiating Joint-Magistrate and Deputy Collector, Chittagong, is vested with special appellate powers under section 87 of Act VII (B.C.) of 1876.

The 1st December 1885.—Mr. G. C. Kilby, Deputy Superintendent and Remembrancer of Legal Affairs, is allowed furlough for three days, under section 50, chapter V of the Civil Leave Code, in extension of the furlough granted to him under the order of the 23rd April 1884.

Mr. T. F. Bignold, District and Sessions Judge, Beerbhoom, is allowed leave for one month and one day, under the note to rule 2, section 73, chapter V of the Civil Leave Code, with effect from the date on which he availed himself of it.

Mr. F. W. Badcock, Joint-Magistrate and Deputy Collector, 24-Pergunnahs, is appointed to act as District and Sessions Judge of Beerbhoom, during the absence, on leave, of Mr. Bignold, or until further orders.

POLICE.—*The 25th November* 1885.—Mr. H. M. Parish, Officiating Assistant Superintendent of Police, Midnapore, is allowed leave for one and half months, under rule 2, section 138, chapter X of the Civil Leave Code, with effect from the 12th October last.

The 1st December 1885.—In modification of the order of the 13th October last, Mr. W. D. Pratt, District Superintendent of Police, Moorshedabad, is allowed leave for one month and ten days, under section 72, chapter V of the Civil Leave Code, with effect from the date on which he availed himself of it.

ECCLESIASTICAL.—*The 1st December* 1885.—The Revd. A. C. Pearson is appointed to be Chaplain of Dum-Dum, with effect from the 17th November last.

The Revd. W. Kitchin is appointed to act as Chaplain of Howrah, with effect from the 19th November 1885, during the absence, on deputation, of the Revd. A. L. Mitchell, or until further orders.

The Revd. A. L. Mitchell, Chaplain of Howrah, is appointed to act as Chaplain of Darjeeling, during the absence, on leave, of the Revd. J. O'F. Willcocks, or until further orders.

The Revd. J. H. Taylor is appointed to be Senior Chaplain of St. John's Church, Calcutta, with effect from the 20th November 1885.

The Revd. G. Billing is appointed to act as Chaplain of St. Thomas's Church, Calcutta, during the absence, on leave, of the Revd. S. B. Taylor, or until further orders.

JAILS.—*The 30th November* 1885.—Mr. W. Leonard, Superintendent of the Presidency Jail, is allowed leave for one month and four days, under section 72, chapter V of the Civil Leave Code, with effect from the date on which he may be relieved.

Mr. M. S Emerson, Assistant Superintendent of Jails, Alipore, is appointed to act as Superintendent of the Presidency Jail, during the absence, on leave, of Mr. W. Leonard, or until further orders.

EDUCATION.—*The 26th November* 1885.—In supersession of the orders of the 14th instant, it is notified that Mr. R. Parry, Professor, Patna College, was absent from his duties, on leave, under section 50, chapter V of the Civil Leave Code, from the 7th September to the 9th October 1885.

OPIUM.—*The 1st December* 1885.—Mr. L. L. Parrott, Assistant Sub-Deputy Opium Agent, attached to the Benares Agency, is allowed privilege leave for three months, with effect from the 10th instant.

The following notifications are republished from the *Assam Gazette*:—

No. 360.—*The 14th November* 1885.—In consequence of the return to duty of Mr. G. Godfrey, Officiating Deputy Commissioner, second grade, with effect from the 3rd November 1885—

To Officiating Deputy Commissioner, third grade.—Captain H. St. P. Maxwell and Mr. R. B. McCabe, Officiating Deputy Commissioners, second grade.

No. 361.—In consequence of the return to duty of Mr. R. B. McCabe, Officiating Deputy Commissioner, third grade, with effect from the 3rd November 1885—

To Deputy Commissioner, fourth grade.—Mr. J. Kennedy, Officiating Deputy Commissioner, third grade.

To Assistant Commissioner, second grade.—Mr. A. W. Davis, Officiating Deputy Commissioner, fourth grade.

Mr. A. J. Primrose, Assistant Commissioner, second grade, is appointed to act in the first grade to fill an existing vacancy, with effect from the 12th October 1885.

No. 75.—*The 19th November* 1885.—Mr. R. B. McCabe, on return from special duty, resumed charge of the treasury and office of Deputy Commissioner, Nága Hills, from Mr. A. W. Davis, in the forenoon of the 3rd November 1885.

F. B. PEACOCK,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION,

The 1st December 1885.—The following notice, issued by the Board of Trade in England to Masters of Vessels directing them to enter in Official Log Books all cases of illness, injury, or death occurring among the crew, is published for general information :—

The attention of the Board of Trade having recently been called to a case in which the Master of a vessel had omitted to enter in his Official Log Book the illness of a member of the crew who, on arrival in London, was found to be suffering from typhoid fever, notice is hereby given that any Master who omits to enter any case of illness, or injury, or death, happening to any member of the crew, renders himself liable to a penalty, which it will be the duty of the Board of Trade to enforce by legal proceedings.

Owing to the presence of cholera at certain places, it will be the duty of Masters to take particular notice of this caution, and of Superintendents of Mercantile Marine Offices to exercise vigilance as to entries in logs where crews are paid off before them.

J. WARE EDGAR,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st December 1885.—The following Order-in-Council, dated the 9th July 1885, regarding the regulations for preventing collisions at sea, is published for general information :—

AT THE COURT AT WINDSOR,

The 9th day of July 1885.

PRESENT :

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by "The Merchant Shipping Act Amendment Act, 1862," it was enacted that on and after the first day of June 1863, or such later day as might be fixed for the purpose by Order-in-Council, the Regulations contained in the Table marked C. in the Schedule to the said Act should come into operation, and be of the same force as if they were enacted in the body of the said Act, but that Her Majesty might, from time to time, on the joint recommendation of the Admiralty and the Board of Trade, by Order-in-Council, annul or modify any of the said Regulations or make new Regulations in addition thereto, or in substitution therefor; and that any alterations in, or additions to, such Regulations made in manner aforesaid should be of the same force as the Regulations in the said Schedule;

And whereas by the same Act it was further provided that, whenever it should be made to appear to Her Majesty that the Government of any foreign country was willing that the Regulations for preventing collisions contained in Table C. in the Schedule to the said Act, or such other Regulations for preventing collisions as are for the time being in force under the said Act, should apply to the ships of such country when beyond the limits of British jurisdiction, Her Majesty might, by Order-in-Council, direct that such Regulations should apply to the ships of the said foreign country, whether within British jurisdiction or not :

And whereas it was further provided by the said Act that, whenever an Order-in-Council had been issued applying any Regulation made by, or in pursuance of, the said Act to the ships of any foreign country, such ships should in all cases arising in any British Court be deemed to be subject to such Regulation, and should, for the purpose of such Regulation, be treated as if they were British ships :

And whereas by an Order-in Council made in pursuance of the said recited Act, and dated the 11th day of August 1884, Her Majesty was pleased to direct that, on and after the 1st day of September 1884, the Regulations contained in the Schedule thereto should, so far as regards British ships and boats, be substituted for the Regulations then in force, and contained in the First Schedule to an Order-in-Council of the 14th day of August 1879 :

And whereas since the date of the abovenamed Order-in-Council bearing date the 11th day of August 1884, it has been made to appear to Her Majesty that the Government of Turkey is willing that the said Regulations appended to the said Order, and to this Order, shall apply to Turkish ships when beyond the limits of British jurisdiction :

And whereas the said Government of Turkey is desirous that Article numbered 12 of the said Regulations shall, as applied to Turkish ships, be modified as follows, viz. :—That in lieu of, and in substitution for, the bell required by the said Article to be provided and used as a sound signal for fog, &c., there may be placed and kept on board Turkish ships an efficient drum, which shall be sounded under the same circumstances, and at the same intervals, as by the said Article a bell is required to be rung.

NOW, THEREFORE, Her Majesty, by virtue of the power vested in Her by the said recited Act, and by and with the advice of Her Privy Council, is pleased to direct that the said Regulations appended to the said Order-in-Council bearing date the 11th day of August 1884, and to this Order, shall, on and after the date hereof, apply to ships belonging to the said Government of Turkey, whether within British jurisdiction or not; and the Regulations shall be substituted as regards Turkish ships and boats for the Regulations contained in the First Schedule to the Order-in-Council of the 14th day of August 1879 :

Provided, however, that it shall not be necessary for the bell required by Article numbered 12 of the said Regulations to be provided and used on board steam and sailing ships as a sound signal for fog, &c., to be placed and kept on board Turkish ships, but that, in lieu thereof, and in substitution therefor, there may be placed and kept on board such Turkish ships an efficient drum, which shall be sounded under the same circumstances, and at the same intervals, as by the said article a bell is required to be rung.

S. T. TREVOR, *Col.*, R.E.,
Secy. to the Govt. of Bengal, P. W. Dept.

IRRIGATION.

The 1st December 1885.

Notification.—No. 464.—In exercise of the powers conferred on him by sections XI and XII of Act V (B.C.) of 1864 (The Canals Act), the Lieutenant-Governor of Bengal is pleased to make the following alterations in the rules having reference to the undermentioned navigable channels. A draft of these alterations as proposed was published in this Department Notification No. 106 of the 16th March 1885, for a period of more than six weeks, in the *Calcutta Gazette* of the dates noted in the margin. The alterations now made will have effect from the 1st January 1886 :—

18th and 25th March, and 1st, 8th, 15th, 22nd, and 29th April, and 6th and 13th May 1885.

1. The river Bhagiruthee throughout its whole course, from the Ganges to Nuddea, or to its junction with the Hooghly.
2. The river Hooghly, from Nuddea to its junction with the river Matabhanga.
3. The river Jellinghee, from the Ganges to Nuddea.
4. The river Bhoyrub, from the Ganges to Nuddea.
5. The river Matabhanga, from the Ganges to its junction with the Hooghly.
6. Such portions of the river Ganges as may be within 5 miles of the entrance for the time being of the Bhagiruthee, the Bhoyrub, the Jellinghee and the Matabhanga rivers respectively, which were passed in Notification No. 175, dated the 30th July 1879, and published in Part I of the *Calcutta Gazette* of that date, pages 783 to 789.

For the first paragraph of Rule II, substitute the following:—

The tonnage of every vessel shall, for the purpose of the Canals Act, 1864, and of these rules, be determined by the following measurements :—

Add to Rule II as clause (*d*) :—In the case of steamers, the tonnage as determined by clauses (*a*), (*b*), and (*c*) shall be reduced by one-half as an allowance for engine and cabin space.

Add to Rule II, clause (*e*) :—In the case of a steamer that has been surveyed under Act VI of 1884, the tonnage entered in the certificate shall be taken to be the tonnage of the steamer for the purpose of these rules, no further deduction being made for engine space.

Rules 3 and 4 will be abolished.

A. D. MCARTHUR, *Major*, R.E.,
Under-Secy. to the Govt. of Bengal, P. W. Dept.

The 1st December 1885.

No. 465—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for Eastern Bengal State Railway junction arrangements with East Indian Railway, in the district of 24-Pergunnahs, pergunnah Habilishahur, mouzahs of Katalparah, Naihati and Goripa, it is hereby declared that for the above purpose five plots of land measuring, more or less, 76 bigahs 11 cottahs 12 chittacks of standard measurement, bounded as noted below, are required within the aforesaid mouzahs of Katalparah, Naihati and Goripa.

On or about Wednesday,	22nd ,,	,,	...	2,350	2,150	4,500
On or about Wednesday,	3rd November	,,	...	2,350	2,150	4,500
On or about Thursday,	2nd December	,,	...	2,350	2,150	4,500
		Total	...	28,200	25,800	54,000

The following are the conditions of sale :—

1.—The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2.—The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by clause 13 of these conditions of sale. The bids must advance by Rs. 5 at a time.

3.—The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M.; but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or, if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4.—Each lot shall contain five chests.

5.—A Promissory Note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal receipts or by substitution of other public securities of the Government of India, on or before 3-30 P.M. in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts or deposit of other public securities as aforesaid shall have been delivered

DEPOSIT.
When the amount bid is less than Rs. 1,200 per chest, Rs. 300 per chest.
On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.
On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on, Rs. 100 being added to the deposit for every bid additional, to the extent of Rs. 400.

in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

6.—The said Promissory Notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M. if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand tender at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained; and the first *bonâ fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the Office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium.

17.—The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazeepore Factory for the

Year 1884-85, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazeepore Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18.—Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the Office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Board of Revenue, L.P.,

C. A. SAMUELLS, *Offg. Secretary.*

FORT WILLIAM, *the 30th November* 1885.

No. 1136B.

Strike out Rule II of this foot-note, and substitute the following—

"Officers of Royal Engineers who have attained or hereafter may attain the rank of General Officers must vacate their appointments in the Public Works Department. But if an officer at the time of so vacating office is a Chief Engineer, 1st class, or holds a post carrying that rank, he may be continued in the position which he had been required to vacate for the remainder of the term of five years referred to in Rule III, unless in the mean time he must vacate office by some other regulation. Officers of Royal Engineers holding rank below that of Chief Engineer, 1st class, vacating office under this rule are not eligible for reappointment to the Public Works Department."

Calcutta Volunteer Rifle Corps.

Sergeant Charles James Sharpe and Volunteer Alexander Wilson to be Lieutenants in the Mounted Company.

O. R. NEWMARCH, *Colonel,*
Offg. Secy. to the Govt. of India.

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Viceroy's Camp, Agra, the 26th November 1885.

His Excellency the Viceroy and Governor-General will hold a Levée at Government House, Calcutta, on Thursday, the 17th December 1885, at 9-30 P.M.

All Civil and Military Officers and the Native Officers of the Native Regiments of the Garrison are invited to attend.

Gentlemen purposing to attend the Levée are requested to send their cards to the Aide-de-Camp in waiting not later than Monday, the 14th December 1885, after which "no cards" will be received, and to bring with them to the Levée two cards with their names legibly written on them, one to be given on entering Government House, and the other to the Aide-de-Camp in waiting at the time of presentation.

Gentlemen who have not already been presented at the Court of St. James or at Government House will be good enough to add the names of gentlemen who will present them.

Gentlemen wearing uniform will appear in full dress.

Gentlemen not wearing uniform will appear in evening dress.

The carriages of gentlemen (except such as have the private entrée) attending the Levée will enter by the north-east gate, set down under the Grand Staircase, and pass out by the north-west gate.

Their Excellencies the Viceroy and the Countess of Dufferin will hold a Drawing-room at Government House, Calcutta, on Monday, the 21st December 1885, at 9-30 P.M.

Ladies purposing to attend the Drawing-room are requested to send their cards and addresses to the Aide-de-Camp in waiting not later than Thursday, the 17th December 1885, after which "no cards" will be received, and to bring with them to the Drawing-room two cards with their names legibly written on them, one to be given on entering Government House, and other to the Aide-de-Camp in waiting at the time of presentation.

Ladies who have not already been presented at the Court of St. James or at Government House are requested to send their cards with their addresses and the name of the lady by whom they are to be presented to the Aide-de-Camp in waiting as soon aspossible.

Ladies who present others should themselves attend the Drawing-room.

The carriages of those who have the private entree will enter by the south-east gate and set down at the south entrance of Government House.

All other carriages will enter by the north-east gate, set down under the Grand Stairs, and pass out by the north-west gate.

By Command,

W. BERESFORD, *Major,*
Military Secretary to the Viceroy.

A. L. HOME, Conservator of Forests, Bengal.
Darjeeling, the 10th November 1885.

Notice.

Oudh Forest Department

BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of sál beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet length, at Rs. 2-10 per cubic foot.
22 " " 2-12 "
23 " " 2-14 "
24 " " 3 "

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at " 2-4 "
Under 7 feet at " 2 "

The above prices are for ordinary building purposes.

For *Planking, Sleepers*, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion

Second and Third Class Timber will be sold and price fixed by agreement

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N. W. P. and Oudh, Oudh Circle.

KANHYA LAL,
Sub-Assistant Conservator of Forests,
Bahramghat Division.

Bahramghat, the 1st April 1883.

Crystalline Cinchona Febrifuge.

A NEW and improved preparation made at the Government Factory from Red Cinchona Bark. This is a more perfect substitute for Quinine than the ordinary uncrystallized Febrifuge. It can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds and upwards* at a time, from the Superintendent, Royal Botanic Garden, Seebpore, near Calcutta, for *cash only*, at the following rates:—Per four ounce tin *Rs.* 6 *ans.* 8, per eight ounce tin *Rs.* 12 *ans.* 8, per pound tin *Rs.* 24. The general public can be supplied by the Superintendent, Royal Botanic Garden, *for cash only*, at the undernoted rates:—Per four ounce tin *Rs.* 8 *ans.* 8, per eight ounce tin *Rs.* 16 *ans.* 8, per pound tin *Rs.* 32. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage four annas per 4 *oz.* tin, eight annas per 8 *oz.* tin, and twelve annas per pound tin, in addition to the foregoing rates.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin, *Rs.* 4 *ans.* 8; per eight ounce tin, *Rs.* 8 *ans.* 8; per pound tin, *Rs.* 16 *ans.* 8. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the undernoted rates:—per four ounce tin, *Rs.* 5 *ans.* 8; per eight ounce tin, *Rs.* 10 *ans.* 8; per pound tin, *Rs.* 20 This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

Notice.

THE Public are hereby informed that the well-known Kartick Barani Mela, which is held every year on the banks of the Dhaleshwari, near Munshigunge, in the district of Dacca, will commence on the 21st November 1885 A.D., corresponding to the 7th Aughrahyan 1292 B.S., and continue up to the 3rd January 1886. Tradesmen, dealers, and others may buy and sell there during these six weeks.

F. WYER, Collector.

Wanted

TWO or three qualified men for the posts of Forester in the Darjeeling district. They should have passed the Calcutta University Entrance Examination, and, after serving for a year, will be required to pass through a course of instruction at the Dehra Dún Forest School. The pay to commence with is Rs. 25 and Rs. 30 only, but promotion follows on obtaining the Forest Ranger's certificate at the school Application should be made to the Deputy Conservator of Forests, Darjeeling Division, Darjeeling.

A. L. HOME, Conservator of Forests, Bengal.

Darjeeling, the 16th November 1885.

Wanted

FOR Purneah District Engineer's office, Purneah, a Draftsman and Surveyor. Salary Rs 60; no allowance. None need apply but natives of sound constitution, of active and sober habits, with at least three years' service. Certificates must testify to being a neat and accurate draftsman, understanding drawings, and an accurate leveller and estimator.

Copies of certificates, which will not be returned, will be received by the District Engineer up to 5th December 1885. (717—1)

Notice.

IT is hereby notified, under section 5 of the Indian Treasure Trove Act (VI of 1878), that, in the month of October 1885, the treasure described below, and valued at Rs. 150-2, was found under ground, while the foundations of a house for the Head Assistant Collector at Coondapur, South Canara district, were being dug out.

2. All persons claiming the said treasure, or part thereof, are hereby required to appear personally or by agent before the Collector of South Canara at his office on the 14th of May 1886, in order to the matter being enquired into and determined according to law.
